BENGAL FAMINE.

TWENTIETH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL, FROM THE 12TH TO THE 25TH JUNE 1874.

THE Lieutenant-Governor, Sir Richard Temple, has written from Goalundo on the 23rd June the following remarks for inclusion in the present narrative:—

“During the past fortnight I have passed down the Ganges and part of the Brahmapootra and its branches, from Monghyr to Dacca, visiting parts of the districts on either bank of the river, and conferring with the local authorities and with the principal natives. The remarks which I shall now offer apply not at all to Behar, but to the generally distressed, or partly distressed districts of North-Eastern Bengal, namely, Cooch Behar, Dinagpore, Rungpore, Bogra, Malda, Rajshahye, and Pubna.”

“In the spring, frequent showers enabled the husbandmen in many places (though not everywhere) to sow the early (or *boro*) rice to a larger extent than usual, advantage being taken, with skill and promptitude, of every patch of ground that could be turned to this purpose; such as beds of those tanks and of those rivers which had been deprived of their water by the drought. Occasional rain-storms brought forward to maturity the produce of these little green fields in the midst of the arid, drought-stricken country just at the time of sorest need, when the circumstances of May caused stocks to fall, prices to rise, and employment to cease. The incoming of this early harvest, though not enough to alter the general situation, did yet suffice to afford relief and mitigation.”

“Then the rains, commencing seasonably and propitiously at the end of May, have continued through June abundantly, but not violently; filling the

rivers, soaking the soil in the uplands, where the autumn rice crop (*aous*) is springing up, and flooding the hollows, where the winter crop (*amun*) has just been sown, and affording the required moisture for the lowlands, where the sowings have yet to be made. The sowings for the autumn rice are believed to have been extensive beyond the average: the crop is now so strong and high above the ground as to be considered almost secure. The sowings for the winter rice are understood to have already been considerable, and to be progressing well. For the most part there has been no want of seed. In some places some such want has manifested, or may yet manifest itself. It is remedied partially, if not completely, by the arrangements which the local officers are able to make."

"Thus far, then, the agricultural prospect is favorable."

"The rivers are rising, the summer navigation of these natural highways is opening fast: these are the arteries and the veins of this system of inland communication. It is therefore possible for trade to throw in supplies from distant districts; but this is not being done as yet to any considerable extent. The southerly and the easterly breezes, which are the trade-winds in this section of the great river at this season, have been blowing propitiously for many days past. Some fleets of the Dacca boats—always distinguishable by their tall masts and white swelling sails—are to be seen, laden sometimes, but not always, with rice from Naraingunge (the entrepot of South-Eastern Bengal), and bound for the distressed districts. But the quantities thus brought are as yet small compared to the needs of the North-Eastern markets. Some supplies may reach the river-side districts, as Maldah, Rajshahye, Pubna, Bogra, and parts of Rungpore; but no succour worth reckoning has as yet come to Dinagepore, which has the broadest area of distress in all North-Eastern Bengal, and few persons seem now to believe in its coming. The Dinagepore marts usually supply all their own neighbourhood, and export largely to Rajshahye and Pubna. This year they cannot meet their home demands, much less supply any one else. The inland river-side "bundars" or quays for the collection of rice to be sent away by boats, so numerous in the interior of this district, and usually so full and busy, have this year been empty and deserted. Again, the east tract of Dinagepore, having good crops, exported rice to the neighbouring tract of Rungpore, which was in distress, to such an extent that it became itself distressed in its turn."

"Then the markets of Rajshahye and Pubna, even in ordinary years, expect to receive a part of the Dinagepore supplies. This year they depended still more on such importation, as the supplies from the local harvests, though in good part saved, were yet short and scanty, but have received, and will receive, next to nothing. In the Rajshahye district prices have gone on rising until on a very recent date they were as dear as in the most distressed districts. In the south part of the Pubna district the upward tendency of prices has been stopped, and indeed reversed, to the relief of the people. This fortunate result arose, however, not so much from importation as from the belief in the safety of the *aous* crop, and the consequent production of old stocks. In the north part of the Pubna district, around Serajgunge (the well known place, where the collection of country boats forms a sort of floating city), the market had for months been trusting to supplies from the Mymensingh district, across the Brahmapootra. These suddenly ceasing, together with failure of supplies from the Dinagepore direction and gradual depletion of local stocks, caused a panic, which was checked only by importation of Government grain. Scarcity, however, still prevails in most of the northern parts of Rajshahye and the north-eastern part of Pubna."

"In the Cooch Behar division (including the Julpigoree district, the Cooch Behar State, and part of the Bhootan Dooars), there was but slight failure of crop (chiefly in a locality to the south of Julpigoree itself), but grain was exported briskly to parts of Purneah and of Dinagepore. Then in the Julpigoree district there arose panic in the grain-markets;—how far from depletion of stocks, how far from combination among dealers to hold their stocks, it is hard to say, but probably from both causes. The trouble, which at one time threatened to become serious, was checked by relief measures and by the importation of Government grain."

"The Rungpore and Bogra districts obtained much of their food-supply for many weeks from Mymensingh, across the Brahmapootra. In the beginning the Mymensingh crop was expected partly to fail. Had it not been saved, there

is no doubt that the troubles in Rungpore and Bogra would have begun much earlier, and proved worse than they actually have. The west part of Rungpore also benefited by the trouble which has been just mentioned as befalling the east part of Dinagepore. The frequent occurrence of panics in the grain-marts of Rungpore, and the equally frequent demand for Government aid, prove the precarious position in which the trade has been standing for several months past."

"In Mymensingh, again, the north-west corner brought temporary trouble on itself from helping others. In that particular quarter the markets became empty. There was money enough in the hands of the people, but no food-grain for it to purchase. Hence arose the strange circumstance of Government grain being landed on that margin of the river highway whence surplus grain had recently been exported to districts within sight across the water."

"Further down the river, in the Dacca district, though the crops were fairly good, there were very high prices of rice (8 to 10 seers for the rupee) for some time and many complaints of distress among the people, owing doubtless to the grain going to meet demands elsewhere. Within the last few days the price has become cheaper, 12 to 13 seers for the rupee. It is worthy of note that the Dacca district is held by the local authorities to be secure from general distress caused by drought, because large areas of rice-land, which ordinarily suffer from floods, yield fully in years of scanty rainfall; yet even in this district it has for some weeks past been necessary to distribute charitable relief at the chief centres of population."

"These circumstances may be not devoid of interest, as showing the interdependence of these several districts, in consequence of which any extensive trouble befalling any considerable part ramifies ultimately over the whole, and causes divers complications and mischances to occur suddenly, and to tax our vigilance to the utmost."

"Under all the circumstances, as above set forth, of agriculture and of trade in the particular districts above adverted to, there arise the questions—Will there be private supplies of grain forthcoming to sustain the people till the end of August? and if not, are there enough Government supplies for this purpose? and whether the *aus* crop, if successfully gathered, will sustain the people from September till December, when the main rice crop is to be expected? Many, perhaps most, experienced persons think that there is not now time enough remaining for trade to do the needful; that there are certainly not stocks in any quantity; and that if there be any part unexhausted, there is no certainty that the dealers will bring it forward upon merely the assured prospect of the *aus*. It is rather thought that they will perhaps wait until the position of the winter crop can be better foreseen. Again, some of the best authorities apprehend that the *aus* crop may not wholly suffice (in the absence of all other stocks) for the sustenance of the people from September until the incoming of the *aman* crop in December; and that distress, after subsiding in September and October, might spring up again from the end of October till December. In vain, it is argued, will the winter harvest be displaying all its promise of abundance if there be actually not grain enough on the spot for the teeming population. Some assistance may perhaps be looked for from the *aus* crop of other places. It is indeed always to be remembered that generally this crop is kept for intermediate subsistence until the winter crop comes in, and is seldom exported; and this rule will probably obtain to the full this year, when rice is so scarce everywhere. Still its promise seems to be so good in the eastern tract, in the country of the Brahmapootra and the Megna, that some considerable part may be available for exportation during August and September, while the rivers are still full."

"The original allotments of rice for the four districts of Dinagepore, Rungpore, Bogra, and Maldah, are stated below:—

| | Mds. |
|----------------------|-----------------|
| Dinagepore | 12,00,000 |
| Rungpore | 3,00,000 |
| Bogra | 2,40,000 |
| Maldah | 1,50,000 |
| Rajshahye | 1,00,000 |
| Railway works | 1,00,000 |
| Total | 20,90,000 |
| | = 76,849 tons." |

"Out of this allotment the expenditure has been—

| | | Actual expenditure up to some day from the 2nd to 10th June. Mds. | Estimated up to the end of June. Mds. |
|--------------------------------|----|--|---|
| Dinagapore | .. | 1,88,235 | 3,00,000 |
| Maldah | .. | 24,000 | 41,000 |
| Bogra | .. | 30,000 | 45,000 |
| Rungpore | .. | 94,359 | 1,32,000 |
| Rajshahye and Railway works .. | .. | 8,000 | 20,000 |
| Total | .. | 3,44,594 | 5,38,000 = 19,779 tons." |

"Under the circumstances, it has been decided to transfer 60,000 maunds, equal to 2,205 tons, from Dinagapore to the neighbouring district of Purneah, where the distress had increased faster than was expected, and which had to send part of its grain on to Cooch Behar. Also 50,000 maunds, equal to 1,838 tons, have been transferred from Maldah to Sonthalia and Moorshedabad. Perhaps, too, some portion of the Bogra allotment may be spared. But with these exceptions, the belief of the responsible officers on the spot is that the Government grain available in these districts will be absolutely needed."

"Inasmuch as the estimated consumption shown above does not allow for loss and wastage, there must be some abatement made from the quantity estimated to be remaining after the 1st of August. With allowance made for this, however, there will still be, as we hope, considerable stores for the needs of the distressed tracts. And if any misfortune not now foreseen should occur, these stores would suffice to meet even a severe accession of distress until fresh supplies could be brought in by river."

"The numbers of boats of various build and capacity, according to the peculiarities of the navigation of each stream or river, are known to be ample for any operation which we might have to undertake. These craft are now to be seen everywhere, either plying on the channels which daily become broader and deeper, or moored in crowds at every creek that is sheltered from the gales that blow over the expansive rivers."

"As regards the condition of the people: I believe that there has been occasionally some sharp distress in Rungpore; perhaps also some (though in a less degree) in Bogra, which happened notwithstanding our preventive efforts. But in Dinagapore I believe that dangerous distress has never been permitted to rear its head. Large sections of the people must doubtless have been straitened or gradually drawn towards the verge of distress; but help (as I believe) nearly always came in time, even before emaciation could begin. But none who witnessed the many broad patches of country where the rice crop had perished; who reflected on the consequences of such a failure to a dense population almost exclusively agricultural with almost nothing save this one product to depend upon; and who noted the impossibility of succour being afforded by trade at that time of year, when the river navigation was closed to this land-locked district, and when prices in the south were too high to yield a profit to the importer, can reasonably doubt regarding the disease and death which must have ensued had the Government refrained from acting. Maldah was from the beginning never brought near to danger. In juxtaposition with its partly distressed tracts were tracts fertilised by the Ganges and yielding a rich crop of wheat and barley. Its situation offered the utmost facilities for importation from Central and Southern Bengal, of which advantage the trade availed itself. In the hottest season also the mango-fruit afforded much sustenance."

"The wages given to relief laborers in these districts (2 to 3 annas a day) are higher than those allowed in Behar, only because the ordinary rate of wages is higher in these eastern districts. Generally task-work has been successfully exacted and demoralisation prevented, with some notable exceptions however. The rates for piece-work (4 annas for 100 cubic feet of earth-work) have been lower than those which had to be allowed in Tirhoot. Here also the laborers are believed to have saved something from their earnings at piece-work by working with commendable industry. They would in the early hours of the day do their out-work in their fields, from which they could obtain no present gain; then come on to the relief works before noon, and work to the very end of a summer's eve in order to earn a good wage. The works

consisted more of roads and less of tanks than in Behar. The roads are represented to be so far good as to improve the internal communication of the district; the bridging must, however, remain for future years. As the rains fall, the relief laborers will, we hope, go off to their fields or to private employment; and instructions have been reiterated to the local officers to expedite this change. This will be facilitated by the advances of Government grain to the cultivators which are being made; still there may be many who cannot sustain themselves, and thus the lists of recipients of charitable relief may swell."

"The sale of Government grain to the public, as might be expected under the circumstances described in this narrative, has recently been, and probably will continue to be, very considerable. In Dinagepore and Rungpore and Bogra the measure has not been extended beyond the limits mentioned in my narrative of the 14th May. In Maldah it has been adopted, but very slightly. In parts of Pubna it was adopted to stay the panic. In parts of Rajshahye I have recently ordered it not only at the request of the people, but on the recommendation of the grain-dealers themselves. In these districts one may travel from town to town and ask the grain-dealers why, with such high prices (9 to 11 seers the rupee) at home, they do not import from the south. They will say that the principal mart whence they could import is Naraingunge, and that the prices there (12 seers the rupee) preclude profit. Boats worked by the owners may bring some consignments obtained direct from the producers. Some traders may make ventures individually, but native merchants will not import largely to the north until prices at Naraingunge shall become as cheap as 15 or 16 seers the rupee. Now Naraingunge is the principal mart in East Bengal for rice among several other things. Here is collected much of the surplus rice from the east bank of the Brahmapootra;*

* Called locally the Puddi.

from the basin of the Megna (Sylhet, Dacca, Tipperah) and from the deltaic district of Backergunge. Proceeding to Naraingunge, I find that rice has become cheaper, but is quoted as dear as 12 to 13 seers to the rupee. The native merchants think that the price may become slightly cheaper, but they would not admit the hope of its becoming as cheap as 16 seers to the rupee until August, and they evidently are not at all confident that, however good the September crop may prove, rice can be much cheaper until the next winter crop is gathered. The scarcity of rice, which has been felt for so many months throughout most parts of Bengal, must cause a demand everywhere, with a corresponding effect upon prices at Naraingunge as well as at other southern marts; and this must militate against grain being sent northwards."

"Looking to all this, I cannot doubt the expediency of selling Government grain in the eastern districts north of the Ganges whenever the measure is asked for, reiterating always the instruction that such sales are to be suspended if trade should bring in supplies."

1. *Weather and Rainfall.*—The reports continue to be very satisfactory. Rain continues to fall seasonably in almost all districts; only in Hooghly, Howrah, and part of Jessore, is more rain said to be wanted.

2. *State of Crops.*—The prospects of the coming crops could hardly be better. In almost every district, with very few exceptions, a more than average crop is expected, and in every district there has now been ample rain for sowings.

3. *Prices.*—Prices still remain fairly steady, and the tendency to fall, remarked on in last narrative, still continues in Behar and the more distressed districts of north-eastern Bengal. In the western districts there has been a fall in Burdwan and Hooghly, and a rise in Beerbhoom, Midnapore, and Howrah. In the central districts there has been a rise in Jessore and Maldah, and a slightly upward tendency is shown in Moorshedabad. There has been a fall in Rungpore, Bogra, and Pubna. Throughout the eastern districts prices are generally somewhat higher. They have risen considerably in Dacca and Fureedpore, and slightly in Sylhet and Chittagong. The other districts show no change except Noakholla, where prices have fallen to the level at which they stood the fortnight before last. In Behar rice and barley have fallen in Tirhoot, and

barley (an important article of food in Behar) has fallen in Patna, Shahabad, and Chumparun; only in Monghyr have prices risen. In Chota Nagpore there is no change to record except in Hazareebagh, where prices are somewhat lower. In Pooree there has been a considerable rise, from 27·9 to 28·10 for common rice.

4. *Private trade to Behar.*—The usual note on food-grains will be found in appendix A. Though the total upward traffic shows a decrease from the figures given last fortnight, yet the decrease is solely in the Government grain sent up, and there is really a slight increase of 56 tons in the upward private trade, and a considerable increase of 2,779 tons in the downward traffic.

5. *North Tirhoot.*—The reports continue satisfactory. Sowing is being carried on in every part of the district, and seed-grain, about which there were some fears, has turned out to be generally plentiful; so much so, that it was selling in Mudhoobunnee at Rs. 2 the maund. The general health of the population is exceedingly good, and their condition very much improved. The Seetamurhee and Poopree sub-divisions have been inspected during the fortnight by Drs. MacDonell and Coates. The former found in Poopree from 90 to 82 per cent. of the people on relief works up to the normal condition, which is exceedingly satisfactory, as the standard adopted by Dr. MacDonell, as remarked in the last narrative, is a high one. Dr. Coates found the people in Seetamurhee generally in very good condition, even in the most remote villages.

6. *Rice* (except Government rice) continues very scarce in the bazars, but importations of the coarser grains are reported to be increasing. Advances are now being given largely to the ryots for the support of themselves and their dependent laborers during the coming cultivating season.

7. *South Tirhoot.*—The prospects of the coming crop are excellent, and sowings are going on extensively; but though importations by private persons have increased, yet stocks still continue to be abnormally low, and sales of Government rice are necessarily continued.

8. *Chumparun.*—Indigo prospects are said to have improved owing to the recent rain, and there is consequently an increased demand for laborers for weeding the fields. The prospects of the other crops are excellent, and the condition of the people improved. In Ramnugger Dr. Coates, in his inspection tour, found a large number of the people anæmic and out of condition; but as the place is noted for its unhealthiness, it is probable that a similar inspection in a year of the greatest plenty would produce similar results. More seed-grain has been forthcoming than was at one time thought likely to exist in the district.

9. *Sarun.*—In this district the cheena crop has turned out particularly well, especially in Bussantpore and Mushrukh, the worst tracts in the district. Indigo prospects are greatly improved, and the bhadoi crop promises to be remarkably good. Some laborers have been at last induced to engage to go to the Soane Canal, and it is hoped that others will follow.

10. *South Behar.*—The prospects of these three districts continue to be very good; only the rainfall was too early for the superstitions of the people, as many refrained from sowing when the first rain fell owing to the idea that the influence of the Mirgeshra Nakshattar,* through which the moon, according to Hindoo astronomers, was then passing, was unpropitious. Some, however, disregarded the omen and sowed, though at least a large minority hesitated. Fortunately for the latter the rain continued, and they did not lose the opportunity of getting their crop into the ground. Private trade in Patna continues to be very active; the imports for the fortnight being 3,88,512 maunds, against 3,62,246 imported in that preceding it.

11. *Bhagulpore Division.*—The condition of the people continues good, and there is but little distress anywhere except in Bahadoorgunge in Purneah, and parts of the Sonthal Pergunnahs. The prospects of the coming crops are excellent. The Collector of Bhagulpore says that "the bhadoi is simply magnificent;" and the Collector of Monghyr goes so far as to state that all fear of distress will be over at the end of July, as soon as the jenera (millet) crop ripens. If the rains continue the harvest throughout the division will probably be above the average.

12. *Rajshahye Division.*—In this division there has been a very great and general improvement, except in Rajshahye and parts of Pubna, where somewhat severe distress has been felt. The distress in the former district arose chiefly

* This is one of the 27 mansions of the moon into which the Hindoo lunar year is divided.

from a deficient supply of food-grains owing to the falling off in importations, and sanction has been given for the sales of Government rice in those places where the deficiency was serious. The prospects for the coming season could not be better.

13. *Cooch Behar and Julpigoree*.—The report of the Deputy Commissioner shows that no further distress is apprehended in this district, and that with some few exceptions the people are now well off and looking forward to reaping a more than average crop.

14. *Burdwan Division*.—There is little or no change to report in the condition of the people, and the prospects are good, though not so unusually good as in other parts of the country. Cholera is decreasing.

15. *Nuddea*.—There is no change in this district.

16. *Chota Nagpore*.—The reports still continue to show an improvement in the state of the people, and distress may now be said to be almost entirely confined to parts of Manbhoom and Hazareebagh; the promise of the crops is so good that hopes are entertained of an early return to a normal state of prosperity.

17. *Transport of Grain*.—With the exception of small quantities of grain going to the districts of the Burdwan division and of the extra lakh of maunds ordered to be sent for South Tirhoot, the transport of Government grain by the railway has almost entirely ceased. The State Railway to Durbhunga having been only laid down as a fair-weather line, cannot continue to carry grain during the rains; and hence the three lakhs still remaining to complete the Mudhoobunnee allotment will have to go by water. Arrangements are being made for the purpose. Mr. Metcalfe reports from Durbhunga that he anticipates no difficulty in making adequate transport arrangements for the movement of grain from the larger to the subsidiary golahs during the rains, as all the golahs are situated on the banks of rivers or connected with river-side stations by good roads, involving no great length of land carriage.

18. *Relief Works*.—The number of laborers on relief works according to the latest returns available, as compared with the numbers given in the last fortnightly narrative, are as follows:—

| | | | Last fortnight. | This fortnight. |
|---------------------------|-----|-----|-----------------|-----------------|
| Patna division | ... | ... | 1,231,496 | 1,368,087 |
| Gunduk embankment | ... | ... | 45,247 | 27,574 |
| Soane Canal | ... | ... | 34,850 | 31,945 |
| Bhagulpore division | ... | ... | 109,617 | 88,448 |
| Rajshahye division | ... | ... | 194,131 | 155,466 |
| Northern Bengal Railway | ... | ... | 22,129 | 22,622 |
| Burdwan and Chota Nagpore | ... | ... | 96,950 | 72,849 |
| Cooch Behar | ... | ... | 3,548 | 3,741 |
| Total | ... | ... | 1,737,768 | 1,770,732 |

These returns show an increase on those given in previous returns of 32,964; but an analysis of the numbers employed in each district shows that the increase has been chiefly in North Tirhoot, Sarun, and Chumparun districts. The Collector of Sarun remarks that we must not expect the numbers on relief works to fall off largely immediately after a fall of rain sufficient for sowing, as "beyond the ploughing and sowing which are done by the ryots themselves and their families, there can be no general demand for field-labor till the transplanting of the dhan and the wedding operations are taken in hand." In this district it is proposed to close relief works from the 1st July, when the demand for agricultural labor becomes brisk, and to reduce the rate of wages where works are maintained to the lowest subsistence allowance. In Chumparun the numbers have not increased largely anywhere, except in the Gobindgunge sub-division, where they have more than doubled; but in the Ramnuggur sub-division, where the numbers have been hitherto very large and the distress greatest, there has been a very large decrease from 31,573 to 11,919.

In South Tirhoot there has been a decrease, and also in Shahabad and on the Gunduk embankment and Soane works; but in Patna and Gya there has been a slight increase in the numbers of laborers, though in the former district the numbers had fallen at the close of the fortnight.

In the Bhagulpore division there has been a decrease in the numbers on the whole, though the Bhagulpore district and the Sonthal Pergunnahs show a slight increase. In the Rajshahye division all the districts show a decrease except Moorshedabad and Rajshahye. In the former district the increase is small, and in the latter, though apparently large, it is really insignificant, as the persons engaged in light labor, who were last fortnight entered as receiving charitable relief, have now been entered as laborers according to the practice followed in other districts.

In the Burdwan division the returns are not complete, but there has been a slight decrease in Hooghly and a slight increase in Bankoora and Beerbhoom; while in the Burdwan district the increase is more considerable. In Chota Nagpore there has been a slight increase in Manbhoom, and no satisfactory returns have been received from Palamow and Hazareebagh; but the figures given probably rather overstate the numbers on relief works. The Commissioner remarks that the numbers are at least half what they were in the previous fortnight, and the last crop-report says that the relief works in Palamow are almost deserted.

19. It is frequently remarked in the district narratives that the laborers work part of the day in their fields and part on the relief works, and consequently the numbers of men on these works must not be considered as so many men taken from the ordinary number of agricultural laborers. The universal report as to the excellence of the crops and the breadth of land sown prove that nowhere have relief works prevented the carrying on of the ordinary agricultural operations of the season.

20. The following return shows the numbers employed in each district, with details, as far as they are available, of those employed on piece-work and daily wages:—

| Divisions. | Names of districts. | Laborers under Public Works Department. | Laborers under Circle officers. | Total Laborers. | Task or piece work. | Daily wages. |
|---------------|------------------------------|---|---------------------------------|-----------------|---|--------------------|
| PATNA | Tirhoot (North) ... | 140,487 | 639,021 | 784,508 | 675,682 | 112,826 |
| | Tirhoot (South) ... | ... | 180,559 | 180,559 | 26,604 | 153,955 |
| | Chumparun ... | 139,197 | ... | 139,197 | ... | No details. |
| | Sarun ... | 229,885 | ... | 229,885 | ... | No details. |
| | Patna ... | 17,661 | ... | 17,661 | 17,661 | ... |
| | Gya ... | ... | 3,534 | 3,534 | 2,280 | 1,245 |
| | Shahabad ... | 7,746 | 997 | 8,743 | 8,186 | 557 |
| | Total ... | 643,976 | 824,111 | 1,368,087 | 730,422 | 268,583 |
| | Gunduk Embankment ... | 27,574 | ... | 27,574 | 27,574 | 27,574 |
| | Soane Canal ... | 31,945 | ... | 31,945 | 31,945 | ... |
| BHAGULPORE | Total ... | 59,519 | ... | 59,519 | 59,519 | ... |
| | Total for Patna Division ... | 603,495 | 824,111 | 1,427,606 | 789,941 | 268,583 |
| | Monshyr ... | 2,907 | ... | 2,907 | Task-work general, but details imperfect. | ... |

* These figures are doubtful. Enquiry is being made.

21. *Gunduk Embankment*.—The embankment work has been nearly completed, and it has been raised above high flood-level throughout the entire length, so that there is little but dressing to be done. Two miles of the High Level Canal have been completed, and work has been started from the 1st to the 8th, the 24th to 29th, and 46th to 48th miles; seven miles of temporary road have been made, and the Sarun Canal begun.

22. *Soane Canal*.—Work is progressing favorably, but the number of laborers has decreased owing to the completion of the anicut works in Patna and the rain in Arrah. About 29 lakhs of cubic feet of earthwork have been excavated during the fortnight in the main western canal in the Karumnassa division.

23. *Northern Bengal Railway*.—The total amount of earthwork up to date is 57,058,000 cubic feet, equal to 109 miles of four feet bank, of which 9,284,300 have been thrown up during the fortnight. This is the largest return yet sent in, and besides this 89 miles of feeder roads have been completed.

24. The following statement shows the numbers in receipt of charitable relief according to the latest returns :—

| DIVISIONS. | Names of Districts. | Number of centres. | NUMBER ON CHARITABLE RELIEF. | |
|---------------|---------------------|--------------------|------------------------------|-----------------|
| | | | This fortnight. | Last fortnight. |
| PATNA | Tirhoot North | 572 | 102,291 | 157,477 |
| | Tirhoot South | 57 | 13,647 | 12,928 |
| | Chumparun | 50 | 15,664 | 11,997 |
| | Sarun | 18 | 7,122 | 13,384 |
| | Patna | None. | None. | None. |
| | Gya | 12 | 1,070 | 420 |
| | Shahabad | 15 | 848 | 410 |
| | Total | 722 | 200,643 | 195,594 |
| BHAGULPORE | Monghyr | 13 | 1,090 | 2,251 |
| | Bhagulpore | 15 | 39,740 | 12,783 |
| | Purneah | 91 | 2,944 | 5,045 |
| | Sonthal P. gunnahs | | | 100 |
| | Total | 119 | 43,774 | 20,179 |
| RAJSHAHYE | Maldah | 32 | 9,502 | 8,977 |
| | Dinapore | 404 | 22,180 | 19,112 |
| | Rungpore | 33 | 32,050 | 21,580 |
| | Bogra | 30 | 13,705 | 9,031 |
| | Moorsshedabad | 24 | 5,916 | 2,217 |
| | Rajshahye | 19 | 7,060 | 11,142 |
| | Pubna | | 10,908 | |
| | Total | 602 | 102,268 | 66,059 |
| CHOTA NAGPORE | Manbhoom | | 10,490 | 8,550 |
| BURDWAN | Hooghly | | 4,013 | 9,884 |
| | Beerbhoom | | 10,913 | 9,803 |
| | Bankoora | | 11,416 | 9,047 |
| | Burdwan | | 15,382 | 14,551 |
| | Midnapore | | Not received. | 1,314 |
| | Total | | 41,784 | 38,599 |
| | Grand Total | 1,443 | 401,982 | 329,000 |

These returns show a considerable increase over those of the last fortnight in almost every district except Sarun, Monghyr, Purneah, and Rajshahye. In the last district the decrease is more nominal than real, as those doing light labor on roads have this fortnight been entered among the laborers on relief works, instead of among the recipients of charitable relief, as was the case in the former return. The great increase in Bhagulpore seems, from the Collector's report, to have been caused by a too indiscriminate grant of village relief tickets; but the lists are being carefully scrutinised, and the numbers will probably be considerably reduced. In Purneah the figures are not free from doubt, and their accuracy will be inquired into. Enquiry is being made as to the large numbers returned for Pubna.

25. We can hardly flatter ourselves that we have yet reached the greatest numbers of persons to be relieved under this heading; for doubtless as relief works become deserted, owing to the demand for field-labor, there will be considerable numbers of old men and women and young children who now earn a scanty subsistence from doing nominal work on relief works, who will be driven to accept charity owing to their incapacity for gaining a living by labor paid at its market value, and these persons must continue to draw sustenance from the charitable funds till the incoming harvest enables their relatives to give them the same assistance as heretofore.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A. TO THE 20TH SPECIAL NARRATIVE.

1. THE returns received for the first half of the month of June give the exports from the Bengal Presidency at 4,780 tons, and the imports at 11,614 tons. Of the latter, 2,020 tons were on private, and 9,594 tons on Government account. The bulk of the private imports was from Orissa.

The total figures to the middle of June are:—

| | | | | | | Tons. |
|---------|-----|-----|-----|-----|-----|---------|
| Exports | ... | ... | ... | ... | ... | 230,510 |
| Imports | ... | ... | ... | ... | ... | 415,004 |

2. The following figures show (in tons) the quantity of food-grains "sent up from stations *below* Rajmehal and Jamoore, and down from stations *above* Mirzapore, which was delivered at stations between Rajmehal and Buxar (inclusive)" between the 31st May and 13th June.

| | | | This fortnight. | Last fortnight. | Increase. | Decrease. |
|------|-----|-----|-----------------|-----------------|-----------|-----------|
| Up | .. | ... | 6,764 | 16,546 | | 9,782 |
| Down | ... | ... | 20,190 | 18,640 | 1,550 | |

All the increase is in private, and all the decrease in Government grain.

The totals to date of the returns on which the above figures are based, and which, it must be remembered, are for Behar only, are given below; but the "up" figures are only approximately correct. Appendix B., however, shows in detail the destination of all the Government grain that has been sent up from Howrah.

| | | Govt. grain. | Private grain. | Total. |
|--------|-----|--------------|----------------|---------|
| Up | ... | 269,076 | 146,659 | 415,735 |
| Down | ... | 38,635 | 170,249 | 208,884 |
| Totals | ... | 307,711 | 316,908 | 624,619 |

3. The importations of food-grains to Calcutta by the Eastern Canals, from the 5th to the 19th June, were 3,394 tons, making 192,026 tons in all since 1st October.

4. The private traffic registered on the Ganges is as shown below:—

| Stations. | Date. | Direction. | Tons. | Up to date from 1st November 1873. Tons. |
|----------------|-----------------------|-------------------|-------|---|
| Sahebgunge ... | 7th to 20th June | ... Up the Ganges | 898 | 35,071 |
| Ditto ... | Ditto ditto | ... Down " | 304 | 12,287 |
| Goalundo ... | 31st May to 13th June | ... Up " | 1,214 | 24,671 |
| Kooshtea ... | Ditto ditto | ... Down " | 147 | 12,599 |

CALCUTTA, the 25th June 1874.

G. TOYNBEE, C.S., *on Special Duty.*

APPENDIX B. TO THE 20TH SPECIAL NARRATIVE.

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

No. AF, dated Bankipore, the 14th June 1874.

From—A. C. MANGLES, Esq., C.S., Collector of Patna,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to send the following narrative for the fortnight ending Saturday, the 13th instant.

A.—STATE OF THE COUNTRY.

2. The several bazars in this district continue to be well supplied with grains of all sorts, and no deficiency is reported from anywhere. The quantities imported by private traders is still very large, and from all that I can hear, there is no likelihood of its falling off for the present. 388,512 maunds were imported during the fortnight ending the 6th instant, against 362,246 reported in my last narrative.

3. The subject of the impending block at the Patna station was fully discussed with His Honor the Lieutenant-Governor during his late short visit to this station, and I am only sorry that he could not spare the time to visit the stations and judge for himself what their requirements are. The subject has since been receiving my best attention, but I am sorry to say that day by day fresh difficulties arise. Of the shoots that were ordered only two were at work on the 11th, the time of my last visit, the construction of the remainder up to that time not having been completed, and it was very doubtful whether the existing two would be much longer of any use, as the water was already beginning to stand in the hollow to the south of the railway embankment and threatened to spread up to the embankment itself, when all unloading on that side would have to be put a stop to altogether, and we should have to look to the north side only for removing the grain. Here again, with the enormous and continued traffic that is passing over it, the road is daily getting worse and worse, and it is hard to say what to do lest in trying to improve matters we put a stop to traffic altogether. At the new siding things did not look much more hopeful. The bank of new earth intended for the platform had become saturated, and from there being no revetment wall and no drain, the surplus water had found its way across the space left for the road, which had not up to that time been metalled, and cut away deep channels into the cutting on the opposite side of it. I have since received Government of Bengal's letter No. 437T.F., dated the 13th instant, forwarding copy of extracts from its letter to the Government of India, and on receipt of the telegram therein referred to will do my best to carry out the instruction therein contained.

whatever they may be, but I would here beg to point out that the whole of the work which has to be done is within the railway premises which have their frontage, a very broad one, on to our main road leading through the bazar. The Railway Company let the time slip for the completion of the work, and now it will be very hard, if not impossible, to make up for lost time. However, as I said before, as soon as I get my instructions I will do my best to carry them out.

4. The following are the prevailing prices of food-grains in the principal markets of this district:—

| | | Rice, best. | | Rice, common. | | Wheat. | | Maize. | | Barley. | | Gram. | |
|--------------|-----|-------------|----|---------------|----|--------|----|--------|----|---------|-----|-------|----|
| | | S. | C. | S. | C. | S. | C. | S. | C. | S. | C. | S. | C. |
| Patna ... | ... | 12 | 8 | 14 | 0 | 17 | 0 | 17 | 0 | 19 | 8 | 20 | 8 |
| Barh ... | ... | 9 | 8 | 10 | 0 | 13 | 8 | 14 | 8 | 16 | 0 | 17 | 0 |
| Behar ... | ... | 9 | 12 | 10 | 8 | 13 | 0 | 16 | 0 | 19 | 0 | 16 | 8 |
| Dinapore ... | ... | 10 | 0 | 11 | 12 | 16 | 0 | 16 | 0 | ... | ... | 18 | 8 |

The rates prevailing in the interior of the Sudder and Dinapore sub-divisions are as follows:—

| Thanna. | Common rice. | | Wheat. | | Barley. | | Maize. | | Gram. | | |
|----------|--------------|-------|--------|----|---------|----|--------|----|-------|----|---|
| | S. | C. | S. | C. | S. | C. | S. | C. | S. | C. | |
| Bickram | 11 | to 11 | 8 | 14 | 0 | 19 | 0 | 17 | 8 | 17 | 0 |
| Mosourae | 10 | to 11 | 0 | 14 | 0 | 18 | 0 | 16 | 8 | 17 | 8 |
| Monair | | 10 | 0 | 14 | 0 | 18 | 0 | 17 | 0 | 17 | 0 |
| Behta | | 11 | 0 | 14 | 8 | 16 | 8 | 17 | 0 | 18 | 0 |

5. During the past fortnight we have had good rain generally throughout the district, and though each individual fall has been very partial, they have been in such quick succession in one part of the district or another that each part has had a fair share. At head-quarters the reported fall has been 1·54, though within a very few miles of it, or indeed less than that, I have reason to believe that more than double that quantity has fallen. At Dinapore the fall is said to have been 2·20, at Barh 2·81, and at Behar 1·82. We have thus all over the district had sufficient rain to allow of work in the fields being commenced upon, and the sowing of the bhadoi crops and broadcast paddy is going on everywhere. In some places the Indian-corn and morooa seeds sown with the first rain have already germinated, and the young plants are some two or three inches high. There is no doubt that the fall of prices generally in the city may be attributed to this early fall of rain and to the consequent improved state of agricultural prospects, more than to the large importations of grain from the north-west, the bulk of which finds its way across the river. On this subject the sub-divisional officer of Behar writes as follows:—

“According to local custom, no ploughman ploughs his field during this fortnight, or as long as the influence of the *Mirgisra* star lasts. Many have stuck to the prejudice, but so great has been the desire to profit by the early rains, which were so scarce last season, that notwithstanding the local prejudice many ryots have commenced sowing makie. In fact the plants have come up 3 inches in some fields. In most places cheena has been reaped. In five to ten days more the whole will have been cut.”

6. The condition of the people is reported as favorable from every part of the district, and now that they can find employment in the fields, it is to be hoped that they will leave our relief works and return to their agricultural pursuits.

No cases of misery or starvation have been brought to light except in the Dinapore sub-division, whence the sub-divisional officer reports: “Six cases of misery or starvation have been brought to my notice up to date; they are being relieved by private charity. They are professional beggars.” Captain Hopkinson, I am of opinion, may congratulate himself on not being able to find more than six beggars in his sub-division.

7. Though only one case of grain theft was reported by the district police during the fortnight, and that of a petty nature, numbers are being sent up almost daily by the railway police. These thefts are for the most part perpetrated by the coolies employed in removing the grain, and I must say that the temptation thrown in their way is very great.

8. I annex herewith the crime statement prescribed by the Government order of 20th December last for the last month, which shows 199 cases against 102 in 1873 and 160 in 1872.

9. Two hundred and thirty-nine emigrants were registered in this office during the fortnight for the Natal colony, whereof 82 belonged to this district, 70 to Gya, 21 to Shahabad, 9 to Sarun, 2 to Tirhoot, and 54 to the North-Western Provinces and Oude.

B.—RELIEF WORKS.

10. The subjoined statement will show the number of laborers employed on our several relief works during week ending the 6th instant, regarding which the latest return has been received.

Sudder Sub-Division.

| Road No. | | | Average daily No. |
|----------|---------------------------------|-----|-------------------|
| 9, | from Bankipore to Mohabullypore | ... | 983 |
| 11, | from Nowbutpore to Mosowrhee | ... | 351 |
| 12, | from Durweshpore to Bichram | ... | 325 |
| 22, | from Dinapore to Nowbutpore | ... | 293 |
| 24, | from Ranipore to Mohabullypore | ... | 159 |
| 23, | from Ekanger Serai to Mosowrhee | ... | 729 |
| Total | | | 2,840 |

| <i>Bark Sub-Division.</i> | | | | Average daily No. |
|---|-----|-----|-----|-------------------|
| No. 17, Mokameh railway station to the river bank | ... | ... | ... | 21 |
| „ 15, Futwa to Burhica | ... | ... | ... | 1,336 |
| „ 30, Mokameh to Surmeyra | ... | ... | ... | 169 |
| Total | ... | ... | ... | 1,526 |
| <i>Behar Sub-Division.</i> | | | | |
| No. 29, Futwa to Behar | ... | ... | ... | 2,246 |
| „ 31, Bucktearpore to Raneebagh | ... | ... | ... | 4,932 |
| „ 36, Behar to Asthwan | ... | ... | ... | 1,880 |
| „ 37, Raggir to Girrick | ... | ... | ... | 1,250 |
| „ 38, Futwa to Raneebagh | ... | ... | ... | 1,486 |
| Total | ... | ... | ... | 11,794 |
| <i>Dinapore Sub-Division.</i> | | | | |
| No. 10, Phoolwaree to Surowdha | ... | ... | ... | 428 |
| „ 13, Monair to Pures | ... | ... | ... | 127 |
| „ 14, Monair to Bilta | ... | ... | ... | 131 |
| Total | ... | ... | ... | 686 |

or a grand total of 16,846, consisting of 5,525 men, 8,869 women, and 2,452 children, against 18,477 in the previous week, and 17,453 in the week before, as shown in paragraph 11 of my last narrative. The number of laborers has, I believe, considerably fallen since, and will doubtless continue to fall.

Though I have not at any time increased the rates of wages, and am still paying those employed on the roads the same wages as they have been accustomed to get in ordinary years, still there is no doubt that it is in excess of what they could expect to earn by ordinary labor in the fields; so that now that we have had a sufficiency of rain to allow a cultivation being commenced upon, I have issued strict orders on the officers in charge of the different works, through the Executive Engineer, to enquire from the land-owners and cultivators in the vicinity of each work whether they were in want of labor, and if they found that we were drawing away labor to the detriment of the former, to at once put a stop to the work. If unfortunately necessity arise, we can easily resume them, but I am in hope that once stopped we shall not require them again.

11. The following relief works had additional grants sanctioned for them during the fortnight:—

| | Rs. |
|-------------|--------|
| Road No. 29 | 4,000 |
| Road No. 31 | 5,000 |
| Road No. 36 | 2,000 |
| Total | 11,000 |

12. The average daily number of the laborers employed on the canal works in this district, during the fortnight ending the 2nd instant, was 4,633, against 8,931 during the previous fortnight, and the daily number of those employed on tank and embankment works in the Sudder sub-division was 1,039 against 1,549, reported in the last narrative. These works have now approached completion, and will in the course of ten or fifteen days be dispensed with.

C.—TRANSPORT OF GOVERNMENT GRAIN.

13. The subjoined statement will show the amount of food-grains imported into this district during the fortnight ending the 6th instant:—

| | Rice. | Wheat, oats, and barley. | Maize. | Other grains. |
|----------|--------|--------------------------|--------|---------------|
| By rail | 93,856 | 146,254 | 33,734 | 219,962 |
| By river | 750 | | | 640 |
| Total | 94,606 | 146,254 | 33,734 | 216,602 |

or a grand total of 491,196 maunds, of which 102,684 was Government grain and 388,512 made up the amount of private importation.

D.—STORAGE OF GOVERNMENT GRAIN.

14. I had, as reported in my last narrative, directed the sub-divisional officer of Behar to make arrangements for the sale of Government grain to the laborers on the road, and had for the same purpose deputed one of my salt officers to Mussourie to the south and another to Paleegunge, to the south-west of the Sudder sub-division, but having since received the Government orders directing me to send all the grain which I could spare for use in Tirhoot,

I have recalled the officers deputed to the Sudder golahs, and also directed the sub-divisional officer of Behar to put a stop to all sales. I have already commenced despatching what I can spare in excess of the 25,000 maunds already sent, but I think it will be necessary for me to keep a small stock in hand at the two places mentioned above in the Sudder sub-division, and also at Behar for the present, to prevent the buniads, thinking that they had it all their own way and could raise their rates as it pleased them.

15. I have received Government orders to receive 75,000 maunds of grain from Gya, and of it to despatch 40,000 to Tirhoot, keeping the remaining 35,000 as a reserve in the Bankipore golahs. I am making arrangements for the transport of the grain by boats to Konoi Ghaut at Hajeeepore, Bunker Ghaut having been done away with.

E.—ADVANCES TO PRIVATE PARTIES.

16. None during the fortnight. All the advance-holders for the purchase of grain have sent money to the Punjab for importing grain and replenishing their stock to the full.

F.—CHARITABLE RELIEF.

17. None in this district.

G.—FINANCIAL RESULTS.

| | | Rs. | A. | P. |
|-------------------------------------|-----|----------|----|----|
| 18. As per account already rendered | ... | 2,41,803 | 5 | 11 |

During the fortnight.

| | | | | |

PATNA POLICE OFFICE,
The 8th June 1874.

H. M. RAMSAY, Captain,
District Supdt. of Police.

No. 890F, dated Gya, the 15th June 1874.

From—A. V. PALMER, Esq., Collector of Gya,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my report on scarcity and relief in the Gya district for the fortnight ending Saturday, 13th June.

A.—STATE OF THE COUNTRY.

2. The bazars continue to be sufficiently supplied. In Aurungabad sub-division the importations have gradually been decreasing,* but to no great extent. This is, as stated in my last report, attributable chiefly to the great demand for carriage in all parts of the sub-division; to the large number of carts that have crossed the Ganges to North Behar, and to the action of the canal officers. I am informed by the sub-divisional officer that he has, after enquiry, satisfied himself that there is no want of stock; and that importation every year becomes slack at this season, when every laborer and bullock is more usefully employed in agricultural pursuits.

3. The firmness of prices as indicated in the price-current supports this view, and I have no reason to think the state of the sub-division to be otherwise than normal.

4. The annexed statement shows the comparative prices of food at the principal marts in the district:—

| BAZARS. | WHEAT. | | BARLEY. | | RICE, BEST SORT. RICE, COMMON. | | | | MILLET. | | MAIZE. | | GRAM. | |
|-------------------|------------------------|-------|-----------------------|-------|--------------------------------|-------|-----------------------|-------|------------------------|-------|-----------------------|-------|------------------------|-------|
| | Week ending 13th June. | | Week ending 30th May. | | Week ending 13th June. | | Week ending 30th May. | | Week ending 13th June. | | Week ending 30th May. | | Week ending 13th June. | |
| | Rs. C. | S. C. | Rs. C. | S. C. | Rs. C. | S. C. | Rs. C. | S. C. | Rs. C. | S. C. | Rs. C. | S. C. | Rs. C. | S. C. |
| Gya | 11 12 | 11 8 | 16 0 | 15 8 | 8 4 | 8 0 | 9 0 | 9 0 | | | 14 0 | 13 8 | 15 0 | 14 0 |
| Nowada | 18 8 | 12 0 | 17 0 | 18 0 | | | 9 12 | 11 0 | 17 0 | 15 0 | 14 0 | 13 0 | 16 12 | 14 8 |
| Jehanabad | 13 0 | 13 0 | 16 0 | 16 4 | 9 0 | 8 12 | 9 8 | 10 0 | | | 15 0 | 14 8 | 15 8 | 15 0 |
| Aurungabad | 13 8 | 13 4 | 17 0 | 17 4 | 9 12 | 10 0 | 10 8 | 10 12 | | 17 0 | ... | 16 8 | 15 4 | 15 6 |
| Doodhuzkur | 13 0 | 13 8 | 18 0 | 18 0 | 10 0 | 10 0 | 10 8 | 11 0 | ... | 17 0 | ... | ... | 15 8 | 16 0 |

Rice has slightly risen, but other grains have declined, and no interference on the part of Government is necessary so long as other food-grains are plentiful and cheap. Prices continue firm.

5. Rain began to fall from 1st June, *i.e.*, about three weeks before it was expected. It has been most acceptable after the long drought, extending almost without intermission from February last.

6. I append in the margin the rain reported at sub-divisional head-quarters during the past fortnight.

Gya 314
 Nowada 491
 Jehanabad 349
 Aurungabad 178

7. Since the 1st June, there has been rain every day, followed by bright sunshine. Nothing could be more favorable for agricultural purposes, and since June commenced, we have had nothing but fine growing weather.

8. Rice and the bhadoi crops are being sown. The Mirzissa Nakshattar (or first week after rain begins to fall, during which time all Behar husbandmen consider it most inauspicious to touch the land) having expired, agricultural operations are being vigorously pursued, and it is a matter of astonishment to find the cattle in such good condition. From what I have been able to learn, I attribute this to the great demand there has been throughout the season of drought for carts and cattle, and the very handsome manner in which the owners have been paid, thus enabling them to live comfortably themselves and to provide food for their cattle.

9. I am thankful to be able to reiterate that the condition of the people in this district remains good. I have, during the past fortnight, received a large accession to my executive staff in the shape of 6 tehsildars, 4 moonserims, and 2 overseers. The moonserims have since returned to divisional head-quarters.

10. These officers have been employed in a village to village visitation, and the result hitherto has been highly satisfactory. The tehsildars are intelligent officers, and are doing their work to my satisfaction. The Sudder sub-division, including Sherghotty, I am having thoroughly well tested.

11. No cases of misery or starvation have been reported in any part of the district.

12. I append a statement of crime which speaks for itself.

Statement showing the number of true cases of dacoity, robbery, theft, and house-breaking, in the Gya district, for the month of May 1874, as compared with the number of such cases in the corresponding month of May 1873 and 1872.

| SUB-DIVISION. | DACOITY. | | | ROBBERY. | | | THEFT. | | | HOUSE-BREAKING. | | | | | | Total of all crimes. | | |

| Gya | ... | 6 | 3 | 1 | 1 | 2 | ... | ... | ... | ... | ... | ... | ... | 6 | 3 | 1 | 1 | ... | 2 |
| Jehanabad | ... | 4 | 1 | 3 | ... | 1 | ... | 1 | 1 | ... | ... | ... | ... | 4 | 2 | 4 | ... | 1 | ... |
| Nowada | ... | 4 | 3 | ... | ... | 1 | ... | 1 | ... | ... | ... | ... | ... | 4 | 5 | 3 | ... | ... | 1 |
| Aurangabad | ... | 1 | 1 | 1 | ... | 1 | ... | ... | ... | 2 | ... | ... | ... | 1 | 1 | 1 | 2 | ... | ... |
| Total | ... | 15 | 9 | 6 | 1 | 3 | ... | 2 | 1 | 2 | ... | ... | 15 | 11 | 9 | 3 | ... | 2 | 3 |

Crime is not even up to the average in the Sudder and Jehanabad sub-divisions, and in Nowada and Aurungabad it has but very slightly increased.

13. I still continue to think that there is no deficiency of seed-grain. Several applications have been made by needy ryots, but on inquiry it has generally turned out that the applicants are men of straw, and in many cases having no lands; and in others they have abused their zemindars' confidence on former occasions, and that they belong to that class of jenantry, who never act fairly by their lands.

14. Where a ryot is *bonâ fide* in want of seed-grain, his zemindar will, as a rule, if it be necessary, supply it; and the fact of zemindars having held back in taking advances for this purpose from Government, is fair evidence that there is no great pressure from want of seed-grain in the district.

B.—RELIEF WORKS.

15. I annex a statement of relief works.

| NAME OF WORKS. | ON PIECE-WORK. | | | | ON DAILY WAGES. | | | |
|---|----------------|--------|-----------|--------|-----------------|--------|-----------|--------|
| | Men. | Women. | Children. | Total. | Men. | Women. | Children. | Total. |
| 1. Daodnuggur road | 223 | 26 | | 249 | | | | |
| 2. Surbubda road | | | | | 308 | 438 | 29 | 774 |
| 3. Bela and Khidur Serai road ... | 617 | 471 | 113 | 1,201 | | | | |
| 4. Puraya road | 1,009 | 590 | 275 | 1,874 | | | | |
| 5. Shergotty and Myapore road* | 410 | 328 | 230 | 968 | | | | |
| 6. Ditto and Inaungungo* „ | 233 | 200 | 102 | 535 | | | | |
| 7. Pukree Barwan | 1,535 | 471 | 580 | 2,586 | 298 | 1,185 | 486 | 1,969 |
| 8. Gobindpore road | 1,028 | | | 1,028 | 182 | 1,559 | 561 | 2,302 |
| 9. Behar and Rujowlee, collection of metal. | 772 | 1,205 | 17 | 1,994 | 2,205 | 8,118 | 4,317 | 14,640 |
| 10. Warishungo road | 636 | 221 | 116 | 973 | 1130 | 2,885 | 614 | 4,829 |
| 11. Jehanabad and Hoolasungeroad | 1,507 | 2,119 | 196 | 3,822 | 102 | 212 | | 344 |
| 12. Obra road | 260 | 107 | 81 | 448 | 295 | 88 | 67 | 450 |
| 13. Myabigha and Ruffungo road | 616 | 693 | 217 | 1,526 | 143 | 343 | 40 | 526 |
| 14. Aurungabad tank | | | | | 50 | 257 | 9 | 316 |
| 15. Maharajungo road | | | | | 1,040 | 2,061 | 1,223 | 5,324 |
| 16. Kootoomba road | | | | | 321 | 200 | 125 | 646 |
| Total | 9,026 | 6,474 | 1,930 | 17,430 | 6,983 | 17,396 | 7,670 | 32,049 |
| Grand total | | | | | 49,479 | | | |
| Daily average | | | | | 3,534 | | | |

16. It will be observed that the numbers of laborers have slightly increased during this fortnight, the number being 49,479 against 40,060 in preceding fortnight. There are two additional works in the present statement, as marked with an asterisk.

17. This statement shows 17,430 persons engaged on work, which is paid for by result, against 32,049 paid by daily wage. This is an improvement on the preceding fortnight, which showed 12,228 on "piece-work" against 27,832 on "daily wage."

18. There is one work, No. 9, collecting of kunker and gravel for Behar and Rujowlid road, which affords employment to a very large number of women and children, and to men who are unfitted for harder work. If we omit this work in the calculation, we have for the present fortnight 15,436 on piece-work, against 17,409 on daily wage.

19. This is an improvement, but not a sufficient one to satisfy me, and I trust to reduce the proportion of daily payments very considerably.

20. Laborers are being paid in grain and in pice, which are exchanged for Government grain on the works. I hope to be able to annex a statement showing the realisations by sale of grain to laborers. Grain is nowhere looked upon as a boon by the laborers, notwithstanding the favorable rates at which it is sold to them. They would infinitely prefer payment in coin.

In some cases a gang will bring eight days' food-supply with them from their village.

21. As promised in paragraph 48 of my last report, I submit a statement showing the cash expenditure on each relief work, and the amount recouped by sale of Government grain.

Statement of Laborers, their wages, and amount recouped by sale of Government Grain for the fortnight ending 6th June 1874.

| NAME OF WORK. | Number of laborers. | Amount paid in wages. | Recouped by sale of Government grain. | REMARKS. |

| * Total | ... | 3,044 6 0 | 749 2 2 | |

On the Bela and Khizer Serai road the laborers declined to buy the Government grain. They have since been informed that, unless they do, payment will be made them in grain only, instead of pice. As the works proceed, and the system of payment in Government grain gets better understood, the expenditure of Government grain will increase.

22. I may mention that I anticipate a very great falling off in laborers by next fortnight, in consequence of the agricultural necessities of the season.

C.—TRANSPORT OF FOOD.

23. The following importation statement will show reported imports :—

| Bazars. | Wheat. | Barley. | Rice, best sort. | Rice, common. | Millet. | Maize. | Gram. | Total. |
|-----------------|--------|---------|---------------------|------------------|---------|--------|-------|--------|
| Gya ... | 493 | 175 | 122 | 1,609 | ... | | 431 | 2,830 |
| Nowada ... | 30 | | | 40 | ... | | 40 | 110 |
| Jehanabad ... | 300 | 45 | 175 | 225 | 135 | 75 | 225 | 1,180 |
| Aurangabad ... | 150 | | 31 | 338 | ... | | 145 | 664 |
| Daoodnuggur ... | 1,100 | 125 | 340 | 280 | ... | | 130 | 1,975 |
| Total ... | 2,073 | 345 | 668 | 2,492 | 135 | 75 | 971 | 6,759 |

The total importations amount to 6,759 maunds, against 5,656 maunds in preceding fortnight. The increase has been general, except at Daoodnuggur, in the Aurngabad sub-division.

24. The importations at the sudder station bazar are 2,830 maunds, against 2,084 maunds in preceding fortnight.

25. Means of transport at this season of the year are very insufficient. This is owing to all agricultural oxen being engaged in ploughing up the country, and it is only the regular carrier-traders who have carts and bullocks available. I don't apprehend that this state of things will improve for some time to come.

26. I should be glad if Sir Richard Temple sees his way to supplying me with some Government transport to convey 75,000 maunds of grain recently ordered to Patna.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

27. The selected storage places are as follow :—

| Storage centres. | | | | | | Quantity. | Total. |
|-------------------|-----|-----|-----|-----|-----|-----------|---------|
| <i>Gya</i> | ... | ... | ... | ... | ... | 29,851 | 46,493 |
| Bela | ... | ... | ... | ... | ... | 3,012 | |
| Sherghotty | ... | ... | ... | ... | ... | 4,279 | |
| Uttree | ... | ... | ... | ... | ... | 3,930 | |
| Bhelooa Chutti | ... | ... | ... | ... | ... | 991 | |
| Tuccaree | ... | ... | ... | ... | ... | 2,004 | |
| Futtehpore | ... | ... | ... | ... | ... | 991 | 29,855 |
| Imamgunge | ... | ... | ... | ... | ... | 1,435 | |
| <i>Jehanabad</i> | ... | ... | ... | ... | ... | 14,900 | |
| Urwul | ... | ... | ... | ... | ... | 6,958 | |
| Gundhor | ... | ... | ... | ... | ... | 3,059 | |
| Kinjur | ... | ... | ... | ... | ... | 1,945 | |
| Hoolosgunge | ... | ... | ... | ... | ... | 2,000 | 35,450 |
| Khazi Serai | ... | ... | ... | ... | ... | 993 | |
| <i>Nowada</i> | ... | ... | ... | ... | ... | 21,460 | |
| Kadirgunge | ... | ... | ... | ... | ... | 2,814 | |
| Pukree Borwan | ... | ... | ... | ... | ... | 5,182 | |
| Rujowlee | ... | ... | ... | ... | ... | 3,992 | |
| Warisligunge | ... | ... | ... | ... | ... | 2,002 | 25,364 |
| <i>Aurangabad</i> | ... | ... | ... | ... | ... | 18,869 | |
| Ruffigunge | ... | ... | ... | ... | ... | 3,968 | |
| Kootoomba | ... | ... | ... | ... | ... | 2,997 | |
| War | ... | ... | ... | ... | ... | 4,556 | |
| Deobandpur | ... | ... | ... | ... | ... | 497 | |
| Grand Total | | | | | | ... | 117,162 |

28. The Aurungabad sub-divisional officer has experienced great difficulty in getting transport from Bihta station, notwithstanding that he has raised the rates to 8 annas per maund. Of the 5,000 maunds lately sent to Bihta from North-Western Provinces, he has stored 1,640 maunds and 1,750 maunds are in transit, leaving 1,610 maunds at the station.

29. This I have directed my agent to forward to the Collector of Patna for transmission to north of the Ganges.

30. I annex statement showing the storage and consumption of Government grain for the fortnight ending 13th June 1874.

31. It will be observed that, whilst I have preserved the form of statement as prescribed by Government, I have amplified some of the columns, so that the direction in which the expenditure has been incurred may be seen at a glance.

Statement showing the Storage and Consumption of Government Grain in the Gya District for the fortnight ending 13th June 1874.

| NAME OF CIRCLE. | Dates for which figures are given. | Total allotment. | Total quantity received and stored. | TOTAL QUANTITY OF GOVERNMENT GRAIN CONSUMED UP TO DATE. | | | | | Estimate of expenditure during ensuing fortnight. |
|-----------------|------------------------------------|------------------|-------------------------------------|---|--|---------------------|---------|-------|---|
| | | | | By sale to the public or laborers. | By gratuitous distribution in any shape. | By payment in kind. | T. tal. | | |
| Gya | 12th June | 51,000 | 45,493 | 1,505 | 249 | 201 | 1,815 | 3,000 | |
| Nowada | 10th " | 33,000 | 35,459 | 596 | 5 | 33 | 484 | 300 | |
| Jehanabad | 11th " | 30,000 | 29,855 | 696 | 19 | 71 | 816 | 500 | |
| Aurungabad | 9th " | 40,500 | 35,364 | 389 | 178 | 67 | 721 | 500 | |
| Total | | 154,500 | 147,162 | 5,796 | 491 | 432 | 6,811 | 4,300 | |

E.—ADVANCES TO PRIVATE PARTIES.

32 *First, to deal in grain.*—These applications have been put a stop to by Government Order No. 3369—S.R., paragraph 4.

Second, for land improvement.—During the fortnight only one advance (for a pucca well) has been granted in the Jehanabad sub-division.

33. I annex a statement showing number of applications made up to date and how dealt with :—

| SUB-DIVISIONS. | Number of applications received during the fortnight. | Number of applications received previously. | Total number of applications received. | NUMBER DISPOSED OF. | | | | | Pending. |
|----------------|---|---|--|-----------------------|------------------------|---------------------------|-----------|--------------------|----------|
| | | | | Applications granted. | Rejected or withdrawn. | Reported to Commissioner. | Returned. | Total disposed of. | |
| Gya | 2 | 32 | 34 | 9 | 25 | | | 34 | ... |
| Aurungabad | | 80 | 80 | 38 | 40 | 2 | | 80 | ... |
| Jehanabad | | 80 | 80 | 19 | 31 | .. | | 80 | ... |
| Nowada | 29 | 18 | 47 | 4 | 30 | | | 34 | 13 |
| Total | 31 | 210 | 241 | 100 | 136 | 2 | | 238 | 13 |

F.—CHARITABLE RELIEF.

34. In my last report I stated very fully what had been done from the commencement of operations, and what was being done in the matter of charitable relief. It will only, therefore, now be necessary for me to report the transactions of the past fortnight.

35. I may mention that the late bi-monthly (now monthly) statement and report furnished to the Central Relief Committee at Calcutta give all details. The annexed statement will show the number of persons relieved during the fortnight ending 12th June:—

| SUB-DIVISIONS. | B. | C. | D. | Total. | Daily average. |
|----------------|--------|-------|-------|--------|----------------|
| Gya | 5,702 | 343 | 8 | 6,053 | 432 |
| Nowada | 2,016 | 9 | | 2,025 | 144 |
| Jehanabad | 1,628 | 8 | | 1,636 | 117 |
| Aurangabad | 4,584 | 707 | 21 | 5,312 | 377 |
| Total | 13,930 | 1,067 | 29 | 15,026 | 1,070 |

36. A fresh relief-house has been opened at Bela.

37. It is anticipated that the number will increase under heading C of the Central Committee's circular. Under heading D, I continue to expect very few applications for relief, and there is no doubt that the country is being thoroughly searched for such cases.

38. The tehsildars were first sent out on a trial trip to become acquainted with their work, and when I had satisfied myself that they understood what I wished them to do, I distributed them throughout the district.

39. Each sub-division has now a supervisor and deputy supervisor, mainly employed in seeking out fit subjects for relief.

G.—FINANCIAL RESULTS.

40. The total expenditure as per last narrative (31st May) amounted to Rs. 1,13,145-5-3.

41. During the fortnight under notice the following expenditure has been incurred:—

| | Rs. | A. | P. |
|--------------------------------------|-----|-----|---------|
| Salary of famine clerk for May | ... | ... | 35 0 0 |
| Paid to Poonie Saho to deal in grain | ... | ... | 500 0 0 |
| Paid to Bikum Singh | ... | ... | 100 0 0 |
| Total | ... | ... | 635 0 0 |

Abstract.

| | | | |
|----------------------------------|-----|-----|--------------|
| Establishment | ... | ... | 35 0 0 |
| Advance to private parties | ... | ... | 500 0 0 |
| Ditto for land improvement | ... | ... | 100 0 0 |
| Expenditure shown in last report | ... | ... | 1,13,145 5 3 |
| Grand total | ... | ... | 1,13,780 5 3 |

No. 444—F., dated Arrah, the 15th June 1874.

From—H. W. ALEXANDER, Esq., Collector of Shahabad,

To—The Offg. Secretary to the Govt. of Bengal, Statistical Department.

I HAVE the honor to submit my fourteenth narrative, for the fortnight ending the 13th June.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supply in the Bazars.

No scarcity of supplies is reported in the markets from any part of the district.

Kinds and prices of Grain selling at one or more specified principal Marts.

In Appendix A full particulars in regard to prices and kinds of grain selling at the chief marts in the district are given.

In the Arrah sub-division, as compared with the last return, at Arrah, Bendowlia, and Saha, prices have slightly risen, in Jugdispore there has been a fall in the price of wheat and barley.

In the Buxar sub-division the prices have remained on the whole steady, and are not unfavorable.

In the Sasseram sub-division the prices have slightly risen in Sasseram, Dehree, and Sheogunge, have remained steady at Akberpore, and fallen in Chennary.

In the Bhubbhoa sub-division the prices continue generally steady,

Rainfall.

At Arrah during the fortnight under report the rain-gauge has registered 8·48 inches, and rain appears to have fallen in most parts of the head-quarters sub-division.

From Buxar, rain is reported to have set in fairly on Tuesday last.

A rainfall of 2·09 inches has been reported at head-quarters in the Sasseram sub-division, and 1·11 in the Bhubooah sub-division. In these two sub-divisions the rain appears to have commenced from the beginning of the month, and to have continued in occasional showers up to the end of the fortnight.

At Arrah during the past week the rainfall has been unusually heavy.

Condition of the Crops.

Sugarcane and indigo have generally benefited by the late rain.

Since the 6th of June very little in the way of sowing has been carried on; on that date the Mirgissa Nakshattar commenced, and the natives of these parts have a superstitious dread of carrying on any agricultural operations during the first eight days of this Nakshattar. Previous to the 6th instant, during the Rohinee Nakshattar sowing in some places occurred. From this date (June 15th) bha-loi sowings will generally commence, the ground being nearly everywhere in a favorable condition for such sowings. In the table-land in the Sasseram sub-division both broadcast and nursery rice have been sown.

The mango crop is now being gathered, and may be considered a full average one.

Condition of the People.

There is no reputed change for the worse in the condition of the people since the date of the last narrative. No cases of actual misery and starvation have been brought to light. Small-pox still continues, but is on the decrease. From Sasseram, Mr. Eyre reports—"I have during the last week been over a large tract of pergunnah Rohtas, high-land and low-land,—the condition of the people generally was satisfactory."

In the Arrah and Buxar sub-divisions the grain-thefts have been so few as to call for no notice. Two burglaries and one house-theft occurred in the Sasseram sub-division during the fortnight under report. The burglaries (one of which was from the Sasseram golah, under police guards) were of over two maunds of grain each; the house-theft was of six seers. Only one case is reported from the Bhubooah sub-division, of one maund of wheat.

In Appendix B is given the comparative statement of crimes called for in Government Circular No. 4081, dated the 20th December 1873. As compared with the corresponding period of 1872, there has been a marked increase of 91 cases, and of 1873, an increase of 49 cases; this increase is noticed in the offences of "cattle-theft" and of "house-trespass and house-breaking with intent to commit theft."

B.—RELIEF WORKS.

For full particulars in regard to relief works in progress, and number of laborers employed on each, *vide* Appendix C.

Government grain has been sold to the laborers employed on these works; details in regard to the amount so disposed of appear in a separate statement.

During the fortnight no fresh relief work has been started in the Arrah sub-division.

In the Buxar sub-division the chief work in progress is the cross-road from Saraya to Poorunda.

In regard to the Sasseram and Bhubooah sub-divisions, Mr. Eyre reports—"The work on the road between Hatta and Durowli has been the only relief work carried on during the fortnight. From the information gathered during my recent visit to Rohtas pergunnah, I conclude that no relief work is necessary in that locality for the present. Baboo Nund Lal Singh, a well-to-do zemindar, is constructing a stone dam across a mountain-stream, the Puteatee, near Purcha, which runs through his estate there. He is employing between 100 and 200 workmen, and will employ as many as come to the work. The workmen are being paid mostly in kind. This work affords work to all in need thereof, and there is no necessity for Government to undertake any."

The sale of grain to the laborers is being carried on on the Hatta Durowli road, Jehanabad-Khirse road, Jehanabad-Baraon road, and Jehanabad-Bhubooah road. It will be extended to the Jehanabad-Mulhipore road this week.

C.—TRANSPORT OF FOOD.

The statement of the private importations of grain by rail to the stations in the Arrah and Buxar sub-divisions during the fortnight will follow.

The imports into the Sasseram sub-division during the fortnight were—

| | | | | |
|----------|-----|-----|-------|--------|
| By rail | ... | ... | 1,282 | maunds |
| Interior | ... | ... | 2,437 | " |
| Exterior | ... | ... | 3,153 | " |

Total ... 6,872 "

These imports from the exterior are reported to be chiefly rice and gram from the Gurwa mart, in Palamow.

The imports into the Bhubooah sub-division during the fortnight amounted to—

| | | | | Mds. | Srs. |
|--------------|-----|-----|-----|-------|------|
| By rail ... | ... | ... | ... | 94 | 25 |
| Interior ... | ... | ... | ... | 1,143 | 15 |
| Exterior ... | ... | ... | ... | 1,028 | 25 |
| Total ... | | | | 2,266 | 25 |

The imports into the Sasseram sub-division have thus again decreased, and those into Bhubooah again increased, in comparison with the previous fortnight, which showed a decrease and increase, respectively, as compared with the fortnight preceding it.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

Mr. Eyre reports—"Maunds 5,127 have been stored during the fortnight of the grain which has arrived at Zumneneah, Buxar, and Doomraon from the North-Western Provinces. The rain has been so continued, and the river Kurrumnassa and Durguoti being in flood, carts have experienced the greatest difficulty in getting along. I have accordingly directed the receiving clerks to store the grain at the delivery-stations until a break occurs.

"In all, up to date, of the 25,000 maunds, 20,603 maunds have been received at the delivery-stations. It is greatly to be regretted that this grain was not sent earlier; I anticipate great difficulty in getting it safely stored,—I proceed to Zumaneah as soon as possible to see to its security and arrange for the most rapid transport obtainable."

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

No advances have been made. In regard to this subject, the sub-divisional officer of Buxar remarks—"No fresh advances have been actually made in the fortnight, and I would notice that I am strongly impressed with the difficulty there will be in making sure that the money advanced either for the purchase of grain or improvements is fairly used in the way bargained for by Government. For instance, two men only, Suumber Ram and Ram Sarun Ram, have received from me Rs. 800 and Rs. 400, respectively, to purchase grain. I have called on them for their proofs that the money has been spent in the way specified in their agreements, by purchase from other districts: Ram Sarun Ram states that he bought his at Mirzapore, and brought it down by boat; he bought it from an agent of one of the large Mirzapore firms, but cannot give the man's name; the owner of the boat which brought it down lives somewhere in the east, and the boat has gone eastward. This is very vague and unsatisfactory. Suumber Ram states that he has had his grain sent from Delhi by rail. He is sorry he cannot show the receipt, because he has made it over to the station-master at Doomraon; enquiries have been made, but the station-master says he can trace no such grain, and I have to make further enquiries. I will send a separate report on this subject.

F.—CHARITABLE RELIEF.

In the Arrah sub-division the charitable relief operations are as follow:—

HEADING B.

Cooked Food.

| | Men. | Women. | Children. | Total. | Average. |
|---------------|------|--------|-----------|--------|----------|
| Moulabag ... | 211 | 215 | 426 | 852 | 57 |

| | 437 | 1,234 | 176 | 1,847 | 123 |
| GRAND TOTAL | 1,313 | 2,633 | 739 | 4,688 | 312 |

During the fortnight the three supervising relief officers and the Canoongo have visited in the—

| | | | | | |
|--------------|-----|-----|-----|-----|--------------|
| Arrah circle | ... | ... | ... | ... | 22 villages. |
| Beheea „ | ... | ... | ... | ... | 21 „ |
| Peroo „ | ... | ... | ... | ... | 39 „ |
| Nonore „ | ... | ... | ... | ... | 15 „ |
| Total | ... | ... | ... | 97 | „ |

In the Buxar sub-division the numbers relieved are as follow :—

HEADING B.

Cooked food.

| | Men. | Women. | Children. | Total. | Daily average. |
|---------|------|--------|-----------|--------|----------------|
| Chousah | 70 | 110 | 16 | 196 | 17 |

HEADING C.

Rope-making at Poor-house.

| | Men. | Total. |
|---------|------|--------|
| Chousah | 44 | 44 |

Spinning Relief.

| | Women. | Total. |
|---------|--------|--------|
| Chousah | 2 | 2 |

Total of persons under Heading C, 46.

HEADING D.

Gratuitous Uncooked Food.

| | Men. | Women. | Children. | Total. | Daily average. |
|------------|------|--------|-----------|--------|----------------|
| Buxar | 118 | 218 | ... | 336 | 24 |
| Doomraon | 56 | 56 | ... | 112 | 8 |
| Nowanuggur | 140 | 168 | ... | 308 | 22 |
| Chousah | 380 | 868 | 220 | 1,468 | 133 |
| Berhampore | ... | 112 | ... | 112 | 8 |
| Total | 694 | 1,422 | 220 | 2,336 | 195 |

Mr. Armstrong further reports that—"During the fortnight the Chousah poor-house has been working for the Chousah thana. I have a very intelligent man in charge, and am satisfied that it is being worked properly, and I hope to have the Buxar and Saraya poor-houses working, as I stated in my last, from the 15th instant. Wali Mohamed, the Chousah relief inspector, has visited 95 villages during the fortnight, and is confident that everything is going on right. Illahi Bux, the Doomraon relief inspector, has visited 98 villages, and Hurjuthun Dubee, the new Buxar relief inspector, 90 villages, and they both report favorably also. They have all three got the names of the members of the committees and sub-committees resident in their respective thanas, and have been instructed to apply to the different members from time to time to know whether they have any fresh information to give."

The charitable relief operations in the Sasseeram and Bhubooah sub-divisions are—

HEADING B.

Cooked Food.

| | | Men. | Women. | Children. | Daily average. |
|----------|-----|-----------|-----------|-----------|----------------|
| Sasseram | ... | 244 | 268 | 72 | 41 |

| | | <hr/> 33 | <hr/> 179 | <hr/> 4 | <hr/> 216 |

Mr. Eyre further reports that—"The supervising relief officers of Dungair Nokh, in Sasseram, and of Ramgurh Bhubooah, in Bhubooah sub-division, have submitted their reports up to the 8th current. In the first sub-division, 73 villages more had been visited and 45 persons. In Bhubooah 114 villages had been visited and 82 persons. The supervisors of Sasseeram and Durgaoti circles have not sent in their reports as yet.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

ARRAH,
The 17th June 1874.

W. H. ALEXANDER,
Collector.

No. 1685F, dated Mozufferpore, the 17th June 1874.

From—C. F. WORSLEY, Esq., Collector of Tirhoot,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative of scarcity and relief in the Hajepore, Tajpore, and Sudder sub-divisions for the fortnight ending Saturday, the 13th June 1874.

A.—STATE OF THE COUNTRY.

2. In Hajepore sub-division prices are nearly the same that they were on the 30th ultimo, and sales of Government grain at relief works have had a good effect on markets in

Mhoweh thana, where the sub-divisional officer was assured by the bunniahs some time ago that there was no grain in the bazar.

3. In Tajpore sub-division prices have remained almost stationary "the only noticeable feature being," as the sub-divisional officer remarks, "a very slight rise in the price of rice in some markets, and a cheapening of barley and grain." The latter circumstance is considered satisfactory, as implying that importations have not fallen off.

4. In the Sudder sub-division the price of rice has fallen $1\frac{1}{2}$ seers, while that of wheat has risen half a seer in the rupee. The prices of other grains have not varied, notwithstanding that a considerable amount of Government grain has been brought into consumption. In the early part of last week I recommenced sales of Government grain in Mozufferpore town, and the amount sold daily has averaged 289 maunds. This is less than I expected to sell, but the result is perhaps natural enough when it is remembered that outside the town Government rice is sold at certain golahs at 12 seers the rupee, while in the town the price has been fixed by the order of Government at 10 seers. I do not myself see that any advantage can be gained by maintaining this distinction, and should be glad of permission to sell everywhere at the same rate. The manager of Ottar factory (10 miles distant from Mozufferpore) assures me that residents of the town come to buy rice at his golah, because it is sold two seers cheaper than in Mozufferpore.

5. Although the bunniahs of the town have reduced the price of rice in consequence of the Government sales, I do not propose to discontinue them at present. I know from experience that they will again raise the price directly the Government grain is withdrawn from the market; and that if real relief is to be afforded to the distressed towns-people, sales must be constant and regular. It is only the large dealers who dislike our sales: the small bunniahs to a man affirm that they are necessary, and are anxious that they should be made more largely. The latter declare, too, that existing private stocks are not one-tenth of what they usually are, and ought to be, at this season of the year.

6. The subjoined statement shows the kinds and prices of grain selling at some of the principal marts on 13th instant.

| NAME OF MART. | | | | Wheat. | Barley. | Common rice. | Lesser millets. | Maize, or Indian-corn. | Gram. |
|---------------|-----|-----|-----|------------------|------------------|-----------------|-----------------|------------------------|------------------|
| Hajepore | ... | ... | ... | 12 $\frac{3}{4}$ | 17 $\frac{1}{4}$ | 9 $\frac{1}{2}$ | ... | 15 $\frac{1}{2}$ | 17 $\frac{1}{2}$ |
| Mhoweh | ... | ... | ... | 12 $\frac{1}{2}$ | 15 | 8 $\frac{1}{2}$ | 16 | 12 $\frac{1}{2}$ | 15 |
| Tajpore | ... | ... | ... | 13 | 16 $\frac{1}{2}$ | 9 $\frac{3}{4}$ | 15 | 15 | 16 $\frac{1}{2}$ |
| Mozufferpore | ... | ... | ... | 11 | 14 | 10 | ... | 13 | 14 |

7. The rainfall during the fortnight was as follows:—

| | | | | |
|--------------|-----|-----|-----|-----|
| Hajepore | ... | ... | ... | 73 |
| Tajpore | ... | ... | ... | 30 |
| Mozufferpore | ... | ... | ... | 232 |

The falls have varied very much throughout these sub-divisions. In several parts of the Sudder sub-division the fall has been as much as two or three inches, while in other places it has been less than an inch. At Lalgunge I understand that eight inches of rain fell one day in a few hours, though at Hajepore there was scarcely a drop.

8. In most parts of these sub-divisions the rain has been sufficient to enable the ryots to cultivate and sow their lands. During the last week I have been over more than 200 miles of country in the Sudder and Hajepore sub-divisions, and everywhere I have found cultivation going on vigorously. A great deal of waste land is being brought under cultivation, and seed, though procured at much expense and with some difficulty, has apparently been obtained in sufficient quantities. In Tajpore sub-division the dhan in the lower churs to the south and south-east is said to "show a magnificent promise." The dhan sown on higher lands, and which had begun to suffer, has been freshened, and the clay soils are now soft enough to be prepared for transplanted rice.

From those circles of the Sudder sub-division which I have not visited during the fortnight, viz. Toorkie, Belsund, Rajkhund, Kultrah, and Gaighattee, I have received most satisfactory reports regarding cultivation of lands. Throughout these circles active preparations for sowing are being made, and in many places Indian-corn and rice have been already sown.

On the whole I may say that, with the exception of tracts liable to inundations, the country looks as well as could be wished, and it is quite evident that the relief works have not induced the people to neglect their fields.

9. The condition of the people is generally satisfactory in Hajepore and Tajpore sub-divisions, where the attendance at relief works is still comparatively small. It is almost a truism now to say that the numbers on these works afford the surest test of the condition of the lower classes, and that as long as the works are thinly attended, there can be no severe distress in their neighbourhood. The deserted state of the relief works in some circles of

Hajeepore sub-division conclusively proves (what I have myself frequently observed elsewhere) that persons who are not in the habit of working on roads and tanks will not accept such employment until compelled to do so by sheer want of food.

In the Sudder sub-division there has been no increase of distress, but wherever relief works have been temporarily closed, the villagers have felt the withdrawal of Government assistance, and have begged hard that the works may be reopened. I have therefore directed circle officers to provide employment liberally, as the only object of closing works was to ensure the cultivation of fields, and cultivation, as I have already said, has been going on most actively and widely. I was much struck during my recent tour with the very large numbers of women and children working in the western circles. In the Moteepore circle, for instance, there were on the 11th instant no less than 4,593 women and 3,761 children, against 4,819 men on the works. I have no doubt that many cultivators work in their fields, while their women and children are employed in earning subsistence for all.

B.—RELIEF WORKS.

10. The number of laborers employed daily in the three sub-divisions is as follows:—

| | | | | | |
|---------------------|-----|-----|-----|-----|---------|
| Sudder sub-division | ... | ... | ... | ... | 166,386 |
| Tajpore | „ | ... | ... | ... | 10,774 |
| Hajeepore | „ | ... | ... | ... | 5,099 |
| Grand Total | | | | | 182,259 |

Statements are given in the Appendix.

11. Now that the rains have commenced it will not be possible much longer to carry on tank works. I expect, however, that we shall be able to provide work on roads, especially village roads, for several weeks in many circles. At present there is no difficulty about this matter.

12. Payments in grain have now been introduced in all circles of the Sudder sub-division, and the ensuing fortnight may be expected to show the results of the system in full operation. Owing to the very large number of relief works in some circles, there was much difficulty in putting the system thoroughly in force.

In nearly all the circles of Hajeepore and Tajpore sub-divisions grain payments are now made.

C.—TRANSPORT OF FOOD.

13. Large fleets of boats laden with private grain daily pass up the Gunduk, and importations are steadily increasing. The recent addition of 2,18,000 maunds to the previous three allotments for the Sudder sub-division will cause the contractors' carts to be employed in the transport of Government grain for a longer period than was anticipated; but to show that private traders might have done very much more during the last few months than they attempted to do, I may mention that all the small bunniahs to whom grain is advanced for sale by circle officers, contrive to supply carts for its conveyance from the Sudder golahs to their own villages. The employment of small bunniahs is not only greatly beneficial to them and the public, but it tends to make the large holders of grain more reasonable in their demands.

In Tajpore sub-division inland traffic is said to have become easier.

D.—STORAGE OF GRAIN.

14. The amount of Government grain that has been stored is as follows:—

| | | | | | |
|------------------------|-----|-----|-----|-----|----------|
| | | | | | Mds. |
| Hajeepore sub-division | ... | ... | ... | ... | 5,170 |
| Tajpore | „ | ... | ... | ... | 20,753 |
| Sudder | „ | ... | ... | ... | 2,51,619 |

I propose to store the greater portion of the last allotment of grain in the opium godown at Mozufferpore.

The quantity of Government grain disposed of during the fortnight was 34,361 maunds. Detailed statements regarding its disposal are given in the Appendix. The quantity is some 40,000 maunds short of my estimate, but an explanation of the discrepancy may be found in my 12th paragraph. Some officers, too, are still very reluctant to sell freely, and say that if they attempted to meet the demand they would run through a lakh of maunds in a month.

E.—ADVANCES.

15. There has been a great improvement under this head, especially in the circles administered by planters, where a good deal of grain has been advanced to ryots. A large number of very useful native officers from the North-Western Provinces are now employed under circle officers in the Sudder sub-division, in connection with the making of advances, which I hope will be completed by the end of the month. The Tajpore officer has now made a good beginning in this direction, but nothing has been done in Hajeepore.

F.—CHARITABLE RELIEF.

16. The number of persons daily receiving charitable relief have somewhat increased during the fortnight, being as follows:—

| | | | | | |
|------------------------|-----|-----|-----|-----|--------|
| Hajeepore sub-division | ... | ... | ... | ... | 2,501 |
| Tajpore | „ | ... | ... | ... | 2,588 |
| Sudder | „ | ... | ... | ... | 11,146 |

The above figures include persons employed in cotton spinning, &c.
Detailed statements are appended.

G.—FINANCIAL RESULTS.

17. Statement showing the financial results of Sudder, Hajepore, and Tajpore sub-divisions for the fortnight ending 13th June 1874:—

| | Rs. | As. | P. |
|--|-----------------|----------|----------|
| Salaries, establishments, and office contingencies ... | 8,560 | 0 | 0 |
| Storage, including buildings and repairs ... | 1,051 | 4 | 3 |
| Charitable relief ... | 14,171 | 0 | 0 |
| Miscellaneous ... | 118 | 12 | 0 |
| Transport of Government grain ... | 1,99,672 | 4 | 3 |
| Advances to trustworthy residents for purchase of grain... | 5,580 | 9 | 0 |
| Advances to zemindars for support of ryots ... | 400 | 0 | 0 |
| Advances on account of giving loans to ryots ... | 5,000 | 0 | 0 |
| Advances to traders for purchase of grain ... | 500 | 0 | 0 |
| Relief works ... | 81,710 | 0 | 0 |
| Purchase of grain by Government ... | 5,080 | 9 | 0 |
| Total ... | 3,21,844 | 6 | 6 |

E.

Statement showing advances made from Sudder, Hajepore, and Tajpore sub-divisions for the fortnight ending 13th June 1874.

C. T. WORSLEY,
Collector.

No. 689, dated Durbhunga, the 15th June 1874.

From—C. T. METCALFE Esq., Additional Commissioner of the Patna Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative report of scarcity and relief for the three Sub-divisions of Seetamurhee, Mudhoobunnee, and Durbhunga, for the fortnight ending Saturday, the 13th June 1874.

A.—STATE OF THE COUNTRY.

2. We have now passed from the brassy heat of the 29th of May into the rainy season. Day by day in the earlier part of this past fortnight, the rain clouds came gathering from the east, and have since given us copious showers day and night, breathing agricultural life into the whole population. Ploughs are everywhere at work. Cultivation seed, of which, according to the statement of every villager, not a maund was forthcoming in some villages, has mysteriously appeared everywhere, and the greater part of the country will, by the time these lines leave the office, have been sown. In Mudhoobunnee seed-grain is selling at Rs. 2 per maund in the bazar. In all the lower lands, wide expanses of dhan are to be

seen green and refreshing; the mango crop has turned out far better than was anticipated, and suttoo and mango-quash mixed, will form the midday meal of many thousands for the next month.

3. From the Durbhunga narrative I extract the following:—

“Everywhere I went I found ploughing actively going on, mostly, however, in lands which produce the bhadoi crop. In Bahera, I am informed, over half of the crop has been sown. Lands not usually tilled with this crop have been sown with it, in preference to keeping them for their usual crop, rice. This is a significant fact. Dhan has been sown more largely in the eastern parts of Bahera and in Singhia than elsewhere. The reports are reassuring as regards the condition of this dhan.”

“The people are gaining heart greatly. The rains seem to have put life into them. The applications for seed-grain have become few. The people know they will be better employed in sowing the seed they possess. I never did believe there was much cause for apprehension on the question of sufficiency of seed-grain in the hands of the people.”

4. From Poopree the accounts are very encouraging:—

“During the last fortnight we have had frequent falls of rain, notably on the 5th instant, when four inches fell in the space of a few hours at Poopree. On my last ride through the sub-division (within the last week), I everywhere found agricultural operations in full swing. Dhan, murwa, sama, sathi, makai, urhur, were everywhere being sown; and although want of seed is in places complained of, yet a good shower has a wonderful effect in bringing it to light. A few days ago two maliks, sharers in the same village, applied to me for advances. One of them hoped that I would lend him Rs. 4,000 to buy dhan-seed for his ryots; the other opportunely enough wished me to purchase dhan-seed from himself which was stored in the village in question. I proposed to advance No. 1 some grain, and that he should exchange it with No. 2 for seed, so they both went away sorrowful, for it was cash that they both wished for.”

5.—*Price-current for the fortnight under*

5. *Condition of the people.*—As the year progresses there is the less to report. The old tales of suffering, distress and emaciation are of the past. The grain has reached its destination. All vacancies have been filled. Every department has fallen into a working groove. The rainfall has been copious. The prospects of the coming crops are good, and there is but little to form the material or groundwork of a narrative.

6. The sub-divisional officer of Mudhoobunnee reports: “The condition of the people can now be pronounced to be, on the whole, very satisfactory.” Mr. Wight, who has recently taken charge of the Kutchra circle, writes: “It would be impossible for any one unacquainted with the facts to discover from an inspection of the villages that there had been distress.”

The Magistrate of Durbhunga reports the condition of those in the receipt of gratuitous relief as satisfactory. “A careful examination of this class, village-by-village, has been undertaken, with the result that a large number have been reduced who are now quite capable of earning their own bread.”

7. Medical scrutiny of all classes, including the paupers, has been undertaken by Dr. MacDonell, through the Poopree circle. The following are the percentages:—

| NAME OF LOCALITY. | Condition. | Amongst persons on charitable relief. | Labouring population. | |
|-------------------|------------|---------------------------------------|-----------------------|------|
| POOPREE | Normal | 27 | 94.75 | 89 |
| | Under-fed | 59 | 4.75 | 9.3 |
| | Emaciated | 14 | .5 | 1.7 |
| SEEBNUGGAR | Normal | 41 | 90 | 83.7 |
| | Under-fed | 34 | 10 | 13.1 |
| | Emaciated | 25 | | 3.2 |
| CHERBIUT | Normal | 35 | 85 | 80 |
| | Under-fed | 44 | 15 | 18 |
| | Emaciated | 21 | | 2 |

| NAME OF LOCALITY. | Condition. | Amongst persons on charitable relief. | Laboring population. | |
|-------------------|------------|---------------------------------------|----------------------|-------|
| PARIHAR | Normal | 36 | 94 | 84.5 |
| | Under-fed | 41 | 6 | 11.7 |
| | Emaciated | 23 | | 3.8 |
| SOORSUND | Normal | 30 | 83 | 72 |
| | Under-fed | 57 | 15.66 | 24 |
| | Emaciated | 13 | 1.33 | 4 |
| JALEH | Normal | 40 | 90 | 83 |
| | Under-fed | 38 | 10 | 14 |
| | Emaciated | 22 | | |
| NOURUNGA | Normal | 24 | 94 | 79 |
| | Under-fed | 44 | 4 | 13 |
| | Emaciated | 32 | 2 | 8 |
| BUNGAON | Normal | 33 | 94 | 86 |
| | Under-fed | 54 | 6 | 12.3 |
| | Emaciated | 13 | | 1.7 |

8. This is for the whole of the relief circles of this sub-division. The normal condition here ranges from 72 to 86, whilst in the more distressed tracts of Durbhunga the conditions were, for normal, 55.5 only. The under-fed here range from 59 to 14, although in one case, the northern one at Soorsund, this class is quoted at 24. The average for the same class at Durbhunga is 23.4.

In Mudhoobunnee, the numbers receiving tickets have been largely increased during the fortnight, as the relief officers have taken over the distribution of relief from the Raj officers.

9. While Dr. MacDonell has run through the Poopree circles, Dr. Coates, the Sanitary Commissioner, has done the same in Sectamurhee. He reports the entire absence of disease out of 50 children found in a gathering of 500 persons. At Amor 10 only were enæmic, and 3 emaciated. I personally attach great weight to these figures, as being evidence to those who saw the earlier state of the population in March, of how really effective must have been the circle relief arrangements, when in a distant corner of a great division, away on the frontier of Nepal, only $1\frac{1}{2}$ per cent. of children are found at all approaching emaciation.

RELIEF WORKS.

10. The system of payment in grain has been everywhere introduced, except in the Mudhoobunnee Sub-division, where no steps up to date have been taken. To give effect to the Government orders, Hattee, which was behindhand in this respect, has picked up ground. Mr. Aikman writes: "I have been told by the laborers that they prefer it to money payments, and the system is reported on all hands to work well. In the case of the Public Works Department, the officer in charge of the work sends a receipt to the nearest golahdar for the amount of grain that may be required; no mates are employed, but the amount due to each gang is weighed out by a paid bunniah, and made over to the headman.

11. In the case of village tanks, payments are made for the whole quantity of work measured, the laborers keeping their own tally and taking their shares.

The rain has partially stopped the work all over these three sub-divisions. In Narayah the rain has been falling steadily every day, and large tracts of low lands are under water. In the drier lands of Poopree, the demands of agriculture have sent the figures of work-people from 25,000 to 14,463. In Mudhoobunnee the numbers have been rapidly decreasing. During the fortnight, from 153,000, the numbers have gone down to 127,000, whilst on Public Works there are 79,000 against 106,000, a total decrease of 63,000.

12. I admit I am puzzled by these figures, and the only conclusion to be gathered is that, of the 232,000 persons hitherto at work, only 63,000 were either ploughmen, or immediately in possession of land which required their attention, the rest having no agricultural employment. This can hardly be the case.

Regarding payment in grain, Mr. Magrath writes: "The late orders of Government have not yet had time to percolate through the sub-division."

13. In the Durbhunga Sub-division there is a diminution on the works of 21,000 persons in numbers. We have in this sub-division the assurance that all labor is now being paid in grain, both by the Department Public Works and the circle officers, and yet only 17,000 maunds of grain have been expended under this head. As an equivalent for the money generally expended, this amount should have been nearly trebled.

It may be the case, as explained by the Magistrate, that the group inspectors first expended the money they had in their hands, and then commenced grain payments; or it may result, as I anticipate, that grain having less attractions than money for purposes of mis-appropriation, we may discover that the grain payments are cheapest for the Government in more ways than one.

14. The following statement gives the daily average of laborers on relief :—

| Name of Sub-division. | Daily average of laborers on relief works. | Public Works. | | Circle Officers. | | Court of Wards | |
|--|--|---------------|--------------|------------------|--------------|----------------|--------------|
| | | Task-work. | Daily wages. | Task-work. | Daily wages. | Task-work. | Daily wages. |

* Complete returns not received.

Consumption and Grain Sales.

15. *Poopree*.—The sales in the northern circles are not as extensive as it was anticipated they would be, now that the Nepaulese are allowed to buy freely. Mr. Forbes lately visited Siripur in Nepaul, and found country rice of a superior quality selling in the hats at about the same price as cleaned Government rice. It would appear that the Nepaulese bunniahs have been guided by the Government price and quite prepared to undersell us slightly. Mr. Forbes reports that it is quite clear the stocks of country rice across the frontier has never yet run so low as on this side. In Durbhunga the demand for Government grain has slackened, although it is still considerable. The introduction of grain wages, which are now general, has deprived the grain dealers of a large number of customers, and has made the trade hesitate in their purchases.

16. If I analyse the figures of these sales I find that in the Durbhunga Sub-division, the largest sales have been in Durbhunga, Mahomedpore, and Hyaghat, Tulee; Hattee sub-division at Dasouta and Singhia.

17. The following statement shows the comparative sales for the past and the present fortnight :—

| Name of Circle. | For fortnight ending 30th May. | | For fortnight ending 13th June. | |
|-----------------|--------------------------------|----------|---------------------------------|----------|
| Durbhunga ... | ... | 19,210 | ... | 24,227 |
| Mahomedpore ... | ... | 28,920 | ... | 38,944 |
| Hyaghat ... | ... | 15,223 | ... | 22,755 |
| Warisnuggur ... | ... | 3,155 | ... | 7,804 |
| Bundhar ... | ... | 1,478 | ... | 2,247 |
| Dosowta ... | ... | 12,568 | ... | 18,796 |
| Gungdah ... | ... | 5,156 | ... | 9,214 |
| Rohur ... | ... | 3,748 | ... | 8,865 |
| Singhiya ... | ... | 9,714 | ... | 11,518 |
| Hirnee ... | ... | 1,312 | ... | 2,113 |
| Hussunpur ... | ... | 2,425 | ... | 5,062 |
| Lehera ... | ... | 2,101 | ... | 2,500 |
| Total ... | ... | 1,02,010 | ... | 1,54,045 |

This shows an increase of sales in every circle.

18. In Mudhoobunnee the figures of comparative sales are as follows :—

| NAME. | Past fortnight. | | Present fortnight. | |
|------------------|----------------------|----------|----------------------|----------|
| | Sales to the public. | | Sales to the public. | |
| Mudhoobunnee ... | ... | 19,105 | ... | 71,746 |
| Oomgaon ... | ... | 12,338 | ... | 21,557 |
| Bukwah ... | ... | 44,022 | ... | 48,105 |
| Moteepur ... | ... | 11,569 | ... | 19,112 |
| Jhungharpur ... | ... | 23,269 | ... | 35,839 |
| Kuchra ... | ... | 1,606 | ... | 24,603 |
| Total ... | ... | 1,11,909 | ... | 2,20,962 |

The large increase of sales has been at Mudhoobunnee, Oomgaon, Jhungharpur, and Kuchra.

19. The above figures, then, show that within the month, 3,32,871 maunds of rice have been readily purchased; whether these sales will continue as briskly is a question on which there is a great difference of opinion among local officers. I incline to the belief that they will not continue, but the sales for July will give us the average sales that we may

expect for the remaining months of July to November. Mudhoobunnee has as yet only expended 2,46,226 out of its total allotments of 11,42,350 maunds stored. Durbhunga has expended only 2,96,802 out of its stored grain. We have, then, for the present, plenty of grain, and there is no immediate necessity for anxiety as to insufficiency. In Seetamurhee I may say the same; the original 10-lakh-allotment has been reduced to 8, which, again, will shortly be reduced to 6 by a transfer of 2 lakhs to Mudhoobunnee.

20. In Seetamurhee the Government sales are not large. With a view of raising the frontier sales in Mudhoobunnee, where there has been a very great demand, I directed special sales at the more northern of the Seetamurhee granaries, but under European superintendence; only 32 maunds were sold in five hours in north Sonbursa, although the Nepaulese flocked in in large numbers. The buyers were comparatively few.

IMPORTATIONS.

I find private imports of the coarser grains coming into Durbhunga. I can hear of no probable imports of rice grain into Durbhunga at all.

Seetamurhee is better off in this respect. Mr. O'Reilly reports: "On Sunday I noticed rice imported by private traders, which is being sold at the same rate as Government rice. In Nepaul, rice is selling at 10 to 10½ seers per rupee. I hear also of Nepalese traders bringing in a better class of rice, and exchanging it for our cargo rice."

Since the late heavy falls of rain I have asked for information in all quarters if prices have at all been affected thereby. The answer is in the negative, except at Durbhunga, where prices are a shade lower.

STORAGE OF GRAIN.

21. The amounts of grain stored are as follows:—

| | Mds. |
|------------------------------------|-----------|
| Seetamurhee | 834,011 |
| Mudhoobunnee | 746,129 |
| Naraya | 639,162 |
| Durbhunga, including Hathco | 1,142,350 |
| Total | 2,361,652 |

ADVANCES.

22. These advances are chiefly occupying attention, but the difficulties attending the giving are very great. The most preposterous applications are made. The Mudhoobunnee sub-divisional officer reports: "Some progress has been made in giving advances both of food-grain and seed to cultivators. Large numbers of applicants for advances have, however, on finding that money cannot be obtained, refused to accept grain. The hopelessness of obtaining even an approximately truthful statement from the villagers is very trying to all the officers concerned. The villagers of Bissumberpore with closed hands implored assistance, as they were on the verge of starvation. They asked for an amount which they never can repay. On inquiry it transpired that the farmer had just given them Rs. 400 worth of rice. This incident is connected with the Mahomedpore circle, but is a type of what is going on everywhere. Naturally officers are afraid of being duped."

23. The following statement shows the advances already made:—

| Name of circle or sub-division. | Advance in money. | Advance in grain. |
|---------------------------------|-------------------|-------------------|
| Durbhunga . | 2,058 | 3,603 |
| Mahomedpore . | 1,297 | 2,273* |
| Ilyaghaut . | 4,331 | 7,046 |
| Warisnuggur . | 737 | 6,382 |
| Bhandhar . | ... | 1,874 |
| Dasowta . | 11,432 | 10,858 |
| Gungdhar . | 8,673 | 1,812 |
| Rohar . | 5,000 | 1,478 |
| Singhia . | 7,897 | 2,428 |
| Hirnee . | 9,777 | 4,920 |
| Hussunpore . | 749 | 105 |
| Seyra . | 12,467 | 1,818 |
| Poopree .. | ... | 6,341 |
| Seetamurhee .. | ... | 2,264 |
| Naraya .. | Not received. | |
| Total ... | 64,418 | 53,202 |

* Later returns not received. A special officer is on deputation in this circle for making advances.

CHARITABLE RELIEF.

24. As regards charitable relief, the recipients now number 139,871, excluding Seetamurhee and Naraya for the latter of these from returns just received, add 22,383, total 162,294. The daily average in Durbhunga and Hathee numbers 111,178 persons, which is an increase of 8,562 over the daily average of the last fortnight. The numbers are increasing, and it is anticipated that in Durbhunga alone there may soon be 130 to 150,000 persons. The following statement may not be without interest:—

| | | | | Government relief at Home. | In Poor-house, |
|--------------|-----|-----|-----|----------------------------|----------------|
| Durbhunga | ... | ... | ... | 9,595 | 154 |
| Mohamedpore | ... | ... | ... | 7,884 | 81 |
| Hyaghat | ... | ... | ... | 8,571 | ... |
| Warrismuggur | ... | ... | ... | 6,396 | 28 |
| Bandhar | ... | ... | ... | 5,110 | ... |
| Dasowta | ... | ... | ... | 15,159 | 81 |
| Gungdar | ... | ... | ... | 6,649 | ... |
| Rohur | ... | ... | ... | 9,444 | 65 |
| Singhia | ... | ... | ... | 14,802 | 196 |
| Hirnee | ... | ... | ... | 8,000 | ... |
| Hussanpore | ... | ... | ... | 15,000 | 33 |
| Lehra | ... | ... | ... | 3,930 | ... |
| Total | | | | 110,540 | 638 |

There are, then, in this sub-division, 638 persons in poor-houses, and 110,540 receiving Government relief.

25. In Poopree sub-division the distress is far less. There are only 413 in poor-houses and 6,903 in village relief lists.

The figures of persons on charitable relief, then, are as follows:—

| | | | | | |
|----------------|-----|-----|-----|-----|---------------|
| Seetamurhee | ... | ... | ... | ... | Not received. |
| Poopree | ... | ... | ... | ... | 7,316 |
| Durbhunga | ... | ... | ... | ... | 37,819 |
| Hathee | ... | ... | ... | ... | 73,359 |
| Mudhoobunnee | ... | ... | ... | ... | 21,417 |
| Naraya | ... | ... | ... | ... | Not received. |
| Since received | ... | ... | ... | ... | 22,383 |

Exclusive of over 6,000 maunds removed.

No. 3111F, dated Sarun, the 17th June 1874.

Memo. by—J. S. DRUMMOND, Esq., Offg. Magistrate and Collector of Sarun.

FORWARDED to the Secretary to the Government of Bengal in the Statistical Department, Calcutta, for information, with reference to his circular No. 80 of the 17th November 1873.

Narrative of Scarcity and Relief in Sarun District for the fortnight ending 13th June 1874.

A.—STATE OF THE COUNTRY.

Abundance or Scarcity of supply in the Bazar.

PRIVATE trade has been less active this fortnight. At Revelgunge the importations, which last fortnight amounted to 59,800 maunds, had decreased by 21,000 maunds. In the Sewan Sub-division, too, importations had somewhat fallen off. The bazars in the interior generally have, however, continued to be sufficiently supplied. While importations have diminished, prices have in many places somewhat fallen. This fall in prices is due partly to the favorable prospects held out by the early setting in of the rains, but in some measure also, no doubt, to the effect of the large grain advances to the cultivators now being made.

2. In the Sudder sub-division during the fortnight the imports were, at Revelgunge, 38,700 maunds; at Dooreegunge, 3,580 maunds; at Maharajgunge, 1,301 maunds; from Chumparun, 835 maunds; and from Patna 941 maunds. The exports to Tirhoot, Chumparun, and Patna, amounted to 11,175, 1,606, and 145 maunds respectively.

3. Major Jackson, in charge of the relief sub-division of Chupra, consisting of the Chupra thana, reports as follows:—

“Having been principally engaged in ascertaining the general wants of the inhabitants in Chupra thana, caused by the failure of the past year’s crops, I have had little opportunity of personally examining into the state of the bazars, but have, wherever the occasion offered, inquired into the subject. From Semaria to Cheerand, and on to Singhai Ghât, there is no want of grain, large stores existing in several places. In the interior the tehsildar informs me the small bazars are tolerably well supplied, petty bunias bringing their small stocks on the days fixed for the fairs to different points in the district, whence the villagers can supply themselves.”

4. Mr. Tonnerre, in charge of the Manjhee sub-division, comprising the Manjhee thana, makes the following report:—

“I believe that all over the sub-division there is food to be had, but the prices have well nigh put it out of the reach of most of the people.

“There are no considerable marts in the sub-division. The major part of its supplies is drawn from Revelgunge and Maharajgunge. The people at Manjhee trust mostly to Revelgunge bazar for their food.

“During my frequent rides through the country, I have not seen more than twenty pack-bullocks carrying grain.”

5. Mr. Barry’s narrative for the Pursa sub-division has not yet been received. In one of his diaries he notes the fact of grain being reported scarce in the Jelalpore and Tehtee circles. Large advances of Government grain are, however, being made there.

6. The following is Mr. Wright’s report of the Sewan sub-division.

“The bazars in this sub-division continue to be fully supplied. According to the returns received, private importations have not been so large during the past fortnight as during the previous one. I am inclined to think that this is owing more to the imperfect means we have at our disposal for collecting information regarding importations than to an actual falling off in the amount of grain imported. Some of the persons employed in collecting the information have other duties to perform (two of them being Abkari darogas), and may, therefore, fail to obtain full information regarding the importations. From the returns received during the fortnight, the imports at Siswan, Darowlee, Sewan, and Guthni, amounted to 60,682 maunds of food-grains. No reports have been received regarding exportation.”

As a similar cause must have operated during previous periods of report, the falling off in importations can hardly be due to the reason assigned.

7. Regarding the Hutwah sub-division Mr. Hodgkinson writes thus:—

“Imports from Goruckpore on the north and Guthni on the south still continue on a small scale.

“Prices have fallen in the bazars, partly owing to the improvement in prospects from the recent rain, but mainly to the increase of supply in the hands of the people, due to the large advances in grain which have been given out.”

Prices-current List,

| DESCRIPTION OF GRAIN. | RATE PER RUPEE. | | | |
|-----------------------|-----------------|----|------------------|----|
| | Hutwah bazar. | | Meergunge bazar. | |
| | S. | C. | S. | C. |

| Wheat | 13 | 8 | 13 | 0 |
| Peas | 15 | 6 | 15 | 6 |
| Makai... .. | | | | |

8. *Kind and price of grain selling at the different marts.*—The kind and price of grain selling at the principal marts, and at the thanas and outposts, are given in the annexed statement.

9. *Stock of food in the hands of the people.*—On this head Major Jackson reports as follows, and judging by the number of applicants for advances of Government grain, his conclusion has general application:—

"It is extremely difficult to get any information on this point. I can only gauge it by the appearance of the applicants for relief, and the numbers of these which pour in daily. The ryots are not very clamorous, but still evidence exists that such stores must be dwindling down and must be supplemented by aid from Government.

10. Mr. Tonnerre, the sub-divisional officer of Manjhee, writes thus:—

"In every village through which I have been, the ryots complained of great scarcity of food. The better classes, those who will not go on to the relief works, are now suffering much, and are unanimous in saying that they could not have lived but for the timely advances of grain which they receive from Government. This they tell me wherever I go."

Rainfall.

11. There has been general rain throughout the district, and agricultural operations are in most places in progress. Here at Chupra there has been a fall of about 3 inches.

12. Mr. Tonnerre writes:—

"It rained on the 21st May, the 2nd, 5th, 8th, 9th, and 10th June. The rain was general over the sub-division on the 8th, 9th, and 10th, and was heavy enough to do much good."

13. Regarding the Musrukh sub-division Mr. Hudson reports:—

"The first indication in this sub-division of the approaching rains was given by a very violent storm of wind and a fall of 2 inches of rain at Rajaputty on 1st instant. On the 2nd also the relief superintendent reported rain from Maharajgunge. After this slight partial showers fell in many places during the ensuing week; but the commencement of the rainy season may be fairly dated from the 10th instant, when a steady downpour, unpreceded by thunder, continued for several hours during the day."

14. The following is the Sewan sub-divisional officer's report:—

"During the first week of the fortnight slight rain fell on three occasions, but during the second week we have had heavy falls of rain frequently. The total fall during the fortnight, as measured by the gauge at Sewan, was 5·61 inches. The rains may now be said to have regularly set in."

Mr. Rattray says that "rain has been heavy and pretty general throughout the sub-division during the past fortnight, and labor in the fields is coming into demand."

15. And Mr. Hodgkinson writes thus under this head—

"The rainfall has varied greatly in different parts of the sub-division, being greatest at Hutwa and in the extreme north-western Zillah Marur, and least in Bhorey* and Dhobowl zillahs, where, until yesterday, none had fallen sufficient to do any good; yesterday's rain was, I believe, pretty general. At Hutwa the rainfall was—

State of the Crops.

16. The *cheena* has, after all, turned out in most places a fair crop, and, where standing, has been greatly benefited by the timely rain. Indigo prospects have also improved, the rain admitting of fresh sowings.

17. Of Chuprah sub-division, Major Jackson writes thus—

"The only crops on the ground at present are *cheena*, confined to the environs of villages where irrigation from wells can be had. These are very flourishing. Ploughing is now going on largely in consequence of the recent rainfall."

18. Mr. Tonnerre reports of the Manjhee sub-division,—

"Ploughing has begun everywhere, the rain has softened the ground very considerably, and sowing will soon begin. There is a considerable quantity of millets as far as I could see, and I have frequently seen patches of dhan ready to be transplanted: *kodo* and *sathee* have been sown in several parts of the thana. I think that seed is procurable by those who have the money. I am pushing on the advances as rapidly as possible. There is a scarcity of plough-cattle, and I have seen whole fields untouched because the ryots had no cattle.

"Many have been obliged to sell theirs to supply themselves with food; mahajuns have seized others for debts due, and many have died."

19. Seed-grain is, I believe, everywhere procurable by those who have the means, and advances for the purchase both of seed and of plough-cattle are being made wherever needed.

20. Concerning the Musrukh sub-division, Mr. Hudson writes—

"Besides the early sowings of bhadoi and aghanee crops on particularly favoured spots which have retained their moisture, there is no crop calling for attention now except the cheena. It is the first time that I have ever seen this crop in any great abundance, and it would be impossible to fail of remarking its luxuriance and rapid growth, the facility with which it is raised, and the extraordinary aptitude with which it fills up the driest and most hopeless interval in the agricultural year. On my way to Rajaputty on the 12th, I could not but notice how this crop was flourishing in the neighbourhood of Doomarsun, where otherwise the country is all waste and barren."

21. The sub-divisional officer of Sewan submits the following report:—

"The young crops on the ground have been greatly benefited by the rain which we have had during the past fortnight, and the ryots are now busy ploughing their lands and sowing the remainder of their bhadoi and early and late rice crops. Murwa is being transplanted."

The Sub-Deputy Collector, Baboo Rajkeshore Narain, reports as follows of the crops in thana Sewan:—

"Since my last report on the subject, there has been rain several times in different parts of this ilaka, which has done considerable good towards agriculture. Every standing crop looks green and in full thriving state. The sugarcane that was subjected to the severity of excessive heat and west winds, has now begun to resuscitate; marwa, tenguni, &c., are already sown, and janera also is being sown in that part of the ilaka where it had rained sufficiently. Paddy seeds are also being sown in suitable fields. In short, works in agriculture at present are busily going on."

Of thana Darowlee he writes—

"The state of the crops is much the same as in Sewan thana. The ilukas of Mairwah and Siswan outposts have got good showers of rain on different dates, but those of Darowlee khas and Roghoonathpore have not been so fortunate in this respect. The rain of the 2nd fell everywhere, but not everywhere in the same quantity. The standing crops, viz. millet and sugarcane, &c., are well thriving. Indigo seeds, sown long ago, are now germinating; marwa, kodo, tenguni, &c., are mostly sown by this time, but sowing janera has not commenced as yet.

"Since the Sub-Deputy Collector visited the Darowlee thana there has been a copious fall of rain both in Darowlee khas and Raghooonathpore outpost.

"Of the Barowlee thana the Sub-Deputy Collector says: It is the most fortunate of the thanas of this sub-division in respect to rain. The standing crops look deep green and thriving, and give full hope for the future. Indian-corn has commenced to be sown in the north-western part of the thana, and in some other places, too, where the soil had sufficient moisture. Kodo, murwa, sawan, tenguni, and other bhadoi crops, are being busily sown, and in many fields previously sown the seeds have germinated. Paddy in chowrs has grown up to 6 to 9 inches. In short, every crop at present gives a fair prospect."

22. Regarding the Hutwa sub-division Mr. Hodgkinson writes thus—

"The cheena is a very fair crop indeed, and what remains in the fields will all be gathered in within the next week.

"Murwa is being planted out where rain has fallen in sufficient quantities. The early dhan in the northern zillahs looks well. Makar is now being sown largely. There is at present every prospect of a bhadoi harvest about 10 or 12 days earlier than usual, and if this prospect continues, the period for which actual famine was apprehended, will be greatly lessened."

23. The prospect here held out is a general one, and this merciful interposition of Providence is a subject for much thankfulness, and has greatly alleviated the anxiety hitherto felt as to the future.

Condition of the people.

24. Though the favorable expectations of the next harvest have removed a cause of dread as regards the more distant future, the condition of the people cannot but continue to be a source of constant anxiety during this month and the following months of July and August. Throughout these hard times there has been but little diminution in the pressure put upon the ryots by their zemindars and mahajuns, and with the exhaustion of the local stocks, a very large proportion of the entire population will remain dependent on Government support throughout these months.

25. Regarding the Chuprah sub-division, Major Jackson reports as follows:—

"No actual cases of starvation have come to my notice. Mr. Becher reports the people about Gurkha to be apparently somewhat hard-pushed. This shall meet with my personal attention in a few days, and immediate steps will be taken to relieve them should there appear occasion for it. Few applications from that district have, however, come in, and it may appear that they are no worse off than their neighbours. A report will be made at once, should it appear necessary to act at once."

26. Of the Manjhee sub-division, Mr. Tonnerre reports thus—

"Amongst those who come for advances, I have seen several people in such a weakly condition that I have had to give them there and then charitable relief, to last them a few days till the lists, &c., were ready."

"It is needless to say that there are numbers of emaciated people amongst those who seek charitable relief. They are all being provided for."

27. Concerning the Musrukh sub-division, Mr. Hudson makes the following report:—

"No alteration in the condition of the people has come under my observation during the past fortnight, unless, indeed, it be one for the better, cheerfulness and activity being evoked everywhere by the assured prospect of the rains. These have now fairly set in, and agricultural operations are everywhere in progress. The labor imposed by the Government order for distribution of the stores of grain among the ryots, before the rains impede transport, has kept me a close prisoner at Musrukh during the greater part of the last 14 days, but I have spent a day at Ramcollah, and have twice been enabled to visit Rajaputty and Gopalpora. I have thus seen some 15 miles of country in the least fortunate portion of the thana, which is not, therefore, likely to mislead into over-estimation of the welfare of the whole. I have nowhere seen lands lying idle, but, as above mentioned, have observed that preparations for sowing are being actively carried on. The early rain has saved the indigo crops of Rajaputty factory to a considerable extent, and the "Mahai" will consequently provide unexpected employment for a large proportion of the laborers now on the relief works there. Indeed Mr. Llewellyn went so far as to say that he was unwilling that any of the coolies in his neighbourhood should leave for the Soane Canal works, as there would not be more than he could find employment for during the rains.

"Baboo Taraprasad, the relief superintendent, has been on tour in the Bussuntpor thana during the whole of the past fortnight. He has been chiefly in the neighbourhood of Bagowra and Maharajunge, but has also visited Seesay and Bussuntpore. Of the former neighbourhood he writes that the "cheena" crop about Bagowra looked better than he has seen it elsewhere, and the general condition of the people did not appear bad. He learnt that the zemindar of Indowlie, and another large landholder, Mahant Raghunandangir, had considerable stocks of grain, but that none of the ryots had any at all. Baboos Sadhu Saran Sahi and Ram Coomar Sahi are also reported to have stocks of grain.

"Of the bazars, the relief superintendent writes that there is a good supply of food at Maharajunge and a bad one at Bagowra; and prices are higher at the latter place * * *. In his letter * * * dated 2nd June, the Baboo tells me that the general state of the country looks hopeful, and the cultivators are everywhere busy about their fields. On the 5th, however, being in the neighbourhood of Chainpore, and having visited Madhopore and several other villages, he says that the cultivation seemed to be at a standstill in all of them.

"The relief superintendent gives high praise to the Chainpore maliks, and also to Baboo Sadho Saran Sahi and Ram Coomar Sahi of Bagowra. The last-named native gentleman has expended Rs. 1,500 of his own money on the excavation of a tank as a relief work; and Baboo Sadho Saran superintends a Government tank, the work on which has been performed at a very small proportionate expenditure. Baboo Gajadher Persad of Chainpore also has been supporting nearly 1,000 labourers daily in various kinds of work."

28. The sub-divisional officer of Sewan reports as follows:—

"There is no very material change to report in the condition of the people. Our relief works have not as yet been closed by the rains setting in, and the poorer classes are still able to find work on them to support themselves. Agricultural operations, which are now coming into full swing, are also giving employment to numbers, and will furnish employment for thousands more as the season advances. Arrangements are being made to enable ryots to employ people of the labouring class who may have no lands of their own to cultivate throughout the rain season, or till the bhadoi and aghani crops are reaped. As soon as these arrangements are completed, there can be no cause for further anxiety about the people, if the bhadoi crop turn out well. For beggars and people unable to work, arrangements for the distribution of gratuitous relief have been made.

"The Sub-Deputy Collector, Baboo Rajkeshore Narain, reports of the people in the Sewan that they are now in far better condition. Of the people in Darowlee he says much the same; and of Barowlee, he reports that the people in this ilaka are in pretty good condition. Distress is evidently relieved, and none is now seen in extraordinary distress, and even ordinary distress is removed by means of famine relief in various shapes."

29. Concerning the Hutwa sub-division, Mr. Hodgkinson writes:—

"I have nothing to add to my former reports on this head."

30. *Known Cases of Misery and Starvation.*—There have been no such cases reported.

31. *Grain-thefts or Robberies.*—There have been three cases of grain-thefts during the fortnight.

The accompanying comparative statement shows the number of offences against property involving an element of theft, committed during the month of May in the years 1872, 1873, and 1874, respectively, as required by the Government circular No. 4081 of the 26th December last.

B.—RELIEF WORKS.

32. The annexed statements show the relief works in progress and the number employed thereon. The mean daily number employed during the fortnight was 229,481, and the number on the last day was 208,392. While the numbers have fallen off very largely in the Hutwa sub-division, they have increased elsewhere. The fact that in other parts of

the district there has been no falling off, but on the contrary an increase, is due partly to the fact that the rates at first (under a misapprehension since corrected) fixed for the sales of grain on the relief works proved unduly attractive, and partly to the circumstance that it was only towards the close of the fortnight in many parts of the district that rain fell in sufficient quantities to admit of agricultural operations being generally commenced. Still, allowing for

* As beyond the ploughing and sowing which are done by the ryots and their families themselves in a year like the present, there can be no general demand for field labor until the transplanting of the dhau and weeding operations are taken in hand.

agricultural operations, owing to rain at an earlier period, being undertaken sooner in the Hutwa sub-division and adjoining tracts,* it is difficult to account for the very large falling off in the numbers on the Hutwa works, except on the supposition that many of the works must have been closed; and I incline the more to this hypothesis, as I find that in the adjoining sub-divisional circle, in Barowlee thana, which has been particularly fortunate as regards rainfall, the mean daily number employed on the relief works had increased during the fortnight. Mr. Hodgkinson furnishes no explanation on this point. There is some immigration to the works from Goruckpore, showing that all are not able to obtain work there. It is proposed to close all the relief works from the 1st July; and meanwhile, in order to lessen the grain expenditure, it is in contemplation, now that the season for general agricultural operations is approaching, to reduce the daily wages to the barest subsistence rates of 1 anna 9 pies, 6 pies, and 4 pies for men, women, and children of different ages, or their equivalent in grain of 12, 9, 6, and 4 chittacks.

Sale of Grain to Labourers on the Works.

33. During the fortnight about 24,000 maunds of grain only have been sold on the works. This is due to grain sales being suspended in Chupra and Manjhee sub-divisions owing to apprehended exhaustion of stocks.

Collection and Despatch of Labourers to Soane Canal Works.

34. None have yet been sent, but the first batch, though of a very limited number, is under despatch, and it is hoped that the example having been once set, many will now again agree to go.

State Emigration to British Burmah.

35. Orders have lately been received to resume operations, and head-money of one rupee for each emigrant is offered to recruiters. During next month, when the relief works are closed, it is hoped that more emigrants may be got.

C.—TRANSPORT OF FOOD.

36. Mr. Hodgkinson reports thus under this head:—

"The transport of the grain which lay at Revelgunge is just finished. The last carts are expected to arrive to-day. Some 10,000 maunds remain to be supplied by Messrs. Schoene, Kilburn and Co.; it will, on arrival at Patna, be transported in boats, some up the Daha river to Umbicapore, and the rest up the Khunwali river to Chamookha and Kuttaya."

D.—STORAGE OF GOVERNMENT GRAIN.

Distribution and expenditure of Government grain.

37. The usual statement accompanies.

Gradual expenditure from Government grain stores, and possibility of more grain being actually required.

38. The allotment of 5,56,000 has been reduced by 60,000 ordered to be sent immediately to Tirhoot; and it will be seen that 80,000 maunds have been expended up to the close of the fortnight, leaving an unexpended balance of 4,16,400 maunds. According to the data available hitherto, the advances to cultivators, if they should prove to be needed in all villages on the present scale of allotment, would, it is now found, require six lakhs of maunds alone. To this must be added for relief-works now being carried on, say, for a month and a half's expenditure in Sewan, Musrukh, and Pursah sub-divisions, and for one month's expenditure in Chuprah and Manjhee, a further quantity of grain equivalent to 1,00,000 maunds. The result would appear to be that a further allotment of about three lakhs of maunds may need to be provided, and this without allowing for wastage, or any reserve to command the market. *Vide statement enclosed.*

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

39. The statement accompanying shows the advances of grain made up to date, except for Pussuntpore, the figures for which have not been yet received; and money advances are shown under head "Financial results."

40. Mr. Hudson writes as follows under this head:—

"In the matter of advances, the Government work progresses very slowly; for the quarrels and jealousy of ryots, maliks, and thikadars seem to place a continuity of obstacles in the way of their being made. In my opinion, if the advances are to be really made in time for them to help the ryots over the crisis of their distress, the agency of the maliks must be dispensed with altogether. When, agreeably to Government instructions now in force, the

maliks are applied to either to take the advances themselves on behalf of the ryots, or to guarantee their repayment of the loan, a tangle of difficulties at once crops up; and whereas in cases where the maliks do not appear at all, and the putwari's attendance is dispensed with, the cases are soon ripe for action to be taken. In those where they do intervene, the longer the cases are labored on, the further off do they appear from consummation.

"On the one hand, the maliks will only support and be responsible for the ryots in their own 'khas' pattees; and on the other hand, the same ryots are found both in a 'khas' pattee and in an 'ijmalee' one; in one that is held by a thikadar, and in one that remains in the exclusive possession of the malik: added to these causes of delay, are the attempts of persons to divert to their own ends the endeavours of Government to fulfil its obligations. For instance, the relief superintendent ascertained at a village named Madhuapore, near Bugowrah, that certain parties to a case before the High Court had applied for an advance in order to construct evidence to support their claim. Again, there are maliks who reply to the Government invitation to assist their ryots by professing to have made every arrangement, and whose sole object is to avoid doing anything, and to stave off all Government intervention between them and their tenants. Such was the case at Harnatar, where the relief superintendent found that absolutely nothing had been done, although the zemindar had replied to my notice warning him of an application from his ryots, by making the above declaration. It is certainly clear that if anything is to be done in time, we must act without the maliks, and a discretion to do this was given to all officers."

41. In Major Jackson's sub-division, which at present only consists of three circles, 13 group superintendents have been appointed, and the work of preparing the village lists is in progress.

42. Mr. Tonnerre, concerning the Manjhee sub-division, reports as follows:—

"The grain is being weighed out all day to those who take away the village advances.

"Nearly every morning I have ridden out into the interior, gone into villages, questioned ryots as to whether the lists were being drawn up fairly or not, &c.

"I have ascertained that maliks are quite averse to their ryots receiving Government advances; they employ every means in their power to thwart its agents; when putwarees can be got away in time it is always done, the maliks imagining thereby that they have washed their hands of the whole thing.

"When the putwaree has been set to work before the malik could interfere, the latter's only aim is to diminish the sums total of maunds and rupees as much as he can.

"A man with a large family requires 10 maunds, and the putwaree puts down four, without informing the applicant.

"Even among themselves the ryots have but one object, *i.e.*, to be helped as soon as possible, and 'the devil take the hindmost.' If any ryot is absent from his village at the time of drawing up the list, he is omitted; no enquiries are made about him. There are many chances that in every list many are omitted who should have been included, and who apply for help after the bond has been signed and the first instalment of grain issued.

"This has happened to me *three* times. I shall in future delay every issue of advances for *two* days after the preparation of the list to allow representations to be made in time.

"Petitions are also presented by mooktars to prevent the issue of advances to such and such a one, on the ground that his land is mortgaged over and over again.

"It would take a revenue court with a large staff to dispose of such matters.

"Ryots do not hesitate sometimes to threaten the group superintendent that he may pass excessive lists for advances.

"It will be seen how many difficulties beset the drawing up of such lists with due care and yet with rapidity.

"I hold office daily, and my residence is crowded with putwarees, ryots, and beggars. I am getting everything decentralised, and all applicants will, as soon as possible, be referred to their respective circles.

"I have divided the sub-division into five circles, viz: Pursah, Ramgurh, Bunwer, Taintpore, and Chainpore. The latter I have to manage myself, as there is no person eligible for the post of circle officer in that part of the sub-division.

"I have appointed 16 group superintendents, 15 on Rs. 10, and one on Rs. 15 per month. The latter is in Chainpore, and in charge of the largest group.

"There being no one on the spot to control him, I gave him Rs. 15 to make it worth his while to retain his post."

43. I quote the following from Mr Barry's narrative (subsequently received):—

"For the purpose of making advances and for charitable relief, this sub-division has been divided into 9 circles. Of these 7 are in Pursa thana, and 2 in Dighwarrah, the latter having as yet remained in abeyance, there being no urgent distress among the people. Of the 7 circles of Pursa, the boundary and villages of the following have been carefully defined, viz:—

1. Tehtee, Mr. Macgregor, = 52 villages.
2. Telelpore ditto = 36 ditto.
3. Arna, Mr. W. L. Llewellyn = 38 ditto.
4. Nowada, Mr. Tullock = 34 ditto.
5. Cheytun Pursa, Moonsiff = 49 ditto.
6. Seetulpore, Sheikh Abdool Ali = 75 ditto.

"Advances to a large extent have already been made in the first four of these circles, and the remaining two circles are in a forward state. A great number of lists have been given in to me, which belong to these circles; these lists will be sent to the circle officers for disposal. Group superintendents for every 10 or 15 villages have been appointed in all these circles at salaries from Rs. 10 to Rs. 15 per mensem, and care has been taken to select men of influence and of great local knowledge. These have been readily found. So I am confident the advance will be made in a business-like manner, and that no one will get grain who is not really in need of it. The amount of grain to be given to each ryot is distinctly specified in the lists sanctioned.

"With regard to the remaining circle, viz., Merondhi, in charge of Mr. T. Wilson, nothing has been done, as Mr. Wilson has been absent during the fortnight at Durbhunga. The assistant, Mr. Simpson, at present in charge of the factory in Mr. Wilson's place, has only been a few months in the country, and is of course useless for this kind of work. If Mr. Wilson does not return soon, other arrangements will have to be made. It is said that Mr. Llewellyn of Ramcolla is looking after this circle, but I have received no replies to my letters addressed to the circle officer. The villages that do not fall into any circle, about 200 in number, will be taken up and disposed of by myself. The work is progressing, and several group superintendents have been appointed, and the villages in their groups determined. Of course great care is required to see that no one village is included in two circles or groups. But this is very difficult, as so many villages bear the same name, that mistakes will occur, and a few miles from their factories, it is astonishing how ignorant Indigo planters are.

"I have found that in some villages two circle officers have made advances; but this has arisen from the fact that both factories had leases, or thikas, of portions of the village from different proprietors, and each circle officer gave advances to his own ryots. There is no objection to this, but at my interview with circle officers (and I have seen them all), I have warned them how careful they must be in cases of this kind, to see that ryots do not take advances from both circle officers. The English circle officers are very chary in making advances, as they are directly interested in keeping their ryots solvent; for if they advance too much, the ryots will become hopelessly involved, and will be unable to pay their rents to the factories. If anything, there will be a tendency to give too little rather than too much. They report that each applicant generally gets only about three maunds for three months, which is very little, considering that, as a rule, there are six to ten persons depending on each householder. Nothing is being done in haste, and no advances are being made without careful local inquiry. I have found no difficulty in dealing with the putwarees."

44. The Sewan sub-divisional report is to the following effect:—

"Mr. Rattray reports as follows under this head:—

"The preparation of village lists is progressing fairly in most of the relief circles. Lists of 282 villages have been prepared up to date, showing an application for 43,991 maunds and 35 seers, and the grain is now in course of distribution amongst the applicants. I have great difficulties to contend against in the preparation of the lists. Zemindars, with very few exceptions, have refused to stand security for the grain now being advanced, and by their influence over their putwarees and tenants, are throwing every obstacle in my way towards the completion of the lists. Since the promulgation of the Government order putting a stop to all grain advances, except cleaned rice at 12 seers for the rupee, applications by maliks and zemindars have ceased."

"Instructions have been issued to Mr. Rattray in accordance with the Magistrate-Collector's order, to explain to all maliks, that as they are certain to be held responsible in the end for the recovery of the advances to their ryots, it is more to their interest to allow the lists to be checked by the putwarees than by preventing the attendance of the putwarees to risk persons being given advances without reasonable security."

45. And Mr. Hodgkinson writes thus under this head:—

"Advances to ryots have been made on a large scale during the past fortnight, 24,411 maunds 32 seers 6 chittacks have, according to the last reports received from the different store-houses, been actually distributed."

F.—CHARITABLE RELIEF.

46. The number receiving this description of relief is shown in the annexed statement. The large falling off is due to non-receipt of most of the returns, owing to change of system under which returns are now sent to the sub-divisional officers.

47. The Chuprah sub-divisional officer, Major Jackson, reports thus:—

"For this purpose, 6 circles exist respectively at Arwa, Gurkha, two in Chuprah, one at Revelgunge, and one at Goldengunge. The relief centre at Goldengunge has only just been opened. It has been entrusted to a respectable resident of the locality, named Sew Govind Sah, with a mohurrir and two peons to assist him. No actual disbursements have as yet been made, but a list of about 80 purdah women worthy of relief has been received, and their wants will be immediately attended to. Some distrust and fear exists in this new circle as to the meaning of the measures being taken, but this, as in other instances, will no doubt disappear as the scheme becomes better known."

48. The following may be quoted under this head from Mr. Hudson's narrative of the Musruk sub-division:—

"The relief superintendent reports to me that he has introduced the system of giving thread to poor weavers in Baboo Sadho Saran's circle. Mr. Llewellyn of Rajaputty, also,

has a very large quantity of ready spun thread, and has instituted a search for weavers in his neighbourhood to convert it into cloth. Here at Gopalpore, as well as in my own special circle at Musrukh, the distributions on account of cotton spinning, and also of alms to the helpless, are very considerable; but I must not fail to notice a most characteristic feature of the results of Government action in the matter of charitable relief. A number of Domes, strong, able-bodied men and women, came to this relief centre yesterday to receive charity. When asked why they did not seek employment on the tanks and roads, they boldly expressed their disinclination to labor, and stoutly refused to do so. Such are some of the piratical attempts upon the Government benevolence, which throw such obstacles in the way of its being put in practice. The very thieves by profession come forward to share, as of right, in that which all parties are prone to regard as a universal dole."

49. The sub-divisional officer of Sewan has now opened a poor-house at his station where cooked food is given.

50. The following is Mr. Hodgkinson's report of the Hutwa sub-division :—
"A large increase is observable under this head.

| CIRCLE. | Average number receiving cooked-food. | Number receiving uncooked-food. | Number receiving food in payment of wages for cotton spinning. | Number specially relieved by village officer under (d). | TOTAL. |
|--------------------------------------|---------------------------------------|---------------------------------|--|---|--------|
| Hutwah | 61 | 939 | 315 | | 1,315 |
| Sreepore | 186 | 481 | 60 | | 730 |
| Bhorey, Dhobowl and Chumookha | 180 | 470 | 201 | | 851 |
| Muniarah | 11 | 22 | | 80 | 118 |
| Jugdishpore | 61 | | 30 | | 93 |
| Chukkia | 42 | | | | 42 |
| Gopalgrunge | 14 | | | | 14 |
| Sonowhula | 11 | 192 | | | 233 |
| Bunjaria | | 116 | | | 116 |
| Kuttayah | | 23 | | | 23 |
| Kulula | | 10 | | | 10 |
| Total | 601 | 2,255 | 600 | 80 | 3,518 |

"Group superintendents have been appointed in Marur, Dhobowl, and Bhoney Zillabs, the circles under Mr. Browne; and also in the Maniarah circle under Mr. Reid. In the Sreepore circle, the putwarees, who have on an average five or six villages under them, will report directly to Mr. Buskin, who is in charge of it. Arrangements for the rest of the estate will be completed very shortly. In the meantime, direct enquiries regarding persons requiring relief are being made from the putwarees who came in with the ryots for grain advances; and this plan has hitherto worked well, but of course some superintendence will be necessary in the future."

G.—THE FINANCIAL RESULTS OF THE FORTNIGHT.

51. The financial results of relief operations are given below :—

| | Rs. | A. P. | Rs. | A. P. |
|--|----------|-------|-----------|-------|
| Total expenditure as previously shown ... | | | 19,11,668 | 3 3½ |
| 1. Expenditure incurred by the Executive Engineer of Sarun, for district relief works, vide statement of labor, from 31st May to 13th June 1874 ... | 1,89,079 | 4 0 | | |
| 2. Expenditure incurred by the Executive Engineer of Sarun, for protective works in the town of Chupra, from ditto to ditto ... | 1,577 | 13 9 | | |
| 3. Expenditure incurred by the Executive Engineer, Lower Gunduk division, for relief works in connection with the Sarun embankment, for the fortnight ending 11th June, 1874 ... | 1,480 | 8 0 | | |
| 4. Amount advanced for relief works in the town of Chupra under the immediate supervision of the Magistrate viz.— | | | | |
| For levelling the Serni compound ... | 700 | 0 0 | | |
| For digging tanks ... | 1,000 | 0 0 | | |
| For repairing roads ... | 400 | 0 0 | | |
| | | | 2,100 | 0 0 |
| 5. Amount of tuccavee advances made to the following persons for purchase of seed-grain and plough cattle, viz.— | | | | |
| To Bhagwan Sahay of Peteree, pergunnah Barae ... | 19 | 0 0 | | |
| To Raghoonundun Ravat of Sawaree, pergunnah Bal ... | 45 | 0 0 | | |
| To Sheo Nundun Singh, of Toleh Baharepore, pergunnah Toleh ... | 200 | 0 0 | | |
| To Ram Anooogroh Singh, of Toleh Baharepore, pergunnah Toleh ... | 120 | 0 0 | | |
| | | | 384 | 0 0 |

| | Rs. | As. | P. | Rs. | As. | P. |
|--|--------|-----|----|--------|-----|----|
| 6. Amount advanced under Land Improvement Act for digging tanks and wells, as follows :—viz. | | | | | | |
| <i>For Wells.</i> | | | | | | |
| To Hanmeat Sahay of Gopalpore Chukdeh, pergunnah Bal ... | 225 | 0 | 0 | | | |
| To Nursingh Sabay of Shah Nawaz- pore, pergunnah Goah .. | 249 | 0 | 0 | | | |
| To Beejadhur Mohish of Ktaya, per- gunnah Bal ... | 99 | 0 | 0 | | | |
| To Raghoober Dyal of Mohamed- pore, pergunnah Goah ... | 100 | 0 | 0 | | | |
| <i>For Tanks.</i> | | | | | | |
| To Ram Nihora Pandey, of Choorma, pergunnah Baral ... | 3,600 | 0 | 0 | | | |
| 7. Amount advanced to Collectorate Nazir for conveyance of Govern- ment grain into different places of storage in the interior of the district ... | 6,000 | 0 | 0 | | | |
| | | | | 6,000 | 0 | 0 |
| 8. Amount advanced for con- structing golabs and sheds for storage of Government grain, viz.— | | | | | | |
| To District Superintendent of Police, Sarun ... | 167 | 11 | 11 | | | |
| To Narain Dutt, head constable of Sewan ... | 50 | 0 | 0 | | | |
| | | | | 217 | 11 | 11 |
| 9. Amount paid to Choonee Lall, Marwaree, being balance of the price of grain purchased from him at Revelgunge ... | 21,250 | 0 | 0 | | | |
| | | | | 21,250 | 0 | 0 |
| <i>Establishment.</i> | | | | | | |
| 10. Pay of the famine establish- ment attached to the district grain office at Chuprah for May, 1874 ... | 458 | 13 | 10 | | | |
| 11. Ditto late (Salt Department Sudder sub-division) for May 1874 ... | 348 | 0 | 0 | | | |
| 12. Pay of Major W. Jackson on special duty at Chupra, for May 1874 ... | 892 | 12 | 0 | | | |
| 13. Pay of the medical establish- ment attached to the poor-house at Serai for May 1874 ... | 26 | 12 | 4 | | | |
| 14. Pay of Mr. C. F. Tonnerre, As- sistant Superintendent, on special duty at Ekma, for May 1874 ... | 300 | 0 | 0 | | | |
| 15. Pay of Baboo Debee Pershad, district grain officer for April and May 1874 ... | 500 | 0 | 0 | | | |
| 16. Pay of Mr. W. H. Hudson on special duty at Musrukh for May 1874 ... | 1,036 | 10 | 10 | | | |
| 17. Pay of the medical establish- ment attached to the Revel- gunge municipality for May 1874 ... | 31 | 2 | 0 | | | |
| 18. Pay of Mr. W. Barry on special duty at Pursa for May 1874 ... | 1,311 | 0 | 5 | | | |
| 19. Pay of Mr. Curton, late Deputy Inspector of Salt at Sewan, for May 1874 ... | 100 | 0 | 0 | | | |
| 20. Pay of Moulvee Mohumed Seedeeq, tehsildar, on special duty, including establishment for May 1874 ... | 260 | 0 | 0 | | | |

| | Rs. A. P. | R. A. P. |
|---|-----------|----------------|

SARUN MANAGER'S OFFICE,
The 16th June 1874.(Countersigned,
J. S. DRUMMOND,
Offg. Magistrate and Collector.SYUD MAHOMED FUZI,
Manager.

No. 1915F., dated Motiharee, the 15th June 1874.

From—H. KEAN, Esq., Collector of Chumparun,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative of scarcity and relief, for the fortnight ending the 18th June 1874.

A.—STATE OF THE COUNTRY.

There has been rain, more or less general, throughout the district, and there is every appearance of the regular rainy season having now set in. The prospects of the district have greatly improved, and may now be looked upon as very satisfactory.

In the Motiharee sub-division, Mr. Oldham states that the effect of the rains, combined with the sale of Government grain, has been very marked. He gives the following table to exemplify this:—

| Rates prevailing last fortnight. | | | | Present fortnight. | |
|----------------------------------|-----|------|------|--------------------|------|
| | | Srs. | | | Srs. |
| Rice (cheapest) clean | ... | ... | 11 | ... | 15 |
| Wheat (coarse) | ... | ... | 12 | ... | 12½ |
| Barley | ... | ... | 16 | ... | 17 |
| Cheena | ... | ... | 13 | ... | 13 |
| Maize | ... | ... | 13 | ... | 14½ |
| Gram | ... | ... | 13 | ... | 14½ |
| Oorid | ... | ... | 13 | ... | 12 |
| Moong | ... | ... | 13 | ... | 14 |
| Arhar | ... | ... | 16 | ... | 16 |
| Seed-rice | ... | ... | 16 | ... | 19 |
| Kodo | ... | ... | None | ... | 20 |

At Ramgurwa (on the west of the sub-division), the best rice is selling at 11 seers, and coarse at 13, and all the above grains are abundant. The rice is not Government grain, but a part of those local stores, on the presence of which Mr. Oldham has all along insisted. In the north of the sub-division, the young rice plants are in some places some inches high, and the cultivators say that they could do without rain for a fortnight. South of the Shikrana there has not been so much rain, and the numbers on the works are still increasing.

"The country," Mr. Oldham says, "in this tract is higher, and agricultural operations will not be in full force till next month. The people here, moreover, have only now just reached the stage in which the population of the northern and rice-producing tract was two months ago."

Seed-grain, Mr. Oldham says, is as abundant as it was in Orissa, even in the second year of famine there (1867), and "all vague theories to account for a supposed deficiency of it here are vain. As every one who was in Orissa at the time knew, the stores existed; they were exposed up to the very last by each fresh theft, fire, or dacoity. The mistake made was in supposing that they were available for food. As his daily rice is to the laborer, so is his store of seed to the zemindar-mahajun, his most profitable capital, which he will only expend where he can literally reap the profits himself. If this was the case in Orissa where no mahajun system existed, it is still more so here, where that system is in full force."

From the Dhaka sub-division, Mr. Kilby writes: "Owing to the rain which has lately fallen every 4 or 5 five days, the young crops are progressing most satisfactorily; and as the people are doing their utmost to prepare their lands for rice, I conclude they either have seed in their possession, or have the means, and know where to procure it." Mr. Kilby had travelled all over his sub-division during the fortnight, and considers the condition of the people satisfactory. The mango crop is coming in, and there is not that wholesale robbery of the fruit that the owners of the orchards expected.

Food-grains of all kinds are said to be procurable in the "bazaars." A considerable quantity of Burmah rice, Mr. Kilby reports, is finding its way into the markets adjoining Mr. Oldham's sub-division, and is selling for 13½ seers the rupee (presumed to be uncleaned). Some is also coming, it seems, from the Seetamurhee sub-division.

The public health remains, Mr. Kilby states, particularly good; indigo prospects have improved, and a large number of laborers are employed in weeding.

From the Gobindgunge sub-division, Mr. Weekes reports, that the prospects have improved wonderfully in consequence of the setting in of the rains, and the opening of the Government stores. Hitherto Mr. Weekes had been reserving his stock in order to encourage as much as possible private importations which had set in from Patna, Revelgunge, and

Hajipore. The early setting in of the rains has now, Mr. Weekes says, altered the state of affairs very materially, and it is now no longer urgently necessary to foster private trade, and there is no fear of underselling the traders. Rice from Patna of a fair sort was selling in some of the bazars at 13 seers, and another large bazar visited by Mr. Weekes, was abundantly supplied with grain from Motiharee, Revelgunge, Gobindgunge, &c. Prices have fallen considerably, "and there is an abundant supply of food-grains in the bazars. Sowings have been carried out to a great extent; in fact the state of agricultural affairs has almost entirely changed in little more than one fortnight." This account of the prospects of the sub-division is decidedly, in my opinion, satisfactory. Mr. Weekes, however, takes a less favorable view of affairs. He says: "the state of the people is such, that I can not be certain what a day may bring forth, and at present the orders to introduce task-work as much as possible on relief works (and mine are almost entirely village works), are causing me much anxiety. I do not think it advisable to reduce relief works, rather the contrary. In spite of the introduction of task-work as much as possible, the numbers are increasing; about one-eighth of the whole population depend for their support, almost entirely on these works. The cultivators, especially the smaller ones, are very badly off, and extremely thin, not to say emaciated. I am giving loans in many mouzahs, as they are much required to enable the ryots to sow, while the mahajuns are either exhausted, or are strangely short-sighted waiting till the crops appear and give good promise." If Mr. Weekes' village relief system is complete, and advances of grain are freely given, there can be little danger in reducing the number of relief works, especially as prices have fallen, and the supply of food-grains is abundant. Indeed not to do so would undoubtedly cause the relief works to compete injuriously with the demand for field labor which ought now to exist. Mr. Weekes' attention has also been drawn to Circular No. 3667—S.R., dated 8th June, which especially provides for laborers who have no present means of subsistence.

From Bettiah, Mr. Samuells reports that the Government rice is being freely bought. The sales amount to about 6,000 maunds per week, and the demand is steady; private importation to a small extent had commenced. The condition of the people continues good; agricultural operations are going on briskly. The dhan crop is reported to be coming up well, and much waste land has been taken up. No difficulty had as yet been experienced as regards seed-grain. The following table shows the rates at which food-grains have been procurable.

No. 1, Motiharee sub-division.

| | | | | | Seers. |

In the Moteeharee sub-division, work has been reserved on the existing roads which will give employment to the end of the rains. Mr. Oldham writes on this head:—

"In my tour last week in the north of this sub-division, I took measures for rendering the work as unattractive as possible by reducing the rates, ordering occasional issues of other grain than rice, and other means suited to the exigencies of the different places. As task-work must now necessarily stop almost entirely, the work for the rains being generally turfing, dressing, and such patch-work, the rates may sink to the merest pittance. To provide for this change I have extended and relaxed my system of charitable relief."

The laborers are all paid in grain for six days in the week, and in pice on Sundays. The numbers on the works in this sub-division have not as yet decreased, nor have they done so in the Dhaka and Gobindgunge sub-divisions.

In the Bettiah and Ramnuggur divisions, however, a marked decrease has taken place. The workmen are paid throughout the district in grain, except every seventh day, when they receive pice. The High Level Canal has been commenced in the neighbourhood of Bugaha (Ramnuggur sub-division), and gives employment to about 3,000 persons daily.

As the work will not pass through one of the chief rice-growing tracts (Ramnuggur), and one which of all others, is the most subject to a deficiency of water-supply, its usefulness will be much curtailed, and the expediency of constructing it at all seems questionable, as it will involve a vast outlay (crossing as it does the water-shed of the country at right angles), and affording, it seems to me, but a very limited amount of benefit.

The irrigation officers are, however, best able to judge in the matter, and I presume they have fully considered the question.

C.—TRANSPORT OF GRAIN.

Private importations continue to be made in the Gobindgunge, Dhaka, and Bettiah sub-divisions, but are not so brisk, it is reported, as in the previous fortnight, owing probably to the setting in of the rains, and the consequent heavy state of the roads. The rivers will, however, shortly rise, and fresh supplies will probably be imported. The bazars are all said to be well supplied, and prices have fallen.

D.—STORAGE OF GRAIN.

All the sub-divisions except Dhaka have their full allotments, and on a further inspection of the grain accounts, it is clear that the full amount allotted to this district has been received, and that the impression that the despatches were short by a lakh of maunds, is incorrect. Three out of the five sub-divisions have, it turns out, received more than their allotted amount, and more than was at first known, and the surplus will, if required, be transferred to the Dhaka sub-division.

The disbursement of Government grain is shewn below, and a subjoined statement gives the information required by Circular No. 3369—S.R., dated the 26th May.

In the Motiharee sub-division as already reported, sales of grain have been going on without restriction. It is sold at all the golahs at the rate of 11 seers for clean rice to the public, and at 12 seers to relief committees and laborers. The sales, Mr. Oldham reports, have everywhere sensibly declined within the fortnight. This he at first attributed to the large quantities already issued on the works and to the public; to the expectation of advances being given on the largest scale; and also that the rates would fall. The state of the bazar, however, is now quite enough to account for it. The anticipated rush on the frontier golahs at Addapore and Kutkenwa, has not taken place, the sales at both these golahs having been, on the contrary, inconsiderable. The largest issues have been from the golahs at Sripore and Lukowra, both of which Mr. Oldham has had to replenish. These golahs are on the borders of the Dhaka sub-division, and the bulk of the grain expended from them, has been imported thither.

The principle on which sales have been conducted (i.e., without any restrictions), has been separately reported, and orders solicited. The effect of these sales has been to supply the bazars freely, and they have now, as stated above, declined.

In the Dhaka and Gobindgunge sub-divisions, the sales to the public have not been on so large a scale, but are going on briskly in the Bettiah and Ramnuggur sub-divisions. In Ramnuggur, Mr. Howe is carrying out a scheme to effectually provide for any possible outbreak of distress in the rains.

The scheme consists in having several "small and well-selected reserve storage sites," so that sales of grain may be extended at any moment in the interior, to meet all demands for charitable requirements, and to make further advances. According to this arrangement, each large tuppa will have four centres, and each small one two; small supplies of grain will be stored at these centres, and kept on the zemindar's security. Should these stores run out they can be replenished by means of pack-bullocks and ponies, which are easily obtainable. The system will be supervised by the tehsildary and group officers. The reserve golahs will be constantly visited by the tehsildars and sub-inspectors, and the distribution made in their presence, and on their responsibility. This arrangement, combined with the large tucavee advances already made, and to be made, will, Mr. Howe considers, effectually provide against any unforeseen outbreak of distress.

E.—ADVANCES TO PRIVATE PERSONS.

About 5,000 maunds have been advanced in the Motiharee sub-division under the system fully described in the last narrative. These advances will be completed within the month. Baboo Doorgaprosad of Mudhoobunnee has purchased 3,000 maunds of Government grain for his ryots, in Mr. Oldham's division, and consented to distribute 1,500 more in Mr. Kilby's. Messrs. McQueen, Begg, and Edwards have received advances and made considerable loans to their ryots, and many petty maliks have received advances for the same purpose; the Bettiah Raj has also promised to stand security for 8,000 maunds in this sub-division, and for 5,000 in Gobindgunge. In the latter sub-division Messrs. Macleod of Pipra, Gibbon of Tirkowlia, and Shaw of Rajpore, have all given great assistance in the distribution of loans of grain to the people, by taking advances from Government for that purpose. In the Bettiah sub-division, a few zemindars have taken advances of grain during the fortnight, and Mr. Hudson of Parsa factory, is making considerable advances to the ryots of that circle.

The following sums have been expended under this head during the fortnight :—

| | | | | | |
|-------------------------|-----|-----|-----|-----|-------|
| 1. For storage of grain | ... | ... | ... | ... | Nil. |
| 2. Assistance to ryots | ... | ... | ... | ... | 7,215 |
| 3. Land Improvement | ... | ... | ... | ... | 1,058 |

The total amount expended up to date under these heads is—

| | | | | | Rs. | A. | P. |
|----|-----|-----|-----|-----|----------|----|----|
| 1. | ... | ... | ... | ... | 1,39,000 | 0 | 0 |
| 2. | ... | ... | ... | ... | 1,70,954 | 0 | 0 |
| 3. | ... | ... | ... | ... | 76,355 | 0 | 0 |

F.—CHARITABLE RELIEF.

The subjoined table will show the numbers who receive relief under this head, and I have nothing to add to what has been reported in former narratives. This form of relief will probably have to be largely extended during the rains, as out-door relief work must inevitably be curtailed, and with this view Mr. Oldham is placing small stores of grain in villages liable to be isolated by the floods, and Mr. Howe as already described, has commenced a similar system in his district. Mr. Howe's report has not yet been received. Its non-arrival, has, I am sorry to say, been occasioned by Mr. Howe's illness, which has been brought about by exposure to the weather. It will be forwarded on receipt.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

Total expenditure from the district and subordinate treasuries, as shown in the last narrative, full details of which were therein given, Rs. 22,62,096-7-10.

No. 1942F., dated Champarun, the 18th June 1874.

From—H. KEAN, Esq., Collector of Champarun,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of this office No. 1915F, dated the 15th June 1874, I have the honor to submit Mr. Howe's narrative for the week ending 13th June which has just come to hand. The delay in its submission has been caused (as stated in my narrative), by a severe attack of rheumatic fever, which rendered Mr. Howe physically unable to write the report.

2. The account given by Mr. Howe of the present state of the sub-division and its prospects, is on the whole very encouraging. The spontaneous decrease in the numbers on the relief works, and the return of the people to "their ordinary occupations" is very satisfactory. It is also satisfactory to learn that the supply of seed-grain is not so limited as Mr. Howe at first thought. The provision of 25,000 maunds made by Government, is on its way to Ramnuggur, and should by this time have arrived.

Narrative of Scarcity and Relief for the fortnight ending 13th June 1874, for the Ramnuggur sub-division.

A.—CONDITION OF THE PEOPLE.

During the last fortnight heavy rain has fallen throughout the sub-division; in fact it seems as if the regular rains had set in. In consequence of this, the people have commenced field-work, and (as will subsequently be shown), the numbers on our works have very largely decreased. Fields are everywhere being ploughed; sowings have also commenced, and there is in consequence a marked improvement in the condition of the people. The decrease in numbers on our works was spontaneous, and this, I think, is a very good sign. In order, however, not to compete with agricultural labor, I, immediately after the rainfall, reduced our rates, and this had a beneficial effect. At present the laborers consist chiefly of women and children, for whom, however, field-work will soon become available.

There will, I fear, be a deficiency of seed-grain, even for the bhadoi crop; a deficiency of probably about one-third in certain localities. We have, with Commissioner's sanction, determined to make no cash advances for seed-grain, *first*, because such advances could not increase the quantity of seed-grain in the sub-division, but would only affect its distribution; and *secondly*, because if advances in cash were made at all, every one applying would have to receive, there being no time for very detailed enquiries. The plan of obtaining seed-grain from Nepal has, I regret to say, failed, because as soon as it became known that seed-grain was required in this part of the country, the Nepalese raised their prices, so that it became impossible for the planters who were willing to take advances, to import except at a loss. Neither would it have been of any use under these circumstances to purchase for Government. Another reason why the price of seed-grain rose so much in Nepal, in the district of Mewulpore, was because other distressed districts in Nepal made large indents for seed-grain on that district. Still I think a certain amount of seed-grain from Nepal has found its way to the northern tuppahs, about which I feel less anxious. In the east also, I am glad to be able to report that there is more seed-grain for the bhadoi than I had anticipated, and it was more from the deep-rooted impression (both on the part of ryots and holders of seed-grain), that Government would make cash advances, that the seed has hitherto been withheld. We have throughout endeavoured to impress on the people that no cash advances would be made for seed-grain; that if our grain arrived in time it would be sold or advanced as tucavee, but that under all circumstances the people must do their best in this matter for themselves. To the very last, however, they would not believe this, but now that they see we are firm, and that there is no seed-grain in our stores, they are, I am glad to say, exerting themselves, and we may therefore hope that the deficiency will only be confined to a few localities, and that generally there will be more than we had anticipated. The north and east (the latter including the south-eastern tuppahs) will be best off; the deficiency will be most in the Ramnuggur circle (*i.e.*, tuppahs Chungwan, Jamoulee, Chankee and Deorar, and to a lesser extent in Bassura also).

For the Aghanee crop, there will probably be still less seed, as it proved an almost entire failure; but when the time for sowing comes, the 25,000 maunds promised will have arrived, and we shall be comparatively safe.

During the fortnight, the Sanitary Commissioner (Dr. Coates), visited Ramnuggur, and inspected the people receiving relief work at our poor-house, the patients in hospital and the town of Ramnuggur. He also examined a few villages near Ramnuggur. His report has been forwarded separately, but as it throws considerable light on the condition of the people, I think a few extracts will not be out of place.

Writing of the town of Ramnuggur, Dr. Coates remarks: "The town is evidently becoming depopulated; the people are thin and squalid looking; and there is a conspicuous absence of children. There are many huts in ruins, and no new ones are being built. Of the 126 recipients of relief at the poor-house, 80 were emaciated, and of the children, 11 were anasarcaous, distinctly the result of scarcity. Two of the sick in hospital had that day died from dysentery,—one a young, the other a middle aged man. The hospital records

show 40 per cent. admissions from fever, 12 per cent. from diarrhoea, and 9 per cent. from dysentery. I went through two of the villages to the east of Ramnuggur to see the tank-workers. As the morning had been so rainy, a few only were present. I found three out of 15 of these in a state of anæmia. I expect many other villages further off than these are in a worse state of health. Doubtless, this is largely due to the fever and spleen enlargement which are here endemic. Nevertheless a week's short rations or inferior food would be fatal to a great many. On my return here (Bettiah), I inspected *en route* the workers at the Soobya tank, and those at Loureah, and on the Pursa road. The nearer I got to Bettiah, the healthier the people were. All officers in charge of centres have reported the absence of epidemics; also that cattle are free from disease."

This description of the condition of the poor receiving relief at the Ramnuggur poor-house applies to all those to whom charity is given in the sub-division, for the 126 examined by Dr. Coates were but samples of the rest, and by no means the worst conditioned. Small-pox is not noticed by the Sanitary Commissioner; but the omission seems accidental, as it has been, and still is, very severe, though it has decreased slightly since the rainfall. Colonel Boulderson reports that the health of the people in the eastern circle is generally good, and this is also the case in the west, from which I have just returned. The most sickly part is the central circle, and the whole sub division is very unhealthy in August and September.

Price-currents.

The following are the prices prevailing in the eastern circle :—

| Names of places. | Rice. | Dál, oorid. | Gram. | Jhow, Bhoota. | Wheat. | Barley. |
|------------------|---------|-------------|--------|---------------|--------|---------|
| | | | Seers. | | Seers. | |
| Bhowra | 8 and 9 | | 13½ | | 12 | 16 |
| Chunputeah | 8½ | 11½ | 13 | | | 16 |
| Loureah | 9 to 11 | 12½ | 14 | 16 | 13 | 17 |

In this circle rice can still be obtained, but at high prices, and not in large quantities. In Ramnuggur no rice can be obtained except Government rice. Dál (oorid) is selling at 10½ seers, and atta 8½; gram (hardly procurable), 13; gehum, 12½; makai, 14. All these grains are, however, obtainable in small quantities, and both here and in the west the people depend almost entirely upon Government grain. No price list has been received lately from Bugaha, owing probably to the rise of the rivers; but having lately returned from Bugaha, I have ascertained that Ramnuggur prices and those prevailing at Bugaha are nearly equal, and that grain of all kinds are not easily procurable. Under circular No. , dated the various markets will be watched, and should any importation take place, the procedure laid down in that circular will be adopted.

Sales of Government Grain.—There has been a decrease in sales by 829 maunds 33 seers during this as compared with the last fortnight. The reason of this appears to be the large payments in kind on our works. Hitherto bunniahs who had purchased our grain supplied our laborers, and these sales were treated as "sales to the general public." Some laborers receive payment in kind; they have neither the means nor the incentive to purchase, and hence necessarily there must be a slight diminution in the amount sold. But this does not, I think, show that our grain is in less demand, or that sales have in reality fallen off, for the amount sold is large, and the decrease such as must necessarily follow the introduction of payment in kind.

B.—RELIEF WORKS.

The statement sent with this report shows that our daily average has fallen from 31,880 to 11,949, *i.e.*, it shows a reduction of nearly two-thirds. This very satisfactory result, *viz.*, the spontaneous diminution in the numbers on our works is, I think, due in a great measure to the large tucavee advances we have made. A large proportion of our laborers are cultivators, who but for advances would have had no means of subsistence while preparing their fields. Colonel Boulderson, referring to this subject writes:—"The greater portion of the people have returned to their ordinary occupations, and a more settled state of things is fast replacing the anxiety and bustling for relief-employment which lately prevailed here. Advances of grain have everywhere been pushed on, and this, with the free disposal of rice through all the bazars, has had the effect of enabling cultivators to subsist while engaged in field-work. Our attendance has decreased to our normal standard before the great crowding on our works began in April.

These remarks, which apply to the whole sub-division, correctly describe, I think, the exact position of affairs. In Ramnuggur the distress reached its height in March; in Shikarpore in April. Before this the cultivating classes had not resorted to our works in large numbers; it was only when distress had reached a certain point that they were compelled to work. Now our works show the usual attendance before the distress among the cultivating classes was severely felt. But as during the time they worked they had no means of subsistence except their wages (as was shown on several occasions), they could not

at the commencement of the rains have left the works unless some provision had been made for them. This, however, had been done by the advance system, and the free disposal of rice, and the consequence is that our works have naturally diminished, and that the people have been able to "return to their ordinary occupations."

Payments have now everywhere been made in kind, and the measure has been very successful.

Those who now attend our works are either women and children belonging chiefly to the cultivating classes, or those who in ordinary times subsist by labor. For the former, work in the fields will be found very soon when weeding operations commence; the latter will require help more or less throughout the rainy season. A good many of those also will find employment in the fields, but we shall continue our works for those of all classes who may still for any reason remain on our hands. To prevent competing with agricultural labor, I have reduced our rates, and this has had a beneficial result. With the Commissioner's sanction we have made arrangements to pay rations for any days when, from a continuance of the rain, work is impossible, and when those who have nothing but labor to look to will be without employ. It is, however, anticipated that a still larger reduction will take place, and that provision of this nature will have to be made for a few only.

D.

The following statement shews the amount of grain now actually stored in our golahs :—

| | | | | | Mds. | S. | C. |
|-----------------------|-----|-----|-----|-----|----------|----|----|
| Ramnuggur | ... | ... | ... | ... | 86,741 | 36 | 0 |
| Bugaha .. | ... | ... | ... | ... | 77,094 | 21 | 12 |
| Harnatur | ... | ... | ... | ... | 15,049 | 27 | 0 |
| Chankee | ... | ... | ... | ... | 6,922 | 8 | 12 |
| Chamardeeha | ... | ... | ... | ... | 8,426 | 3 | 0 |
| Shikarpore and Bhoura | ... | ... | ... | ... | 23,782 | 20 | + |
| Total | | | | | 2,18,016 | 36 | 12 |

E.—ADVANCES TO ASSAMEES.

These have nearly been completed, and all distributions will be made before the heavy rains set in. During the fortnight we distributed 5,102 maunds, and there now remains only a small amount to be distributed, both under the Rajah's security and in other estates.

From the beginning we have advanced 21,207 maunds 18 seers 6 chittacks, and this large amount, distributed in every part of the sub-division, will go far to help the people through till the next crop is taken. In addition to the advances made by Mr. Gibbon, I think this provision has been ample, and what remains is chiefly a balance under the Rajah of Ramnuggur's security. Some advances are made payable by instalments under circular No. 481, and in order to have grain available in the interior during the rains, I have drawn up a scheme under which a sufficient supply will be kept in every tuppah in the custody and on the security of responsible zemindars. This will also guard us against any sudden outbreak of distress, and will be available for charitable purposes or for sales, should it be necessary to extend these in the interior.

The Commissioner in his late tour approved of this scheme.

Charitable Relief.—Special Report under section 5, Circular No. 3216—S.R.

Heading (b).—The number of recipients of charitable relief amounts now to 2,000 a day. These are persons so reduced by starvation and sickness, or so old and decrepit, that they cannot support themselves by work, and but for the assistance they have received from the charitable committee, the majority of them must have perished. When I came to Ramnuggur in January, their condition was pitiable, though then there were fewer, and even now, though they have been fed for some months, (and to me their condition seems much improved), Dr. Coates, Sanitary Commissioner, and others who have lately visited Ramnuggur, were much struck with their miserable appearance. Assistance in various ways besides food had to be given to many of these unfortunates. Women with little children they had not the strength to nurse, had to be fed with more nutritious diet than ordinary rice and dāl; children were often so weak that they could not digest their food, while many who came half-naked had to be clothed. All these wants have been fully met by the sub-division committee, and the sub-committees at Shikarpore and Bugaha. The expenditure therefore under heading (b) included the following detail :—1st, regular rations, i.e., rice, dāl, and salt; 2nd, special diet for those too weak to be able to digest ordinary rations.

The latter were especially necessary both in the cold season, (i.e., well into the middle of March) and at the beginning of the rains.

Besides the poor-houses, we have charitable centres, which I have increased to 14. The statement attached to this report shows the amount of grain used for charitable relief, the money value, the average number relieved, and the amount spent in cash. Of course there are always those who stay for a short time and then go to other places. Thus lately we have given relief to 80 starving persons who came from Gorukpore in a most pitiable condition, while a good many came from Nepal. The daily average, however, has now for some time been about 2,000. I think the number will increase, as the rainy season is very trying, and as many must necessarily be out of employ.

II. *Heading (c).*—Employment for paupers who cannot go to our relief works is, to as large an extent as possible, found at our poor-houses. This mode of relief can never be carried out on a large scale, as it would imply collecting large crowds at one place. It also requires a great deal of supervision at Ramnuggur. We have given employment of this nature to 80 persons, who receive extra food in payment. The principal work done is husking rice, grinding corn, and light work in repairing buildings, &c. During the rains I shall have employment for about 200 persons, and our poor-houses at Bograh and Shikharpore, where hitherto less has been done (a few dhenkees for husking rice only having been started), will give labor to about 60 or 70 persons each. The persons who mostly work are women and young children, or men who are too weak to go to roads. The amount of expenditure under this head is included in statement for heading (b), as the payments are in kind.

III. *Heading (d).*—Statement II shows the number of persons receiving relief of this nature. The following extracts from the register kept for this class of cases will best show the nature of relief afforded.

EXTRACT.

From 1 to 13.—“These are widows of good caste in very reduced circumstances, who during their husbands’ lifetime were well-to-do. In ordinary years they received help from their husbands’ relatives, and they also made a living by purchasing dhan when it was cheap, husking it in private, and selling it through their male relatives in the village. Most of them have a little property—the remnant of better times—and this year, when others could not help them, they sold their trinkets. At the best of times they have only just enough to live; at a time like this they are in the utmost distress. They cannot work on our roads, they will not receive charity, yet unless assisted they must starve.

These women are either Brahmans, Kayeths, or of high Mussulman castes.

No. 20 in the same register is one MirBhawul of mouzah Jogya; was formerly chowkeedar; was dismissed on account of old age; has three females dependent on him, and two children. Is in great distress, but will not beg.

Generally all cases to which relief has been given under this heading, are either women such as are described in the first extract, or old men of good caste who cannot work. In all we have 107 cases, and during the next few months the number will increase in all probability. It is a matter of great difficulty to discover these cases, as, unlike ordinary recipients of charity, they will not come forward, and will undergo almost any hardship sooner than receive charity pure and simple. Native gentlemen, members of our committees, *e.g.*, Mir Taur Alee and Shek Salamut Alee, have been of great assistance in finding out these cases. In a few cases relief has, under this heading, begun to sufferers by fire. This is a peculiar kind of distress in which relief is much required, but in which it is very difficult to discriminate between the deserving and undeserving, as all are so apt to exaggerate their losses. I have therefore hitherto proceeded very cautiously, but lately I have taken up this question systematically, and made careful inquiries, the results of which I will separately report upon. With the Commissioner’s sanction, relief under this heading has also been given to some village chowkeydars and gorceyets whose circumstances are peculiar; who from the nature of their duties cannot attend our works; who are as a rule wretchedly poor, and who generally have many depending upon them.

All assistance under this heading has hitherto been in grain. The amount expended and the numbers relieved will be shown in statement No. 2 attached to this report.

* Grain began to be used in March. Previously we purchased rice and makai in the bazars and distributed it, hence this column.

† This does not include the Bugaha or Shikarpore expenditure, as details have not been received.

‡ The Shikarpore roads are not included, details not having been yet received. For Colonel Boulderson's report the total daily average is as noted below—3,890.

§ This is actually in store.

||Seed-grain.

W. A. HOWE,
On Special Duty.

No. 73F, dated Bankipore, the 10th June 1874.

From—G. E. PORTER, Esq., Offg. Deputy Commissioner of Patna, on special duty,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the divisional famine narrative for the fortnight ending Saturday, the 6th June.

2. During the period under review the early rains have fairly set in, and the rainfall has been general throughout the division. Chumparun was the first district that felt the good effects of the rain, which, coming from the north-west, appears to have clung to the hills, and to have poured in fertilising showers in the Terai sub-divisions. In the southern districts of the division the rainfall has not been so heavy. The following figures give the results:—

| | | | | |
|-----------|-----|-----|------------------------------|---------|
| Chumparun | ... | ... | 2 $\frac{1}{2}$ | inches. |
| Tirhoot | ... | ... | 1 $\frac{1}{2}$ | " |
| Shahabad | ... | ... | 1 $\frac{1}{20}$ | " |
| Gya | ... | ... | $\frac{1}{2}$ $\frac{7}{10}$ | " |
| Sarun | .. | ... | $\frac{1}{2}$ $\frac{5}{10}$ | " |
| Patna | ... | ... | $\frac{1}{2}$ $\frac{0}{10}$ | " |

The rain in Chumparun has been sufficient to set agricultural operations on foot, to diminish the numbers on the relief works, and generally to lighten the prospects of the district. In Tirhoot the rainfall appears to have been very eccentric and unequally distributed.

In Mudhoobunnee nearly 3 inches of rain fell; and the Collector writes that "in some places it is feared, if general rain comes on, that the lower lands will be submerged and no dhan sown." This refers more particularly to Singhea and part of Baherab.

In Shahabad sufficient rain has fallen for cultivation. A telegram was received from Arrah on the 8th instant that heavy rain had fallen on that day, which would do immense good.

The districts of Gya, Sarun, and Patna would be the better for more rain in parts; but the figures given above, taken as they are at the Sudder Stations, do not indicate the rainfall in other parts of the district. For instance, as regards the Patna district, nearly 2 inches of rain fell at Behar, more than an inch at Barh, and nearly an inch at Dinapore, whereas only half an inch was registered at head-quarters.

3. This general and opportune rainfall has undoubtedly done vast good. It has enabled the ryots to prepare their lands for the rice crop, which in many places, where the moisture is sufficient, has been sown: much land has been ploughed; indian-corn and other crops have been put in. There has been a general diminution in the numbers attending the relief works, but to what extent I am not in a position to say. The figures will be furnished with the next narrative. Some reports indicate that the rain has not thinned the relief works so much as was anticipated, and it is said that the liberal rates offered by Government are keeping back the cultivators from the fields. This is a matter for grave consideration; and in any case where it is found that the profits in the relief works are so high as to keep the laborers from the fields, the rates should be adjusted accordingly.

4. In addition to the good effects noted above, the rain has had a sensible influence on the price-current, the rates of which have fallen more or less in all districts. Statement A appended to this narrative shows the rates prevalent in the districts of this division on the 6th June.

The rates given for Tirhoot and Chumparun are the average rates, but of course they vary considerably in different parts of the districts; e.g., the price of rice in Tirhoot ranges from 8 $\frac{1}{2}$ to 13 $\frac{1}{2}$ seers per rupee; and so far as these two districts (Tirhoot and Chumparun) are concerned, the price-currents are no safe criterion in testing the pressure of distress, as in many parts the only grain in the market is Government grain, and the prices quoted in the lists are those at which the Government grain is being retailed to the starving people.

In regard to the other districts where private trade is active, I think the price-currents may be accepted as denoting the actual rates at which the various food-grains are obtainable; and although there may occur partial distress in isolated tracts, yet with food at these prices, with the large stocks of Government grain accumulated, and the elaborate machinery set on foot to inquire into the wants of the people and to bring relief to their very doors, I think we may safely say that no general distress can be apprehended in any of these districts. Special cases will be treated as they arise, and need not be touched upon in this report.

5. The following statement B shows the allotment, storage, and consumption of Government grain in the several districts of this division. The figures, so far as they go, are taken from the last district fortnightly narratives.

6. During the fortnight under review, Patna has despatched 23,000 out of 25,000 maunds ordered to be sent to Tirhoot. This leaves the Patna district with a balance of only 18,899 maunds, and orders have recently been issued by Government to send as much of this balance as can be spared to Tirhoot also.

7. As regards Sarun, the figures given in statement B are the same as shown in our last fortnightly narrative, being taken from the Collector's narrative for the period ending 16th May. In the last district narrative for the fortnight ending the 30th May, the grain statements promised in parts D and E have not been received, but it is apparent that during

last fortnight there has been a large expenditure of Government grain. I gather the following facts from the body of the report:—

Paragraph 27—

| | | | | | |
|------------------------|-----|-----|-----|-----|--------|
| Grain sold to laborers | ... | ... | ... | ... | 16,491 |
|------------------------|-----|-----|-----|-----|--------|

Paragraph 36—

| | | | | |
|----------------------------|-----|-----|-----|--------|
| Advances to ryots in Sewan | ... | ... | ... | 5,950 |
| Ditto in Karbala | ... | ... | ... | 20 |
| | | | | <hr/> |
| | | | | 22,461 |

Mr. Hodgkinson says that the amount distributed in advances will probably exceed 60 or 70 thousand maunds in the Hutwa Raj.

Mr. Drummond (paragraph 33) hints that more Government grain may be required; but I am inclined to think that the large stocks at his disposal, if judiciously distributed, ought amply to suffice for the requirements of his district.

8. As regards Gya, nothing need be said; the stores are sufficient to meet any ordinary contingencies.

9. Shahabad is still bringing in grain from the North-Western Provinces. The amount consumed up to date has not been given by the Collector. The figures have been called for.

10. With reference to Chumparun, there appears to be some unaccountable discrepancy between the amount said to have been despatched and the quantity received. The mistake, which is probably one in account only, is being inquired into. Meanwhile the stores in the district are large (more than 6½ lakhs of maunds), private trade from Patna, and other places is brisk, and will probably increase as the rains set in, and the prospects of the crops are most promising; so that, taking everything into consideration, I see no cause for anxiety. However, the situation of this district will be carefully watched, and on the first symptoms of any probable deficit in the food-supply, grain can be poured in by boat and steamer.

11. Lastly, there remains Tirhoot, the food-supplies of which district have occupied much attention during the fortnight under review.

Statement C appended shows approximately the despatches of Government grain up to date. From this it will be perceived that the 42 lakhs of maunds first allotted to Tirhoot have been probably more than made up by this time.

12. As the rains are approaching, orders have been issued to close the Futwa Ghât under Lieutenant-Colonel Chambers, and the Chumpta and other adjacent ghâts under Captain Rennick. These ghâts will probably be closed in a few days. Under Colonel McGregor's orders the despatches of grain have been concentrated on Barh (Mr. Gray Glen), where the grain is crossed over the river by steamer or boat and taken by the State Railway to Durbhunga. On the 31st May, Ram Neerunjun and Company had about 52,000 maunds of grain to despatch in order to complete their contract of 5,64,000 maunds. This grain has been ordered to Barh; a large quantity has already arrived there; and the rest is, I believe, in transit. Of the 20,000 maunds of North-Western Provinces' grain originally intended for Gya, 5,000 maunds had been sent to Bukhtiarpore. Of this Gya took 333 maunds, and the remainder (4,667 maunds) was forwarded to Barh. There remained 15,000 maunds, of which 10,000 maunds have been received at Futwa and forwarded to Barh. The remaining 5,000 maunds were, when we last heard, waiting for carriage, but by this time they ought to have been loaded and may have reached the station. A large quantity of grain has been sent from Monghyr to Barh for Tirhoot during the past fortnight.

13. It has been the practice in previous divisional narratives to submit a statement in form D (annexed) showing, up to the latest date, the numbers employed on relief works and the expenditure of Government grain in the more distressed parts of Tirhoot and Chumparun. These figures were obtained by telegrams from the several sub-divisions. As stated in my last narrative, they came very irregularly and were prepared in various ways, so that their usefulness was diminished, and owing to their non-receipt the divisional narrative was often delayed.

The submission of these telegraphic despatches rendered it necessary for the sub-divisional officer to come in from his work in the middle of the fortnight; and as the information asked for was precisely the same as that furnished to Government the week before, the Commissioner has decided that these telegrams should be discontinued. This statement will not therefore appear in future narratives.

14. The Commissioner left head-quarters on tour on the 26th ultimo, and proceeded *via* Hajespore to Mozufferpore, and thence *via* Motiharee and Bettiah to Ramnuggur. His note on the working of the relief circles in the Tirhoot district has already been forwarded to Government, and therefore need not be included in this narrative.

15. In conclusion I give below a list of officers, both European and Native, who have been posted to famine work during the past fortnight, also the districts to which they have been sent, and the dates on which they reported their arrival to this office, and I propose in all future narratives to give a similar list for the information of the Lieutenant-Governor; at the

same time, as requested, I will report specially the arrival and posting of each officer as it occurs—

G. E. PORTER,

Offg. Deputy Commissioner of Patna, on special duty.

A.

THE state of the district has improved during the past fortnight more than even I anticipated in my last narrative. The rains have set in very satisfactorily, and even in Bukhtiarpore there is not a single village but what has had a good downpour; seed which has been in the ground for the last month has all germinated, dhan as well as murwa,—the dhan that was scorched has already revived and lost the burnt-up appearance. Ploughing and sowing are going on rapidly all over the circle; janera is an inch above the ground. The people are in good spirits, anticipating that if they can only tide over the next six weeks with the help of Government, all will be well.

The distress which was manifesting itself in the north of the Begoooseraï sub-division has been well got in hand by Mr. Wilkins since he was relieved of his judicial work. The rain over there has been general, and the prospects are now good. Relief measures must continue until the reaping of the crop now sown, but not on any very great scale.

The temporary distress at Simultollah has yielded to the rain and to prompt relief measures: whilst it lasted it was really distress amongst the agricultural class, not professional beggars, and had the rains held off another week we should have had ten times the numbers on our hands. However, the rain has come down plentifully, the 600 who were being relieved have dwindled down of their own accord to between 60 and 80. This showed that the people were willing to work in their fields as soon as possible, and did not wish to eat the bread of idleness at Government expense if they could possibly help it.

Mr. Money has been riding about this part of Chokai lately, and now reports fields being ploughed everywhere. In some villages the *moris* or early nurseries of dhan, are planted, and the rice is sprouting well, and all the janerah which had been sown five days is coming up. The janerah crop is a most important one, as it grows very fast, and it is within the capacity of the humblest ryots and coolies to have their patches of it; by the end of July, when it will be ripe, all fear of distress will be at an end. In the meantime, however, the local bazars are scantily supplied, and Government rice is being moved down from the surplus golahs.

In the Luckeeseiraï circle the rain has been general, and cultivation is going on actively; janerah is springing up well, and in the homestead lands there is a good deal of murwa ready for transplanting.

B.

There is still work on the Chikinghat road, in the Bukhtiarpore circle, for another 15 days; one tank work (Rasulpore) has been closed, and two new ones opened, affording work to 1,797 laborers. Those incapable of work have already been disposed of in their respective villages.

In Begoooseraï, eight public and two private tank-works have been in full swing during the fortnight, and have afforded work to 302 persons. As those are finished, other works are being provided.

Ploughing and sowing have drawn off nearly all the people from the Jamooe works; but they can be resumed when the ploughing and sowing are over, until the harvest renders them no longer necessary.

C.

Private trade at Bukhtiarpore still continues very small. The sales of Government rice, to the extent of 3,000 maunds a month, amount, according to Mr. Manson's calculation, to more than one half of the monthly consumption of the whole population of the circle.

As might be expected, some of the 20,000 maunds I was moving from the surplus golah of Sheikpoora to Begoooseraï has been caught in the rain and damaged: I hear of only 147 bags so far injured, and hope that, as it is required for immediate consumption, even if some of it has got wetted it will be eaten before it has time to go bad.

Mr. Money is moving down small quantities of rice from the Secundra golah to Simultollah and Chokai.

D.

There is nothing new to report under this head. The enumeration of bags is still going on at Bukhtiarpore, but is not yet finished,—13,297 bags have been enumerated.

E.

Mr. Manson has advanced 485 maunds of grain to 12 zemindars, and 2,328 maunds to 1,181 ryots, within the Bukhtiarpore circle, and Mr. Wilkins has advanced 1,197 maunds to ryots in the Begoooseraï sub-division, and Mr. Currie has advanced 27,004 maunds to 6,370 ryots scattered over 275 villages.

F.

Throughout the Bukhtiarpore circle the distribution of rice to the poor at their own villages through the group superintendents was effected without the slightest confusion or misconception of orders. Mr. Manson has been through the greater portion of the villages, and was not accosted by a single pauper asking for relief, nor did he hear a single complaint against the persons through whom this relief has been given. Only the sickly and diseased and residents of other districts come to the poor-house.

In Begoooseraï the number of Tirhootees mentioned in my last narrative have been fed up, and sent to their houses with a supply of food sufficient to last them the journey.

At Jamoee there are only 20 to 50 professional beggars receiving relief, and the collection at Simultollah has been reduced to about 60.

At the head-quarters at Monghyr the Secretary of the relief committee, Colonel Murray, has been breaking up the poor-house and sending the people off with a 15 days' ticket; the lepers had previously taken their departure for fear of having personal cleanliness enforced upon them.

The following information is in accordance with Government letter No. 1250 :—

Committees.

Monghyr, Jamoee, and Begooseraï.

Sub-Committees.

Luckeeseraï, Sheikpoora, and Bukhtiarpore.

P. S.—There are 87 Brahmans, 189 Rajpoots, 1,675 weavers, 62 oilmen, 101 washermen, 271 shoemakers, 133 potters, 2 kalwars, 50 barbers, 20 halowai, 13 goldsmiths, 40 banasaha. Nearly 4 per cent. belonging to non-laboring classes, the rest are belonging to the laboring classes.

RAM RUTTUN MOJOMDAR,
Assistant Engineer, in Executive charge,
Monghyr District.

No. 583—S.R., dated Bhagulpore, the 18th June 1874.

From—V. T. TAYLOR, Esq., Collector of Bhagulpore,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my 15th fortnightly narrative for this district.

A.—STATE OF THE COUNTRY.

2. I have just returned from a tour over the distressed tracts of the Soopool sub-division, having visited every golah excepting Bheemnuggur and Nathpore, and the result is that I can pronounce the state of the country generally to be eminently satisfactory. The general prospects could not be better. There has been a very unusual early and heavy rainfall, most heavy where it was most wanted, especially in Narradeegur, Harawuth, and Dhupper pergunnahs. From the 1st of June to date we have had at head-quarters a fall of 7·87, and since the 1st of January the fall has been 11·27, whereas the total rainfall last year to the end of June was only 6·44. In the Banka sub-division the rain has been very general, and during the fortnight under report 4·45 has been gauged. The rainfall measured during the fortnight at Soopool amounted to 9·92; but while I was in that sub-division over 7" had already been measured, at Bhaptiahi, south of Dugmurrah, and over 9" at Portabgunge, in pergunnah Harrawuth. On the 13th instant 6" fell in 3 hours, both at Soopool itself and at Sonebursa, south-west corner of Muddehpooora sub-division, so I imagine that that fall must have been very general. Rain has fallen throughout Mud-

* I have just heard that 7 inches fell at Muddehpooora in a few hours on the 13th.

dehpooora, but not to such an extent as at Soopool.* The effects of this rain cannot be overstated, and the Bhadoi crops are simply magnificent. A larger extent of country has been sown down than usual with Bhadoi rice and murwa, and in no previous year have the prospects of these and the low land paddy been better at this season of the year. The rivers and tanks are all full, and the low country under water as much so as if it were the very height of the rains, instead of the commencement only.

3. The Soopool sub-divisional officer writes—"The state of supplies in the bazaars is about the same as on the date of the last report. Gram and other pulses are easily procurable, but little or no rice is to be had. The nominal quotations for rice range from 9½ to 11 seers throughout the sub-division. Gram is selling at 11 to 13 seers, murwa at from 12½ to 14½, wheat at from 11 to 12." The allusion to rice is of course private rice only, as Government rice is easily procurable from the many moodies established to sell it, as well as from nearly all the golahs direct.

4. The Muddehpooora officer remarks:—"Supplies in the bazaars are about the same as at the time of my last narrative; the rates too, are unaltered."

5. The Banka officer reports:—"Food articles in the marts of this sub-division are procurable according to the wants of the people in general. On account of the rainfall, and in anticipation of future prospects, prices have fallen—rice from ½ to 1 seer, barley from 1½ to 1½ seers, and wheat from 1½ to 1½ seers per rupee."

6. At head-quarters prices are also falling, and the present prices are—

| | S. | Ch. |
|-------------|----|-----|
| Common rice | 10 | 11 |
| Wheat | 13 | 14 |
| Indian-corn | 15 | 2 |
| Gram | 16 | 6 |

7. The following statement shows the difference in prices this year and at the same period in 1866:—

| | Rice. | | Pulses. | | Indian-corn. | | Wheat. | |
|----------------------|--------|-------|---------|----------|--------------|----------|--------|-------|
| | 1866. | 1874. | 1866. | 1874. | 1866. | 1874. | 1866. | 1874. |
| | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. |
| Soopool | ... | 9 5 | ... | ... | ... | 12 12 | ... | 11 0 |
| Muddehpooora | ... | 11 0 | ... | ... | ... | 15 0 | ... | 11 0 |
| Banka | 11 0 | 11 0 | 9 0 | 14 to 16 | 16 0 | 14 to 15 | ... | 12 8 |
| Head-q. rters | 10 11½ | 10 11 | 10 1½ | 16 6 | ... | 15 2 | 11 6 | 13 14 |

Prices generally are apparently not so high now as they were in 1866.

8. There is no doubt, as I remarked on a previous occasion, prices have reached their highest, and will fall by degrees, unless indeed we have too much rain, so as to injure the present bright prospects.

9. The condition of the people generally is remarkably good—far better than it was from October to March. The condition of the able-bodied men and women on our works is

superior, and I believe they are far better off (physically) than they would have been in any ordinary year. The light labour gangs are in undoubted good case, and the people receiving gratuitous relief upon house-to-house tickets are wanting but little. Somehow or another ploughing, sowing, and transplanting, have been carried on freely and generally, without so large a diminution in the numbers on our works as might have been anticipated, and I think many will hold on to these as long as the rates are as high as they are. The time they will be most wanted for agricultural purposes will be about a month or so hence, when the Aghani rice has to be transplanted and general weeding becomes necessary. It is utterly impossible now, unless the Bhadoi crop fails from too much rain, or the rains cease so early that the Aghani fail also, for any famine to overtake the people of the district; and owing to the free manner in which house-to-house relief is gratuitously given, the people generally will be very well off. There are of course many cases where the people are sick and diseased and utterly incapable of doing anything, who will die notwithstanding the exertions of all the officers; but taking the whole district, I can safely say the condition of the people has very greatly improved, and no danger need now be apprehended.

10. I write the above from personal observation, and I have been over a large tract of country. Most of the villages I found surrounded with cultivation, especially of Indian-corn, murwah, and kuchus. These had been all irrigated, and in some instances the Indian-corn had been reaped and the murwah was in full ear and nearly ripe; these of course were extra crops put in by provident ryots, and were naturally great helps. The people generally are in good spirits, and very many I found taking advantage of the times and trying either to get a "ticket" or "tuceavi," who undoubtedly had no business with either.

11. The statement of cases against property for the month of May is annexed; it shows a very slight increase on last year's reported crime, and almost nothing to what might have been apprehended.

B.—RELIEF WORKS.

12. I annex the usual statements showing the progress of the relief works during the fortnight and the work done by the Durbhanga Court of Wards, as also the information called for in Government circular No. 144F, dated 5th May, as far as I have got information.

13. All or any works will be stopped directly if it should appear that they in any way interfere with the call for agriculture; but I agree with Mr. Kirkwood, whose remarks I extract, that there is not much fear of this. Agricultural operations are being extensively carried on, our works notwithstanding. Mr. Kirkwood writes: "I do not think our works are now anywhere likely to interfere with the call for agriculture: any work that I have in my charge will be stopped at once if there be any sign that it is interfering with agriculture; but personally I have not the slightest fear on this account. Let it be remembered that in Orissa, after half a million of the labouring and cultivating classes had perished, works were maintained throughout the rains on a large scale, and yet scarcely an acre of land remained untilled. It is so frequent to find labourers working one day in the field and the next day on works."

C.—TRANSPORT OF GRAIN.

14. The exports and imports at the Bhagulpore station have been larger than usual, 26,867 maunds against 40,412 maunds; and it is clear, as previously pointed out, that grain is imported from the north-west to be sent on again to Calcutta. Of the imports, 25,148 maunds were wheat and 12,361 maunds of gram from far up-country; the rest peas, Indian-corn, rice, and paddy in small quantities. Of the exports, 20,374 maunds were wheat for Howrah, 3,048 oats, and 2,983 gram; rest paddy, local, for Spoltangunge. The trade is not in food-grains, except wheat; and this latter, though largely grown in the district, is grown for exportation, as a rule, and not for local consumption. The trade from the other stations is insignificant.

D.—STORAGE OF GOVERNMENT GRAIN.

15. I have, as previously mentioned, visited every golah in the Soopool sub-division except two, Nathpore and Bheemnuggur, as well as the golahs at Byjnathpore and Sonebursa, in Muddehpooora. The annexed statement, in the form prescribed by Government, is, I am glad to state, correct up to the dates against each golah.

16. The group golahs have nearly all been filled, and in special villages in the south-west corner of Soopool sub-division, grain has also been stored, and with the object of carrying out orders recently received, reliable moodies have been sought for and found in some instances, who are willing to engage to take rice in sufficient quantities for sale in various villages. As matters now are however, I think I am right in asserting that no man need go anywhere in the Soopool sub-division a greater distance than 3 to 4 miles for his rice, whereas in ordinary years many have to go 8 or 10 miles to the nearest laut and think nothing of the journey. Rice, however, shall be taken as nearly as possible consistent with its safe custody and the absence of risk of injury from the weather to within the immediate reach of all, and orders have been given to Mr. Kirkwood accordingly.

E.—ADVANCES TO PRIVATE PARTIES.

17. Rs. 15,000 have been sanctioned by the Commissioner to be paid in grain to one zemindar, named Ekbal Ali Khan, of Soopool sub-division. 1,000 maunds of rice have also been ordered to be given to Rughoobur Dyal Munder, of Moorho, and one application of 2,000 maunds of rice has been submitted to the Commissioner for his orders. Rs. 1,500 have been sanctioned by me to be paid in grain to two zemindars, and there are some other applications recently received, which will be disposed of within the present fortnight.

F.—CHARITABLE RELIEF.

18. Under this head I would first mention the sales to the public from the Government golahs. Though this can hardly come under the heading of charitable relief, yet it is a very great boon to many, and without the opportunity of purchasing many would be unable to procure rice, though they might purchase other food-grains which are available. I took care at every golah except at Soopool itself to watch the sales, and noted a few facts; one being that many of the purchasers from the Semani (Telub), Nurgu, and Roshwar golahs, were inhabitants of Tirhoot, who come there 5 or 6 miles for their rice, and another being that a fair quantity of rice at Dugmurah is purchased for Nepal and done in this way. Women at most of the golahs take precedence of the men, and I observed the same women coming back again for more rice. Their condition was such as to render it impossible for them to be the owners of the rupees brought in, and on watching I found they took their rice outside, where banghybardars were ready to take it away, deposited their load, and returned for more. There were several subterai residents in the golah enclosure, who soon cleared off. The sales to the public in one month only at Dugmurah reached 4,475 maunds, the sales at Nurgu and Roshwar were also high, viz. 5,066 and 7,803 respectively, the former the work of one month, the latter of six weeks. The full work of each golah will be seen in the statement annexed.

19. The rice is sold at two rates only—the one, clean rice, at 12 seers the rupee, and the other, “dhanwa” (containing a quantity of dhan), at 15 seers. I have examined a large quantity of this rice at all golahs, and the quantity throughout is excellent, and remarkably free from weevils. The dhanwa rice is very much preferred, and the bags, as a rule, contain $\frac{1}{2}$ dhan to $\frac{3}{4}$ rice, though sometimes the proportion of dhan is larger. At Ekar some 250 bags arrived from Monghyr completely destroyed by wet, and at Nowhutta some 3 or 4 bags of koorthi had been sent up under the name of rice; 3 or 4 bags moreover were evidently sweepings.

20. The cotton-spinning may here be mentioned, but only so far as I procured figures myself while on tour, which I did from every golah I went to; the figures are nearly all up to the 3rd of June.

| Mds. Srs. C. | | | | | Mds. Srs. C. | | | | |
|-----------------------|----|-----|----|----|-----------------|------|----|----|--|
| Bungong cotton issued | .. | 19 | 36 | 0 | thread returned | 10 | 32 | 7 | |
| Muheshi | .. | 0 | 34 | 0 | .. | 0 | 4 | 10 | |
| Semani | .. | 10 | 37 | 4 | .. | 8 | 4 | 6 | |
| Beergaon | .. | 8 | 39 | 0 | .. | 4 | 23 | 3 | |
| Ekar | .. | 16 | 23 | 0 | .. | 10 | 27 | 8 | |
| Puchgachia | .. | 20 | 28 | 0 | .. | 10 | 11 | 3 | |
| Notha | .. | 18 | 6 | 0 | .. | 12 | 16 | 5 | |
| Chundail | .. | 11 | 32 | 12 | .. | 3 | 19 | 6 | |
| Nowabkahur | .. | 3 | 37 | 0 | .. | 1 | 30 | 14 | |
| Roshwar | .. | 0 | 24 | 8 | .. | Nil. | | | |
| Dugmurah | .. | 8 | 38 | 0 | .. | 2 | 27 | 0 | |
| Dulgaon | .. | 7 | 33 | 0 | .. | 4 | 6 | 0 | |
| Bhulooa | .. | 9 | 10 | 0 | .. | 1 | 17 | 2 | |
| Pertabgunge | .. | 19 | 19 | 0 | .. | 0 | 27 | 7 | |
| Simrahi | .. | 18 | 20 | 0 | .. | 11 | 30 | 5 | |
| Peepra | .. | 6 | 26 | 0 | .. | 2 | 25 | 10 | |
| Nathpore | .. | 6 | 12 | 0 | .. | 1 | 38 | 11 | |
| Sonebursa | .. | 7 | 0 | 0 | .. | 4 | 21 | 5 | |
| Byjnathpore | .. | 6 | 17 | 0 | .. | 5 | 23 | 0 | |
| Total | .. | 183 | 32 | 8 | .. | 107 | 26 | 6 | |

21. The figures for the remaining golahs I have not yet got; but as only 1 seer is given to each woman, some relief has certainly been afforded by this means. Weavers are

beginning to come forward to take the thread, and some cloth has already been returned. All payments for this work are made in grain only. As far as I could ascertain, it takes a woman working at odd times at this spinning 10 to 12 days to turn one seer of cotton into thread.

22. The next points to remark upon are the poor-houses and centres, the latter, at which cooked food was given, have one by one been closed, except a very few, as no longer necessary, now that the house-to-house relief system is in full working order. The poor-houses remain at Soopool, Ekar, Bungaon, Nowabakhur, Dugmurah, Simrahi, Kamp, and Bhowanipore, and those I saw at Ekar, Soopool, Bungaon, and Nowabakhur, were in a very satisfactory condition. The inhabitants of these poor-houses I found in very plump condition, as a rule, but unwilling to leave, being houseless, and they declared that if they departed they would have to subsist by begging and soon fall off again. These people are living anyhow, as I imagine, they never lived before, and are indulged in the luxury of a thorough "oiling," which I understand is a sanitary arrangement. The hospitals are comparatively speaking almost empty; the patients almost nil, and among those I saw the chief complaint was syphilis, especially at Nowabakhur.

23. In the Muddehpooora sub-division there is only one centre open at Muddehpooora itself. The latest figures I have received show that the total numbers receiving cooked food in Muddehpooora and Soopool are as follows:—

| | | | | | |
|---------------------------|----|----|----|----|-------|
| In the Soopool circle | .. | .. | .. | .. | 135 |
| Ekar and Bungong | .. | .. | .. | .. | 522 |
| Bulooa and Simrahi circle | .. | .. | .. | .. | 593 |
| Naradigur | .. | .. | .. | .. | 350 |
| Muddehpooora sub-division | .. | .. | .. | .. | 396 |
| Total | | | | | 1,716 |

24. The house-to-house relief has been given very freely, and having watched distributions at Soopool, Nowabakhur, and Dugmurah, I must say I think that the numbers on the registers could be very fairly greatly reduced. While at Dugmurah I was surprised to see a whole village come in headed by a putwaree, jeyt-ryot, and chowkeedar, in a body to ask to have their names entered for a ticket, not one of them aught but well-to-do, physically at any rate. Their village had been carefully inspected, but only a few deserving men were registered, and after they had got their rice the whole village thought they might try to get some also. I have seen persons honestly purchasing at the golahs in infinitely worse condition, as far as their appearance went, than very many receiving gratuitous relief. I am directing these registers to be thoroughly overhauled again and villages to be revisited, and only these absolutely in want, moneyless, and without means of livelihood, to be entered and relieved gratuitously. Many of these relieved will find ample employment ere long in the fields, and we must not make them idle by feeding them for nothing. The work of house to house relief has been most energetically, and with great labour, carried on by those concerned; but I think though no pains have been spared by all concerned that the relief of this nature has been carried a little too far. The following figures show the numbers who have received tickets, but it must be remembered that if a family consists of six or seven children from six months of age upwards, a ticket has been given to each individual. A large majority of the recipients are consequently small children, and in many cases the children get tickets when the parents do not.

| | | | | | |
|-----------------------------|----|----|----|----|--------|
| Soopool circle | .. | .. | .. | .. | 4,341 |
| Ekar and Bungong circles | .. | .. | .. | .. | 8,500 |
| Naradigur circle | .. | .. | .. | .. | 15,000 |
| Simrahi and Bhulooa circles | .. | .. | .. | .. | 3,789 |
| Bhowanipore circle | .. | .. | .. | .. | 700 |
| Kamp circle | .. | .. | .. | .. | 4,000 |
| Total | | | | | 33,330 |

I am glad to remark that Mr. Fanshawe has been compelling several of his house to house recipients to take to spinning and earn a portion of what is given to them. I hope others will follow this plan,

25. *Light labor gangs.*—These are composed of chiefly women and children and men, who either from old age, weakness, or infirmity, are considered unfit to work under the Department Public Works. The many at work were, as far as I could judge, in excellent health and spirits, and earning more than they possibly could in any ordinary year. All payments are made in grain. The following figures, showing the numbers employed on this and other work, are given by Mr. Kirkwood.

Omitting sales, tuccavees, Department Public Works, and Raj Durbhunga works, we have as relieved.

| | |
|--|--------|
| 1. Privato works | 11,000 |
| 2. Circle labour | 6,392 |
| 3. Light labour | 2,992 |
| 4. Spinning and weaving | 5,465 |
| 5. House to house | 33,330 |
| 6. Relief centres and poor-house | 945 |
| Total | 60,124 |

26. A considerable start has been recently made by Mr. Kirkwood in the matter of advances, but I know very many zemindars have done a good deal in this line themselves. I have just received Mr. Kirkwood's report, and he remarks as follows:—"Lists of what has been done in this matter by myself and Baboo Ram Shunker Sen, almost without exception during the present month, will show we have been active in this matter." In reply to a telegram from the Lieutenant-Governor, I this day telegraph as follows: "Up to end of May 2,100 maunds advanced, since then much activity; myself advanced to zemindars in pergunnahs Naradigur; and Harawuth 5,060 maunds, and to 790 ryots 3,350 maunds, this from end of May to 13th June. Ram Shunker Sen in Harawuth and Dhupper in same time advanced 3,400 maunds to 1,378 ryots. Dwarka Nath Sen in Harawuth (estimate) to ryots 1,000 maunds, total 5,060 to zemindars and 7,750 to ryots; of this 835 maunds seed-grain. Smith in the act of advancing 5,500 maunds rice and 1,000 maunds seed-grain to Raja Leelanund Singh for pergunnah Otturkhund and Kubkhund. I am just giving them for Dhupper 3,000 maunds rice and 500 maunds seed. Roughly speaking, the larger portion of these three pergunnahs have been taken off our hands. This the only case in which action purposely suspended, Commissioner having ordered to wait action until the 10th. Sookhpore zemindars acting admirably in this matter, entirely taking off our hands much of pergunnahs Mulhneegopal and south Naradigur. The only pergunnah entirely on our hands for advances is Harawuth, and that has had much done to it as above. June disbursements under this head probably more than 30,000 maunds; no information from Muddehpooa". This shows with tolerable precision the state of things as regards advances. My own impression is that the action of the zemindars is such as will not necessitate any but very few advances being made direct by us to the ryots; I hope not.

27. The seed-grain, some 15,000 maunds, received from Julpigoree, has not so far been as useful as it was hoped it would have been. Mr. Kirkwood writes, "Seed-grain is generally obtainable in sufficient quantities." Most certainly by the look of the country, it was ample of all kinds; but it still remains to be seen whether there is a sufficiency of the Aghani seed-grain used for high lands. "Out of the 15,000 maunds received, I believe not much more than 2,500 maunds have been taken off our hands, and that with the exception of 78 maunds sold at Soopool entirely as tuccavee and not by purchase, 1,000 maunds were stored at Bhulooa, 1,000 maunds at Simrahi, and the rest at Soopool; much was in transit during the late heavy rains." A good deal, I am afraid, has been much damaged, and I saw a good deal of it when the bags presented the appearance of green fields. Examination showed only the outer grain had germinated; but it was urged by the natives that the inside grain must have become heated, and would be of no use. Several of the bags contained mixed seed of as many as 4 or 5 different kinds—in fact greatly against purchasers: some, however, was most excellent, and of one kind only. The moodies have been induced to take small quantities as an experiment, and I hope it will be successful. If there really be a want of seed, a great deal of this will be got rid off, but now is the time, I saw a large area of Aghani seed nurseries well forward. The state of the country is so far most satisfactory in the matter of cultivation.

28. I hope to be able in the next narrative to show some figures in detail of expenditure in relief under the various headings, but I am not, I regret, in a position to do so this time.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

| | |
|---|----------------|
| Total expenditure from the District and Sub-divisional Treasury, as shown in the last narrative | Rs. A. P. |
| ... | 6,83,432 12 24 |

LIGHT LABOR.

V. T. TAYLOR,
Collector.

No. 2076—F, dated Purneah, the 16th June 1874.

From—W. KEMBLE, Esq., Magistrate and Collector, Purneah,
To—The Secretary to the Government of Bengal, Scarcity and Relief.

The fortnightly narrative for period ending the 13th June is forwarded by

A.—STATE OF THE PEOPLE.

THE crops throughout the district are promising well. The rain has been most abundant everywhere, except in a few villages in the south, where I hear more required.

I have visited Kissengunge and some parts of the sudder sub-division, and found people everywhere busy, ploughing and sowing.

Mr. Thornton at Dengrah says:—"The general condition of the crops and people is satisfactory; although the demand for rice-sales has increased considerably during the past ten days, it can be fully accounted for by the increased demand for labor in the fields, payment for which is invariably made, in part at least, in grain." This gives a fair picture of the general condition of the sudder sub-division.

In Kissengunge the state of affairs has much improved since my last report. Prices have fallen from 7 and 8 seers the rupee to 9 and 10 seers; private traders are busy, bringing up grain from Purneah, Sahebgunge, and Calcutta. I found when I was last at Dengrah ghât that about 500 maunds of rice were taken over the ferry every day for private traders. Mr. Carnac, who has lately taken charge of the sub-division, takes a more gloomy view of affairs, and Mr. Bertelsen, in Bahadoorgunge, reports that "the whole population are dependant on the Government golahs." This is, however, an exaggeration, Mr. Carnac says that he considers that from 15 to 20 per cent. of the population are dependant on Government in the sub-division.

The scarcity here is due, not so much to failure of the crops, as to persons having sold their stock, tempted by the high prices lately ruling. The people consequently have money, and are able to buy. They have here had a good kanni crop, which will do much to alleviate the distress.

Supply of food in the Bazaars.—I have ascertained that during the month of May Messrs. Bird and Co., at Caragolah, have brought up for private traders 23,099 maunds of grain, and 16,601 maunds during the first ten days of June; besides this, enormous quantities continue to come into the district from Sahebgunge by boat. These stores are now finding their way up north. The part of the district where the distress is now greatest is doubtless Bahadoorgunge, where, on the cessation of the importation from the north-east the trade from the south has not yet penetrated.

The grain-thefts and dacoities which had begun to create considerable alarm in this Sub-Division have happily quite ceased; Mr. Craven went up and arrested and punished the rioters in almost every case, and thus restored confidence to the people and the traders. From Arrareah, Mr. Rattray states that the markets are plentifully supplied with Government and private grain, and that the laborers on the roads in many instances earn more rice than they can consume, and the surplus they retail at a profit. Quite enough rain had fallen, no more was wanted. Murwa and bhadoi were doing well, as was also jute. Mangoes, millet, and pulses (kauni and moong) were affording great relief to all classes; it was expected that some fields of early jainira dhan would be gathered in about three weeks.

The return of grain-thefts this fortnight contrasts favorably with that of last fortnight.

R. A. CORDNER,
Executive Engineer.

MENT TO THE CALCUTTA GAZETTE, JULY

B.

Mr. Gouldsbury's report this week contains the rules for the payment of laborers in grain. He is working very successfully, but the demand for grain has increased in the people now take all their pay in rice, and sell what they cannot eat. The number of laborers is 94,718, which gives a daily average of 13,531, being less than last fortnight. There has not been enough rain to stop work, therefore owing to the laborers being wanted for work on the fields. The price of grain in the golahs was owing to the great rush for sales and advances in the supplies are now being pushed up. Bank works by relief officers have in many places ceased, and all non-able-bodied men employed on the village roads, and in generally improving the means of communication. According to my last returns, which are not perfect, the average number of persons employed on relief officers' works is 18,374, which shows a considerable decrease over last fortnight. Mr. Gouldsbury, in Kusba Amour, still continues to find work for a large number of women and children, while the able-bodied men work on the roads of the Department Public Works. The falling off of the laborers is of little consequence, in fact, I look on it as a good sign, as they all work on their fields, and are paid by the grain either advanced or bought from our golahs.

C.

Transport operations are now in full work, both by boats, carts, and ponies. The whole of the 1,50,000 maunds of grain have been despatched from Maldah, and out of this about 80,000 maunds had on the 10th instant been received at Dengra, and sent on to Kusba Amour, Kissengunge and Bahadoorgunge, Koortee, Tetalya, Kallia, Kallia and Kudail; 10,000 maunds had also been stopped at Barsoe for Bulrampore circle. Captain Anderson has arrived, and is now visiting the different circles to inspect the arrangements made for pack-ponies. By my last returns I find that the numbers given below have been engaged and registered:—

| Stations. | Employed. | Registered. |
|----------------------|-----------|-------------|
| Kissengunge | 450 | 500 |
| Bahadoorgunge | 533 | 150 |
| Kudbah | 100 | 500 |
| Kusba Amour | 164 | ... |
| Sudder | ... | 290 |
| Arrareah | 84 | ... |
| Total | 1,331 | 1,440 |
| Grand Total | | 2,771 |

Mr. Gouldsbury has engaged contractors, who will bring ponies when required.

D.

The minor golahs are all stacked. The following table shows the quantity stored in each circle:—

| | Mds. |
|---|--------|
| Sudder | 9,787 |
| Kudba | 2,000 |
| Kissengunge | 10,500 |
| Bahadoorgunge | 10,000 |
| Kusba Amour | 8,224 |
| Bulrampore, about | 10,000 |
| Dengra | 10,000 |
| Arrareah, quantity not definitely stated, said to be 2 months' supply in each, say | 10,000 |
| Total | 75,511 |

E.

The only advances made have been to traders in Kissengunge, as reported in my diary of May 24th. They were:—

| | Rs. |
|---------------------|-------|
| Khesidass } | 1,000 |
| Girdharilall } | |
| Babulall | 500 |
| Muniram Sahu | 2,000 |
| Gotoo Sahu | 1,000 |

Other advances applied for have been tendered in grain, but I have not heard that they have been accepted.

F.

I annex a copy of my district return for the fortnight, which shows 14,732 persons relieved, exclusive of those on Department Public Works of expenditure of grain is also annexed.

Bulrampore returns, owing probably to the illness of Mr. Meiklejohn, received.

Lieutenant Coles, at the sudder, has again included all the persons relief tickets in column 3. This shows a great decrease, and it is satisfactory to find that of purchasers has also ceased.

Lieutenant Coles, by distributing the grain judiciously amongst the traders, keeps markets supplied. These petty traders come to him at stated intervals with their ponies, take the grain to the villages in the interior.

A good supply has also been given to Baboo Mohesh Lall, of Purneah, who sells it in small quantities in the city. This he has been doing for some months past; when his own supply falls short, we help him with Government grain. Lieutenant Coles now finds that 80 maunds a day meets the demand in Purneah station, at first 200 maunds a day did not suffice.

I annex a table which shows the charitable relief given by Roy Lutchmiput Singh's agent in Purneah, Baboo Ramchund Setya. This gentleman's services deserve notice.

Dengraih Circle.—Mr. Thornton's returns show a great falling off in light-labor tickets; but as advances have been freely made, the people are much better employed on their fields. It is reported that "the difficult question of giving relief to women of good family has been met by causing lists of these women to be drawn up by the jeyt-ryots, and countersigned by two or more of the most respectable residents in the sub-circle, through whom a month's supply, at $\frac{1}{4}$ a seer per diem, is issued to each person." This is purely charitable relief, but it is, I think, the only way in which it can be given. Mr. Thornton sells about 110 maunds of rice a day. He reports the whole country much more quiet and contented; no fires, grain-robberies, dacoities, or petty thefts.

Kusba Amour.—Mr. Gouldsbury has omitted to show the number of persons on light-labor tickets, but from the other return submitted to Government, it appears that he has 4,677 persons daily employed. Mr. Gouldsbury states that the work done on his roads by women and children was good, and he was surprised to see the progress made at his last visit.

Mr. Gouldsbury has sent in a return showing 13,846 maunds of rice stocked in 94 villages under jeyt-ryots and group superintendents, under whom village relief is effectually carried out. 1,360 maunds a week are sold at the golahs.

Kulbah.—Mr. Perry's returns show a great decrease. In this locality the importations by private traders have been larger, and the demand for Government grain less than was expected. I have drawn supplies from here to replenish my northern golahs. There are a number of poor weavers and others to whom employment in spinning has been afforded: the cloth is paid for in grain and sold at the local haut; light labor is provided and uncooked rice distributed by ticket.

Bahadoorgunge.—There was here at one time so great a rush for work on our roads that Mr. Carnac was, he says, afraid that the crops would suffer for want of weeding, he therefore, under orders of Government, directed that half a month's supply of food should be given to the men employed on relief works, and that they should be made over to the ryots for doing work in the fields. He has also been authorised to make advances to those ryots who require grain to enable them to pay their laborers. Mr. Bertelsen reported that there was no importation,—this Mr. Carnac remarks is due to the too indiscriminate manner in which sales were held. On my recent visit to Kissengunge, I arranged with him that he should sell less in the public markets and more on tickets to the villagers; this will prevent hoarding and combinations, which I am convinced existed up here among the traders to keep prices high, and will encourage private importation. Sales will still be made through traders, but they will be regulated, and hoarding prevented.

The people here have long had plenty of work supplied to them; the spinning and weaving done under Mr. Bertelsen's superintendence has far exceeded that done elsewhere, and much relief has been afforded by these means. The numbers receiving charitable relief, both in cooked and uncooked food, at Bahadoorgunge is large. Mr. Bertelsen has always been active in getting all fit objects for charity sent to his poor-houses, where they were well taken care of. This fortnight he reports two deaths, both from bowel-complaint, one 48 hours, and the other 3 days, after admission,—probably in both cases disease was engendered by want.

In Bahadoorgunge the difficulties of transport will be great, but I hope we shall manage by pack-ponies, pack-bullocks, and boats to carry grain wherever it is wanted.

The group system has been expanded here, and is now working well. Mr. Bertelsen himself, as far as powers of visiting go, seems to be a thoroughly efficient officer, and knows all the villages in his enormous circle well.

Kissengunge.—Baboo Rajanenath Chatterjee in this circle has far fewer difficulties to contend against; the pucca road enables traders to bring grain into the heart of his circle;

R. A. CORDNER,
Executive Engineer.

MENT TO THE CALCUTTA GAZETTE, JULY 1, 1874.

are well arranged, and are working well. Here also the spinning and has been freely and well distributed. The sales here were not made so y as in Bahadoorgunge, but the village ticket system worked here from

ese last named circles the work is getting well in hand, and rice to supply the g pushed up.

gunge, where distress may break out, has been placed under Abdul Majeed, the ty Collector, an active young Mussulman.

Arrareah.—Mr. Rattray continues to manage his sub-division with only native kants. Mr. Quillet has been sent to Bulrampore to help Mr. Meiklejohn, as Mr. Rattray at the reported he would sooner have a native assistant. He reports that the circle officers are distributing village relief tickets, especially round Dholbajja, where distress is said to be more felt than in other quarters. The people are going to work in large numbers on their fields, those who do not work now, get no share in the harvest work, it is consequently doubly to their advantage to take field-work in preference to ours. Advances of grain and sales have been freely made, so there is no lack of grain; more is being sent up to fill the golahs.

R. A. CORDNER,
Executive Engineer.

The figures in column 3 are actual stock in the Government golahs on the 10th June 1874, as per golahdars' returns; besides this about 75,000 maunds have been stored in the minor golahs in the different circles, and some grain has been despatched or in transit to Julpigoree, for which no accounts have been received yet.

Return of Sick and Infirm treated at the Poor-houses in the District of Purneah for the
fortnight ending 13th June 1874.

| No. 2, Nathpore and Etwaree. | 65 miles marked out, and levelled and surveyed, estimate in progress, and additional length 15 miles east of Khat azunee to Innaetpore from tier has been laid out. | 39,351 | 1,761 | 698 | 41,810 | 1,550 0 | 4,150 0 0 | <p>The heavy rain that has fallen at intervals all over this road during the past week has been a check to the work, as many of the laborers did not come to the road under Mr. Sub-Engineer Kenyon, as he has sent in no statement of grain sold or cash disbursed.</p> | | | | | | | | | | | | | | | | | | | | | |

R. A. CORDNER,
Executive Engineer.

R. A. CORDNER,
Executive Engineer.

| Name of road. | Progress in marking out relief works. | Number of laborers thereon. | | | Supply of food thereat. | | Condition of the laborers and general features of the country. | Mode of payment. |
|---|---|---|-------------|-------------|--|-------------------------|---|--|
| | | Class I. | Class II A. | Class II B. | Amount of Government grain sold to laborers. | Proceeds of sale. | | |
| No. 4, Kissen- gunze to Titaliya. | Whole line laid out, estimate submitted for sanction. | 7,468 | | | 453 5 | Rs. A. P. 1,213 10 8 | The numbers at work on this road are much the same as last reported. In the early part of the week the number were increasing, but owing to the heavy rain many left the works. The crops are looking excellent, and there is every prospect of a good harvest. The condition of the laborer is universally good. Grain-payments have been in force for the last two weeks, and are very popular with the laborers. | but when procurable, the former kind of rice is invariably preferred for by the officer in charge of the works. Class II A laborers on task-work will receive as follows:— Men 11 Women 1 Children 1 Class II B— Men 1 Women 1 Children 1 As almost all our works are now carried on by Class I laborers it is expected that but few payments will have to be made to Class II A and B. On Mondays and Tuesdays pay-orders will be made out, and the same will be made out on the same form as at present, with the exception that the value of the work done will be entered in grain in place of in cash. These pay-orders will be handed over to the duffadars of the range, who will distribute them on the above-mentioned day to the moodies, who will get the grain for them signing a receipt, as at present, on the back of the order. The duffadars will then distribute the grain to their sanze. 4. The officer in charge of the works will be issued with a receipt for the amount of rice required by him at each golah, and will from time to time give a receipt form to the cashier filled up and signed by him, as at present, for such an amount of rice as he considers necessary, and the cashier will be responsible for the fact that the grain is delivered to the golah; he will be allowed, as at present, one cashjemadar to each party, who will keep all the moodies' accounts, and see that provisions are issued on days |
| No. 5, Toortelli, All marked out and levelled, estimate submitted for sanction. | 4 parties working. | 6,337 | | | 428 7 | 1,141 12 9 | The decrease in the number of laborers this week is owing to the heavy rain that has fallen. On Monday and Wednesday less than half the usual number attended the work. I fear that if we have heavy rain soon again it will almost put a stop to the earth-work, as many of the side-cuttings are even now being washed away. Dressing and watering the slopes will, however, afford occupation to those who want it for some time to come. The condition of the laborers is good. The crops in every direction are looking excellent, grain-payments have now been in force for two weeks, and the arrangement is very popular with the laborers. | 1,141 12 9 |
| No. 6, Dengra Ghut to Bhopla. | All marked out and levelled, estimate submitted for sanction. | 5,864 | 216 | | 316 36 | 845 1 0 | The decrease in the number of laborers is owing to the heavy rain that fell during the week, and which for a few days almost completely stopped the work. The crops are everywhere looking well, and the people are cheerfully looking forward to a plentiful harvest. The new system of paying the laborers in grain has been in force for the last two weeks, and the people appear to prefer it to cash. | 845 1 0 |
| No. 7, Raikunze to Bulram-pore. | All marked out and levelled, estimate submitted for sanction. | 11,819 | 2,028 | | 819 9 | 2,194 9 7 | The number of laborers on this work has increased since last week, as some able-bodied men who had first received employment on 2nd class relief works have been sent back to us. There has been some heavy rain along this road, but not sufficient to materially affect the work. The laborers are looking very well in every direction. Grain-payments are now in force, and are popular with the laborers. | 2,194 9 7 |
| No. 8, Woldah Ghut to Harthibet road. | Line laid out, estimate submitted for sanction. | Work can be taken in hand as soon as it is considered advisable to do so. | | | | | | |

No. 456—S.R., dated Doomka, the 15th June 1874.

From—J. H. BOXWELL, Esq., Offg. Deputy Commissioner, Sonthal Pergunnahs,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending the 14th instant.

I have received reports from Rajmehal, Deogurh, Jamtara, Hendwa, and Godda. Sultaabad not received.

A.—STATE OF THE COUNTRY.

There has been no actual failure of supply anywhere. The only part of this district in which serious scarcity is reported is in the Jamtara sub-division, where grain is being supplied to the public from the Government golahs.

Doomka.—No signs of distress in this sub-division, prices of grain are high, but the importation of 3,000 maunds daily expected to arrive will no doubt remedy this.

Mr. Smith, the sub-divisional officer, has just returned from a visit to the Hendwa talook, the only place from which any disquieting reports reached us; after careful enquiry he came to the conclusion that there was no ground for fear. The zemindars of this portion of the country have promised assistance, and have agreed to take grain from Government for advancing to their ryots. Work has been opened on a new part of the Jarmundi and Deoghur road, near Taljhari, where assistance had been asked for.

In Doomka itself relief works have been started, but very few people avail themselves of them, and will not consent to labor at less than 2 annas a day. The large bund at Kattikund under the District Engineer is going on well, but though the rates given are good, and notice had been issued that there was work for 500 men, only 250 could be got on piece-work. Cultivation is going on everywhere, though the rains are not all that could have been desired. There does not appear to be any scarcity of seed.

Rajmehal.—Mr. Stewart states there is very little change as regards supplies in the principal bazars since date of his last report. Sahebgunge is well stocked, and prices gone down to 12 seers for common rice. At Rajmehal no change is reported; in spite of sales to public of Government rice, price of common rice remains at 8½ seers per rupee.

Burio and Burhait remain as before. It is anticipated that when rivers rise and the country is flooded Government rice will have to be sold to the public. Mr. Stewart says that the sale of Government rice at Rajmehal does not interfere with private trade. The people don't like it, they prefer to pay a higher price for dealers' rice and only take Government rice from necessity; they complain that it is old, and chiefly "arrowa," or rice husked without boiling the paddy. No cases of misery or starvation reported. Cultivation going on; maize, millet, and khery being sown. There appears to be no deficiency of corn-seed, but in portions of Moogara there is a scarcity of rice-seed. No crops in the ground but sugar-cane and indigo,—rain has benefited the latter. The mango crop is a partial failure.

Deogurh.—Mr. Wilmot reports much rain over the sub-division, and, in consequence, sowing is actively going on. It has also had the effect of lowering the price at most of the hauts; the dearest is 10 seers at Gharsara, the cheapest 13 at Kurron and other places. As there is a fair promise for the bhadoi crop, rice-holders are selling at Deogurh town, where the price is 11 to 12 seers. Owing also to large recent importations, gram may now be bought in Deoghur and Rohini shops from 16 to 17 seers per rupee; this has lessened the demand for rice,—the people, however, say they will require rice when the rains fairly set in, as they cannot work so hard on gram. Mr. Wilmot states he does not believe extreme distress exists anywhere in the sub-division, from the unwillingness of the people to accept assistance, unless given to them in their own houses, and these people only of the lowest caste. A deputation of 325 men applied for advances of money to assist them in cultivation, and requiring loans of money and grain without interest, repayable after the cold weather harvest, or at a later date, according to their option. They based their application on what they said was being done elsewhere, in Jamtara and Manbhoom. He told them that their crops had not been so bad as at Jamtara, where rice was difficult to procure at 9 to 10 seers a rupee, whereas in Deogurh the selling price was 12. Moreover, he had no orders to give them advances. Work was offered to them, and enquiries made as to their condition, which showed that they were not in the distress they represented. In fact, it was only an attempt to get assistance without having to pay interest for it. They refused the work, and went away grumbling and complaining of neglect.

Godda.—Mr. Grant states that the general condition of the people and country is good, but though not worse than when he last wrote, things have not improved, and in consequence the pressure from scarcity and dearth of food is more keenly felt, and over a more extended area. No cases of death from starvation reported or known of.

There has been a heavy rainfall in the south of the district, but as it has only come within the last few days its effect on the relief works cannot be estimated with certainty. At present the number of people on the works has not decreased; in fact, the daily labour returns show a slight increase as compared with the preceding fortnight. The present daily average is 12,288, against 12,046 of the previous report; 10,061 have been doing task-work, and 2,227 daily labour.

Cultivation, however, is not neglected; the men work in the fields in the morning, and earn their food on the relief works in the afternoon; if they absent themselves entirely their

places are filled up by other members of the family. The next week's returns will probably show the full effect of the rain on the works. No actual failure of food-supplies. At Belbudda and Perozapore the prices range from 7½ to 8 seers at the other bazars from 8 to 10. No reliable information as to stocks of grain in private hands. Though the mustagirs and large cultivators of the southern portion of the sub-division are said to hold sufficient for their own and dependant's wants, there must be many thousand households who have to look to relief work or the chance of agricultural employ for their daily food. Relief work in active progress, and moodies appointed for sale of grain.

Jamtara.—Mr. Hand, the officer in charge of the sub-division, reports favorably of the changed condition of the people since relief operations have commenced, but unfavorably as regards food-supplies. The grain is scarce everywhere, and the price is only kept down by the opening of the Government golahs. Relief works are being opened and carried on in all parts. No cases of actual starvation are reported. There is no certain information as to the stock of grain in private hands: by some it is said to be large, by others small. About 3 inches of rain has fallen, and sowing is pretty general,—chiefly of Indian-corn and sugar-cane. There is a great scarcity of seed-grain, and the cattle are suffering for want of nourishment. Rice will be wanted shortly, both for present use and to store before the rains,—2,000 maunds are on the road to Kundahit from Cynthia.

The people, especially Sonthals, are very averse to the contract or task-work, therefore most of the labor is on the subsistence principle. The daily average of laborers of all kinds employed in this sub-division for the week ending the 12th June shows as follows:—

| | |
|-----------------------------------|-------|
| On subsistence | 3,841 |
| On contract or piece-work | 2,694 |
| Total | 6,535 |

No reports from Sultanabad. Mr. Boerrssen reports that works are going on favorably at Benagarhia, but Mr. Muston complains of the difficulty of selling rice.

Mr. Smith, the excise officer, reports a considerable increase in the collection in the quarterly abkarry return ending March. The Herausser and Pakour distilleries are the most marked; Rajmehal and Burhait also show increase, which the sub-divisional officer attributes to relief operations.

Rain has been general everywhere,—at Doomka we have thunder-storms and lightning daily, with moderate showers. Of the sub-divisions, Jamtara and Godda seem to have had the least fall. Small-pox has broken out at Doomka. Cholera is reported at Moheshpore; a native doctor has been despatched there. In Jamtara few cases of cholera have been reported. In Deogurh small-pox is abating, and cholera has disappeared. No fresh cases of dacoity or any grain-thefts of importance have occurred. The number of beggars, lepers, cripples, &c., in Doomka, has considerably diminished.

B.—RELIEF WORKS.

List of works annexed, with daily average. Grain-payments being made everywhere, with the exception of Doomka, where the grain has not yet come to hand, and the works are of no importance. Mr. Hand has started a good many bunds and tanks; several of them of some magnitude.

Mr. Wilmot has been obliged to increase the rate from Rs. 2 to Rs. 2½ per 1,000 cubic feet, and states the number of laborers is decreasing. Mr. Grant is paying Rs. 2-8 per 1,000 cubic feet.

C.—TRANSPORT.

Our difficulties are now commencing, owing to the agriculturists refusing to lend their carts, having begun the cultivation.

Complete arrangements were made to transport 5,000 maunds from Cynthia to Doomka and Kundahit; the carts arrived at the station before the rice, and, without waiting a single day, returned to Kundahit, refusing to take compensation.

Ferries are being established and temporary sheds erected for the protection of rice during transport at the principal rivers, particularly on the More and Ajay. The Magistrate of Beerbhoom has also kindly lent tents for storage purposes on the Soory and Doomka road.

D.

A large golah is nearly completed at Doomka, and Mr. Hand reports that Jamtara golahs are ready to receive fresh supplies. The Kundahit and Nala golahs are quite complete. The golahs in the other sub-divisions are complete and stocked.

E.

Rs. 200 has been advanced to one Sagor Goran, for constructing a bund at Rajbandh, during the fortnight under review.

F.

The charitable relief committees are just starting work, and will shortly be in full swing. From the report received from Jamtara, it appears that the place stands in urgent need of it. Mr. Grant is also actively carrying out Government orders, and has two agents continually moving about, searching out distress and relieving it when found.

G.—FINANCIAL RESULTS.

The information is given in a separate sheet.

Explanation is required from Mr. Grant as to whether the half-days tell on the haziri and the piece-work, and as to where the supplementary numbers come from, and what they were doing before the rain. I have to thank Mr. Rowland for the preparation of this report: I have been ill and unable to work for three days.

Grain disposed of up to date of submission.

| | | | | | | | | | | | | | 2,947 11 6 |

* The payment by aircars takes place north of Doonka, where a few men are scattered on E. W. repairs.

† During the rains and reasons stated in the 7th column, the number of laborers was comparatively small.

‡ Deputy Commissioner has been asked to grant a supply of food-grain for this place.

§ This work is only the nicking out of the centre line.

DENO NATH MOOKERJEE,
Accountant, for Offg. Executive Engineer, on tour.

No. 852—S.R., dated Berhampore the 16th June 1874.

From—C. W. BOLTON, Esq., Assistant Magistrate and Collector of Moorshedabad, in charge,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

In the absence of the Magistrate-Collector, who has gone to meet His Honor the Lieutenant-Governor at Godagari, I have the honor to submit the narrative of scarcity and relief for the fortnight ending 13th instant.

Narrative of Scarcity and Relief in the Moorshedabad District for the fortnight ending Saturday, the 13th May 1874.

A.—STATE OF THE COUNTRY.

1. *Abundance or scarcity of supply in the bazar.*—The supply of food-grains in the bazars and hâts of the Head-quarters Sub-division is reported to be still sufficient for the daily wants of the people. Notwithstanding frequent reports from many parts that the local markets are never supplied with more than the day's demand of the neighbourhood for each day, prices are not subject to rapid fluctuations, and do not appear to be much affected by accidental circumstances, such as a heavy fall of rain, for instance, which might impede the importation of grain into the markets, at the period of their occurrence. There could not appear, consequently, to be much foundation for these reports. They have, in truth, been constantly received ever since the commencement of the present distress. In the Lalbag sub-division there is still a sufficient supply of food-grain in the city, Baluchur and Azimgunge, but the stock in the hands of shop-keepers is by no means large. In thana Bhadrighat the supply of rice is reported to be very scanty. In the Jungypore Sub-division, in consequence of the importation of a large quantity of "purbi" rice into Dhulian, the smaller bazars in thanas Shumsheergunge and Sooty are more abundantly supplied with rice than when the last narrative was submitted. But in the smaller bazars in other parts the supply is still very scanty. In the Rampore Hât sub-division the supply is reported to be scarce.

2. *Kind and price of grain selling at one or more principal marts.*—The price of common rice has, on the whole, risen; the average of 13 of the principal marts in the Head-quarters sub-division being $10\frac{1}{2}$ seers per rupee, whereas the last fortnight's shewed $11\frac{1}{2}$ seers per rupee. The difference is due rather to a heavy rise in two or three markets than a general rise in the majority of the markets. In some places there has been a fall. It is dearest at Dowluttabad, Hurhurpara, and Kallyangunge, where the rate is 9 seers per rupee, and cheapest in Gorabazar, where the rate is $11\frac{1}{2}$ seers per rupee; gram is $16\frac{1}{2}$ seers per rupee, being dearest at Satoon, where it is selling at 13 seers per rupee, and cheapest in Gorabazar, where the price is 18 seers per rupee. Wheat is $13\frac{1}{2}$ seers per rupee; it is dearest at Dowlatabazar and Satoon, where it is selling at 12 seers per rupee, and cheapest at Gowas, where the price is 18 seers per rupee. It would appear from the cheapness of wheat at Gowas that there must be a good supply of it in that locality, as the greater demand for it, which the dearness of rice, now selling at 10 seers per rupee, must have created, has not as yet had much effect upon its price. In the Lalbag Sub-division the prices of best, common and "Purbi" rice in the several marts vary from 9 to $9\frac{1}{2}$, 9 to 10 and $10\frac{1}{2}$ to 11 seers per rupee, respectively; those of wheat, barley and gram vary from 12 to 14, 18 to 20 and 16 to 18 seers per rupee, respectively. In the Jungypore Sub-division, in the Roghoonathgunge bazar the retail price of coarse "Purbi" rice is $11\frac{1}{2}$ to $11\frac{3}{4}$ seers per rupee. At Shumsheergunge rice sells at $13\frac{1}{2}$ seers for uncleaned rice and $11\frac{1}{4}$ seers per rupee for cleaned rice. At Sooty the latest quotation is 12 seers per rupee. Rice is dearest in parts of Dewanseraï, where "aous" and "Purbi" sell each at 11 seers per rupee, while "Rashi" sells at 10 seers per rupee. The relief assistant attached to this sub-division lately visited Lalgolah and reports that the supply in that bazar is somewhat scanty. In the Rampore Hât sub-division the price of coarse rice varies from 11 to 12 seers and that of fine rice from $9\frac{1}{2}$ to 10 seers per rupee. The latter kind of rice is reported not to be procurable in the markets of Nulhatti and Pulsah.

3. *Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots and others.*—The stock in the hands of mahajuns, zemindars, and well-to-do ryots, is not known, but is supposed to be sufficient to enable them to advance seed-grain to the ryots as occasion arises. There was no lack of seed for the "aous" crop already sown. In one station, Gowas, the mahajuns are reported to be lending grain at 150 per cent. Mr. Jones, special sub-divisional officer of Kandi, reports that nothing certain can be stated on this subject, but he fears that the stocks of the ryots, if not already exhausted, cannot hold out much longer; while the smaller and some of the wealthier and more liberal mahajuns appear to have given out all their stocks. As the rice trade becomes more and more a monopoly, and the rise of the rivers and the state of the country render communication and transport of grain difficult in that part of the district, it will be seen whether the mahajuns have the power of enhancing prices. The next two months will be most critical and the pressure of high prices then most severely felt. In the Lalbag Sub-division the stock in the hands of the jain merchants of Baluchur and Azimgunge is still considerable. A large amount of grain is still being imported for sale at the Patibona and Debipore golahs, situated on the banks of the river Pudma in thana Bhagwangolah. The sub-divisional officer of Rampore Haut states that there is a very small quantity of stock in the hands of zemindars and traders, but believes that the well-to-do ryots have some grain stored up.

4. *Rainfall, if any.*—There has been considerable rainfall during the fortnight under report, and it was almost general. The rain has been of the greatest benefit to the young crops where sown, and has also enabled the ryots to prepare their land for the cultivation of *amun*. It has also materially benefited indigo, mulberry, sugarcane, and the “*til*” crop.

5. *State of the Crops.*—The prospects of the crops are very favorable. The young rice both “*aous*” and “*amun*” is reported to be doing well. The mangoe crop has been very good, although considerable damage was done to it by the storm of the 22nd instant, and vegetables also appear to have turned out well. Much help has, no doubt, been derived by the poor from these two articles. The sub-divisional officer of Lalbag reports that the “*amun*” paddy has been sown generally throughout the sub-division and has already germinated in most places. The young “*aous*” plants are well advanced. Indigo, mulberry, and sugarcane are doing well. The crops in thana Bhudrihaut are a little backward, as less rain has fallen there. The sub-divisional officer of Jungypore reports that the prospects of “*bhadoi*” and “*hoimonto*” paddy have been brightened by the rains. Indigo, sugarcane, and “*bhadoi*” seedlings look healthy in his sub-division. He has lately seen many “*bhadoi*” rice fields in thanas Rughoonathgunge and Dewanserai, and states that the seedlings looked very fine, especially in the alluvial lands of Dewanserai. If there be no inundation this year, a very good harvest of “*aous*” is likely to be reaped. He reports that another good feature in the prospects of the year is an abundant supply of “*purbi*” rice in the Dhulian bazaar. The alluvial lands near the Ganges in thana Dewanserai are the most fortunate parts of this sub-division, and this impression is confirmed by his late tour. The state of Mirzapore, which has no “*bhadoi*” crop to speak of, continues to give some anxiety. In thana Pulsah the “*aous*” on the banks of the Bansloi River is reported to be promising.

6. *Condition of the people.*—There is little change to record in the condition of the lower classes from what has been given in previous narratives; they are still much distressed by the high price of food. For the poorer classes provision has been and is being made. The special sub-divisional officer of Kandi reports that complaints of distress are now loudest from the cultivating classes and the class of writers, &c., who may be out of employment. In the south-east of this sub-division (where several large *mehals* have lately changed hands and it is useless for the ryots to expect help from their new landlords) applications for advances are constantly being made. The advances are required for subsistence allowance during the weeding season and for the payment of laborers who would otherwise go upon relief works. Most of the factories are now closed and many hands are thus thrown upon the labour market. The indigo season, however, will commence in a few days. The sub-divisional officer of Lalbag reports that the laboring classes generally have employment at present on relief works or are engaged in cultivation. Within the municipal limits as well as in thana Bhugwangolah this class is very much better off than in thana Bhudrihaut. Here, as has already been observed, the crops are not so advanced and the people are, comparatively speaking, poorer than the poor classes of the other parts of the sub-division. Persons of this class, especially women and children, will come miles for a handful of rice in this portion of the district. To this class the relief works and the charitable relief are of the greatest service and will prevent a great amount of distress. The population of thana Bhudrihaut is principally composed of the poorer classes, and the better classes are generally speaking well off, and up to the present time there does not seem to be any want amongst them. The sub-divisional officer of Jungypore reports that the condition of the people has slightly improved in parts of this sub-division owing to the importation of “*purbi*” rice. Everywhere the agricultural classes have got work nearer their homes. Shumsheergunge is now better off than it was reported to be in the last narrative in consequence of the good supply of “*purbi*” rice coming into the “*Dhulian*” market, which has already been mentioned. This has also had the effect of augmenting the supply in the smaller bazars in North-West Sooty. The sub-divisional officer of Rampore Hât states that the cultivators are in better spirits since the rain. The poorer people and some of the more respectable classes in thana Pulsah are in difficult circumstances.

7. *Actual facts as to any known cases of misery and starvation.*—The case of one woman in the Khargram thana, who, from want, sold two of her three children for a rupee, was reported to the special sub-divisional officer of Kandi, privately, and afterwards by the relief assistant; temporary relief was given and arrangements are being made for her future maintenance. The special sub-divisional officer has been requested to report more fully on the circumstance of this case, and as to the present condition of the children who are alleged to have been sold. The sub-divisional officer of Rampore Haut, states that there were a few cases of imminent starvation at Balia, in thana Rampore Haut, which had been relieved by the local sub-committee.

8. *Grain-thefts or robberies.*—Three cases of grain-theft of a petty nature have been reported during the fortnight in the head-quarters sub-division; none have been reported from any of the sub-divisions. A crime statement is annexed, which does not show much increase of crime, as compared with the previous two years, but shows a decrease of crime as regards Lalbag and Jungypore sub-divisions.

9. *Condition of any special tracts.*—In the head-quarters sub-division cholera and small-pox are still present; the former in Burwa, where there are a few cases lingering, and the latter in Bhurtpore and Sujergunge; but I am glad to be able to report that both diseases appear at last to be dying out in the head-quarters sub-division, where they have been present so long. Cholera has, however, broken out at Bhurtpore, where one of its first victims was the Secretary to the relief sub-committee. In the Lalbag sub-division cholera has decreased considerably, and only three fatal cases have been reported during the fortnight under report. Small-pox still prevails, but is also on the decrease.

B.—RELIEF WORKS.

The average number of persons employed on the several relief works is 4,991; as far as reports have been received the laborers are in good condition; food is easily obtained, except in the case of one work, the road from Panchgram to the Jebunttee bridge. Payments are made at the rate of 2 annas per diem, and the rates of task-work vary from one anna six pie to three annas per 100 cubic feet. On the principal works rice payment has been introduced, and laborers on many of the minor relief works started by the district relief committee are also being paid in the same manner. As fast as rice can be sent out to the relief works, cash payment is being substituted by payment in rice. Considerable progress has been made within the fortnight, and, provided supplies are regularly received from Calcutta, cash payment will be confined very shortly to a few of the least accessible minor works, principally under the relief committee, to which, on account of their limited extent, it will scarcely be necessary to extend rice payments. The rates of payment in rice on the Government relief works, which have also been adopted on the works carried on by the district relief committee, have been fixed by the Commissioner as follow:—12 seers per rupee for clean rice, and 14 seers per rupee for Burmah and other partly unhusked rice. The laborers are perfectly satisfied with these rates, and the introduction of rice payment has not been attended by any diminution in their numbers. In some places it is reported that they are flocking to the works in large numbers; and a gentleman in charge of a road under the relief committee states that they apparently prefer to come to the relief works than to labor in the fields. He has been requested to report again on the matter after further experience, and, if his previous opinion be confirmed, it will probably be necessary to reduce the rates of payment. The laborers appeared to object at first to payment in cash for one day of the week only, but no more complaints, are now heard on this subject. They are in all probability able to sell a portion of their daily earnings for cash at a profit, and thus obtain money for the purchase of other necessities. The workmen as a rule bring their own tools. A statement showing the expenditure on relief works during the fortnight under report is herewith submitted.

C.—TRANSPORT OF FOOD.

At Azimgunge the local merchants are still importing rice. Four boats laden with rice arrived at Lampat bazar (Lalbagh) on the 10th instant from Cutwa sub-division. It appears that 8,126 maunds of food-grains have been exported from the Rampore Haut sub-division, and 12,599 maunds have been imported into the same sub-division during the fortnight ending 6th instant. During the fortnight 11,441 maunds of Government rice have been received, and 10,265 maunds have been already sent out to the places selected for its storage, and to several of the relief sub-committees. The district relief committee has indented largely upon the Government stores, and will require a large supply for its sub-committees, particularly in the Bhurtpore thana, where most of the relief works are carried on under it, and it has been found necessary to increase charitable relief latterly.

The Government rice already sent out has been distributed as under:—

| | | Government Relief Works. | | | Relief Committee. |
|---------------------------|-----|--------------------------|-----|-----|--------------------------|
| | | Mds. | S. | C. | |
| Sudder sub-division | ... | ... | 636 | 8 | 12 |
| Lalbagh | " | ... | ... | ... | Information not received |
| Rampore Haut sub-division | ... | ... | 395 | 10 | 0 |
| Jungypore | " | ... | ... | ... | as yet. |

No difficulty has been experienced in procuring sufficient carriage for the conveyance of the rice from the railway-stations into the interior, but the Nulhattee (State) railway has not been able to convey the rice sufficiently fast from Nulhattee to the other stations down the line.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

The places at which Government grain has been stored are—

| | |
|--|--|
| SUDDER SUB-DIVISION | Berhampore, thana Sujagunge, |
| | Saktipore and Kandi, thana Bhurtpore. |
| | Gokum and Rangamatty, thana Gokum. |
| | Harishpore and Huriharpara, thana Huriharpara. |
| | Jellinghee and Fureedpore, thana Jellinghee. |
| | Nobogram and Panchgram, thana Kullyangunge. |
| | Beldangah, thana Burwa. |
| | Doulatabad, thana Doulatabad. |
| LALBAGH SUB-DIVISION—Lalbagh, Bhogwangola, Ranitalao and Lagurdighi. | |
| RAMPORE HAUT SUB-DIVISION—Khargaon and Rampore Haut. | |
| JUNGYPOR SUB-DIVISION—Jungypore. | |

Where houses could be procured, they have been hired for storage, and in other places bamboo structures are being erected. In Berhampore, a large building, formerly attached to the cantonment and used as a hospital, has been taken for a central golah. It answers the purpose extremely well, and has accommodation for 20,000 to 30,000 maunds. The establishment in charge of the golahs consists of a mohurrir on a salary of Rs. 10 per mensem, or, where available, a pound mohurrir on an extra allowance of Rs. 7 per mensem; a chowkeedar on Rs. 4 per mensem; and two coolies, to be paid principally in grain.

The supply of rice as yet imported into the district is sufficient for its present requirements, but as the district relief committee are making large demands upon the Government

stores, it will be necessary to continue the daily despatches hitherto made from Calcutta for some time longer, until a sufficient stock is laid in. The district grain officer has written to Mr. Toynbee on the subject.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

There were 31 cases pending at the end of the previous fortnight under the Land Improvement Act in the sudder sub-division; 3 fresh applications were received during the present fortnight. Out of the total 34, 16 cases are under investigation; in one case order for payment has been made; in one case the applicant has refused to take an advance; in 5 cases applications have been rejected, and in 11 cases the securities tendered have been found to be insufficient. A sum of Rs. 1,435 has been advanced to 6 parties during the fortnight under report. In the Rampore Haut sub-division a sum of Rs. 65 only has been disbursed during the fortnight as advances under the Land Improvement Act.

F.—CHARITABLE RELIEF.

The statement prescribed by Government No. 1251—S.R., dated the 5th March last, is annexed, as regards each sub-division separately. The numbers receiving charitable relief have increased very considerably during the fortnight, not from a sudden increase of distress, but owing to compliance on the part of the relief committees with the wishes of the Central Committee, that charitable relief should be given freely and without stint. Much relief is thus afforded to thousands who would otherwise be seriously inconvenienced for food, although not reduced to starvation.

There was a balance of Rs. 42,250-11-7 at the close of the fortnight. The total receipts during the present fortnight amount to Rs. 63,691-11-7. This sum includes the grant of Rs. 21,100 made by the Central Committee for the present month. The total actual expenditure from the relief fund during the fortnight has been Rs. 1,983-9. The district committee has, however, purchased a large amount of rice from the Government stores, for which payment will be made shortly, on the adjustment of the accounts.

A cook-house is being erected at head-quarters, as of late applicants for relief have considerably increased. A cook-house has been started at Saktipore, and is now in full operation.

In the Lalbag sub-division the balance at the credit of the sub-divisional relief fund at the close of the last fortnight was Rs. 1,551-1-2, and the subscriptions realised during the present fortnight amounted to Rs. 276, making the amount of total receipts Rs. 1,827-1-2. The expenditure incurred has been Rs. 167-12-6, leaving a balance of Rs. 1,659-4-8 at the end of the fortnight under report. This sub-division still continues to incur expenses on account of charitable relief from local subscriptions, unaided by Government or any allotments from the district relief fund. Large numbers of persons appear to have been relieved by minor works, such as tank-excavations, road-repairs, &c., started by the city of Moorshedabad municipality, by the sub-divisional relief committee, and private individuals. Gratuitous relief, too, in the shape of rice, has been very liberally distributed.

In the Jangipore sub-division numbers have been at work on tanks and road-repairs. During the fortnight under report 64 persons received wage for jute spinning amounting to Rs. 14, 1 person received a dole of pice, and 8,957 persons received doles of rice weighing 147 maunds, 29 seers. The total receipts of the sub-divisional relief fund up to date is Rs. 3,127-5-1, and the total expenditure Rs. 1,826-9-8, leaving a balance of Rs. 1,300-11-5 at the close of the fortnight.

In the Rampore Haut sub-division there was a balance of Rs. 1,331-15 only at the credit of the sub-divisional relief fund at the close of the last fortnight. The total receipts during the present fortnight amount to Rs. 710. The total expenditure from the fund during the fortnight has been Rs. 1,761-2-1½, and the balance remaining in hand is Rs. 280-12-10½ at close of the fortnight. The sub-divisional officer reports that he has been granting small loans to chowkedars.

(d).—A great deal of relief under heading (d) of the Central Committee's notification of the 4th March last has been given at Kandi during the fortnight, and some cases which have been brought to notice have been relieved at head-quarters. The sub-divisional officers, however, appear not to have had any applications from people of the class falling under the above heading. As remarked by the Magistrate in a previous narrative, people of this class are not suffering very much from the prevalent distress. The principal sufferers are probably to be found in the towns, and especially in Berhampore, where many widows come to reside from other districts, in order to spend the remainder of their lives on the banks of the Bhagiruthee. Such persons are generally relieved by friends, relatives, or the members of their own castes, and in Berhampore the majority are also assisted by the Maharanee Shurnomoyee, whose generous charity embraces all classes. The number of applicants to the relief committees will, however, doubtless increase as the wishes of the Central Committee for the relief of this class become more widely known. Every genuine case of distress will be promptly and amply relieved. The number returned as relieved during the fortnight at Kandi is 387, and at head-quarters 6 persons received rice and some pecuniary assistance.

C. W. BOLTON,
Asst. Magistrate and Collector, Moorshedabad, In charge.

No. 862—S.R., dated Berhampore, the 17th June 1874.

From—W. WAVELL, Esq., Offg. Magistrate and Collector of Moorshedabad,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to forward accounts showing the expenditure of the district relief committee from the commencement of operations up to the 31st of May, classified under the various headings, which I find were not sent with the last fortnightly narrative.

FORM A.

Cash account from 1st January to 31st May 1874, District of Moorshedabad.

| RECEIPTS. | Rs. | As. | P. | DISBURSEMENTS. | Rs. | As. | P. |
|---|---------|-----|----|--------------------------------------|--------|-----|----|
| 1. Opening balance ... | | | | Expenditure under heading (b) 12,099 | 3 | 0 | ½ |
| 2. Remittances from central committee ... | 20,000 | 0 | 0 | ditto, ditto, (c) 27,691 | 5 | 4 | |
| 3. Recoveries by sale of manufactures and otherwise, under headings c and d ... | *270 | 10 | 6 | ditto, ditto, (d) 1,452 | 15 | 4 | |
| 4. Local subscriptions ... | †29,588 | 13 | 7 | Miscellaneous ... | | | |
| 5. Government grant ... | 19,478 | 6 | 4 | For orphans ... | | | |
| 6. Miscellaneous ... | 797 | 3 | 7 | | | | |
| Total ... | 70,135 | 2 | 0 | Total ... | 42,023 | 7 | 8½ |

* Rs. 120-0-0 out of this amount have not been credited to the treasury.
† Rs. 2,395-4-9 ditto ditto. This amount consists of contributions by individuals to relief works or tanks carried on by the relief committee, and of charitable subscriptions raised locally by the sub-divisional relief committee of Ramporehaut and the sub-committees of Suktipore and Gokurn.

W. WAVELL,
Offg. Magistrate and Collector of Moorshedabad.

No. 1266—S.R., dated Dinagepore, the 15th June 1874.

From—A. C. BRETT, Esq., Joint-Magistrate, in charge of Dinagepore Magistracy,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

In consequence of the temporary absence of the Magistrate, Mr. Lewis, who has gone to Godagari to meet His Honor the Lieutenant-Governor, it devolves upon me to submit the narrative for the fortnight ending 15th June 1874.

A.—STATE OF COUNTRY.

The prospect of the bhadoi crop is excellent; Mr. Lewis in his last report said that unless no rain fell between then and July, it promised a good return. We have had splendid rain, so that a very full bhadoi may be confidently expected. Preparations for the winter crop go on apace, and for this also matters look very hopeful; cholera has disappeared. Mr. Rajkissen Sen, and Babu Joges Chandra Mitter, alluded to in Mr. Lewis' last report, have taken charge of their respective duties. The price of rice has universally fallen, owing, without doubt, to the bountiful rain.

B.—RELIEF WORKS.

I subjoin the form of return framed by Mr. Lewis in his last narrative, filled in with the figures for the present fortnight.

The orders of Government regarding the payment of wages in grain have been generally carried out. As Mr. Lewis will personally give His Honor the Lieutenant-Governor full information as to the different ways in which the supplies of Government grain are being utilised for the benefit of the country, I need not enlarge on this topic.

C.—TRANSPORT.

This is practically completed.

D.—STORAGE.

Under Mr. Lewis' instructions, the sales of rice at the various golahs have increased in quantity.

E.—ADVANCES.

Advances of grain to ryots are freely made. A few zemindars have applied for money advances to purchase seed-grain. Their applications are under the Collector's consideration, but none have yet been complied with.

F.—CHARITABLE RELIEF.

I append a list shewing the expenditure for charitable relief under the heads B, C, D, of the Central Relief Committee's rules. The machinery for the distribution of charitable relief remains as it was during the last fortnight, viz., in the main, the mandals of individual villages. The extension of the system of group superintendents is under consideration. The following is the statement shewing the number of persons receiving charitable relief:—

| No. | Name of circle. | No. receiving relief. | | Increase. | Decrease. |
|-----|------------------|-----------------------|--------------------------|-----------|-----------|
| | | Shown in last report. | In this report. | | |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Dinagepore ... | 1,902 | 2,430 | 528 | |
| 2 | Ranisonkoil ... | 5,146 | 4,631 | | 515 |
| 3 | Bindoil ... | 1,810 | 1,876 | 66 | |
| 4 | Doorgapore ... | 907 | 1,500 | 593 | |
| 5 | Chooramon ... | 456 | 630 | 174 | |
| 6 | Kaliagunge ... | 486 | 705 | 219 | |
| 7 | Tamboolee ... | 324 | 1,280 | 956 | |
| 8 | Gungarampore ... | 2,248 | 2,363 | 115 | |

| The 15th June 1874. | | Joint-Magistrate. | |

No. 584F, dated Maldah, the 16th June 1874.

From—F. WYER, Esq., Officiating Magistrate-Collector, Maldah,

To—The Offg. Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to forward my narrative for the fortnight ending 13th of June.

A.—STATE OF THE COUNTRY.

During the fortnight rain fell throughout the district, and in consequence of this the prospects of the Bhadoi crop are very good indeed; a greater area has been sown with this crop not only in the north-east part of the district but in the south-west and western parts, which I visited about a week ago; the people are beginning to leave the relief-works for weeding and cleaning their rice crops. There will be, I think, a much greater falling off in the numbers during the next fortnight; the daily number of coolies working during the past fortnight was 6,488 against daily average of 8,321 during the preceeding fortnight; the prices of rice were much the same as during the preceeding fortnight. The following list gives the latest prices—

| | | | Paddy, No. of seers per rupee, (80 tolah weight.) | Common rice, No. of seers per rupee, (80 tolah weight.) |
|--|-----|-----|---|---|
| | | | Seers. | Seers. |
| English Bazar... | ... | ... | 16 | 11½ |
| Old Maldah ... | ... | ... | 0 | 12 |
| Gazole ... | ... | ... | 18 | 12 |
| Nowabgunge ... | ... | ... | 0 | 9½ |
| Rohunpur ... | ... | ... | 16½ | 10½ |
| Chanchal, Tulseegunge, Samsee and Abadpore | ... | ... | 16 | 10 |
| Kaliachuck ... | ... | ... | 0 | 12½ |
| Sheebgunge ... | ... | ... | 0 | 9½ |

Boats are arriving at Head-quarters with rice and paddy from the eastern districts, and from Rohunpur, Nielpur, and other places, so that sales of Government rice in Maldah have fallen to two and three maunds a day, the total quantity sold there during the past fortnight was only 74 maunds. In fact, the total sale to the public throughout the district reported up to date was only 1,172 maunds. I erroneously informed Mr. Bernard that the sales did not exceed 1,000 maunds, the exact amount reported is as given above; but I found to-day when I was at Sheebgunge that that circle officer had not sent in his report of rice sold, that quantity was 932 maunds, and thus the total sold was 2,104 maunds. This quantity, though double the quantity I thought had been sold, is not much for the whole district.

The rainfall as recorded—

| | | | | |
|----------------------|-----|-----|-----|-------|
| At Head-quarters was | ... | ... | ... | 1.07" |
| „ Chanchal | ... | ... | ... | 0.56" |

Condition of special tracts.—Owing to the small quantity of rain which fell during the fortnight at Chanchal the tanks and wells were lower than at any other time of the year, and the water went bad in them. Mr. Reily made wells for drinking water for the people, but they did not take the trouble to go to them, so that cholera has broken out both at Chanchal and Maltipore. The number of cases was 71, of these 15 died, 22 are still under treatment, and 34 are said to be out of danger; therefore, the disease does not seem to be of a virulent type. Since the close of the fortnight there has been heavy rain in Chanchal and the Mohanuda has risen; thus the small rivers will soon fill, the people will get wholesome drinking water close to their doors, and most probably the disease will not spread.

The prospects in Kaliachuck thana were reported by Mr. Livesay to be gloomy, but rain has now fallen there, and I think that, at present, there is not much cause for anxiety for that part of the district.

B.—RELIEF WORKS.

The daily average of the number of people employed on relief-works during the fortnight was 6,488; thus there has been a falling off of 1,833 a day since the preceding fortnight. The laborers are now paid in six-part grain to one-part money, with the exception of a few in Kaliachuck who were under the supervision of Mr. Fergeson, an indigo planter. The men having refused grain payments, Mr. Fergeson continues to pay them in money pending orders. Since it is clear that if the laborers refuse rice payment they cannot be in any great distress. I have ordered the discontinuance of the relief-work in Kaliachuck, unless they accept these payments. The following table gives the number of persons employed in each circle. It will be seen that the amount disbursed in cash by the Department Public Works was Rs. 3,153, and the amount in grain Rs. 2,217-11-0 (taking 12 seers for the rupee). This is owing to the payment in grain having been introduced towards the end of the fortnight:—

| NAME OF SUB-DIVISION. | Number of Public Works Department laborers. | | | Number of laborers under Circle Officers. | | | |
|---------------------------|--|--------|-----------|--|--------|-----------|--------|
| | Men. | Women. | Children. | Men. | Women. | Children. | Tot |
| Sudder circle | 1,685 | ... | 3 | ... | ... | ... | 2,548 |
| Gomastapore circle | 2,801 | 1,941 | 841 | 5,037 | 3,160 | 1,816 | 10,013 |
| Gazole circle | 6,821 | 1,907 | 677 | ... | ... | ... | 4,228 |
| Nawabgunge circle | 4,428 | 3,376 | 819 | ... | ... | ... | 15,606 |
| Maldah circle | ... | ... | ... | ... | ... | ... | 5,300 |
| Chanchal circle | 94 | ... | ... | ... | ... | ... | 16,790 |
| Seebgunge circle | 7,712 | 2,280 | 560 | 207 | 34 | ... | 6,241 |

| | | |
|---|----------|--------|
| Total number of laborers under Department Public Works... | Men | 23,541 |
| | Women | 9,504 |
| | Children | 2,901 |
| Total | | 35,946 |

Total number of laborers under Circle Officers ... 38,026

| | | |
|--|----------|--------|
| Total number of laborers under Chanchal Circle Officer | Men | 16,790 |
| | Women | ... |
| | Children | ... |
| Total | | 16,790 |

Grand Total 90,762

Daily average number of laborers employed in the Sudder Sub-division was—

| | |
|-------------------------------|-------|
| Under Department Public Works | 2,567 |
| „ Circle Officers | 2,716 |
| Total | 5,283 |

Daily average number of laborers employed in the Chanchal Sub-division—

| | | |
|-------------------------------|-----|-------|
| Under Department Public Works | ... | 6 |
| „ Circle Officers | ... | 1,199 |
| Total | ... | 1,205 |

Daily average for the whole district 6,488

Amount disbursed in wages by the Public Works Department during the fortnight was—

| In cash. | | | In grain. | | |
|----------|----|----|-----------|----|-----|
| Rs. | A. | P. | Mds. | S. | Ch. |
| 3,153 | 7 | 9 | 2,217 | 11 | 0 |

C.—TRANSPORT OF FOOD.

Of the total quantity of grain received into the district (i.e., 9,71,997 maunds) 7,82,701 maunds have been despatched to Purneah and Dinagepore, and the rest is stored in the district, of which 1,35,635 maunds have been stored in the several golahs of the district.

D.—STORAGE OF GOVERNMENT GRAIN.

The following quantity of grain has been stored in the several golahs of the district, viz. :—

| | Mds. |
|---------------------------------------|----------|
| English Bazar | 40,462 |
| Old Maldah | 27,195 |
| Gazole | 9,995 |
| All the golahs of the Chanchal circle | 44,608 |
| Gomastapore | 1,125 |
| Nowabgunge | 8,750 |
| Jhelim | 1,000 |
| Parbuttypore | 1,000 |
| Sheebgunge | 1,000 |
| Total | 1,35,635 |

The following table shews the quantity of grain distributed to subsidiary golahs during the fortnight, viz. :—

| From English Bazar Golah— | Mds. | Srs. |
|---------------------------|-------|------|
| To Foolbaree | 50 | 0 |
| „ Gopalgunge | 283 | 0 |
| „ Shershahye | 998 | 0 |
| „ Kalliachuck | 492 | 0 |
| „ Kamalabaree | 1 | 38 |
| „ Goamaltee | 400 | 0 |
| „ Bhugwanpore | 500 | 0 |
| „ English Bazar | 35 | 0 |
| „ Sosain | 300 | 0 |
| „ Sheebgunge | 191 | 25 |
| „ Nowabgunge | 1,000 | 0 |
| | 4,056 | 23 |
| From Maldah old town— | | |
| To Maldah | 131 | 6 |
| Grand total | 4,187 | 29 |

The total quantity of grain disposed of up to date for all purposes was 25,137 maunds 2 seers 4½ chittacks.

E.—ADVANCES TO PRIVATE PARTIES.

No advances of money have been made during the fortnight, either for purchase of grain or for land improvements. During the fortnight 4,123 maunds were advanced to ryots. The total quantity advanced up to date is 6,403 maunds.

F.—CHARITABLE RELIEF.

The following table shows the number of people charitably relieved during the fortnight under report.

| Name of Circle. | Number of centres at each circle. | Number of people relieved. | Rice distribution. | Cash distribution. | REMARKS. |
|-----------------|-----------------------------------|----------------------------|--------------------|--------------------|----------|
| | | | Mds. Srs. Ch. | Rs. A. P. | |
| Budder | 8 | 16,133 | 209 18 2 | 45 10 3 | |
| Gazole | 7 | 5,754 | 134 11 2 | | |
| Gomastapore | 11 | 20,882 | 219 0 12 | 257 12 4½ | |
| Nowabgunge | 14 | 34,219 | 540 19 10 | 191 13 8 | |
| Maldah | 16 | 24,846 | 209 37 12 | 409 4 6 | |
| Sheebgunge | 4 | 1,200 | 70 0 0 | | |
| Chanchal | 32 | 30,890 | 702 21 7 | 31 14 7½ | |

Total daily average number of people relieved during the fortnight was 9,562.

It will be seen that there is an increase on the previous fortnight. This increase has taken place at Chanchal, Maldah, and Nowabgunge.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

| | Rs. | A. | P. |
|---|----------|----|----|
| Total expenditure from district treasury, as shown in the last fortnightly narrative | 3,10,813 | 14 | 8 |

B. S. MORTROYA, Ct. Insp.,
For District Superintendent of Police.MALDAH,
The 2nd June 1874.a = 2 grain thefts.
b = 5 " "

No. 1229, dated Beaulah, the 18th June 1874.

From—W. H. D'O'LY, Esq., Collector of Rajshahye,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit herewith my narrative for the fortnight ending on the 14th June.

A.—STATE OF THE COUNTRY.

Prices have remained high throughout the fortnight; in some places as high as 7 seers 4 chittacks per rupee. There is no doubt whatever that this has been caused by the almost total cessation of importation during the latter part of the last and the beginning of the present fortnight. Lately, however, rice has been imported in large quantities chiefly at Beelmara, Charchat, Beaulah, and at Teygatchee. The first three of these places are on the Ganges; the fourth is on an affluent of the Attrai, about 7 miles north of Nattore. These importations have not yet had any effect on the prices except to a small extent in Beelmara. It is reported that the supply in several markets has been hardly equal to the demand. Sales to the public on a small scale were commenced at Nowhatta, in the north of the Beaulah thana, at Nowgong and Bandaikhara, and in one or two marts in Tannore. I have lately had the advantage of a consultation with His Honor the Lieutenant-Governor, and in accordance with his instructions Government rice will be sold to the public more extensively in parts of Baraigaon, Singra, Bandaikhara, and Tannore. At the end of the last and in the beginning of this fortnight, crowds of ryots came into Beaulah, and said they had no seed-grain and no money, and that they would not be able to get through the next two months unless grain was advanced to them. The district relief officer at first gave a few advances of grain, and the result was that the crowds of applicants increased daily. I found that most of these were well-to-do, wearing good clothes, carrying umbrellas, and presenting none of the appearances of want or privation. Their object was to make a profit for themselves. I therefore stopped advances, and ordered that only those should be provided for who really required assistance.

During the fortnight I rode over the part of the country from which most of these applicants came, and although I was prepared to find a good deal of aous dhan, I was surprised at the quantity that I saw. From Beaulah northwards to Soorsa, and from Soorsa 18 miles to the east through the north of Pooteah thana, not a beegha of land hardly that could be cultivated with aous has been left fallow: everywhere the aous has germinated well, and is thriving as well as could be wished. In the low lands the deep-water rice is doing well also. I found also that the condition of the people generally was good. In all the villages I passed through, the women, the children, and the cattle were fat and well-cared for. Still, in the face of all this appearance of prosperity, there is undeniably a good deal of distress. The weavers, the poorest of the ryots, the infirm, all flock to the poor-houses, and those who can work, gladly take to it. There is a great deal of mulberry cultivation in that part of the district, but the Cheit and Bysack bunds have not been good. Further south the Bysackee bund was an excellent one. The next important bund will be in August, and that with the aous crops will, I trust, prevent any further distress. Mr. Walton and Mr. Forbes, who are in charge of silk factories in the north of Pooteah, have rendered invaluable service in establishing poor-houses and in affording relief, personally superintending the relief operations. I hope to close most of our poor-houses when the aous comes in.

Crime has not increased; sickness has decreased. There have been no cases of starvation. No orphans have been thrown on the hands of committees.

B.—RELIEF WORKS.

There has been a very slight increase in the number of laborers on works under the Public Works Department during the fortnight, but the number employed throughout the district is very small, the daily average number being a little over 1,000.

C.—TRANSPORT OF GRAIN.

See Statement.

D.—STORAGE OF GOVERNMENT GRAIN.

I have not yet heard positively from the railway authorities, but I believe they have in store for me 40,000 maunds between Sooltanpore, (Nowgong), and Sora. All the rest of our allotment has been stored, barring short weight, amounting to about 500 maunds.

E.—ADVANCES TO PRIVATE PARTIES.

| | Rs. | A. P. |
|---|----------|-------|
| Up to end of last fortnight | 1,26,132 | 12 0 |
| During the fortnight, in money | 1,400 | 0 0 |
| During the fortnight, in grain, 873-20 maunds, value | 292 | 8 0 |
| Total | 1,27,825 | 4 0 |

F.—CHARITABLE RELIEF.

The numbers at the poor-houses have increased. The following statement will show that the daily average number of persons relieved is 13,620, of whom 7,009 are fed gratuitously, and 6,611 in return for work done. The rise in the prices of rice has caused the increase in the numbers, and till the aous crop comes in, in August and September, they are not likely to decrease.

| Name of Thana. | Name of poor-house. | NUMBER OF PERSONS RELIEVED DAILY. | | REMARKS. |

No reports received from these sub-divisions for the fortnight.

W. H. D'O'LY,
 Collector.

No. 15, dated Rungpore, the 13th June 1874.

From—E. G. GLAZIER, Esq., Offg. Magistrate and Collector of Rungpore,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

THERE has been a marked change for the better during the fortnight, evidenced by the greatly diminished numbers on relief works. The rainfall has been copious, 8.33 inches having fallen at head-quarters, and it has been very general. In most parts the aous rice is safe, and the yield will be abundant. In Durwani the yield is expected to be double that of an average year; in the eastern parts of Molung such a crop has not been seen for 10 years, and in Sundargunge I saw the crops were splendid. In some parts, however, the preceding drought did great damage, especially in Mahigunge, where much has been scorched, and some ripe ears shewn me by the relief officers were half of them empty, the milky juice having dried up instead of being developed into grain. Down, too, in Pirgunge and Govindgunge, a good portion of the jhully, or early aous, was lost, but the regular crop, which is much later, is thriving, and promises a full outturn if more rain falls when wanted. On the whole, a much more than average crop may be expected. Land is everywhere being prepared for the amun crop, and in many places the seed has been sown, and here and there transplanted.

The time for the sowing of this crop will extend over one or two months, according to the nature and position of the soil; and the question of seed-advance is being dealt with and will be referred to later. In one quarter a strange difficulty presented itself to the cultivator, *the want of land*; the people have carried on aous cultivation to such an extent, that there is not sufficient room left for the amun; and the relief officer of Borobaree saw some cultivators removing aous plants, to make the land clear for the amun rice. Jute and sugarcane have been extensively grown and are looking well. The millets have nearly all been harvested, and there is a good supply of them, and also of aous rice, in the markets. Mangoes and jack fruit have also been brought for sale in large quantities, and the condition of the poorer classes has been much ameliorated by the different cheap food-products. In one division, cheena, the least palatable of the millets, is, it is said, kept in store and rarely brought to market, as the purchasers are now sufficiently well off to export and buy the dearer food grains.

Prices have fallen everywhere to a moderate extent, as the following quotations shew:—

| | | | | |
|-------------|-------------|-----|----------|-------------------------|
| Mahigunge | } per Rupee | ... | 9½ | 0 of 80 tolahs weight.* |
| Nowabgunge | | ... | 9½ | 0 ditto. |
| Gyobunda | " | ... | 9 | 0 ditto. |
| Govindgunge | " | ... | 7½ to 8½ | ditto. |
| Pirgunge | " | ... | 9½ to 10 | ditto. |
| Sundargunge | " | ... | 8½ to 10 | ditto. |
| Durwani | " | ... | 12 to 13 | ditto. |
| Borobaree | " | ... | | |

At the same time, trade has been brisk, but the importations from other districts show a falling off, while local supplies have largely increased. At Kallygunge trade has much

straitened, owing, it is said, to the local supply of millet and early rice in the markets. Rungpore station markets still continue to be supplied with Serajgunge rice from Sundargunge to a large extent. An extensive cart traffic in rice has sprung up along the new relief road (now finished), from that mart on the Teesta, and the falling off of the usual Dinagapore supply is thus balanced. Government rice on passes from Kallygunge is now brought in regularly by traders to Rungpore markets, and has a marked tendency to keep down the general rate. Molung and Pirgunge continue to be supplied in this way, and for Kumargunge, Durwani, and Jaldaka, passes are freely given on the Kumargunge local golah, and on Chellakhal. The pack-bullock traders are a very energetic set of men, and shew a great readiness to draw supplies from any new place on terms which will yield them a fair profit. In any future scarcity, if sufficiently early measures of the kind are taken, it may be depended on that if Government will place its stores at convenient locations on the rivers, the small traders of the country will carry the grain into every market in the district where it is needed.

Our sales continue to be made at the places before reported (Rungpore, Chellakhal, Durwani, Molung division, Mahigunge division) with the best results. Sales at Kishoregunge had been opened and 457 maunds sold. The demand has not been so large as was expected. The reports of distress to the north have subsided and prices have fallen all along the western border. I have now reduced the selling price to 12 seers for clean rice, and 15 seers for dhan, and the Durwani and head-quarters sales, which fell off a good deal, have again increased. In my next report I expect to be able to state that sales have been commenced in Pirgunge and Govindgunge. The large quantity of rice there consumed by the gangs on relief works rendered such measures before unnecessary, and besides it was not certain that the rice could be spared; but as now many of the people have returned to their homes, sale will have to be commenced both at Kamdja and at Pirgunge, and probably at Polashbari. The special feature of the fortnight has been the decrease in Govindgunge in the numbers on relief works from 30,000 to 12,000. Of those who have gone off, 5,000 have been provided for in their own district, Bogra; 5,000 have been drafted to villages, and the rest have returned to their cultivation. The system of payment by grain has been fully inaugurated and is very popular, and piece-work has been now introduced on all the roads. The information on this head is in advance of the figures given in the return No. B. Piece-work is now almost universal, many women preferring to work at it to being drafted off to charitable relief. In one division they earn 1 to 2 annas a day for finishing roads at the rate of 1 anna for 400 cubic feet, and by this means they get sufficient to support their children at home. The grain they receive in payment is exchanged partly for cheaper food, such as millet, which they mix with their rice. In the smaller divisions, the effect of the grain payment has been to materially diminish the number of workmen, and there is a sign that distress is decreasing in those parts. In Kumargunge and Durwani, our relief works have come to an end, owing to the laborers having been drafted to the railway works. From Pirgunge and Sadullapore the officers have failed to send reports, and I have, perforce, used the last figures again.

Much of the decrease shewn under the head of roads will only go to increase the head of charitable relief, as the people have been drafted to the villages under the group system, and otherwise, under munduls. The group-system has been introduced into parts of three thanas, Gobindgunge, Pirgunge, and Molung. In Kamdja, 155 villages have been divided into eight groups, and arrangements have to be made in Khairabad. In Molung, part of Andwah, Sharhatta, and Pyrabund, have been divided into groups and put under superintendents. The system is working well everywhere. Mr. Damant writes:—"I have been much surprised to find the amount of work these women and children have done; they have made some excellent roads in the villages wide enough for the passage of a cart, and even erected some small bamboo bridges where necessary." To the same effect is the testimony of Baboo Akhoy Kumar Sen of Molung. Village paths have been cleared of jungle, narrow ones have been widened to almost half the size of the public roads. "Everywhere the work," he says, "has been useful and satisfactory, and it reflects great credit on the munduls, who have succeeded in extracting good and really useful work from persons who hitherto did little or no work on our roads." He gave to three of the best munduls two maunds of rice each as their remuneration.

The condition of the people varies much, but has on the whole improved. In Borobaree the agricultural classes no longer need looking after, and the paupers only will need assistance until the aous is fully harvested; but in Mahigunge and Durwani the still high prices have developed fresh distress. In some of the worst parts of the former thana all along its south-west corners, 200 fresh cases have come on charitable relief. The attendance, however, at annachatras is less than usual, and the people have no longer fear for the future. In Molung there is keen distress on the red land, which cannot be fully alleviated until August; but in the eastern parts, which has been throughout the blackest and most affected part of the division, all anxiety is at an end in the full promise of an abundant crop.

Dr. Ghose has been round the southern division and seen to the medical arrangements; he found the people at Kamdja strong, contented, and in good health; the fact is that the relief works there have been most thoroughly carried out and saved the lives of the people, who must else have perished by thousands. In Sadullapore the people were markedly unhealthy; it is the most jungly thana in the district; there is still much cholera about it.

Nothing much has to be reported as regards advances. In Molung, matters have progressed, and 970 maunds have been given to 30 villages. About 8,000 maunds will probably be disposed of in this way. In Govindgunge and Pirgunge the laborers who go to cultivate will get a monthly advance. Sanction has been received to the advance of cash for seed-grain in Govindgunge, and I have just made application for Molung, as the relief officer says the same will be needed there. The zemindars in the red land are many of them poor, and will not take advances from Government, and the relief officer has not been able to effect any exchange of Government rice for seed-grain. I have told him to try and induce ryots to take advances of rice, which they can sell in the markets and then buy seed-grain; but I wish for sanction to the disbursement of cost for the purpose to the extent that may be needed.

B.—RELIEF WORKS.

The figures are as follows; they have been referred to above. Roads generally are being finished up in prospect of a stoppage of work on account of the rains:—

Abstract Statement of the relief roads for the fortnight ending 13th June 1874.

| DIVISIONS. | Men. | Women. | Children. | Total. | Employed on piece-work. | Employed on daily wages. | REMARKS. |
|----------------------------|---------------|--------------|--------------|---------------|-------------------------|--------------------------|---------------|
| A. Govindgunge ... | 10,025 | 1,113 | 1,091 | 12,229 | 2,738 | 9,491 | |
| B. Pirgunge ... | 3,015 | 52 | 51 | 3,118 | 3,049 | 69 | |
| C. Sadullaporo ... | 2,593 | 1,013 | 2,132 | 5,738 | | | |

| G. Kumargunge division ... | 1,155 | 3 | 10 | 1,168 | | | |
| H. Borabaree ... | 221 | 20 | 1 | 242 | | | |
| I. Durwani ... | ... | ... | ... | | | | |
| Executive Engineer's | 671 | ... | 16 | 687 | | | |
| Gyebunda ... | 26 | ... | ... | 26 | | | Unenumerated. |
| Total ... | 27,593 | 2,941 | 4,299 | 34,833 | 15,156 | 11,816 | 7,861 |

C.—TRANSPORT OF FOOD.

Little more remains to be reported here. Grain is being sent by rivers for the Borabaree and Mahigunge divisions to Chillakhal, to meet the demands there for passes and sales. At Kaligunge, rice is being received for Julpigoree, to be kept as a reserve.

D.—STORAGE OF GOVERNMENT GRAIN.

Statement showing the Storage and Consumption of Government Grain in the District of Rungpore for the fortnight ending 13th June 1874.

| Add advances sanctioned, but not taken by the parties. | 20,300 | 0 | 0 |
| Total ... | 2,05,750 | 0 | 0 |

F.—CHARITABLE RELIEF.—(Prepared by the District Relief Officer).

The distribution of relief has been actively proceeded with as hitherto.

The numbers of recipients of charitable relief are reported to remain almost stationary, or to be falling off, and the apparent increase is attributed to the greater completeness of the returns, and to the transfer of people from the roads to the village relief works.

The closing of three private annochatras has been reported during the past fortnight, two in the division of Barrobaree, and one at Burghaut in Kumargunge division. In the latter division a Government annochatra was opened at the same time, in case any of the beggars who had been frequenting the Burghaut food-house might have to fall back upon organised charitable relief.

There were petitions for assistance from Ghoramare in Jaldhaka in the north, and a Government cooked-food relief centre has been temporarily opened there.

The number of public and private annochatras shewn in the last return was 72. The present number is 71.

The Bahirband pergunnah private annochatras are, for convenience, shewn separately.

The detailed figures in the return are from the accounts submitted by the relief officers. Previously, the private annochatra returns were submitted very incompletely and irregularly through the secretary to the charitable relief fund.

With regard to the present return, from the end of the fortnight under notice, two of the largest and best managed private cooked-food relief centres have been closed, viz., that of Baboo Janoki Kullebh Sen, of Dimla at Kannungotolah, where, during the last four months, between 700 and 800 people have been well fed daily; and that of Baboo Annoda Proshad Rai of Sanibariya, where between 300 and 400 people have been well fed daily for about five months. Both these annochatras were in the Mahigunge division. They have been closed because it is alleged that the people who attended them are of the begging or part-begging classes, and that they can now obtain an easy subsistence by begging, or eking out their means by begging in their usual way.

F.—CHARITABLE RELIEF (MEAN).

Statement showing the Daily Progress for the fortnight ending 13th June 1874.

E. G. GLAZIER,
Officiating Magistrate.

No. 972—S.R., dated Bogra, the 13th June 1874.

From—E. J. BARTON, Esq., Officiating Magistrate and Collector, Bogra,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative of relief operations for this district, which is now due.

CONDITION OF THE COUNTRY AND PEOPLE.

2. The improvement to which I referred in my last narrative still continues. During this fortnight no less than $6\frac{1}{2}$ inches of rain have fallen, and the crops and country present the dark-green hue of a luxurious vegetation. The long drought had generated a grub which was doing damage to the aous crop. The heavy rains have invigorated this crop, and destroyed the grub. An exceedingly fine aous crop, probably above an average, is confidently anticipated by all.

3. The excellent prospects of the aous harvest have had a very visible effect on the market. There can be no question that the holders of grain have up till now been keeping it back, either for their own consumption, or in the hopes of securing a larger price for it. The rain and the consequent security of the growing crops are bringing these stocks into the

market, and it has been generally observed all over the district that the bazars have been better supplied since the late copious rainfall began than they ever were before; those who were hoarding amun rice are now bringing it into the market. The rivers, too, are open for boat navigation, and grain has been brought by merchants by these routes to localities where it was much wanted; for example, in one corner of the Sherpore circle, where the ruling price has been about 7 seers (80 tolahs) per rupee for months, rice is now selling at 12 puka seers the rupee. Importation and private trade have been the cause of this.

4. I append in the margin a comparative table, contrasting the price of rice last fortnight with its price this fortnight. In nearly every place has there been a cheapening, more or less. Moreover, the *boro* and *boono* rice crops are now getting into the market, and one may now see in the bazars not only the new rice of recent crops, but the old rice of the last amun harvest. In some places a coarse food-grain called *kawans* is selling at 2½ seers the rupee.

5. Although I have heard of no case of great distress, still there are two or three tracts in the district to which the general improvement just described by me does not extend, and which continue to give anxiety; we are fully prepared to cope with any suffering that is likely to arise in them. Moreover, the returns made by the relief officers of people whom they have had to gratuitously relieve, and to whom they have had to give work, show that there is a considerable residuum of distress in the district which requires assistance, notwithstanding the good prospect of the aous crop and the general easing of the markets.

RELIEF WORKS UNDER THE EXECUTIVE ENGINEER.

6. The chief thing to be noted in the history of these relief works during this fortnight is the complete introduction upon them of the system of paying the laborers in grain. In Appendix E I give figures showing the number of men, women, and children employed on each road, and the grain and money expended in the payment of them. As most of the laborers are ineffective, the introduction of grain-payments has saved, and will save, large sums of money to the Government.

7. Last fortnight I expressed an opinion that the introduction of grain-payments would drive a good many able-bodied persons from our relief works, and that anticipation has to a certain extent been fulfilled, but not to the degree I had expected. The places of the able-bodied who have left have been filled by the non-able-bodied, who, being almost destitute, come upon our works, and whom we cannot well turn off. Grain-payments have been in full operation everywhere during the fortnight, yet, as the

| | |
|--|--------|
| Total number of laborers on relief works during last fortnight, the daily average employed | 37,147 |
| Total number of laborers during this fortnight, the daily average employed | 27,020 |

marginally noted figures will show, it has caused no very great diminution among the laborers. The mode of payment is not unpopular.

Another reason for this comparatively small diminution may be found in the description of the people who are working on our roads,—the greater part of them being aged or young, and comparatively few being able-bodied. In some places grain-payments have been very unpopular. They drove a good many laborers in the Panchbibi circle from our works to the railway, and there was a general desertion of a road at Siruttee, where only 39 are now at work, instead of three thousand, as was the case three weeks ago. It is well that this has happened. There is an enormous demand for agricultural labor just now. The soil is being ploughed everywhere for the *amun* crop, and the orders of the Lieutenant-Governor are that laborers at present should not be encouraged to remain on our relief works. The figures will show that comparatively few able-bodied persons are left.

SALES TO LABORERS.

| Name of circle. | Amount sold this fortnight. |
|-----------------|-----------------------------|
| | Mds. Srs. |
| Shibgunge ... | 67 30 |
| Sherpore ... | 6 0 |
| Panchbibi ... | 188 27 |
| | 262 28 |

N.B.—In the other three relief circles there were no sales to laborers during the fortnight.—E. J. B.

8. As a necessary consequence of the introduction of grain-payments, sales of grain to laborers have fallen very low, as the marginally noted figures will prove. Only in three circles have any sales been made to those working on our relief roads, and these sales have been but small. They would have been smaller than they are, but there was some delay in introducing grain-payments into these three circles, and the greater part of these sales was effected then.

9. The process of cautiously and gradually weeding the most useless and helpless of the old women and old men from the relief works has been continued during this fortnight, as the statement in margin will show. These aged and feeble creatures are sent back to their villages with a month's supply of food, and their names are duly recorded in the registers as objects fit for relief. We have freed the works of a total of 5,518 individuals of this class.

| Name of circle. | Number removed last fortnight. | Number removed this fortnight. |
|-----------------|--------------------------------|--------------------------------|
| Sherpore ... | | 69 |
| Bogra ... | | 989 |
| By Mr. Clay ... | 2,802 | 1,678 |
| Total | 2,802 | 2,716 |

10. The payment of the laborers is now in the hands of the relief officers. I believe that one cause of the comparative popularity of grain-payments is, that they are made with more punctuality and greater honesty than the money-payments were. It is more difficult for the supervisors and grain mohurrirs to peculate grain than money. The payments also are more closely and vigilantly superintended than they ever were before. The rules under which the payments are made are very simple, and are working with much efficiency and very little friction.

11. As the rains are now begun, I fear that we shall have to stop all road and tank work immediately. I do not, however, anticipate that this will cause any dangerous distress among the people who are now subsisting by means of these works, as the registration of the more helpless of them is being done, and means will be taken to succour and relieve them, if necessary.

TRANSPORT AND STORAGE OF GOVERNMENT GRAIN.

12. The work done during the fortnight naturally falls under three heads, viz:—

(a) The filling of certain golahs from Chandanbasia by boat.—I give below the names of the golahs and the amount of grain actually put into each during the fortnight, the total aggregating 28,602 maunds:—

INTERIOR STORAGE DONE DURING THIS FORTNIGHT FROM CHANDANBASIA.

| Name of golah. | Amount of grain sent there during the fortnight. |
|--------------------|--|
| | Mds. |
| Shariakandi | 21,721 |
| Sherpore | 740 |
| Muddehpooora | 903 |
| Dhunat | 2,750 |
| Bogra | 2,388 |
| Total ... | 28,602 |

(b) The transporting of the 20,000 maunds lying at Nowgong into the golahs of this district.—I am sorry to say that, owing to a complete failure in the local supply of carts, this transaction has taken a longer time than was at first anticipated. The marginally noted figures show the progress which has been made from the 28th May, when this transport was begun, till the 9th June.

| To what golah. | Amount sent. |
|-------------------|---------------|
| Acamdighi | 1,821 maunds. |
| Panchbibi | 2,371 " |
| Heelee | 4,485 " |
| Badalgachi | 2,406 " |
| Total ... | 11,083 " |

(c) The storing of minor and subsidiary golahs out of the large golahs.—About ten minor golahs have been stocked during the fortnight.

In addition to these three forms of transport, movements of grain have been rendered necessary to pay the coolies on the roads and other relief works. I need not here enter into any particulars of what has been done under this head.

13. Transport and storage are now as good as complete throughout the district. There will still be a movement of grain from golah to golah, according as exigencies arise, and the greater part of our future transport will assume this form.

14. I referred in my last fortnightly narrative to errors in the grain accounts, and it will not be out of place to refer to them again here. I have been bestowing what time I could spare from more important duties upon the discovery and elimination of these errors; they extend so far back that the complete removal of them will be a work of some time, and it is perhaps uncertain if they ever will be properly corrected. That I shall be able to reduce the errors in size, I am certain, but I am not so sanguine about being able to eliminate them altogether. I am afraid that the data do not in many cases exist for this. In the beginning of the transport operations these errors have their origin, and they have continued all through them. That they should occur was perhaps inevitable, considering the novelty of the work and the inferior clerks who had the duty of keeping the accounts.

15. In Appendix D I give, so far as the data in my hands permit me, a statement of the storage and expenditure of Government grain up to date.

Advances.

16. The account of them stands as follows:—

| | Up to this fortnight. |
|---|-----------------------|
| (a) Advances to traders and others for the purchase of grain (paragraph 4 Circular No. 80) | Rs. 500 |
| (b) Advances to zemindars for improving water-supply of a village (paragraph 21, Circular No. 80) | 3,150 |
| (c) Advances to zemindars to help their ryots (see Government letter No. 403—S.R., dated 3rd February 1874) | 50,870 |
| Total .. | 54,520 |

17. As cash advances without the special sanction of Government have now been forbidden, no money has been expended in this direction during the fortnight. I have had

applications, but I did not think that they deserved to be recommended to Government; I always told the applicants they might have an advance in grain, but this they have generally declined.

18. I cannot say that the zemindars (there is one, and perhaps there may be two, exceptions) of Bogra have shown as a rule any desire to aid their ryots on this occasion. I think they are more backward here, and have done less than in any district where I have yet been. It is true that, as a rule, they are poor and indebted; nevertheless, they might have done, and might be doing, far more than they have yet attempted.

SALES OF GOVERNMENT GRAIN TO THE PUBLIC.

19. During the whole of this fortnight this form of relief has been worked throughout

SALES OF GRAIN TO THE PUBLIC.

| Name of circle. | Number of places at which sales are going on. | Amount sold this fortnight. | Mds. | Srs. |
|---------------------------|---|-----------------------------|-------|------|
| Shilgunge ... | 2 | ... | 199 | 0 |
| Serpore | 1 | ... | 221 | 32 |
| Khetlal | 2 | ... | 156 | 20 |
| Bogra | 3 | ... | 678 | 0 |
| Adamdigi | 1 | ... | 216 | 24 |
| Panchbibi | 9 | ... | 1,165 | 35 |
| Total at ... 18 places... | | | 2,638 | 37 |

all the district, and I give in the margin a condensed synopsis of the work done. It shows that during the fortnight under report we have sold 2,638 maunds to the public from 18 places of sale. I cannot say that the extent of these sales has come up to my expectation. Every facility was given to the public to buy. Retail sales were conducted at the golahs; *banias* could take our grain into the villages and sell it there at a profit to themselves. I consider that one great cause of the comparative smallness of our sales is to be found in the fact that the people prefer their own country rice, although it is dearer, to ours, and that they have not yet become so impoverished that they cannot afford to buy the former. The *banias* also do not show much energy in selling our grain; they seem to look upon the *sirkar* as a competitor in the market. The liberal profit of one seer in the rupee is offered them, but that does not induce them to push sales for us.

20. I know the people have prejudices against the Burmah rice, and the intermixture with paddy increases this unpopularity; several laborers told me that its *bhat* did not leave the cooking pot in well-defined isolated grains like that of their own country rice, that much of it spoiled in boiling, that it was deficient in flavour, difficult of digestion, and not so nourishing as their own rice. Some of this is true; the people admit that many of these deficiencies in the *bhat* may be caused by their not knowing how to cook and boil the rice. However, there can be little doubt but that, if there was a real dearth of food in the country, the people would be only too glad to buy and eat the Government grain. I believe also that much they say of it is unfounded, and probably has its origin in a baseless story invented by some one, and circulated and improved by many others. What induces me to think that these tales about the inferiority of the Government grain as a food are, though partly true, yet to a large extent unfounded, is the fact that the people take it fast enough when they get it for nothing, or as a loan which they never mean to repay,—and that it is only when they are asked to buy it and pay money down for it that they hold back.

| Kind of rice. | Number of p oka seers per rupee. |
|--|---|
| (1.) Best country <i>atab</i> rice (clean) | 10 |
| (2.) Country <i>ushna</i> rice | 11 |
| (3.) Burmah <i>atab</i> rice | 11 |
| (4.) Red <i>ushna</i> rice | 12 |
| (5.) Country <i>ushna</i> (mixed) | 14 |
| (6.) Burmah <i>ushna</i> .. | 15 |

21. I have done all I could to foster these sales. In Bogra I have lowered the selling prices two times within the fortnight, till now they stand at the figures which I append. The circle officers have been empowered to sell cheaper than the bazars, keeping within the limit of 12 seers for clean and 15 seers for mixed grain.

22. I am convinced that these rates (12 seers for clean and 15 seers for mixed grain) will soon be too high for this district. Markets are daily falling before the prospects of an excellent *aus* harvest and the opening of the rivers to traffic.

23. If I may be permitted to make a suggestion, I think that the local officers should be allowed to fix the selling price of the grain in the Government golahs, in accordance with the fluctuations of the local market, within the limits of 16 seers for clean and 20 seers for mixed rice. Something like this was done in Orissa in 1867, but it was then experienced as a fact that the local officers had to follow the markets in a downward course, and had constantly to cheapen the rates at which they sold the Government grain. The result of their efforts is well known, viz., that, notwithstanding all they could do, large stocks were left undisposed of at the close of the operations. I anticipate that if some such power be not accorded here, and if the present hard-and-fast line of a maximum rate of 12 seers for clean and 15 seers for mixed rice be adhered to, our sales will soon cease over a large part of the district.

| In what week. | Amount paid into Treasury. | Rs. | A. | P. |
|-------------------------|----------------------------|-------|----|----|
| Week ending 5th June... | ... | 3,405 | 12 | 9 |
| " 12th " ... | ... | 1,488 | 13 | 9 |
| Total | ... | 4,894 | 10 | 6 |

24. Sums realized from the sale of grain have been paid into the treasury, as is shown in the margin; of course more money than this has been realized which has not yet been remitted.

LOANS OF GRAIN TO CULTIVATORS.

25. The marginally noted figures will show the transactions under this head both during the current and the past fortnight. I mentioned in my last fortnightly narrative that these loans had in some places been distributed with a certain amount of profusion and recklessness, and that steps had been taken to introduce more discrimination and judgment into this mode of relief. The figures which are shown above do not really represent the work which has been done in carrying out this mode of relief this fortnight. The relief officers have freely received applications for loans, but, instead of recklessly or capriciously

LOANS TO CULTIVATORS.

| Name of circle. | Amount lent last fortnight. | | Mds. | Srs. |
|-----------------|-----------------------------|------|------|------|
| | Mds. | Srs. | | |
| Shibgunge | 2,498 | 0 | 11 | 10 |
| Sherpore | 17 | 35 | 77 | |
| Khetlal | 301 | 28 | | |
| Bogra | 823 | 0 | | |
| Adamdighi | 1,973 | 0 | | |
| Panchbibi | 826 | 27 | 130 | |

granting or refusing them, as was the case before, they have instituted intelligent inquiries into the necessity of granting those loans in each case. Many of these inquiries are now completed, and the results will appear in the next fortnightly narrative.

26. I have also issued special orders on this subject. I have pointed out to the relief officers that this is the season when the ploughings for the *aman* crop are done; when the ryots of the *khar* land especially must abandon all labour by which they are earning money, and devote themselves to the cultivation of their fields, and that it is the wish of the Lieutenant-Governor that every facility should be given to these men to enable them to leave extraneous work and sow their crops. In these circumstances, loans will be given in the following fortnight with more freedom than that under report, while at the same time a certain amount of discrimination and judgment in the granting of them will be insisted upon.

In connection with this question of loans to ryots, it may not be out of place to mention here that no Bogra zemindar, talukdar, or iyardar (with the exception of Mr. Ridge, who is engaged in silk cultivation, and another who has asked for a loan on certain terms) has consented to stand security that his ryots will repay the value of the grain which they get in loans from the Government stores. There is a singular want of interest on the part of the zemindars in anything that affects the condition of their ryots. It is said that the Pubna combinations of ryots against zemindars, which appeared in a very mild form in this district, are one cause of this apathy. But, whatever may be the cause, the apathy is a fact, and any aid that the zemindars have rendered to the Government officials, with one or two exceptions which I shall report bye-and-bye, has been of a flimsy description. As a rule they do nothing.

CHARITABLE AND GRATUITOUS RELIEF.

I append below a synopsis of the work of relief officers in this direction. It is a condensed summary which I have compiled from various returns sent in by the relief officers. It shows that 13,705 persons have been relieved gratuitously during the fortnight.

NUMBER RETURNED THIS FORTNIGHT.

| NAME OF CIRCLE. | NUMBER RETURNED THIS FORTNIGHT. | | |
|-----------------|---------------------------------|-----------|--------|
| | Men. | Children. | Total. |
| Shibgunge .. | 532 | 1,596 | 1,175 |
| Sherpore ... | Total only given | | 1,313 |
| Khetlal ... | 167 | 732 | 2,119 |
| Bogra ... | Total only given | | 5,367 |
| Adamdighi | Ditto | | 859 |
| Panchbibi ... | Ditto | | 742 |
| Total | | | 13,705 |

28. Most of the people who are enumerated in paragraph 27 as having been charitably relieved were assisted with gifts of grain. Several high-caste Hindoo families we found who were distressed, but who had sincere prejudices against what they said was Government grain transported over the seas from foreign countries, and who were unwilling to go with the common herd to the Government golahs with relief tickets in their hands for our rice. These were relieved in cash to the extent which is marginally noted, and the money so expended will come from the committee's funds. In view of the large discretion which the Central Committee have placed in the hands of the local officers as to the disposal

CHARITABLE RELIEF IN CASH.

| Name of circle | Amount expended this fortnight. | |
|----------------|---------------------------------|-------|
| | Rs. | A. P. |
| Sherpore | 627 | 7 4 |
| Bogra | 915 | 10 0 |
| Khetlal | 277 | 14 9 |
| Shibgunge | 24 | 13 0 |
| Adamdighi | 0 | 10 0 |
| Panchbibi | 79 | 7 0 |
| Total | 2,955 | 14 1 |

of the contributed funds in their hands, I have greatly modified the restrictions which (in obedience to the orders of Government at that time) I have insisted upon in the relief of distress in cash.

29. *Spinning and weaving relief in jute and cotton.*—During the rains, when out-door employments become impossible, this form of relief is almost certain to assume larger and larger proportions. At present, as will appear from the table which is recorded below, 9,419 people have during the fortnight under report been assisted in this way. Men and women who spend their days in working in the fields are glad to earn some additional sustenance for themselves and their females by working at cotton and jute. It is also a form of work which those take whom caste or social prejudices make unwilling to publicly work upon the roads.

Statement of the number relieved by spinning and weaving.

| NAME OF CIRCLE. | PREVIOUS FORTNIGHT. | | | | CURRENT FORTNIGHT. | | | |
|------------------|---------------------|--------|-----------|--------|--------------------|--------|-----------|--------|
| | Men. | Women. | Children. | Total. | Men. | Women. | Children. | Total. |
| Shibgunge | Total only given | | | 359 | 273 | 372 | ... | 645 |
| Sherpore | Ditto | | | 2,052 | Total only given | | | 425 |
| Khetlal | Ditto | | | 504 | 1,430 | 754 | 93 | 2,277 |
| Bogra | Ditto | | | 11,870 | Total only given | | | 4,389 |
| Adamdighi | Ditto | | | 775 | Ditto | | | 1,092 |
| Panchbibi | Ditto | | | 13 | Ditto | | | 591 |
| Total | | | | 18,603 | | | | 9,419. |

30. Hitherto this form of relief has been administered, but there has been little care taken to secure that the material turned out by the workers shall be marketable. I inspected several stores of jute and cotton work, and I came to the conclusion that all the worked material was so bad that it would not be saleable. No doubt much of this inferiority was due to a laxity on the part of the relief officers in receiving and paying for a badly manufactured article; I have therefore, in view of the probable large extension of this form of relief, ordered that it shall be administered under rules, of which the following are the general heads:—

(a) Hitherto the rules have been to give each applicant 1 seer 2 chittacks of raw cotton, and require from her a seer of thread, and give her 12 annas in money as a remuneration. The nominal money-value of the labor may remain the same, but henceforth I wish the payment to be thus made:—

Five parts in rice,
One part in cash.

Rice with not more than two annas paddy in it is valued at twelve seers the rupce, and the amount to be paid in rice for this cotton labor should be calculated accordingly.

(b) The mode of paying in rice will be much the same as on the roads. A book, foil and counterfoil, will be used. The counterfoil will be given to the worker, who takes it to the nearest golah and gets the rice; the foil will be kept by the relief officer.

(c) Hitherto, all thread or yarn has been paid for at the uniform rate of 12 annas, whether fine or coarse, ill-spun, or not spun at all, good or bad. Henceforth there should be two qualities of thread, viz.:—

No. I.—This should be a fine, well spun, well rounded, uniform thread; for making one seer of it, the remuneration is fixed at 12 annas, to be paid as directed in paragraph (a).

No. II.—A thicker yarn or thread than No. I, but still it must be insisted upon that this thread be well spun, well rounded, of a uniform thickness, and free from lumps,—unless yarn has these properties it is useless for weaving purposes; for one seer of this yarn or thread a remuneration of 9 annas is fixed, to be paid as directed in paragraph (a).

(d) People who show that they cannot make either fine or coarse yarn or thread, should, after a second trial, be refused more raw cotton, and put upon other work; or, if no work is available, and they are completely destitute, they should be gratuitously relieved.

(e) The thread or yarn given in by the spinners should either be sold or given to weavers to weave. In this latter case, the remuneration to weavers should be at the rate of 2½ poise for a cubit length of cloth which is two cubits broad, or two poise per chittack of weight. The weavers should be paid as prescribed in paragraph (a) above; for every seer of yarn or thread he gets, a weaver should return 18 chittacks of cloth. *Sarees, dhoties, and gamchas*, should be the cloths woven, and they should be sold in the nearest bazars.

FOR WORK IN JUTE.

(a) *Mutatis mutandis*, the general directions which I have given regarding cotton relief apply to jute.

(b) Generally in the district only twine or yarn has yet been made out of the jute, and the same remuneration is given for it, whether it is good or bad. I now direct there shall be two qualities, viz:—

No. I., the remuneration for which is $1\frac{1}{2}$ annas per seer weight of twine. Good jute twine or yarn has the same characteristics as good cotton yarn or thread. It should be strong, well spun, well twisted, well rounded, be what is called an equal yarn, that is, every part of the same uniform thickness and free from lumps.

No. II., of an inferior quality to No. I. It must, however, be strong, equal, and well spun. I fix the remuneration at 5 poise per seer weight of this yarn or twine.

(c) Payments for jute-work is to be in grain and money combined, as provided in paragraph (a) of the cotton general directions.

(d) The jute twine or yarn may be woven into gunny bags, the weavers to get $1\frac{1}{2}$ poise per cubit one cubit broad.

I am very desirous to sell the cotton thread, jute twine, cloth, and gunny bags which we make; I am unable to find for them a local market here. I have written to several gentlemen, Government officials and others, asking them to aid me in disposing of the articles which we manufacture. I have some hundreds of maunds of cotton thread and yarn made by distressed people, which I cannot sell here. There are almost no weavers in the district to make the yarn into cloth. I respectfully suggest that I should send this yarn into distressed districts where there is a large number of weavers, and I shall be only too ready to do it if the Collectors of those districts will take it from me.

GRAIN PAYMENT FOR WORK ON JUTE AND COTTON.

31. The important measure has been introduced this fortnight of paying for all cotton and jute work, five parts in grain and one part coin. Apparently the people are content; there is certainly less chance of their being defrauded when they are paid in grain, and very likely they get a larger compensation under this form of payment, because the mohurirs and others who pay them find it harder work to cheat them.

VILLAGE REGISTRATION AND VISITATION.

VILLAGE VISITATION.

| Name of circle. | Number visited this fortnight | | TOTAL. |
|-----------------|-------------------------------|------------------------------|--------|
| | By Superintendent. | By Assistant Superintendent. | |
| Shibgunge | 16 | 118 | 134 |
| Sherpore | 120 | Not given. | 120 |
| Khetlal | 39 | 53 | 92 |
| Bogra | Not given. | 25 | 25 |
| Adamdighi | | 60 | 60 |
| Panchbibi | Not given. | 17 | 17 |

32. This part of their work has also, as will be observed from the figures given in the margin, been prosecuted vigorously by the relief officers, although some of them, more particularly the circle officer of Bogra and his assistants, seem to have neglected it. Mr. Collier, C.S., relief circle officer of Adamdighi, had unfortunately an accident in the beginning of the fortnight, which laid him up and prevented him from moving about. He is now recovered.

33. Village registration is confined only to the worst tracts, and is progressing. I

VILLAGE REGISTRATION.

| Name of circle. | Number of villages of which registration finished. |
|-----------------|--|
| Shibgunge | 12 done. |
| Sherpore | 6 " |
| Khetlal | 188 " |
| Panchbibi | 14 " |
| Adamdighi | Figures not given. |
| Bogra | Ditto. |

append figures showing what has been done in this direction during the fortnight. The superintendents of the Bogra and Adamdighi circles give no figures, but the former says that a great part of the work has been done.

All the golahs in the district have been visited by the relief superintendents or their assistants. The condition of the accounts at some of the golahs does not satisfy me, but

I am trying to get them into a better state.

34. *Poor-houses or Annachatras*.—Now that the rains are begun, these will be more

| Name of circle. | Number of annachatras opened. | Average daily number relieved. |
|-----------------|-------------------------------|--------------------------------|
| Sherpore | 2 | 239 |
| Khetlal | 2 | 109 |
| Panchbibi | 1 | 3 |
| Total | | 351 |

systematically worked than they have ever yet been in this district. The *annachatras* at present at work are given in the margin. In addition to these, the Dighaputia Rajah has an *annachatra* near Shariakandi, at which a daily average of about 750 is fed. The necessary buildings, cook-houses, eating sheds, &c., for an *annachatra* at Bogra are nearly ready,

and I hope to begin food distribution next Tuesday or Wednesday. Only those will be relieved at *annachatras* who are homeless, utterly destitute, and disabled.

FINANCIAL RESULT OF THE FORTNIGHT.

Total expenditure from the district treasury, as shown in the last narrative

Rs. A. P.

4,29,238 3 9

Details of the above.

BOGRA,
The 13th June 1874.

F. J. BARTON,
Offg. Magistrate and Collector.

No. 1001, dated Pubna, the 15th June 1874.

Memo. by—W. V. G. TAYLOR, Esq., Magistrate of Pubna.

SUBMITTED to the Secretary to the Government of Bengal, Scarcity and Relief Department, for information.

Fortnightly Narrative ending the 13th of June 1874.

A.—STATE OF THE COUNTRY.

ANY change since last report is for the better, and at this critical time this must be considered very satisfactory. Prices have fallen within the last week. Imports have been more active. The best judges seem to think it unlikely that prices will rise beyond their present level; but, on the contrary, with the rise of the river we may expect to see increased importations, and a further fall in the price of rice. The weather during the past fortnight has been all that could be desired. The heavy rain which ceased on the 27th May 1874 has been followed by bright sunny weather, mitigated by frequent showers. The growing rice crop is looking extremely well, and this has had a most reassuring effect on all classes. A great portion of it will be ripe early in July, and from that time there is a confident expectation that things will begin to mend. There is a considerable demand for employment, which has been met by various works in different parts of the district. This is owing to all sowing operations having been nearly completed. On the other hand, the applicants for gratuitous relief have not increased anywhere, and in the Pubna station jurisdiction have diminished in number. In a district like Pubna, where the distress was never very severe, and where there are such unusual facilities for importation, it was necessary that relief measures should be carried out with discrimination. The relief committee, while offering work at fair rates to all who needed it, restricted gratuitous relief to the really helpless, weak, and very indigent. They refused to admit the excuse of those who stated that they could not come on the roads because they had fields of their own to sow, and at the same time claimed gratuitous relief. Advances on security have been sanctioned to this class. The committee have acted in the belief that it was never meant by Government that men who had lands and houses and cattle should be demoralized by alms; and it is an adherence to this principle that has restricted

gratuitous relief, at least in the Sudder sub-division, within reasonable and necessary limits. The teel crop has nearly all been harvested. It is an average crop. The kaon crop promises well. It will be ripe about the end of the month, and will afford most seasonable assistance. The jullye crop is being reaped. It is at all times, however, a small outturn. The aous crop is, as already stated, most promising, and unusually forward. Indigo is a very fine crop this year. The health of the district continues extremely good. Special native doctors have been moving about prepared to treat any outbreak of sickness.

B.—RELIEF WORKS.

Numbers employed on the several roads are as follow :—

Sujanagar 273, Faridpore 102, Chatmohar 324, and Maligacha road 202. A new road from Dulai to Gangohati *via* Chinakhora has been lately opened under the direct supervision of the sub-inspector of Dulai. The head constable of Ataikula has been deputed to undertake the repairs of the road from Goeshpore to Ataikula. I do not think that it will be necessary to open any more new works. There would not be time to complete them, and the cutting of the kaon and aous will shortly afford employment to considerable numbers.

D.—STORAGE OF GOVERNMENT GRAIN.

3,000 maunds out of 6,000 intended for Serajgunge has been kept for the Sudder sub-division, and the canoongoe has been deputed to Goalundo to forward it in quantities of 500 maunds to six different sub-committees. 5,000 more have been indented for from the other sub-committees. Under orders of the Commissioner, 2,000 maunds have been indented for from the Dhapari depôt and will be retained in hand at or near head-quarters for advances to zemindars and others.

E.—ADVANCES TO PRIVATE INDIVIDUALS.

The following sum has been advanced to several zemindars and others since last report :—

| | Rs. |
|---------------------------------|-----|
| Esharatulla, talukdar | 75 |
| Golam Abdin | 200 |
| Golom Abbaj | |
| Isvar Chundra Chowdhuri | 500 |
| Madhav Chundra Chowdhuri | |
| Total | 775 |

Advances up to the present have been made in cash, there being no grain in store. People to whom advances have been made have been required to show their title deeds, to give a registered bond for the amount, and to submit a monthly list of ryots assisted.

F.—CHARITABLE RELIEF.

Charitable relief has been given by the several sub-committees, who are apparently working judiciously and well, and carrying out the principles of relief unanimously decided on by the central relief committees. It is confidently believed that most cases of real distress have been, and will be relieved.

G.—FINANCIAL RESULTS.

Out of Rs. 7,870-8-0 promised as subscriptions to the Pubna relief fund, Rs. 4,824 have been realised up to date. Reminders have been sent to the subscribers for transmitting their subscription shortly.

Expenditure as detailed below—

| | Rs. |
|--|-------|
| Wages paid to the coolies of Malanchi road | 150 |
| Advanced to the Secretary to the Sujanagar sub-committee for Sujanagar road works | 300 |
| Advanced to the Secretary to the Chatmohar sub-committee for Chatmohar road works | 300 |
| Advanced to the Sagarkandi sub-committee | 500 |
| Advanced to Maligacha road supervisor for wages of coolies | 200 |
| Expenses for sending medicines to Raigunge | 6 |
| Advanced to Golom Nabby, native doctor, for his pay for June 1874 | 60 |
| Sent to Sagarkandir sub-committee | 500 |
| Sent to Dulai ditto | 500 |
| Advanced to canoongoe for conveying rice from Goalundo | 100 |
| Sent to Chat Mohar sub-committee | 130 |
| Advance given for bringing rice from Dhapari depôt | 100 |
| Advanced to the Secretary to the municipal committee for further relief works within the municipality | 300 |
| Advanced to the Secretary to the Ataikula sub-committee for the repair of the Ataikula road | 100 |
| Advanced to the Secretary to the Dulai sub-committee for opening the new road at Dulai | 100 |
| Paid for Sujanagar road-works | 300 |
| „ for Maligacha road-works | 200 |
| Total | 3,846 |

Tenth fortnightly Narrative of distress in the Serajgunge Sub-division, from 28th May to 10th June 1874.

A.—STATE OF THE COUNTRY.

The high prices which prevailed at the end of May attracted a large amount of rice to the sub-division, and supplies are now abundant at all the markets on the river banks. Prices, though still high, have fallen, as will be seen from the following statement:—

NUMBER OF SEERS OF 80 TOLANS PROCURABLE FOR A RUPEE.

| NAME OF MARKET. | Last Narrative. | At present. |
|-----------------|-----------------|-------------|
| | Seers. | Seers. |
| Serajgunge | 10 | 11½ |
| Raigunge | 7½ | 10 |
| Ullapara | 9 | 10½ |
| Pangashi | 9 | 9¾ |
| Taras | 10½ | 9 |

The rise in prices at Taras is accounted for by the fact that local rice is sold at that bazar, which is too far from the rivers to be affected by importations.

The rainfall during the fortnight was only 0·37 inches; more moisture is wanted, but still our prospects are, on the whole, good. The rise in the rivers in May spoilt some of the kaon and joleah rice, but not any very great quantity, and since then the waters have been falling. The kaon now being harvested is a 12-anna crop. Unfortunately it is grown only by about one-half of the cultivators; those who are fortunate enough to possess a field of it are now relieved from all anxiety. The joleah dhan is in ear, and will be cut immediately. It is sown in few places. The jute is forward and promising. The prospects of the aous rice, on which so much depends, are still uncertain. Til has been a failure; an 8-anna crop only can be expected.

The ryots in distressed villages where there is no kaon continue to look thin and anxious. Our system of relief provides for the classes who would otherwise appear most emaciated, and supply the cases of actual starvation.

B.—RELIEF WORKS.

The number of laborers employed on village tracks is 404, that on the Chunderkona road is about 250. The rate paid for earth-work is Rs. 2-4 per 1,000 cubic feet, and Rs. 2 only at Taras, for which I wish to withdraw some coolies for the Chunderkona road. The cultivators at first refused earth-work, but would now accept it if we would give it to them; this we cannot do everywhere, the season being so far advanced.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

During the fortnight 500 maunds of rice was reported to have been sent to Taras by cart from Raigunge. I visited the place lately, and arranged for storage. Our stock of rice is sufficient for the present.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

The system of cash advances to zemindars, to enable them to assist their ryots with loans, has been brought to a close during this fortnight, in consequence of the Government order that such payments should for the future be made in rice. The total amount advanced has been Rs. 49,427. The advances may be classified as follows:—

| | Rs. |
|-------------------------|--------|
| Loans of Rs. 2,000 | 20,000 |
| „ of 1,000 to Rs. 2,000 | 8,500 |
| „ of „ 500 to „ 1,000 | 10,450 |
| „ of „ 100 to „ 500 | 9,272 |
| „ of „ 50 to „ 100 | 930 |
| Less than „ 50 | 275 |
| Total | 49,427 |

The loans have been made by the Collector on my recommendation. Before approving a loan, I examined the papers which the applicant could bring to prove his title, generally either revenue receipts, or deeds of conveyance, or both. I then took a registered bond for the debt. In some cases I insisted on ryots being paid before me, there being some doubt as to whether the money might otherwise be misapplied. There will certainly be a difficulty in recovering many of the loans by the ordinary method, but I hope that some summary way

of realising them will be adopted. The ryots showed that the money actually reached them by their eagerness to get their zemindars to take this form of Government assistance. The abuses of which I have heard are such as must necessarily be expected under the system, that some zemindars lent only to the better class of ryots (whose security is tolerable); that they gave most to villages where there were disputes with co-sharers in which the ryots' assistance was required; that they would not help unionist (vidrohi) ryots, and so forth. All these complaints may be very true, and yet a great deal of relief has been afforded by the advances.

During the last week loans have been given in Government grain at the rate of Rs. 3-5-4 per maund. These disbursements have been made exactly in the same manner as those of cash, that is, on the Collector's order after I had approved the loan and taken a registered bond. The only difference is that in the end I gave an order on a rice golah instead of on the treasury. I have given such orders for 1,097 maunds.

E.—CHARITABLE RELIEF.

Charitable relief is given in Ullapara and Raigunge thanas to all persons who, on the inspection of their residences by the superintendents and their assistants, are found destitute and unfit for road work. The inspecting officer gives such persons tickets, entitling the holder to receive a dole of 6 seers rice and 2 seers dāl, fortnightly, with half that allowance for children. If the ticket-holder is capable of in-door work, a certain task of jute-twisting and cotton-spinning is assigned. Yesterday I received a return of the number of tickets issued. It is as follows:—

| | | | | | | | |
|-------------------|-----|-----|---|----------|-------|---|--------|
| Gratuitous ticket | ... | ... | { | Adults | 3,701 | } | 12,337 |
| | | | | Children | 8,636 | | |
| Laboring tickets | ... | ... | { | Cotton | 2,351 | } | 4,224 |
| | | | | Jute | 1,790 | | |
| | | | | Thread | 83 | | |
| Total | | | | | | | 16,361 |

The recipients of these tickets are nearly all women who in ordinary times live by husking rice, or on charity, their children, and the sick. The cultivators have not received this form of relief.

The first point which strikes us on seeing these figures are that they are very large. It must not, however, be supposed that all the 16,561 are at one time in actual receipt of the dole. The cutting of the kaon crop has taken many off the lists; others have found employment since they were first admitted as ticket-holders; others have ceased to attend on finding that work would be exacted from them. The number of persons drawing rice on tickets at Ullapore during the fortnight was equal to 5,147 adults (counting 2 children as an adult); that relieved at Raigunge according to the consumption of rice, was 2,170, making in all 7,317. Supposing half of these to be children, we would have 10,966 persons receiving the dole. I am trying to convert the gratuitous tickets into laboring tickets wherever I can.

In Serajgunge and Shazadpore thanas there is no system of house-to-house visitation, or of village relief, but cooked-food is given to the destitute. This is also done at the other thanas pending inquiry. The average number fed daily at our annochatras, according to our returns, was 1,357. The Belbuchi return has not been received.

G.—FINANCIAL RESULTS OF THE WEEK.

| | Rs. | A. | P. |
|---|--------|----|----|
| Purchase of rice (2,500 maunds remains to be paid for) | 35,577 | 8 | 6 |
| Chanderkona road | 459 | 4 | 9 |
| Harial track | 150 | 0 | 0 |
| Tatulia „ | 30 | 0 | 0 |
| Cholla khal | 30 | 0 | 0 |
| Dassika „ | 30 | 0 | 0 |
| Gaitae track | 160 | 0 | 0 |
| Shazadpore track | 30 | 0 | 0 |
| Karjury „ | 30 | 0 | 0 |
| Rajapore annochatras | 50 | 0 | 0 |
| Shazadpore „ | 50 | 0 | 0 |
| Jamtoil „ | 190 | 13 | 9 |
| Chanderkona „ | 50 | 0 | 0 |
| Ullapara relief superintendent | 1,000 | 0 | 0 |
| Cotton for Raigunge relief station | 136 | 8 | 0 |
| Establishment | 11 | 10 | 8 |
| Expense for printing relief tickets | 14 | 8 | 0 |
| Khodalis purchased | 273 | 7 | 3 |
| Conveyance charges of govih rice and 2,000 maunds of rice supplied by Mr. Alexander | 1,251 | 2 | 0 |
| Loans given in cash | 6,860 | 0 | 0 |
| Total | 46,384 | 14 | 11 |

Remarks by Magistrate.

The improvement mentioned by Mr. Nolan is cause for satisfaction. The great and sudden rise of the rivers at Serajgunge about a fortnight ago caused considerable anxiety for the fate of the kaon and rice in the low-lying lands. Fortunately the damage done has been but trifling, and the river having again subsided, the general prospect appears much improved.

I am forced to remark again on the great disproportion between the numbers gratuitously relieved and those on relief works. The difference is much greater than in any district in the division, though it certainly cannot be said that the distress in Serajgunge is as severe as yet as in parts of Dinagepore and Rungpore. Mr. Nolan's attention will be called to this, and more discrimination recommended.

PUBNA,
The 16th June 1874.

W. V. G. TAYLOR,
Magistrate.

No. 1275, dated Dinagepore, the 22nd June 1874.

From—W. LEF. ROBINSON, Esq., Relief Commissioner of the Rajshahye Division,
To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the following narrative for the past fortnight.

A.—STATE OF THE COUNTRY.

2. There is certainly a scarcity of supply of rice in the local markets, and in fact there is scarcely any rice to be had except from the Government stores, and it is evident that there cannot be much grain held locally, or the market would not be at 7 seers for the rupee, with the prospect of a very good bhadoi crop.

3. There has been plenty of rain during the fortnight, at times very heavy, and the rivers are all rising; the condition of the people is pretty good. No known cases of starvation have been brought to notice. In the northern portion of Dinagepore there were some grain-robberies about a fortnight ago, but the district superintendent went out to inquire into them personally, and ascertained that the people engaged in them were not suffering from actual want, but were bad characters who preferred plunder to working. A good circle officer (Mr. Scanlan), has been placed in charge of Thakoorgaon, and grain has been sent up to that part of the country both from Dinagepore and Raneesankoil, and I don't think there is any cause for uneasiness about that part of the country.

4. From Maldah, Rungpore and Bogra, the accounts are also good.

B.—RELIEF WORKS.

5. These are being gradually closed, as the ground is now so saturated as to prevent much work being done. Laborers are everywhere paid in grain, and large numbers are returning to cultivate their fields, after taking advances of grain either from their zemindars or direct from Government stores.

C.—TRANSPORT OF FOOD.

6. This may be said to be over, except as regards keeping up the supplies at subsidiary golahs from the main golahs, and this is easily done by boats now that the rivers have risen. Some rice on its way by cart from Nowgaon to Hillee was, I am sorry to say, damaged by heavy rain on the road, but I have not yet received an account of the amount actually rendered useless.

D.—STORAGE OF GRAIN.

7. This has been completed, though changes of stock have to be made from one place to another. Captain Conolly has finished his inspection reports on Rungpore and Bogra golahs, which are on the whole satisfactory. The district officers have been requested to see that attention is paid to the recommendations for petty alterations and improvements suggested by Captain Conolly. I think the stock of grain which we have in the country will be sufficient to meet all demands if the seasons progress favorably.

E.—ADVANCES TO PRIVATE PARTIES.

8. Advances of grain are now being made very largely to ryots and laborers hitherto employed on relief-works to enable them to attend to their cultivation; in one circle alone in Dinagepore, viz., Putnitola, over 28,000 maunds have been thus advanced, and the circle officer assures me in reply to a letter on the subject which I wrote, that these advances have not been made indiscriminately, but that proper enquiry has been made in all cases before advancing.

9. The total amount of Government grain expended under all the different heads up to my latest dates of information, is in Dinagepore 3,20,550 maunds, and in Rungpore 1,06,538 maunds. I have received no returns from Bogra or Maldah, later than those given in the district officers' last narrative. There has been considerably more actually expended in Dinagepore, because the date at the latest golah is 19th June for Dinagepore itself; the others are for 15th, 16th and 17th June only, and the Dinagepore golah alone is now giving out rice at two thousand maunds a day.

F.—CHARITABLE RELIEF.

10. This has been going on throughout the four districts under me; the group system is working satisfactorily wherever it has been introduced, and as work on roads is stopped, the expenditure under the head of charitable relief is likely to increase very considerably.

G.—FINANCIAL RESULTS.

11. The financial results are given in the district officers' narrative.

No. 525T, dated Burdwan, the 17th June 1874.

From—C. T. BUCKLAND, Esq., Commissioner of the Burdwan Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit in original the fortnightly narratives which have been received up to date from the district officers, for the fortnight ending Monday the 15th instant.

2. *Hooghly*.—The report for Hooghly is again generally favorable. There has been a rise of half a seer in the rupee in the price of rice, but on the other hand, the rainfall has been well diffused over the district, and though not heavy, is "universally stated to be sufficient for the present wants of the crops." The Collector observes: "Fortunately the health of the district is better than it has been since 1860." A native officer reports—"whereas two annas of the people were formerly sick with fever, now only one anna is afflicted." The Collector adds: "what distress exists is primarily due to fever rather than scarcity;" and again "at the great bathing festival of the Juggernath car at Serampore, it is said that every one appeared to be quite happy, and to be spending money as usual."

3. The daily number of persons employed on relief works of different sorts is returned as 4,539, against 4,972 of the previous fortnight.

4. The exports of rice and other grains by the East Indian Railway were above 20,000 maunds, but they are apparently merely exports of grain passing through the district from the east. The imports of Government grain have exceeded 2,000 maunds, and the Collector has applied for a further supply.

5. The daily number of persons receiving charitable relief was as follows:—

| | | | Previous fortnight. | | | Present fortnight. |
|----------|-----|-----|------------------------|-----|-----|-----------------------|
| Men | ... | ... | 626 | ... | ... | 761 |
| Women | ... | ... | 1,878 | ... | ... | 2,101 |
| Children | ... | ... | 1,180 | ... | ... | 1,181 |
| Total | ... | ... | 3,884 | ... | ... | 4,043 |

6. The Collector has not attempted to give the separate chapter of the details of relief as required by the Government Circular order No. 3216 of 19th May, as he cannot yet obtain them from the 151 sub-committees who are at work in the district. He will be reminded to submit it.

7. *Beerbhoom*.—The report of the Collector is again more assuring, and notwithstanding some increase in pauperism, he is of opinion that the state of the country is decidedly improving. The unnatural outbreak of dacoity seems to have ceased, as the Collector reports that only two grain robberies occurred during the fortnight.

8. The average daily number of persons employed on relief works as shewn in statement C, was 10,484 during the present fortnight, against 10,374 of the previous fortnight.

9. The local exports of rice had amounted to 8,672½ maunds, against imports of 7,213 maunds of Government grain, of which 3,872 maunds had been consumed up to date as shown in the Appendix Return II. Further supplies of Government grain have been applied for.

10. The daily number of persons receiving charitable relief during the fortnight is given as 10,913, against 9,803 of the previous fortnight. The Collector has omitted to send the return required by Government Circular order 3216 of 19th May, which he submitted in Appendix 5 of his last report, and he will be called on to supply it.

11. *Bankoora*.—The Collector's report is generally hopeful, and there has been a fall in the price of coarse rice. There have been partial showers throughout the district, and the weather has been as favorable as possible for cultivation, except in one very small tract.

12. I would invite attention to the Collector's remarks in paragraphs 4 and 5 on the subject of advances to cultivators, and the popular appreciation of advances of Government grain. From the tabular statement it seems that the Collector had advanced 390 maunds to ryots, but he has not explained on what security these advances were made. In paragraph 14 he states that advances of grain to the value of Rs. 3,277 have been sanctioned, and further applications are under inquiry; a special report will be called for on the subject.

13. The daily number of laborers employed was 3,823 during the current fortnight, against 3,138 of the previous fortnight. The Collector calculates that about 8,400 persons were also employed by private individuals on works executed from tucavee advances.

14. The Collector has given the details required by the Government Circular order of 19th May, under the head of "charitable relief." The daily average totals appear to be—

| | | | | | |
|---------|-----|-----|-----|-----|--------|
| Class B | ... | ... | ... | ... | 9,972 |
| Class C | ... | ... | ... | ... | 3,609 |
| Class D | ... | ... | ... | ... | 865 |
| Total | ... | ... | ... | ... | 14,446 |

which shews a great increase on the 9,047 of the previous fortnight.

15. *Burdwan*.—The Collector has, as usual, submitted an abstract of the sub-divisional reports, with some more than usually incisive comments of his own, to which I would invite special attention. There is no doubt much truth in the Collector's remark that "the people have a fixed idea that the Government must relieve them all gratuitously, and entirely on their own terms, if they only cry out long enough and loud enough." And when a Government officer is thus brought in contact with the expression of this feeling, he naturally seeks to protect the interests of Government, and of the charitable public against imposition. The Collector has forcibly described the scenes presented at the local food depôts, in terms which ought to satisfy any one that he is well acquainted with the wretched objects who are there gathered together, representing the still surviving, but incurable sufferers from epidemic fever; the most horrible victims of leprosy, and the well-feigned anguish of the professional beggars. The Lieutenant-Governor has seen such people collected at Kanoo and at Gulsee, and the district relief officer assures me, that the specimens of distress at Gulsee may be considered to be as bad as, or worse than, what is to be found anywhere else in the district, and I see no reason to doubt this from what has come under my own observation. A special report is under preparation regarding the village at the Beddial railway station, which has been the subject of the comments of a newspaper correspondence.

16. The Collector has quoted the remarks recorded by the Civil Surgeon, Dr. French, who had been on his annual visit of inspection to Cutwa last week, before any special orders arrived on the subject of Cutwa and Bood-bood. It will be seen that his description of the people is generally favorable, and that fever appears to him to have been the real cause of emaciation. But on the other hand, the Collector's remarks shew that distress is increasing in parts of Cutwa which the Civil Surgeon could not visit, and five additional food depôts have been opened during the fortnight in Cutwa, and advances of Government grain have been made there to the amount of 675 maunds, whilst the applications for advances have amounted to 74,012 maunds, out of which applications for 38,130 maunds have been rejected, and applications for 31,207 maunds are pending (see Collector's statement No. 4). If grain has to be sent in large quantities to Cutwa, it will be best to send it by river direct by a Government steamer, and a special application will be made on this subject.

17. The rainfall has been heavy and general throughout almost the whole district, and it has rained every day since the 14th, and it is still raining to-day (17th). The Collector has given a table of the rainfall, but I have obtained a later report from the Civil Surgeon up to the 16th instant, which shews 16·30 inches, instead of 14·78, as the total rainfall up to yesterday, of the current year. It would be difficult to see the country more favorably situated than it now is as regards the prospects of rice growing. The innumerable patches of seedling rice shew that there was no lack of seed-rice in the country, and if everything goes well, there ought to be an excellent crop this year. From my old experience of Bengal, I am satisfied that the *burra bursat* have really begun, although native opinion seems to be rather to the contrary.

18. The statement of relief works shews a daily average attendance of 11,028 laborers against 14,178 during the previous fortnight. In addition to these, nearly 5,000 persons were employed in Cutwa in collecting gooting and kunkur to metal the road to Cutwa, which is at present almost impassable for wheeled carriages during the rains.

19. The Collector states that the exports of grain were 9,431 maunds, against imports of 7,673 maunds of Government grain. The statement No. 2 of Government grain shews an import of only 4,082 maunds, of which 2,083 maunds were consumed during the fortnight. An explanation will be called for.

20. Under the head of *Advances to private persons*, the Collector notices the reluctance of the people to give any sort of security for one another. The Collector proposed to reduce the joint security to a number of not less than six persons collectively, and I sanctioned this, and have especially reported it. But with reference to paragraph 6 of Government orders No. 438T.F. of 12th instant, I have now authorised the Collector at once to make advances of grain in small quantities to individual ryots who declare that they are really reduced to perilous straits from want of food, provided the local charitable sub-committee certifies that this is true. Each applicant, on these terms, is to be required to engage for repayment of the amount advanced to him within two years.

21. Statement No. 5 shews the daily average number of the recipients of charitable relief as 13,651, against 14,551 of the previous fortnight, and of this number 3,200 were fed at the expense of His Highness the Maharajah of Burdwan. But to the total of 13,651 there must be added 1,731 persons as entered in statement required by the Government Circular Order No. 3216 of 19th May, so that the total daily number relieved is 15,382 during the fortnight.

22. The narratives for Midnapore and Howrah will be forwarded as soon as they are received.

23. I beg that as soon as the district narratives are printed, three copies may be sent to this office, and three copies to each district direct.

No. 149, dated Hooghly, the 15th June 1874.

From—F. H. PELLEW, Esq., Offg. Collector of Hooghly,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending Saturday, the 13th June 1874.

A.—STATE OF THE COUNTRY.

2. There is no scarcity of grains in the bazars of the district. As a report had been received of scarcity of rice in the bazars of thana Kristonuggur on the south-west of the district, the sub-divisional officer at my request visited the thana last week. He reports that the statement is groundless; that there is plenty of rice in the markets, and that the Damoodur having now become navigable, supplies are available by boat from every direction.

3. Kind and price of grain selling at certain specified marts—

| Names of principal marts. | QUANTITY PER RUPEE BY THE SEER OF 80 TOLANS. | | | | | | | | | |
|-----------------------------|--|---------------|-----------------|---------------|-----------------|---------------|-----------------|---------------|-----------------|---------------|
| | Wheat. | | Barley. | | Rice, best. | | Rice, common. | | Gram. | |
| | Present return. | Past. return. | Present return. | Past. return. | Present return. | Past. return. | Present return. | Past. return. | Present return. | Past. return. |
| | Srs. | Srs. | Srs. | Srs. | Seers. | Seers. | Seers. | Seers. | Seers. | Seers. |
| Baboozunge in Hooghly ... | 13 | 13 | ... | ... | 9 to 9½ | 9 to 10 | 11½ to 12 | 12 to 12½ | 13 to 13½ | 13 to 13½ |
| Chinsurah, Khuroos Bazar... | 13 | 13 | ... | ... | 9 " 9½ | 9 " 10 | 11½ " 12 | 12 " 12½ | 13 " 13½ | 13 " 13½ |
| Balore ... | ... | ... | ... | ... | 9 " 9½ | 9 " 10 | 11½ " 12 | 12 " 12½ | 13 " 13½ | 13 " 13½ |
| Jinkrapontahgunge ... | 13½ | 13½ | ... | ... | 9 " 9½ | 9 " 10 | 12 " 13 | 12½ " 13 | 13½ " 14 | 13½ " 14 |
| Serampore ... | 12 | 12 | 16 | 16 | 8 " 8½ | 8 " 8½ | 12 " 13 | 12 " 13 | 13 " 14 | 13 " 14 |
| Chunditalah ... | ... | ... | ... | ... | 10 " 0 | 9½ " 0 | 12 " 0 | 12 " 0 | 12 " 0 | 12 " 0 |
| Bydabatty ... | 13 | 13 | 17½ | 17½ | 8 " 0 | 8 " 0 | 13 " 0 | 12½ " 0 | 13 " 0 | 13 " 0 |
| Bhadressur ... | 12 | 12 | 15 | 15 | ... | ... | 11½ " 13 | 12 " 12½ | 13½ " 0 | 13 " 0 |

From this it is clear that the price of rice has risen half a seer in the northern part of the district, following a similar rise in the south recorded in last report. A rise has also occurred at Bhadressur

4. *Information as to the kind and price of rice in the hands of zemindars, traders, &c.*—Same as in previous reports. The markets in thana Ballagurh are supplied principally from Cutwa and Culna by boat and bullock-cart. Those of Pandooah from Calcutta, Muggrah and Culna. Those of Dhunyakhally from Silamabad, those of Huripal from Bydabatty, and those of Kristonuggur from Ampta.

5. *Rainfall if any.*—It rained during the fortnight in all the thanas of the district. At the following places measurements were made:—

| | Hooghly. | Serampore. | Dhunyakhally. | Chunditola. |
|-----------|----------|------------|---------------|-------------|
| 1st ... | | 1.10 | | |
| 3rd .. | | | | .07 |
| 4th .. | | | .05 | 1.00 |
| 6th .. | | | .05 | .55 |
| 10th .. | .30 | .27 | | ... |
| 12th .. | .85 | | .50 | |
| 15th .. | .01 | | | |
| Total ... | 1.16 | 1.43 | .60 | 1.62 |

The rain, though not heavy, is universally stated to be sufficient. Early rice, late rice seedlings, and jute, are being put into the ground as rapidly as possible. The Damoodur rose from a volume of 2,000 cubic feet per second to over 30,000 cubic feet, and at length carried away the sand dam constructed across it for the purpose of forcing a supply of good water into the Kana Nuddee and Surrosutty rivers, as previously reported by me in separate correspondence. The dam was not carried away, however, till the work for which it was constructed was fully carried out, as the Executive Engineer reports that the tanks and hollows on the banks of the Kana Nuddee and Surrosutty have been filled with Damoodur water, so that "there will be no further dearth of water." Much use was made of the water whilst its supply lasted, for irrigation, as well as for drinking purposes.

6. A small crop of til has been got in, which the unusual January and February rains enabled the ryots to sow. The spring crops of rice, boro dhan, and joli dhan, have been harvested in the few places in the district (excluding Howrah) in which they were planted; the late rains have revived the sugarcane. In some places, where from want of water for artificial irrigation, this crop had died, the ryots are replacing it with early rice (*aous*.)

7. Early rice sowings are being rapidly made over an unusually large area. Jute is being planted, but less than usual. The seedlings of late rice are sprouting, and are 5 or 6 inches high in places. The alternate showers and sunshine are very favorable for the rice crop, though later on heavier rain will be required.

8. A fair crop of mangoes was obtained and is being disposed of by the ryots at 76 to the rupee.

CONDITION OF THE PEOPLE.

9. As prices rise, and the organisation of charitable relief becomes more complete and searching, the number of paupers obtaining relief from the committees' funds increases, but I do not consider that there is any serious increase in the number of paupers. The relief officer states that, as a rule, the cultivating classes can maintain themselves. Speaking of villages in thana Dhunyakhally, he says: "The cultivators, though under heavy pressure, are not yet in actual want." The Mahomedan cultivators appear to be worst off. To some of these advances for cultivation will be made, though, as a rule, they will get sufficient assistance from zemindars or mahajuns. Fortunately the health of the district is better than it has been since 1860,—the Dhunyakhally sub-inspector writes that "whereas two annas of the people were formerly sick with fever, now only one anna is afflicted." What distress exists is primarily due to fever rather than scarcity.

10. At the Snan-jatra or bathing festival at Serampore, the crowd was said to be somewhat less than usual, but it is reported that "the state of the poorer classes assembled did not appear at all bad, and their condition did not denote that there was any distress or starvation in the country; every one appeared to be quite happy, and to be spending money as usual."

GRAIN-THEFTS.

11. Two cases of grain-theft have been reported, one in Huripal and the other in Pandooah. The thieves could not be traced.

CONDITION OF SPECIAL TRACTS.

12. There is no tract here which can as yet be said to be in a specially distressed condition.

13.

B.—RELIEF WORKS.

| Name of road. | Number of coolies. | Supply of food. | Condition of laborers. | Mode of payment and rate of wages. | Arrangement for tools. | REMARKS. |
|----------------------------------|--------------------|--|------------------------|--|---|---|
| <i>Hoochly Sub-division.</i> | | | | | | |
| Tribany to Gootiparah road ... | 15 | To be had from the nearest market. | Fair ... | Paid at annas 3-3 per 100 cubic feet of earth-work, receiving annas 2 as khorakee, and their accounts are settled twice in the week. | Partly by the contractors, and partly by Public Works Department. | The coolies all local. |
| Pandooah to Culna road ... | 50 | Ditto ... | Do. ... | Ditto, and for breaking jhamma at annas 8 per 100 cubic feet. | Ditto ... | 40 local, rest imported. |
| Mugrah to Bansbariah road ... | 5 | Ditto ... | Do. ... | Paid annas 0-3-3 per 100 cubic feet. | By contract ... | All local. |
| Tarakeshur road ... | 8 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto. |
| Dhunyakhally road, metalling... | 360 | Ditto ... | Do. ... | Generally all works done by task labor at certain rates. Coolies get annas 2 daily, khorakee; carters annas 5. | Ditto ... | About 66 men living in the Pandooah thana, and 20 local. The rest from Burdwan and Beerbhoom. |
| Shagunge and Tribany ... | 8 | Ditto ... | Do. ... | At annas 3-3 per day per head. | Ditto ... | Local. |
| Tribany bridge ... | 10 | Ditto ... | Do. ... | Masons and carpenters are working; they are paid at task work. | Ditto ... | Ditto. |
| Bhastora to Gooroop ... | 14 | Ditto ... | Do. ... | 3 annas to 3-6 per 100 per cubic feet. | Ditto ... | Partly laborers partly cultivators; all local, under Baboo Joggeesur Singh. |
| Dhunyakhally to Bhastora ... | 35 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto under ditto. |
| Mahanad to Gopikantpore ... | 144 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto under Revd. Juggo-dish Bhattacharjee. |
| Moolye to Jamgram ... | 17 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Partly laboring classes and partly cultivators; all local. |
| Koolayparah to Iachindeopore ... | 30 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Dakchura to Ballaghur ... | 6 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Khonyan to Chapta ... | 61 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Chandpore to Bukooliah... .. | 111 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Baksagore to Chandra ... | 83 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Dhunyakhally to Khanpore ... | 8 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Naksa to Digsul ... | 50 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Tahirpore to Mamoodpore ... | 10 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Pandooah to Khootee ... | 100 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Chapta to Sikra ... | 19 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Bhola to Nalikool road ... | 13 | Coolies purchasing from the nearest bazar. | Do. ... | Ditto ... | By contractor ... | Local. |
| Chandernagore and Bhola road ... | 10 | Ditto ... | Do. ... | Ditto ... | Ditto and Department Public Works. Ditto ... | Ditto. |
| Dwarbasinse to Kanarye ... | 18 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto. |
| Total ... | 1,202 | | | | | |

| Name of road. | Number of coolies. | Supply of food. | Condition of laborers. | Mode of payment and rate of wages. | Arrangement for tools. | REMARKS. |
|--------------------------------|--------------------|--------------------------------|------------------------|---|--|---|
| <i>Serampore Sub-division.</i> | | | | | | |
| Branch Grand Trunk Road ... | 12 | Coolies purchasing from Bazar. | Fair ... | Rs. 6-8 per month; one rupee advance taken weekly by each man as khorrakee. | Partly contractors, and rest Department Public Works. | All imported men are working; no local coolies can be had for this work. |
| Sheakhalla road ... | 112 | Ditto ... | Do. ... | At annas 3-8 per head daily, taking 2 annas as khorrakee, breaking jhama at annas 8 per 100 cubic feet. | Contractor ... | 47 local, rest not local. |
| Bordyabatty feeder-road | 58 | Ditto ... | Do. ... | At ditto ... | Partly contractor, and partly Department Public Works. | 25 local, rest imported. |
| Old Benares road ... | 51 | Ditto ... | Do. ... | Brick claspers taking at Rs. 40 per lakh advance, daily coolies at annas 3-3, &c. | Ditto ... | About 30 men local, and the rest imported. |
| Connuggore and Jonye road ... | 10 | Ditto ... | Do. ... | An advance of Rs. 1 each, or 2 annas per day for each, is usually given. | Contractors ... | So many coolies have gone to cultivation, that the number required for the works cannot be got. |
| Kalipore road ... | 15 | Ditto ... | Do. ... | Men paid 4 annas, women 3-6. | Ditto ... | Ditto ditto. |
| Harida to Baksa ... | 148 | Ditto ... | Do. ... | 3 annas to 3½ annas per 100 cubic feet. | Ditto ... | All local, under Baboo Chunder Kanto Mookerjee. |
| Jonye to Baraset ... | 63 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Derghango to Doorgampore ... | 24 | Ditto ... | Do. ... | Ditto ... | Ditto ... | All local, under Baboo Shara Chunder Banerjee. |
| Bora to Nussibpore ... | 31 | Ditto ... | Do. ... | Ditto ... | Ditto ... | All local, under Baboo Aumooroop Chunder Mookerjee. |
| Jonye to Bora ... | 13 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Total ... | 540 | | | | | |
| Grand total ... | 1,742 | | | | | |

14. The Collector of Howrah will give the Howrah works separately.

15. The following laborers were employed daily on tanks in the municipalities, towns, and unions :—

| | Total. |
|---------------------------------|--------|
| Hooghly and Chinsurah ... | 570 |
| Serampore ... | 203 |
| Ootterparah works completed ... | ... |
| Kotrung ... | 40 |
| Bydabatty ... | 210 |
| Ballagurh ... | 140 |
| Gooptiparah ... | 90 |
| Muggrah ... | 48 |
| Total | 1,301 |

16. Under the Executive Engineer, Northern Drainage and Embankment Division, Irrigation Department, the following work is in progress :—

| Thana. | Name of work. | Daily average No. of coolies during the fortnight.* | Condition |
|-----------|-----------------------------------|---|-----------|
| Bydabatty | Kana Nuddee and Surrosutty Canal. | 108 | Good. |
| | Ordinary Embankment repairs | about 27 | Do. |

REMARKS.—The dry tanks along the Surrosutty have been filled with Damoodar water. Water flowing abundantly down the Kana Nuddee to the Surrosutty until the morning of the 6th, when the dam of sand across the Kana Nuddee at Gopalnuggore was carried away. Chiefly local people have gone to work in their fields.

17. The returns of work on 36 tanks, which are being dug or improved from tuccavee advances, have been received. These show a daily average number of 1,361 coolies employed, of whom 254 are local. 9 (nine) tanks of the above are nearly completed. Besides this, 194 coolies, of whom 40 are local, are employed in excavating the Ghea Nuddee by two zemindars from private means, as a relief work.

18. I give here a comparative statement of the number of coolies employed on relief works as shown in the last and in the present report:—

| | | Last report. | Present report. |
|---|------------------------|--------------|-----------------|
| Roads, &c., under the chairman of road cess. | Sudder sub-division | 1,125 | 1,202 |
| | Serampore sub-division | 310* | 540 |
| Total | | 1,435 | 1,742 |
| Municipalities, towns, and unions. | Hooghly and Chinsurah | 545 | 570 |
| | Serampore ... | 213 | 208 |
| | Ootterparah ... | 15 | 0 |
| | Towns and Unions | 664 | 528 |
| Total | | 1,437 | 1,301 |
| Under the Executive Engineer, Northern Drainage and Embankment Division ... | | 278 | 135 |
| Employed on works executed from tuccavee advances ... | | 1,822 | 1,361 |

C.—TRANSPORT OF FOOD.

19. The following is an abstract of the Railway traffic return for the fortnight ending 6th June 1874:—

Up—Outward.

| Station. | UNDER 150 MILES. | | OVER 150 MILES. | | OVER 300 MILES. | TOTAL. | |
|----------------------|------------------|--------------------|-----------------|--------------------|-----------------|--------|--------------------|
| | Rice. | Other food-grains. | Rice. | Other food-grains. | Rice. | Rice. | Other food-grains. |
| Serampore | | | | | | | |
| Chandernagore | | 1,096 | 6,521 | 210 | 14,38 | 7,959 | 1,306 |
| Hooghly | 139 | | 571 | | | 710 | |
| Muggrah | | | 5,249 | 6,254 | | 5,249 | 6,254 |
| Pandooah | | | | | | | |
| Total | | | | | | 13,918 | 7,560 |

Down—Inward.

| Station. | UNDER 150 MILES. | | OVER 150 MILES. | | TOTAL. | |
|----------------------|------------------|--------------------|-----------------|--------------------|--------|--------------------|
| | Rice. | Other food-grains. | Rice. | Other food-grains. | Rice. | Other food-grains. |
| Serampore | 48 | 133 | | 880 | 48 | 1,013 |
| Chandernagore | | | | | | |
| Hooghly | | | 442 | | 442 | |
| Muggrah | | | | | | |
| Pandooah | 140 | 4 | | | 140 | 4 |
| Total | | | | | 630 | 1,017 |

Up—Inward.

| Station. | UNDER 150 MILES. | | OVER 150 MILES. | | TOTAL. | |
|----------------------|------------------|--------------------|-----------------|--------------------|--------|--------------------|
| | Rice. | Other food-grains. | Rice. | Other food-grains. | Rice. | Other food-grains. |
| Serampore | 849 | | | | 849 | |
| Chandernagore | | | | | | |
| Hooghly | 443 | | 184 | | 627 | |
| Muggrah | | | | | | |
| Pandooah | | | | | | |
| Total | | | | | 1,476 | |

There was no down-outward traffic.

D.—STORAGE OF GRAIN AT GOVERNMENT RELIEF WORKS.

20. Arrangements have been made for the storage of grain at the relief works in progress. The grain will be stored partly in borrowed, and partly in hired premises. In some cases contractors will take over the grain and store it themselves. There is good accommodation for grain in pucca buildings at Hooghly and Serampore. The amount of grain received is shewn below.

Receipt of Government Grain.—Despatch of the 29th May 1874. From Howrah.

| | Bags. | Maunds. | Received. | |
|-----------|-------|---------|-----------|----------|
| | | | Bags. | Maunds. |
| Muggrah | 135 | 103 | 135 | 101-10 |
| Hooghly | 580 | 442 | 580 | 435 |
| Pandooah | 135 | 103 | 135 | 101-10 |
| Serampore | 530 | 407 | 530 | 400-6 |
| Total | ... | 1,055 | | 1,037-26 |

Despatch of the 3rd June 1874. From Howrah.

| | | | | | |
|-----------|-----|-----|-------|-----|-----|
| Muggrah | ... | 50 | 101 | 50 | 100 |
| Hooghly | ... | 218 | 441 | 218 | 436 |
| Pandooah | ... | 50 | 101 | 50 | 100 |
| Serampore | ... | 0 | 440 | 0 | c* |
| | | | 1,083 | | |

21. The amount sent out is from :—

| | | |
|-----------|-----|----------|
| Serampore | ... | 587 |
| Hooghly | ... | 543 |
| Pandooah | ... | 101-10 |
| Total | ... | 1,231-10 |

22. I have applied separately for further supplies before the rains make the roads heavy :—

E.—ADVANCES TO PRIVATE PARTIES.

| | Rs. |
|--|--------|
| 23. Advances for grain as already reported | 18,000 |
| Advances to Municipalities | Nil |
| Advances under the Tuccavee Act up to date of last narrative | 36,561 |

During the fortnight—

| | | |
|--|-----|--------|
| Ramgopaul Bhattacharjee | ... | 300 |
| Narian Sen | ... | 150 |
| Koomud Chundra Mookerjee | ... | 250 |
| Sreemunto Mookerjee and another in two cases | ... | 300 |
| | | 1,000 |
| Total | ... | 37,561 |

24. The advances given in the fortnight were in cases which had been long pending owing to delay in producing title deeds, or failure of consent of all parties concerned, &c., and in which the work were commenced and making satisfactory progress in anticipation of receipt of the tuccavee advance.

F.—CHARITABLE RELIEF.

25. Number of committees as yet appointed—

| | | |
|--------------------------|-----|-----|
| District Committee | .. | 1 |
| Sub-divisional committee | .. | 1 |
| Sub-committees | ... | 151 |
| Total | | 153 |

Number of work-houses, or centres for distribution of food and charitable relief.

26. I have organised 9 centres in the mofussil for distribution of rice on production of tickets—others are in course of organisation. Besides 7 serais for the use of travellers.

27. Number of persons relieved—

| | | | |
|----------|-----|-----|-------------|
| Men | ... | ... | 761 |
| Women | ... | ... | 2,101 |
| Children | ... | ... | 1,181 |
| | | | <hr/> 4,043 |

These figures include relief under heads B., C., and D. The sub-committees' reports do not yet shew the relief given under each head separately.

G.—FINANCIAL RESULTS.

28. The disbursements to Executive Engineer and others during the fortnight were as follow :—

| | | | Rs. | A. | P. |
|--|-----|-----|-----|-------|------|
| To Executive Engineer | ... | ... | ... | Nil | |
| To Zemindars, road cess committees, and others | ... | ... | ... | Nil | |
| For tuccavee advances | ... | ... | ... | 1,000 | 0 0 |
| The local subscription to the relief committee realised up to the date of last narrative | ... | ... | ... | 7,025 | 15 0 |
| During the fortnight | ... | ... | ... | 125 | 0 0 |
| Government contribution | ... | ... | ... | 170 | 0 0 |
| Total | | | | 7,320 | 15 0 |

The following sums have been received from the Central Committee :—

| | | | | | |
|-----------------------|-----|-----|-----|-----|--------------|
| Previous to fortnight | ... | ... | ... | ... | 6,000 |
| During the fortnight | ... | ... | ... | ... | 6,000 |
| Total | | | | ... | <hr/> 12,000 |

The disbursements are as follows :—

| | | | Rs. | A. | P. |
|------------------------------|-----|-----|-----|--------|-----------|
| Up to date of last narrative | ... | ... | ... | 10,307 | 14 9 |
| In the fortnight | ... | ... | ... | 3,439 | 4 6 |
| Total | ... | ... | ... | 13,747 | <hr/> 3 3 |

No. 266, dated Soory, the 15th June 1874.

From—R. D. HIME, Esq., Offg. Collector of Beerbhoom,

To—The Commissioner of Revenue, Burdwan Division.

I HAVE the honor to submit my district narrative for the fortnight ending 13th June.

A.—STATE OF THE COUNTRY.

Notwithstanding some increase in pauperism, I believe the view expressed in my last narrative to have been correct, and that the state of the country is decidedly improving; I attribute the increase in pauperism, not to an increase of the existing distress, but to an increase in the number of relief-houses, and to the natural tendency of charity to attract its objects. I hear now no complaints of scarcity of rice, and from the continued exportation, and applications made to me to compel holders to open their stores, I judge that there are still considerable stocks in the country. The weather is very favorable to all agricultural operations, and the prospects of the early harvest good. Unfortunately a report seems to have got about, spread I believe by the petty mooktears who obtain fees for writing out petitions and subsequent imaginary services, that Government is about to make advances to all cultivators, and my office is consequently daily swamped by a flood of stout, burly, clamorous fellows, armed each with a shabby scrap of paper in which his modest requirements are set forth, generally Rs. 25. These folk shew no signs of privation, and I believe the same report would produce a like rush in the most prosperous year. Cholera and small-pox are abating. No death from starvation has been reported; and the relief agency continues to work successfully. Two grain robberies occurred during the fortnight. Prices are given in Appendix I. During the fortnight 31 emigrants to Natal, and 6 to Cachar, all of low-caste, were registered.

B.—RELIEF WORKS.

No new relief works have been opened during the fortnight. The number of laborers employed on district works of all kinds is given in form C.

C.—TRANSPORT OF GRAIN.

Exportation continues, 8,672½ maunds of rice having been exported during the fortnight under review against 7,024½ maunds of the preceding fortnight. 7,213 maunds, 35 seers of Government grain have been received, and are in process of storage and transport; 900 maunds having been allotted to the police for the support of chowkeydars, and the remainder, 5,313 maunds, 35 seers, to charity and advances to zemindars under concession G.

D.—STORAGE OF GRAIN.

Of the 7,213 maunds 35 seers received, 3,746 maunds 38 seers are partly in process of transport to different centres and police stations, partly already stored at those destinations; 3,439 maunds 35 seers are safely stored at Surool and Bulpore, and 27 maunds 2 seers at Cynthia—*vide* Appendix return II.

E.—ADVANCES TO PRIVATE PARTIES

Are shewn in Appendix return III. No advances under concession G have yet been made owing to a difficulty about the rates, which has been made the subject of a separate reference.

F.—CHARITABLE RELIEF.

Vide Appendix, return IV. Since last report one new relief-house has been opened at Ganotia silk factory, under the supervision of Mr. Jones, manager of that concern. The expenditure up to date is Rs. 24,050-14-4.

G.—FINANCIAL RESULTS.

Up to date Rs. 61,365 have been drawn from the treasury on certificates granted under Act XXVI of 1871; Rs. 66,659 have been placed to credit of the Executive Engineer for relief works; Rs. 6,500 have been advanced to Messrs. Farquharson and Campbell of Ilambazar; Rs. 2,504-2 to Mr. Jones of Gonotia; Rs. 750 to Baboo Kishoree Mohun Roy of Naguri; and Rs. 75 to the Munduls of Kuliara, for the construction of roads chargeable to relief; Rs. 1,154-8-6 have been expended on the excavation of the Rajah's tank, and Rs. 4,615-8 placed to credit of the charitable relief fund on account of the Government subscription.

Prices-current of Food-grains and Salt in the District of Beerbhoom for the week ending Saturday the 13th June 1874.

No. 133—S.R., dated Burdwan, the 27th June 1874.

Memo. by C. T. BUCKLAND, Esq., Commissioner of Burdwan.

COPY of the following statement forwarded to the Secretary to the Government of Bengal, Scarcity and Relief Department, for information, with reference to paragraph 10 of my No. 525T. of the 17th instant.

APPENDIX, RETURN V.

Statement showing the number of persons relieved up to 6th June 1874, submitted with reference to Government No. 3216—S.R. of the 19th May 1874, paragraph 5.

| | (B.) | Rs. | As. | P. |
|---|--------|---------|-----|-----|
| Total number of meals given up to 6th June 1874, i.e., persons fed for one day | ... | 304,016 | | |
| Total number of persons receiving gratuitous relief in rice at present | | 7,865 | | |
| Total cost to date | | 12,991 | 7 | 11½ |
| | (C.) | | | |
| Total number of weavers and spinners supplied with thread and cotton, and advances and laborers employed on light out-door work | | 3,063 | | |
| Total cost to date | | 10,770 | 15 | 0 |
| | (D.) | | | |
| Total number of families under heading "D" | ... | 12 | | |
| Total cost to date | | 22 | 7 | 6 |
| Total number of persons in receipt of relief on 6th June 1874... | ... | 10,925 | | |
| Total of cost up to date, i.e., up to 13th June, under all heads | | 23,784 | 14 | 5½ |

REMARKS.—*Vide* Appendix, return V, of the report for the fortnight ending 30th May. Of the laborers under heading C, 2,435 are spinners and weavers, and 623 out-door laborers engaged on village tanks and roads.

R. D. HIME,
Offg. Collector.

• APPENDIX, RETURN II.

Statement showing the Storage and Consumption of Government Grain in the district of Beerbhoom for the fortnight ending 13th June 1874.

- 1.—Name of circle, Beerbhoom.
- 2.—Date for which figures are given, 1st to 13th June.
- 3.—Total allotment of Government grain, 1,000 maunds per week; total received up to date, 7,213 maunds and 35 seers.
- 4.—Total quantity of grain stored, exclusive of grain transferred to other districts, 7,213 maunds and 35 seers.

Total quantity of grain consumed up to date.

- 5.—By sale to the public or to laborers, none.
- 6.—By gratuitous distribution in any shape, 3,872 maunds disposed of to charitable committee.
- 7.—By advances to ryots, none.
- 8.—By payments in kind to laborers, none.
- 9.—Total, 3,872 maunds.
- 10.—Estimated grain receipt of the ensuing fortnight, 2,000 maunds.
- 11.—Estimated grain expenditure of the ensuing fortnight, 5,000 maunds in charitable distribution, advances to proprietors under concession G, support of chowkeydars under special orders of Government, and sale to laborers on relief works.

APPENDIX, TABLE III.

Statement showing the number of Applications under the Land Improvement Act XXVI of 1871, up to 13th June 1874.

| | | | | Amount. Rs. |
|--------------------------------------|-----|-----|-----|----------------|
| Number of applications registered... | ... | 683 | ... | 2,82,823 |
| Ditto ditto disposed of | ... | 681 | ... | 2,82,373 |
| Ditto ditto granted | ... | 231 | ... | 72,580 |
| Ditto ditto refused | ... | 450 | ... | 2,09,793 |
| Ditto ditto pending | ... | 2 | ... | 450 |
| Ditto of certificates drawn | ... | 180 | ... | 61,365 |

APPENDIX, STATEMENT IV.

Statement showing the progress of Charitable Relief in the District of Beerbhoom for the fortnight ending 13th June 1874.

| | | |
|--|-----|--------|
| Number of committees and sub-committees as yet appointed | ... | 10 |
| Number of special relief sub-divisions opened and officered | ... | 20 |
| Number of regular relief circles opened and manned by special officers | ... | 12 |
| Number of relief circles opened and manned by planters, zemindars, and other residents | ... | 11 |
| Number of work-houses or centres for the distribution of food and gratuitous relief | ... | 21 |
| Number of men, women and children (with total) in receipt of gratuitous relief in any shape, through the charitable relief organisation, daily | ... | 10,913 |

Remarks.—Of the total number of the recipients of charitable relief, 1,903 are cotton-spinners, 532 weavers; the former receiving advances of money and cotton, the latter of money and thread; and 628 are employed in light labor on village tanks and roads, leaving 7,850 in receipt of purely gratuitous relief.

R. D. HIME,
Officiating Collector.

No. 469, dated Bankoora, the 15th June 1874.

From—W. R. LARMINIE, Esq., Offg. Collector of Bankoora,
To—The Commissioner for the Division of Burdwan.

I HAVE the honor to submit my report for the fortnight ending 15th June.

2. *State of the Country.*—The supply of grain is reported sufficient. Prices generally have not altered much, but coarse rice fell considerably during last week, as I have already

reported especially to you. It has again risen slightly, but not to its former standard. The different rates are given below :—

| | Rice, best sort. | Rice, common. | Wheat. | Barley. | Gram. |
|----------------|------------------|---------------|----------|----------|----------|
| | M. S. C. | M. S. C. | M. S. C. | M. S. C. | M. S. C. |
| Bankoora | ... 0 10 10 | 0 12 8 | 0 12 8 | 0 21 0 | 0 13 4 |
| | | Cornc. | | | |
| | | 0 14 8 | | | |
| Bishenpore | ... 0 11 0 | 0 13 8 | 0 13 0 | 0 24 0 | 0 13 8 |
| Chatua | ... 0 12 8 | 0 13 0 | 0 13 8 | 0 17 8 | 0 13 8 |
| Oudah | ... 0 11 0 | 0 13 0 | 0 13 0 | 0 22 0 | 0 14 0 |
| Gungajulghatty | ... 0 11 8 | 0 12 0 | 0 13 0 | 0 18 0 | 0 14 0 |
| Burjorah | ... 0 12 8 | 0 13 8 | 0 15 0 | | 0 13 8 |

3. There have been partial showers all over the district, and the weather has been as favorable as possible for cultivation, except in a very small tract between Mejia and Saltora, where there has not yet been sufficient rain. The aous seedlings are in some places now a foot above ground, and it is stated that seed has already been sown for the amun crop.

4. Mahajuns and others still continue to make advances, but chiefly to the well-to-do ryots. I am glad to say I have succeeded in inducing a good many to advance, who at first hesitated about doing so. On the other hand, several landlords expressed themselves plainly to the effect that they would not advance themselves, and would prefer that no one else did, as they hoped thus to get rid of the small *Mokuridars*. Others offered advances on condition that the ryots gave up certain portions of their hereditary rights. This line of conduct I consider an attempt to take undue advantage of hard times, and have invariably in such cases given advances on the security of the tenure. Speaking generally, whenever ryots apply to me for aid, I put myself in communication with the persons who usually supply their needs, and try to induce them to take advances in order to assist those who require assistance. If they refuse, I deal directly with the applicants.

5. Our special enquiries fully confirm my opinion, long since expressed, that advances would be required, and no form of relief has done, or is doing more *real* and permanent good. One fact tends to show that they are really required. Advances are given in Government grain of a sort called *atali*, having been husked without being boiled. The people here boil their paddy, sometimes twice, before husking, and very much prefer this (which is called *siddho*), to the *atali*. Yet except that one hears a slight grumble, they accept the Government grain freely.

6. Distress is increasing amongst the middle and higher classes, but is not everywhere.

7. No serious grain-theft has been reported, nor have there been any cases of starvation.

8. *Relief works*.—There has been an increase of about 600 in the number employed. This is chiefly due to the decrease in the number employed on works for which tucacave advances had been given, and partly to the increased strictness which some of the sub-committees are showing in rejecting persons who are able to do a full day's work from the light labor list. The increase is chiefly to be noticed in the Bankoora and Taldangrai, and Maliara and Burjorah roads. The Executive Engineer reports that some of the laborers on the Moheshna road, who are paid by piece-work, work half the day on the road, and the other half at their own fields.

9. I have been able to procure returns in 136 out of 171 works, for which advances were made to private parties. In these about 6,700 persons are daily employed. The total number thus calculated would be about 8,400.

10. *Transport of food*.—Both important imports and exports are reported as having diminished.

11. *Storage of Government grain*.—The accompanying statement will shew what has been done. Part of the last consignment of 1,000 maunds of grain received at Raneegunge had not arrived at the different golahs when their accounts were forwarded. The grain is being very satisfactorily disposed of, and I am taking special care that those who are getting advances in grain should not fail to be supplied. If I have not sufficient to meet the whole grant at once, 25 per cent. is allowed until the store of grain is replenished.

12. There is some difficulty just now in procuring carts, as so many bullocks are employed in ploughing, and except in cases of great emergency no pressure should be put upon owners to supply carriage.

13. *Advances to private parties*.—Advances under the Land Improvement Act have been completed, a total sum of Rs. 52,134 having been granted.

14. Advances of grain to the value of Rs. 3,277 have been sanctioned by myself at head-quarters, and there are a number of applications being enquired into, which will be disposed of within a few days. The special relief officer is entirely occupied with this work in pergunnah Moheshna, and is doing it with care and thoroughness.

15. *Charitable Relief*.—I have again to report an increase in the total number receiving gratuitous relief. This is partly due to the opening of some new relief centres, but chiefly to the great increase at head-quarters. This is the more strange, when one knows that no relief centre is more thoroughly supervised. I have myself during the last week, day after day, spent hours in eliminating those who are able to work, and every man, woman, and child has passed before me in review; but I can safely say that those now receiving alms are quite unable to do anything towards supporting themselves. The only reason I can give for this sudden increase here is, that private charity has entirely ceased, partly because the usual

donors are now themselves in distress, and partly because many, seeing Government so willing to supply the needy, feel themselves freed from the obligation to assist.

16. The number brought under class *d*, is I think larger than it ought to be, but it is very difficult to make the necessary distinction between the different classes. No one is admitted into this class except on the written order of a member of the district committee, but I fear that in some instances benevolence out-runs discretion.

17. I may here mention, that the census papers of Bankoora at least, although giving total populations with tolerable accuracy, are perfectly untrustworthy in details of occupations &c. as I could shew very easily. It seems, therefore, hardly safe to draw any definite conclusions regarding the actual number of beggars in the district. From my own observations I would estimate it at a much higher figure than that shown in the census returns.

18. The accompanying statement gives detailed information as to the nature and extent of relief given.

Statement of Charitable Relief.

1. One Central Committee.
2. Twenty-five sub-committees.
3. Twenty-eight „
4. None.
5. Twenty-eight „

Statement showing average daily number relieved during the fortnight.

BANKOORA COLLECTORATE,
The 15th June 1874.

W. R. LARMINIE,
Offg. Collector.

No. 508F.R., dated Burdwan, the 15th June 1874.

From—E. H. WHINFIELD, Esq., Offg. Collector of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the Narrative for the fortnight ending to-day.

A.—STATE OF THE COUNTRY.

2. The Raneegunge Sub-divisional Officer says that the supply of rice at Raneegunge has been much the same as before; that some 5,811 maunds of rice have been imported from the south-east (by rail), and from Midnapore and elsewhere, whereof 1,354 maunds were re-exported by rail; that 2,700 maunds of kalai have been imported; that some Government rice has been imported for Bankoora, and simultaneously a good deal of rice has arrived by the Bankoora road for export by rail; that prices are a little higher, ranging at Raneegunge from Rs 3-10 a maund, best rice (Ramsal), to Rs. 3-2-6 a maund, coarse rice (Midnapore Sali); that prices at Syamdihi in the interior of Assensole thana are about the same, but a little higher at Assensole itself; that the rainfall at Raneegunge itself has been only 45 inch, but more plentiful in the interior; that the paddy sowings are almost finished, except in the immediate neighbourhood of Raneegunge itself; that there is much difference of opinion as to whether the rains have really set in; that last year the rains did not begin till the 10th July and yet ceased in the third week of September, at which time the probabilities were that the crop would be a full one; that no considerable change has taken place in the condition of the people; that there is no starvation and no distress amongst the cultivators as a class; that no emigrants have been registered; and that cholera is abating; which goes to show that the exciting cause of this disease this year was the badness of the water-supply.

The Bood-hood Sub-divisional Officer says that the supply of rice in the interior is deficient; that prices are higher; that rain fell on the 3rd, 8th, and 12th; that the sowings of tora (aous) paddy on the banks of the Damoodar are finished, and the seedlings have risen to a considerable height; that the sowing of amun paddy is still going on; that vegetables are doing well, and are cheap; that the other standing crops are til, indigo, and sugarcane; that cholera and small-pox have abated since the late rain; and that a group of villages round Iowa, which is four miles distant from the existing food depôts at Bood-hood, at Potenah, and at Malla Sharool, require additional provision for their relief.

During the fortnight, I have been through the northern part of the Bood-hood sub-division, visiting and inspecting the paupers at the Bhatecomda, the Amerpore, the Raninagpur, and the Bhedia food depôts. I passed through Hedogorea as well, but the food depôt at that place had just been moved to Mowkora. The numbers of persons fed daily at each of these depôts range from 250 to 450. Many of the paupers certainly look very wretched objects, as indeed might be expected, for in these depôts we have gathered together so as to be seen at one view all the misery of the neighbourhood. The eye is at once caught by the anæmic clammy faces of the sufferers from chronic fever, by the maimed and scarred limbs and colorless faces of the lepers (who abound here), by the swollen legs of those suffering from elephantiasis, by the wretched looks of the old women, and by the studiously miserable appearance of the professional beggars. After the first glance at these assemblages, one is inclined to come to the conclusion that the distress is most severe, and so doubtless it is; but it is not the distress of starvation, but the distress of chronic disease, of leprosy, of old age. When I proceeded to single out the most miserable objects, and question them, I found that in almost every instance they had been fed at the depôts daily for considerable periods. The fact is that no amount of feeding will improve the looks of the unfortunate lepers, chronic fever patients, and old women who are collected in these food depôts. But it is very noticeable that the children (who constitute more than one-half of the numbers fed at these places), as a rule, with few exceptions, look very well. We have two road works going on in this neighbourhood, viz., that from Bhedia to Baisdoh near Sensaharce, and that from Mancoor to join the Panecgiar and Ilambazar road near the Adjai, and as these roads pass mostly over the laterite, we shall be enabled to carry on work on them for some time longer. The two roads and the agricultural work now going on would seem to be sufficient to furnish employment for all who are disposed to work. As for the cultivators, it is true they crowd round Government officers declaring that they have no seed-grain, no bullocks, and no rice to eat and indeed in some villages all, from the Baboo to the beggar, affirm and asseverate that no rice is to be had at any price. This, no doubt, would be a very alarming state of things, if one believed it. But every test applied seems to show that these asseverations cannot be believed. In the first place, just the same asseverations were made to me when I visited this neighbourhood in March last. In the second place, though I offered to advance the applicants sums of money, varying from Rs. 100 to 250, to buy seed-grain on condition of their executing joint security bonds to repay the advance at the end of 1875, as provided in His Honor the Lieutenant-Governor's minute of 20th April last, they haggled about the terms and in no instance as yet have they come forward to take the money; in the third place, when the subject of the paddy sowings was broached, not of course by direct questions, but circuitously, it appeared that sowings were going on and in point of fact I saw the paddy plants well above the ground in several places; lastly, when asked whether any deaths had occurred from starvation, I invariably got the answer given in the tones of one making an unpleasant admission that no one had died from starvation, though it was added deaths would have occurred had it not been for the "hotels," as they call the food depôts. The fixed idea amongst all these people seems to be that the Government must relieve them all gratuitously and entirely on their own terms, if they only cry out long and loud enough, and every visit of inspection paid to each village intensifies this belief.

The Cutwa Sub-divisional Officer states that prices continue much the same as before; that when the Government rice was stored at Cutwa the price of rice at once fell, the bunniahs being under the impression that it was to be sold to the public, and this checked importation from the interior where better prices were obtainable; that prices returned to their former level on its becoming known that the Government rice was only to be used for relief purposes; that the importation of paddy has slackened; that seed-grain is easily procurable; that rain has fallen in Cutwa and Ketugram thanas; that the early paddy and sugarcane are growing fairly, and the amun seedlings have been sown in nurseries; that distress is most severe in the north and north-west of Thana Ketugram, i.e., on the north of the Adjai; that the activity in litigation and easy realization of rent decrees noticed in the last report do not prove that there is no distress because many substantial and well-to-do persons withheld their payments of rent this year on the plea of the scarcity, and it is these persons who are now paying so easily the sums decreed; that notwithstanding this, distress is now spreading to the upper classes, and large numbers of persons flock to the office neglecting their cultivation in order to obtain advances; that it was only the people of Boharan who refused to work on the roads, but in all other places the people are anxious to have road works commenced in the vicinity of their villages.

Dr. French has visited Cutwa during the fortnight, and inspected the paupers collected at the Cutwa Food Depôt, and the following are his remarks thereon.

"Cutwa, 11th June 1874.

"Food Relief.—Being on inspection duty in this sub-division, I visited the food relief depôt this evening. I saw about 300 people fed, the majority of whom consisted of women

and children. I saw some lepers and others debilitated by disease, but I did not find a single one whose attenuated frame could be set down to starvation. Many, in fact most of the children, were plump and very healthy looking. I saw some who had recently come from a long distance to be fed at the depôt, but they bore no signs of having suffered from starvation. Fever appears to me to have been the skeleton-producing cause. Those individuals who were receiving gratuitous relief, were fit subjects for charity. All the others produced a small yellow ticket showing that they were employed on relief works. The food consisted of 8 chittacks of rice, 1 chittack of dal, and 2 chittacks of vegetables per head. Owing to the large number of children this quantity per adult is sufficient, as the children do not eat more than half of their allowance, and the other half goes to the adults. If in any depôt there are very few or no children, I do not consider 8 chittacks per head sufficient.

"The food was well cooked, and I heard no complaints.

"The chief relief work is the excavation of a tank. Each workman or woman gets one cowree per basket of earth in addition to the daily diet; others collect *kunkur* which is saleable in the place. The working of the depôt is satisfactory."

Regarding the Sudder Sub-division, the District Superintendent of Police reports that the supply of rice is abundant in all the six thanas; that the price of good rice varies from 10 pucca seers per rupee in Burdwan thana to 12½ pucca seers per rupee in Indoss, and the price of coarse rice from 13 seers to 15 seers in Indoss; that the stocks in hand are considerable; that the recent rain has done much good; that there is some distress, but no deaths from starvation have occurred, and no thefts of grain except in Sahebgunge.

As reported in the last Narrative, distress appears to be making its appearance in Khondghose south of the Damoodar, and some food depôts have been set going in that neighbourhood to relieve it. There is nothing new to report of Sahebgunge.

The Culna Sub-divisional Officer says that the supply of Dohonagra, Rashi, Rakum, Nona, and Bada rice in the bazars is abundant; that prices vary from Rs. 3-6 to 3-4 a maund; that the stocks in hand are believed to be considerable; that 3.58 inches of rain fell in the fortnight; that the prospects of the crops are favorable; that agricultural work is going on actively; that the importation of rice and paddy has slackened, and hence prices have risen two annas a maund; that the poorer classes are distressed; that cholera and small-pox still linger on here and there; that no death from starvation has hitherto come to notice, and no paddy thefts have occurred.

The Jahanabad Sub-divisional Officer says that the rainfall has been copious and general; that sowings are being carried on actively; that the standing sugarcane is doing well; that the supply of rice in the bazars is abundant; that prices continue about the same; that stocks are by no means exhausted, but are withheld from the markets in the hope of higher prices; that seed-grain is everywhere abundant, and sells at 22 seers per rupee; that there has been no change in the condition of the people; that there is no cholera; that no deaths from starvation, cases of misery, or grain thefts have occurred; that the number of beggars is increasing, but alms are harder to obtain—beggars who used to collect 2½ seers of rice a day, now getting only 8 chittacks or so.

The chief event of the fortnight has been the heavy and general rainfall, and most people seem to think that the rainy season has set in. If this really is so, it perhaps forms a ground for apprehension that the rains may cease too soon. The following table shows the average monthly rainfall in the first six months of the last ten years compared with actual monthly rainfall in the present year:—

| Month. | Average rainfall in last ten years. | Rainfall in 1874. |
|--------------------|--|-------------------------|
| January | 0.30 | 1.32 |
| February | 0.59 | 3.91 |
| March | 1.20 | 1.98 |
| April | 2.90 | 1.69 |
| May | 4.67 | 3.72 |
| June | 9.55 | 2.16 (up to 14th June.) |
| Total ... | 19.21 | 14.78 |

B.—RELIEF WORKS.

3. These are shown in Statement No. I. Earth-work must of course soon be stopped in the alluvial portion of the district, but turfing and metalling will continue to afford work for some time to come; and in the laterite portion of the district (Raneegunge and part of Bood-bood) road works may continue to be carried on for a considerable time. The survey and acquisition of the land required for the Doorgapore and Kuldih road in Raneegunge are progressing. I saw the works on two of the Bood-bood roads during the fortnight, and they appeared to be progressing satisfactorily, and no complaints were made by the coolies. The number of coolies employed on the Cutwa roads has decreased owing to completion of two roads, and the occupation given by cultivation. Nearly 5,000 persons are employed in Cutwa in collecting ghooting and kunkur with which it is proposed to metal the Burdwan and Cutwa road during the rains.

C.—TRANSPORT OF FOOD

4. During the first week in June, beyond which returns have not been received, 9,131 maunds were exported by rail from the district, and 7,673 maunds imported. The importations to Barrakur appear to have come to an end. The Ranecgunge Sub-divisional Officer says there was great difficulty in getting carts to convey the Government rice to Bankoora, and also in getting boats for the Manbhoom rice. The import of rice into Bood-bood from Bankoora and Midnapore has been checked by the rise of the Damoodar.

D.—STORAGE OF GRAIN.

5. Up to date about 4,000 maunds of Government grain have been received, of this 2,000 maunds have been stored in one of the Railway Bungalows at Khanoo, where the Station Master, Mr. Perkins, has rendered great assistance. About 1,200 maunds have been sent to Cutwa, and the remainder has been sent to Borobelloon, Narigram, Kistonuggur, and elsewhere, for supply of food depôts and advances. The rice appears to be of good quality, but imperfectly husked. The statement of storage and consumption (No. II) required by Government letter No. 3369—S.R., dated 26th ultimo, accompanies.

E—ADVANCES TO PRIVATE PERSONS.

6. Statements III and IV show the advances to private persons under the Land Improvement Act, and to land owners and ryots in grain or for purchase of grain. The utmost unwillingness to give joint bonds for repayment of these advances continues to be shown,

* Your reply thereto has just reached me.
E. W.

and I have in my No. 214,* dated 6th June current, recommended that some concession should be made of the nature indicated in my last Narrative. To cite one

instance, 45 maunds of grain were sent out to Borobelloon in compliance with most urgent applications, but when the rice was there the ryots flatly refused to execute a joint security bond for it, and there it lies. Of the numerous applicants for advances, who present themselves day after day in my cutcherry, a large proportion turn away at once when they hear of this condition as to joint security, and many more who assent to it on the spur of the moment are found to have altered their minds when an officer goes to their village to make the necessary arrangements, as their need is not so pressing as to induce them to agree to this unpalatable arrangement. Under the discretion allowed me in Government letter No. 3369—S.R., dated 26th ultimo, I have authorized the Cutwa and Bood-bood Deputy Collectors to make advances of cash at the rate of Rs 100 to 200 per village for the purchase of seed-grain. At present prices these sums will buy from 200 to 400 maunds of seed paddy, and as it takes only six seers to sow a beegha, these amounts would form very handsome "grants-in-aid" of the seed-grain at present procurable in the villages. But no advances have yet been made under this arrangement, the difficulty as to joint security still standing in the way.

E.—CHARITABLE RELIEF.

7. The particulars of the charitable relief now being given, and the expenditure thereon are shown in Statements V and VI. There is nothing new to report except that one or two new food depôts have been opened in the Sudder sub-division during the fortnight, and that under a recent resolution of the District Relief Committee, clothes have been distributed to the paupers. Persons of a superior class are relieved by doles of uncooked rice from the food depôts, and by advances for spinning, weaving, husking paddy. A large quantity of the coarse cloth woven under these arrangements has been used for distribution to the paupers. Relief in cash has also been given in many cases. Arrangements are in progress for buying Rs. 1,000 worth of seed-grain for gratuitous distribution to chowkidars and others who have no property to pledge as security for advance.

The special Statement VII of relief given to respectable persons required by Government letter No. 3216—S.R., dated the 19th May 1874, is annexed.

Statement shewing progress of works in the Burdwan District for the Fortnight ending 13th June 1874.

E. H. WHINFIELD,
Offg. Collector.

No. 1743, dated Chota Nagpore, the 9th June 1874.

From—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore,
To—C. BERNARD, Esq., Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my half-monthly narrative for the fortnight ending this day, Monday, 8th June.

2. The narrative of the Deputy Commissioner of Hazareebagh for the month of May last, and the half-monthly narrative of the Deputy Commissioner of Manbhoom for the last fortnight of that month, are in the hands of Government, and that of the Lohardugga district and Palamow are submitted herewith; all these reports contain ample details of the operations, which I consider it unnecessary to recapitulate, district by district. I will, on this occasion, give a more general view of the work done in the division and the results.

3. These results are on the whole very satisfactory. The intelligence from every quarter shows that the present condition of the people is quite as good as it ever is at this time of the year in the most favorable seasons, and I have every reason to hope that the arrangements made for maintaining them in that condition will prove sufficient. It is frequently remarked that the people generally, especially the children, look unusually sleek and well fed, and that a confidence has been engendered which imparts to most of them a cheerful look.

4. To attain this we have doubtless paid heavily, and though it is impossible on such emergencies to practise strict economy, yet I think that the roads constructed as relief works will, for the most part, prove permanently useful (though some no doubt may remain incomplete till the next dearth), and the irrigation projects will, it is expected, materially add to the food-supplies in future years.

5. Since my last report we have had copious rain in all the districts. So far as agricultural prospects are concerned, this has been an unalloyed benefit. The crops sown have rapidly sprung up under its fertilizing influence, and the softened ground is readily prepared for further cultivation. People are leaving the relief works by thousands, and it is expected that when the orders of Government for payment in rice are fully carried out, we shall have comparatively few left, and many of the works must be closed.

| | | | |
|---|-----|-----|--------|
| 6. It is high time for this to take place. Wherever the daily wage system was in force, the numbers seeking this means of obtaining subsistence daily increased, till before the close of last month they had reached 62,003, excluding Singhbhoom, and the farmers were beginning to complain that the laborers would not come to them. I have no official returns of what has since taken place, but from demi-official letters I learn that an enormous reduction has been effected, and I have grounds for asserting that not half the above number are now employed. | | | |
| Palamow | ... | ... | 24,000 |
| Hazareebagh | ... | ... | 23,003 |
| Manbhoom | ... | ... | 15,000 |
| Total | ... | ... | 62,003 |

reduction has been effected, and I have grounds for asserting that not half the above number are now employed.

7. The chief defection has been in Palamow, where we probably got less work from the laborers than elsewhere. All were on the daily wage system, and there was a great want of good supervision. I have not yet received any report on the works executed, but I know that the proportion of women and children to adult males was excessive, and that the zemindars were of opinion that the workpeople were paid high for the return in labor which they gave. On six roads in the circle under Lieutenant Grey the reduction of rates and introduction of piece-work caused a defection which brought down the numbers from 5,980 to 980, and a letter of the 6th instant from Mr. Forbes tells me that a similar result has attended the change of system in the eastern half of the sub-division. The people leave the work in good condition, and the farmers are now ready and able to employ and feed them.

8. In paragraph 10 of my narrative for the first half of last month, I noticed the great number of people employed under Mr. Peppé, the manager on the Dhuonwar Embankment. It was manifest that the work would be a most costly undertaking if carried on as Mr. Peppé was working it; he was directed to introduce piece-work gradually, and subsequently to pay in kind; the result is that he has been left with only his light-labor gang. This, I think, will prove only a temporary desertion, and it is to be hoped so, for the work is likely to prove of great value to the estate.

9. In Manbhoom I do not expect so great a reduction at least for some time, as out of the 15,025 laborers returned, 11,589 work under contractors, and they no doubt have always been made to give a full day's work for a full day's pay. The remainder are all on piece-work, except the light-labor gangs.

10. I have not yet said anything of Singhbhoom, as we have no return of the number of laborers employed in the Kolhan. It is there, however, all piece-work by families. The head of the house has a certain task allotted to him for which this year he was paid in advance. He may take his own time about its completion. Under this system very honest work is obtained. There are still large gangs of laborers employed on irrigation works in the Dhuibhoom estate, now under Court of Wards. The latest return gave 4,371. The pay is very low, being 1 anna for an adult male, 9 pies for a woman, 6 pies for a child.

11. If the people all forsake the works when rice is offered to them instead of pice, we shall have some difficulty in getting rid of our stock; but those who are in want, and cannot get work on the farms, are sure to return.

12. Considering the condition and population of the two districts, Manbhoom with a million inhabitants, and Palamow with less than half a million, there has been from the first a disproportionate number of persons employed on roads, &c., in the latter district, but in the number of people who are in receipt of gratuitous relief the proportion is all the other way. The classes in Manbhoom who will not labor for hire have greatly increased since last famine, and I suspect will have nearly disappeared by the next. The relaxations in regard to the issue of food gratuitously will cause this. In Palamow the agricultural class when hard pressed, male and female, go on the roads without scruple. In Manbhoom they will do nothing, and require to be fed at home. I notice in Colonel Rowlatt's report an extract from one by Mr. R. D. Hare, informing us that he had been at pains to establish a "Bhoomij Hotel," that is a feeding place for the indigenes so called, where all the cooking was done by their own people. Now that it is ready they will not avail themselves of it.

13. We knew before that the Santhals had an objection to Brahmin cooks, the Bhoomij are now for the first time objecting to take the prepared food, and won't have it, no matter by whom it is cooked.

14. Except in Manbhoom, the expenditure on relief administered through the sub-committees is very trifling, and it is probable that the Central Committee, notwithstanding the *remarkably* liberal offers in their circular No. 147 of the 26th ultimo, will not be asked for more money except by the committee sitting in Purulia. I doubt if the other district committees will have occasion to spend to the extent of the subscriptions *locally* raised.

15. The total number of persons in receipt of relief through sub-committees I cannot give, as I do not find this information in the Hazareebagh or Palamow reports. In Singhbhoom there is no gratuitous relief, but in Manbhoom there are more thousands than there are hundreds for the rest of the division. Colonel Rowlatt gives 8,579. Judging from incidental notices in the reports, I do not think that Palamow and Hazareebagh make up 800 between them. Of the number given above for Manbhoom, 4,161 were receiving uncooked and 3,677 cooked food, and 741 assisted in other ways. I am very desirous that in all cases where it is possible, some return for what is given should be exacted; the Manbhoom report gives no statistics of such returns. Though I am aware that the principle is not overlooked there, it appears to me that this should meet with more attention than it does. Under recent orders the cooked food test is greatly relaxed, and if the relief given to persons not beggars by profession is made entirely eleemosynary, the effect must in my opinion be most demoralizing.

16. In a previous narrative I noticed the arrangements made by Lieutenant Henry Grey at Hosenabad, in the Palamow sub-division, to afford relief to Mahomedan females of good family, where, by sale of articles manufactured in-doors by the recipients, the cost of relief came to only one pice per head per diem. In the Hazareebagh reports recently received, I find that Mr. Tobin, Assistant Commissioner, deputed to Koderma, has a small institution of the kind. The cost of the food given was, during the period under report, Rs. 31-2. The net amount realized by sale of rope, &c., manufactured by the recipients, came to Rs. 30. I would urge all officers employed on relief operations to give their best attention to the importance of working out this principle of relief, and direct them in their next narratives to be particular in details of results obtained.

17. It is satisfactory to find that the prices of food-grain remain so steady at former quotations. They have changed very little since the commencement of the storage of Government grain. There is no doubt that the ordinary grain dealers have been holding back for the high prices which were expected, but the relief given by loans to substantial ryots, and the knowledge that the Government grain might be otherwise thrown into the market, has convinced them that prices are not now likely to touch the famine rates of 1867, and the result is that, although now almost in the rains, the price of rice has during the last week fallen in all the districts.

18. In my last narrative I reported that some difficulty has arisen regarding the moving of grain to the appointed depôts in Manbhoom in consequence of a bad outbreak of cholera.

19. The panic died away before much harm was done. The whole of the Manbhoom allotment has, I believe, reached Burrakur, and on the 6th, 18,000 maunds remained there, 57,000 maunds were stored on the banks of the Damoodur, and Captain Samuells was vigorously co-operating with Captain Grant and Lieutenant Elliot in getting it carted on thence to Raghoonathpore. 59,820 maunds had been dispatched to Govindpore, Pandra, and Nirsha, and 69,633 to Juganpore and Raghoonathpore. Captain Grant hopes to have it all in its place within a week.

20. Colonel Rowlatt's report shows that 71,794 maunds of Government rice had been given out in loans up to close of last month to 25,766 families of substantial ryots, and as the family includes farm laborers as well as relations, this relief will probably assist five times that number of persons. Similar loans are now being made in Hazareebagh. The extra Assistant Commissioner at Pachumba reports that he has hundreds of applications to deal with.

21. Advices dated 6th instant from Manbhoom show that the rain which fell last week has been most beneficial, enabling the cultivators to plough the land and sow for the early crops; cholera has abated, and the prospects of the country are generally much improved.

22. I have not yet received the Singlbhoom Deputy Commissioner's report for May. He has been absent from his sudder station and visiting the southern parts of the Kolhan and Sarunda. He reports favorably of the condition of the people, and that there are no grounds for apprehending any severe distress in any part of the Kolhan; but he adds, "all the assistance rendered, and the further assistance I propose to give, was and is absolutely all fully required." He inspected the large embankment at Dwipa, which was giving employment to the people of Sarunda, and found that Rs. 1,000 had been expended on it, and that a further sum of Rs. 500 was required, which I have sanctioned. He is about, he says, to apply for sanction for some other works costing about Rs. 1,000. The inhabitants of the Kolhan got through the relief works more rapidly than was expected. Of 22 reservoirs sanctioned in the Pirs through which Captain Garbett has been marching, 15 have been completed, and on 4 only is there much more to do. I expect soon to obtain from him a report on all these works.

No. 1480, dated Chota Nagpore, the 6th January 1874.

From—H. L. OLIPHANT, Esq., Deputy Commissioner of Lohardugga,

To—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore.

IN accordance with Government circular No. 154—S.R. of the 16th January last, I have the honor to submit herewith my report on this district for the month of April.

2. The reports in regard to the Palamow sub-division are, as you are aware, submitted fortnightly through your office to Government, in pursuance of a Government order of the 1st April last, and this report relates to the remainder of the district known as Chota Nagpore proper.

A.—THE GENERAL RESULT OF THE HARVEST, THE PROSPECTS OF THE SPRING CROPS, THE EXTENT OF THE PREPARATION FOR THE EARLY RICE CROPS AND THEIR PROSPECTS.

3. It seems unnecessary now to make any further remarks in regard to the first two clauses under this heading, I will therefore proceed at once to the latter one.

4. The prospects of the ensuing season are at present all that could be desired, the season here may certainly be said to have opened most favorably. From the commencement of the year up to the end of May, I find that we have had a rainfall of 9.12 inches, against 3.28 inches during the corresponding period of the preceding year. Of this about 5 inches fell at the end of January and beginning of February, and 2 in March, and besides proving of immense benefit to the rubber crops, which were then on the ground, it enabled all the cultivators to plough their lands, and make timely preparations for the ensuing season, and thus when the rain came a few days ago general sowing immediately commenced. There was a good fall of rain (about 1½ inches) on the last day of May, and upwards of half an inch on the two following days, and from all I can ascertain it appears to have been general. During the last week or so, sowing has been going on very briskly, the greater part, if not all, of the gora dhan and goondly must now have been sown, and if all goes well the latter ought to be reaped by the beginning of August. Much of the low land dhan has also been sown, and the sowing of the "ropun" will take place as soon as there is another heavy fall of rain.

B.—THE SUPPLY OF GRAIN AND THE EXTENT OF IMPORT AND EXPORT.

5. The markets and bazars in this district are wholly supplied from time to time by the Koles, the cultivating class, and the grain is there brought up by the traders and beparcees, and carried away on pack-bullocks. This district always exports rice largely, and as the rice crop last year was on the whole a very fair one, especially as compared with neighbouring districts, the export no doubt has been larger than usual, but it is impossible to speak with any accuracy as to the quantity exported.

6. The town of Lohardugga is the great centre of trade in this portion of the district, and from information furnished to me from there, it would appear that exportation has been going on much as usual. Upwards of 6,100 pack-bullocks carrying some 13,900 pucca maunds of rice and other food-grains, are said to have left Lohardugga during the month, for the north *via* the Lohardugga and Chattrra road. This grain finds its way to Palamow, Hazareebagh, Sherglhoty, and other places in Behar. Exportation is also going on from Ranchee, Govindpore, and other places in that part of the district, towards the east.

7. On the whole private trade may be said to be still very active, and from all I have been able to ascertain there are no grounds whatever for anticipating that it will fail. The stock of rice still in the district is said to be very large and quite equal to any demand which is likely to be made on it. Prices have never risen above 15 seers at Lohardugga, they are now 16, and are not likely to rise again if prospects continue as at present.

8. Importation to Palamow from Chota Nagpore, is also going on satisfactorily. From information received from Chandowa and Balomat, I find that out of the quantity of grain referred to in my 6th paragraph nearly 5,000 maunds found its way into Palamow, and grain is also being taken there by other routes. I am also informed from Palamow, that importation is still going on from Burway Gangpore Juspore, and Soorgoonjah, in the direction of Dultongunge, Ghurwa, and other places in that direction, and that there is no likelihood of any failure of stocks.

9. With regard to importation in this part of the district there is little or none now going on except in respect to the grain which is being brought in for the purpose of exportation, and that which is passing through from the south in a northerly direction.

C.—THE RANGE OF PRICES AND GENERAL CONDITION OF PEOPLE.

10. The price of rice varies greatly in different parts of the district; during the month it was dearest in Ranchee and Sille, where it sold at 14 pucca seers per rupee, and cheapest in the Biru pergunnah where it sold at 23 seers. Prices on the whole have been very steady. The rate at Ranchee during the month has varied between 14 and 14½ seers; at Lohardugga 40 miles west it has remained at 16 seers; at Buru 80 miles west at 17 seers; at Busia and Palkote, 50 and 60 miles to the south, at 18 seers; at Tamar and Sarjundih to the east at 16 and 17 seers, respectively; and at Biru to the extreme south at 23 seers. Maroona is also procurable at many of the bazars at from 20 to 23 seers per rupee, and oreed at from 15 to 20.

11. The general condition of the people continues satisfactory: the season has opened well for them, and they are all now busy with their cultivation. Prices are rather high, but not so high as might have been expected, and the people generally have on the whole fared very well.

12. In the Torco pergunnah, that is the tract bordering on Palamow and Hazareebagh, and in the Tamar pergunnah, lying to the south-east of the district, the condition of the people is not so good as in the rest of the district but additional roads have been opened for all those requiring work, and the splendid crop of mohuwa flower which has fallen this year has afforded immense relief to the poor, and removed all fear of any real distress. Jungle produce generally has been very abundant this year, and the fruit of the mohuwa tree as well as that of the sal tree, both of which are used as articles of food, promise exceedingly well.

D.—IMMIGRATION.

13. There has been no immigration from any of the distressed districts as far as I have been able to ascertain.

E.—EXTENT TO WHICH LOCAL WORKS HAVE BEEN UTILIZED.

14. I have nothing to add to the information afforded under this head in my report, submitted on the 4th April last. The works therein referred to are all going on, and have been found sufficient. The usual annual works are also being carried out in other parts of the district.

F.—SPECIAL MATTERS RELATING TO THE SCARCITY.

15. There is nothing to remark under this head except in regard to the advances made under the Land Improvement Act. Under Government order No. 1916S.R., Mr. T. F. Peppe, the Sub-Deputy Opium Agent, was vested with powers to make advances in those portions of the district referred to in my 12th paragraph, and in the exercise of these powers he has made advances to the extent of Rs. 2,360, and works are being proceeded with rapidly under his supervision.

No. 420, dated Daltongunge, the 4th June 1874.

From—L. R. FORBES, Esq., Officiating Assistant Commissioner, Palamow,

To—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore.

I HAVE the honor to submit herewith my eighth narrative of scarcity and relief in the Palamow sub-district for the fortnight ending Saturday, the 30th May 1874.

Eighth Narrative of Scarcity and Relief in the Palamow sub-district for the Fortnight ending Saturday, the 30th May 1874, submitted in accordance with orders contained in Government Circular No. 80 of the 17th November 1873.

A.—ABUNDANCE OR SCARCITY OF SUPPLY IN THE BAZARS.

I have nothing to add to what I stated in my last narrative under this head. There is abundance of food in the country and the bazars are all well supplied.

Kind and prices of grain selling at one or more specified principal marts.—The table given below shows the kind and price of grain selling in five principal marts. It will be observed that while the price of wheat and rice has risen slightly, the price of mowha has fallen considerably. Mahajuns tell me that they do not expect rice to rise more than a seer higher than it is now:—

QUANTITIES PER RUPEE BY THE SEER OF 80 TOLAHS.

| NAMES OF MARTS. | Wheat. | Barley. | Rice. | | Mowha. | Indian-corn. | Gram. |
|-----------------|--------|---------|------------|---------|--------|--------------|-------|
| | | | Wholesale. | Retail. | | | |
| Daltongunge | 12'38 | 18' | 12' | 11'80 | 47'25 | | 15'18 |
| Garwah | 12'04 | 16'87 | 12'30 | 11'36 | 47' | 16'75 | 15'18 |
| Hussanabad | 13'50 | | 10'75 | 9'63 | 40' | | 15'18 |
| Satherwah | 13'50 | 15'18 | 12'30 | 11'24 | 60'75 | 14'6 | 15'12 |
| Manka ... | 13' | 16'87 | 12'25 | 11'13 | 61' | | 15'25 |

Information regarding the amount and kind of grain believed to be in stock.—I must repeat that the stock of food, particularly of rice, in the country at present is more than sufficient to meet the wants of the people for months to come; of seed grain, too, there will be plenty forthcoming, though perhaps those who do not possess it will have to purchase on harder terms than usual.

Rainfall.—For the last ten days the clouds have been driving up every afternoon, and falls of rain have taken place in various parts of the country, and though the gauge at headquarters has shown only '37 of an inch, from reports received there have been some much heavier falls elsewhere, particularly to the south, as is evidenced by the rise of the Kool river.

State of the crops.—Ploughing has commenced where rain has sufficiently moistened the soil, and a small area of millet seeds (Sawan and Gondeli) have been sown, and khatin and similar dhans have been sown in the basins of some of the reservoirs. The sugarcane crop promises splendidly.

Condition of the people.—The condition of the people is so good that previous to orders to that effect from the Commissioner I had already ordered a reduction of one pice all round, and further the discharge from the works of all children not orphans below the age of 10 years. As to the health of the people, I can confidently assert that during the 10 years I have had charge of the sub-district, I have never known so healthy a year. There has been a good deal of small-pox reported; but this disease is always more or less prevalent, and I believe that a large proportion of what is reported as small-pox is really measles and chicken-pox.

Actual facts as to any known cases of misery and starvation.—No such cases have been reported.

Grain-thefts and robberies.—I have nothing to report under this head.

Condition of any special tract.—There is no tract the condition of which calls for special mention.

B.—RELIEF WORKS.

The relief works in progress are—

| | | | |
|--------|----------------------------|--------|--|
| No. 1. | Daltongunge station roads. | No. 8. | Japla road. |
| " 2. | Chandwa. | 9. | Petty irrigation works in Government villages. |
| " 3. | Behar. | " 10. | Baloomath road. |
| " 4. | Maharajgunge. | " 11. | Untari and Benares road. |
| " 5. | Garwah. | " 12. | " and Shahabad road. |
| " 6. | Untari. | | |
| " 7. | Manjhiawan road. | | |

and the number of laborers on each of the above according to latest information is as follows :—

| | | | | | |
|-------------|-----|-------|-------|-----|--------|
| No. 1 | ... | 143 | No. 7 | ... | 1,799 |
| " 2 | ... | 2,772 | " 8 | ... | 2,314 |
| " 3 | ... | 2,060 | " 9 | ... | 656 |
| " 4 | ... | 3,848 | " 10 | ... | 3,691 |
| " 5 | ... | 1,559 | " 11 | ... | 2,214 |
| " 6 | ... | 3,984 | " 12 | ... | ... |
| Grand total | | | | | 25,040 |

The above shows an increase of about 1,000 over the numbers exhibited last fortnight. For my part I am not at all surprised that numbers have risen so high, it is nothing more than what I expected. With no intermediate harvest it is hardly to be supposed that the class of people on the works could possibly be in a materially better condition now than they were earlier in the year. Had it not been for the liberal way in which the landed proprietors of the sub-district have spent their money on works of different kinds, we should have had the present large numbers long ago. The next narrative will probably show a diminution in numbers to an extent probably of considerably over one-half.

Supply of food thereat.—There are no complaints of want of food from any of the works.

Condition of the laborers—The condition of the laborers is reported to be good.

Mode of payment—Every attempt has been made during the fortnight to push on the system of piece-work, but the matter is a very difficult one; the people here have no idea of working together and they fear being at the mercy of the moonshees. They are probably to a great extent right; a system of this kind requires immediate European superintendence. The greater mass of the people being quite unaccustomed to kodali work, are unable to dig earth in the clean even way a Kole or Dhangur or a professional Nuniah will do, and the staff of native moonshees I have are quite incapable of measuring up earth-work in any shape, and are consequently liable, even if honest, either to pay too much or too little. The people know this and are very reluctant to work in this manner. I was out on the Baloomath road myself a few days ago, where I found about 6,000 coolies working in three stations some 6 or 7 miles apart, and I introduced a system of measuring out a fixed length of road to a certain number of persons to complete during the day, if they chose to work hard and complete it even by noon they would get a full day's wages, but on the other hand no wages to be paid till it has been completed. This introduction of a task system, together

* On the 23rd there were upwards of 26,500 laborers on the works.

with the reduction of wages, has been followed up by a considerable reduction in the number of laborers.* Lieutenant Grey assisted by Mr. Ryves is busy introducing the piece-work system within his circle, but I have not as yet heard with what result.

Rates of wages.—During the fortnight under report the wages of laborers were reduced one pie all round; but from the latest reports that have come in, the result has not been quite so great as was hoped. I shall have a different tale to tell, I trust, in my next as since the close of the fortnight all cash payments have been stopped, and wages are now being paid in rice. The rate at which rice is to be distributed is as follows: 1 seer kucha or 9 chittaaks pucca weight per male adult, $\frac{2}{3}$ seers kucha to a woman, and $\frac{1}{2}$ a seer to a child; these are undoubtedly low rates, but I have adopted it for the present as a crucial test. Zemindars and others give $1\frac{1}{2}$ seer of rice to a male adult or 3 seers of coarse grain, which represents pretty nearly the wages we have lately been giving in pice, viz., six Goruckpuri pice. If agricultural labor is procurable, all the people we have on the works who can get it, will prefer to return home where they can get their $1\frac{1}{2}$ seers, to staying with us and getting only a seer; only the very poorest people, those absolutely without support, will probably remain a few days, but not after the agricultural season has fairly opened. I believe the employers of labor are anxiously looking for the return of the people to their villages, and as soon as we have a general fall of rain, I propose to dismiss the people to their homes, retaining only those few whom hunger and necessity may compel their remaining on the bare subsistence offered them, in order to enable me to complete any bridge-work that it would be unsafe to leave unfinished, not that when the rains have fairly opened a kucha seer of rice can be called a bare subsistence for them, there will be plenty of sags and wild herbs available which would enable a man to make up with his rice two very fair meals a day.

Arrangement for tools.—There are now no want of tools, the whole of the number indented for have been received.

C.—TRANSPORT OF FOOD.

Approximate amount of private food-supplies.—I must repeat what I stated in my last. The supply of food in the country is ample.

Sufficiency or otherwise of the means of Transport.—The means of transport are sufficient.

D.—STORAGE OF GRAIN AT RELIEF WORKS.

The accompanying statement I. exhibits all requisite information under this head. The importation of grain from Dehri is being pushed forward with all possible despatch.

Condition of storage houses.—These are all in good order.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

The results of advances to native gentlemen for the purchase of rice on the part of Government will be found embodied in statement I.

Advances to municipalities.—There are no municipalities.

Advances to private parties for land improvements.—Statement II. exhibits all requisite information under this head. This work is now all but completed, and the officers specially deputed for it will leave for Ranchee in a few days.

F.—CHARITABLE RELIEF.

The following exhibits the amounts subscribed and realized during the fortnight :—

| | Subscribed. | | | | Realized. | | |
|---|-------------|-------|------|---------------------------|-----------|-------|------|
| | Rs. | A. | P. | | Rs. | A. | P. |
| Amount realized up to preceding fortnight | ... | 7,031 | 8 0 | Up to preceding fortnight | ... | 5,623 | 12 0 |
| During fortnight | ... | 272 | 4 0 | During fortnight | ... | 82 | 0 0 |
| Total | ... | 7,303 | 12 0 | Total | ... | 5,705 | 12 0 |

I am sorry to say that I can give little or no information under this head. The principal working committees lie within Lieutenant Grey's western circle, and up to date (the 4th June) I have not received his statements. The delay is probably owing to his being busily engaged in substituting grain for money wages, and introducing the piece-work system. I believe, however, that I may confidently state that under the head of charitable relief, matters are pretty nearly *in statu quo*. I trust to be able to give the information called for in paragraph 5 of Government circular No. 3216SR of the 19th May, in my next narrative.

ASSISTANT COMMISSIONER'S OFFICE ;

PALAMOW,

The 4th June 1874.

L. R. FORBES,

Offg. Assistant Commissioner.

No. 1320, dated Purulia, the 17th June 1874.

From—COLONEL E. A. ROWLATT, Deputy Commissioner of Manbhoom,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

WITH reference to paragraph 3 of Government circular No. 154—S.R., dated the 16th January last, I have the honor to submit my fortnightly narrative up to the 13th instant.

A.—STATE OF THE COUNTRY.

Since the date of my last narrative I am glad to be able to report that there has been a continued improvement in the state of the country unattended by any adverse circumstances, such as that I had to bring to notice in my last report. The outbreak of cholera, which at one time threatened to be severe, has not extended over the whole district, and is gradually dying out. This has, no doubt, been caused by the timely and copious showers of rain which have now fallen all over the district, and given the people good water to drink, instead of the filthy puddle they had previously been using. These showers have also enabled the people to continue their ploughing and sowings, which are now going on actively all over the country. A large portion of the gora paddy, gundlee kodo, and Indian-corn, has been sown, and has germinated freely. A larger quantity of Indian-corn has been put down than usual, which, if the season is favorable, will produce an abundant supply of food in August. The seedling paddy has also been sown, and is now above ground, and will be ready for transplanting by the 1st of July, when agricultural operations will be in full swing. The difficulty about seed appears to have been got over in most places, and very little land will lie fallow at all events on that account; so that the crops of this year, if all goes well, will not be below the average.

In the Purulia circle, where, at the date of the last report, the people were not in such a satisfactory condition as in the Govindpore and Raghunathpore circles, it is now reported that owing to the distribution of the Government rice on loan to the cultivators, the completion of the group system, and the employment afforded on the tanks, a great improvement has taken place; and with regard to the Manbazar circle, it is stated the distress is less in several of the pergunnahs, and that the people are busily employed in sowing their early crops. The arrangements for relief in that circle are, however, still imperfect, which I shall refer to further on.

The rainfall during the fortnight has amounted to 4.30 inches.

From some parts of the district it is reported that the mahajans are beginning to open out their stores, and this I have no doubt they will do more freely when the regular rains set in and the guarantee of good crops seems assured. The stocks of paddy in their hands are universally reported to be low, so that they could not have advanced as largely as usual. The loaning out of the Government rice to the cultivators, which has proved so successful in this district, has however supplied the deficiency, and for the present all are contented and happy.

Mr. B. L. Gupta, reporting of the eastern portion of the Raghunathpore circle, where the failure of the crops was perhaps the greatest, states: "The condition of the people is gradually improving, and certain it is that their gratitude to, and confidence in Government know no bounds;" but he adds "that distress, severe and universal, would overtake the country if the great relief measures now being administered were to be discontinued." In the western portion of the Raghunathpore circle, Captain Samuells states that the condition of the people is very satisfactory. The Sonthals and Baoris are said to be the most distressed, but no deaths from starvation have been reported by any of the relief officers; and now that the relief sub-circles have been organized, it is hardly possible that deaths from this cause can take place.

The supply of grain in the bazars is sufficient to meet the wants of those who have the means of purchasing; but trade is inactive, owing probably to the number of purchasers being small.

No grain robberies have been reported, which is very satisfactory, as it shows that no persons have been driven to commit such crimes for want of food, which undoubtedly would have been the case had not the fullest and most complete measures of relief been adopted.

The price of rice and pulses up to the 13th instant, with those of the previous fortnight, are given below:—

| NAME OF BAZAR. | COARSE RICE. | | FINE RICE. | | PULSES. | |
|----------------------|--------------|-----------------|--------------|-----------------|--------------|-----------------|
| | Last report. | Present report. | Last report. | Present report. | Last report. | Present report. |
| Raipore | Srs. 16 | Srs. 17 | Srs. 15 | Srs. 16 | Srs. 14 | Srs. 13 |
| Manbazar | 14 | 14 | 12 | 11 | 12 | 12 |
| Burrabazar | 15 | 14 | 12 | 11 | 12 | 11 |
| Echagurh | 17 | 18 | 16 | 16 | 13 | 12 |
| Jhalda | 13 | 13 | 12 | 12 | 12 | 11 |
| Purulia | 14 | 14 | 12 | 12 | 13 | 12 |
| Govindpore | 12½ | 12 | 12 | 11 | 11 | 10 |
| Raghunathpore | 13 | 13 | 12 | 12 | 12 | 10 |
| Nirsha | 12½ | 12½ | 12 | 12 | 11 | 11 |
| Gaurandih | 12 | 12 | 11 | 11 | 11 | 10 |

It appears from the above that the prices of rice have fallen at 2 and risen at 2 of these bazars, and that pulses have become a scer dearer at 8 out of the 10 places entered in the list.

B.—RELIEF WORKS.

Work is still going on on all the 19 roads, being carried on as relief works; 5 are situated in the sub-division of Govindpore, and the rest in the Sudder Sub-division. On all of these roads light labor gangs are being employed; but as these are sharply looked after, nearly as much work is being done by them as under the piece-work plan. The great majority of the laborers, however, work on the task or piece-work system, and the works are certainly being done as cheaply and well as in ordinary times. When finished, these roads will be of incalculable benefit to the district, and be the means of averting the effects of future famines by the facilities they will afford of transporting grain to where it is required, which now, from the want of finished roads, is a matter of the utmost difficulty.

The average number of persons employed on all these roads, by the returns made up to the 6th instant, amounted to 15,063 against 14,202, showing that up to the latter date the numbers were still increasing.

| | No. of tanks. | No. of laborers. |
|-------------------------------|---------------|------------------|
| Govindpore, Mr. Mackenzie ... | 13 | 1,224 |
| Raghunathpore, W. C., | | |
| Captain Samuells... | 8 | 250 |
| Raghunathpore, E. C., Mr. | | |
| Gupta | 13 | 1,033 |
| Purulia, Mr. Hore | 19 | 765 |
| Manbazar, Mr. Dombal | 5 | not given. |

The number of village tanks being cleaned out and improved by the relief officers, has increased from 18 to 56, as per margin. The number of people employed, as stated in the margin, amounts to 3,272.

These minor relief works are admirably adapted to afford employment to those in want of it.

As a rule only those resort to these tanks who are unable to obtain work in the fields as agricultural laborers; so that those requiring the services of the ordinary laboring classes are not in any way injured by these works being carried on.

From the above it will be seen that the total number of persons employed on the Government relief works amounted altogether to 19,393 persons.

The detail will be found in the statement annexed.

The laborers employed on these village tanks are now all paid in grain for six days and one day in pice, instead of all in cash, except in the Manbazar circle, where the supply of rice has not as yet been sufficient to admit of the payments being made in that manner. Under orders of the Commissioner, wages will be converted into grain at the rate of 12 seers per rupee. Tools are being provided by employing the village blacksmiths to make them up, which affords employment to a great number of persons who otherwise would be in distress, and some are also purchased in the bazar.

C.—TRANSPORT OF GOVERNMENT GRAIN.

The quantity of grain received at Burrakar up to the 12th instant, inclusive, amounted to 2,15,275 maunds, being 5,275 maunds more than was allotted to this district by the Government, of which 8,699 maunds was in store at Burrakar on the 13th instant, the remainder having been despatched to the various places mentioned below :—

| | Maunds. |
|------------------|----------|
| Raghunathpore... | 78,047 |
| Inganpore ... | 11,500 |
| Govindpore ... | 53,812 |
| Nirsha ... | 14,475 |
| Pandra ... | 1,000 |
| Total ... | 1,58,834 |

From Hijli 34,582 maunds have been conveyed from there to Raghunathpore, leaving only 353 maunds there; and 47,992 are at Disarghat, on the north bank of the Damoodur river.

Between the two, Nirsha and Govindpore, both of which are in the Govindpore circle, 68,287 maunds have been received, leaving only 1,713 maunds to be conveyed, which would complete the allotment to that circle of 70,000 maunds.

All the rest of the grain has to be conveyed to Raghunathpore, which still has to receive about 50,000 maunds to complete the allotment of those two circles, and the Purulia and Manbazar circles, which are to receive 25,000 maunds and 20,000 maunds respectively.

Up to the 13th instant 17,892 maunds had been received in the Purulia circle, but only 3,843 maunds in the Manbazar circle, to which latter the difficulties of the routes and the want of carriage, now that the rains have set in, made it impossible to transport more than the above quantity. Every effort is being made by the relief officers to procure carriage, but the people now generally refuse to allow their cattle to be used in transporting the Government rice, as they say all are required for cultivation.

Government grain is being carted out and stored in the minor golahs, but for want of roads and a sufficiency of carriage this is proceeding rather slowly; and to some of them it is found impracticable to send it out by direct tracks, so that circuitous routes will have to be used. As the rains increase in severity, the difficulties also will increase, and carts will then no longer be able to reach those places that are cut off from the main golahs by streams and nullahs with which the country abounds. Captain Samuells writes: "The carriage for sending grain to the minor golahs has been obtained with considerable difficulty during the fortnight, as the cultivators, on whom we are entirely dependent for our carriage, have been working their cattle in the fields. The want of good roads, and the difficulties of crossing some of the larger streams, have made numbers unwilling to come forward with their carts."

The only finished roads in the district are the Grand Trunk Road and the Provincial Road from Burrakur to Purulia; these have been of the utmost possible use in transporting the rice from Burrakur to Govindpore, Raghunathpore, and Purulia; and had it not been for these roads much greater difficulty would have been experienced, and not nearly so much grain could have been moved as has been done. The advantages, therefore, of good roads in a district where there is no water-carriage have been very forcibly shown, and also the necessity of completing those now under construction strongly exemplified; as in the one case, where roads exist, the transport of the grain has been comparatively easy; and in the other, where they are still uncompleted, great delay has taken place, and almost insurmountable difficulties have to be overcome in moving even small quantities of grain.

D.—STORAGE OF GOVERNMENT GRAIN.

The only places where any large quantity of grain has been stored is at Nirsha and Govindpore, whence as there is perfect communication with Burrakur by the Grand Trunk Road, no interruption has taken place in forwarding the rice on to those places. At Raghunathpore a little more than 10,000 maunds was in store on the 13th instant; but as the run on that store is great, this quantity will very soon be cleared off. At Purulia the receipts only just keep pace with the demands, and at Manbazar, I regret to say, they fall far short of them.

In the Raghunathpore circles it is proposed to store 800 maunds at all the minor golahs, and this is being done; but in the Purulia circle, where the stocks could not have admitted of this being done, grain is sent out, as required, in small quantities of 10 and 20 maunds at a time.

In the Govindpore circle rice is being sent out to Jheria, Tundih, Topechanchi, Katras, and Nanagarh, from which places group officers and those in charge of relief works will be able to draw their supplies.

E.—ADVANCES TO PRIVATE PERSONS AND THEIR RESULTS.

Up to the 13th instant advances have been made to the following extent:—

| | Rs. |
|--|--------|
| 1st.—Advances to zemindars and others for the purchase of grain, without interest | 10,000 |
| 2nd.—To traders and others of a safe and respectable character, with interest | 11,567 |
| 3rd.—To zemindars and talookdars to assist their ryots | 9,950 |
| 4th.—To landholders for land improvements | 69,090 |
| 5th.—To Purulia Municipality | 4,000 |

Only Rs. 500 have been advanced during the fortnight for land improvements at Purulia; those made in the sub-division at Govindpore will be included in the next report. Most of the reservoirs and tanks for which the tuccavee advances were made have now been completed.

Loaning out of Government rice to cultivators and others on security has continued during the fortnight under report, and now amounts to cultivators to 96,251 maunds, as follows:—

| | Mds. | Srs. |
|---|--------|------|
| In the Govindpore circle | 35,370 | 0 |
| „ Raghunathpore, western circle | 18,014 | 0 |
| „ „ eastern „ | 23,469 | 0 |
| „ Purulia | 15,505 | 0 |
| „ Manbazar | 3,843 | 0 |
| To non-cultivators— | | |
| Govindpore | 1,805 | 0 |
| Raghunathpore, west circle | 414 | 0 |
| „ „ east „ | 224 | 0 |
| Purulia | 76 | 0 |
| Manbazar | | |
| To Chowkeedars— | | |
| Gobindpore | 80 | 0 |
| Raghunathpore, west | 204 | 20 |
| „ „ east | 250 | 0 |
| Purulia | 108 | 0 |
| Manbazar | | |
| 24 Tabedars at 2 seers per diem whilst employed in guarding Government grain in transit, &c. | 127 | 24 |
| Total | 99,490 | 4 |

The scheme of loaning out of the Government grain is still spoken of by the relief officers as the best form of relief that could have been adopted. Mr. Gupta states: "This is the form of relief which seems to have been the most popular and successful here, and proved more than anything else a real blessing to the people. I have issued strict orders to the golah-keepers to impress on the minds of the applicants for rice as much as possible that Government means to exact in due time full repayment of the loans." There can be no doubt but that this form of relief has been very successful, and as it is probable that very little loss will eventually fall upon the Government, it is also the most economical that could have been adopted.

F. a.—CHARITABLE RELIEF BY GOVERNMENT.

Since the date of my last report the sub-division of pergunnahs into groups or sub-circles has been completed in the Govindpore, the two Raghunathpore, and the Purulia circles; in the latter it has been found necessary to include the small pergunnah of Jaitorra, which has been divided into two groups. In the Manbazar circle the grouping has been completed in pergunnahs Bagda and Ambikanagar and part of Supur, and the rest will shortly be finished. The order for the formation of groups was only received here in the middle of May, so that I may, I think, say that this order has been carried out vigorously and successfully. In almost all of the groups residents of some one of the villages contained in the sub-circle have been appointed to take charge of them, and in most of them the group officers are stated to be doing their duty well and diligently. I quote from the report of Captain Samuells to show that such is the case. "The utility of the village organization has begun to be fully realized. I have visited the majority of the groups in my circle during the last ten days, and I don't think it would have been possible to make a better selection of group officers than those now discharging such duties. They have one and all taken a real and lively interest in the work allotted to them, and have given much assistance in procuring carts and pushing on the construction of the minor golahs; they have also shown great discretion and judgment in the selection of recipients for charitable relief." Lists of the persons who are to receive a gratuitous supply of Government rice are made by the group officers, which are scrutinized by the relief officers when they visit the groups, and then approved of or altered, according to circumstances. The group officers are expected to visit every village in their circle at least once a week, and ascertain whether all who are really in distress are obtaining relief. In the Purulia circle all relief by the distribution of uncooked rice is being administered by the group officers, and in the Raghunathpore circles the sub-committees will shortly be relieved of this duty, as the stores of rice at the minor golahs will soon be completed.

The quantity of Government grain expended during the fortnight for relief purposes amounts to 368 maunds 24 seers.

F. b.—CHARITABLE RELIEF BY RELIEF COMMITTEES.

A full account of the working of the several relief committees was given in my last narrative, so it need not be repeated. The relief dispensed by them has been very wide and varied, and has consisted of supplying cooked food to all who were willing to partake of it, of distributing uncooked rice to those who, from caste or feelings of pride, objected to eat in public, and of furnishing the means to persons of respectability who were willing to maintain themselves by spinning cotton into thread. A large number of the silk-weaver class in the Raghunathpore and Purulia circles were aided with advances to enable them to carry on their trade, and the cotton thread spun by the women has again been made over to cotton-weavers to be woven into cloths. These cloths are now being given to those frequenting the poor-houses who are in want of clothing, and in this manner not only have a large number of the poor, but respectable classes, been enabled to support themselves during a very trying time, but full advantage has also been taken of what has been done by utilizing to the best possible purpose the result of these operations at the least possible cost to the committees.

Classified as directed in the notification of the central relief committee, dated the 14th March last, the sums expended during the last fortnight, according to the returns received up to the 13th instant, are as follows:—

| | b. | | | c. | | | d. | | |
|-----------------------------|-------|----|----|-----|----|----|-----|----|----|
| | Rs. | A. | P. | Rs. | A. | P. | Rs. | A. | P. |
| In the Govindpore circle .. | 4,450 | 3 | 5 | 32 | 0 | 0 | | | |
| „ Raghunathpore, W. „ .. | 1,136 | 15 | 1 | 802 | 7 | 1 | | | |
| „ Ditto E. „ .. | 1,243 | 4 | 0 | 58 | 10 | 3 | | | |
| „ Purulia „ .. | 162 | 2 | 10 | 74 | 0 | 2 | 85 | 0 | 0 |
| Total | 6,992 | 9 | 4 | 967 | 1 | 6 | 85 | 0 | 0 |

* This is the whole expenditure up to date.

The numbers receiving relief in the above forms during the fortnight under report amounted to—

| | b. | c. | d. |
|------------------------------|-------|-------|----|
| In the Govindpore circle ... | 1,313 | 0 | 0 |
| „ Raghunathpore, W. „ ... | 1,474 | 550 | 0 |
| „ Ditto E. „ ... | 2,437 | 93 | 0 |
| „ Purulia „ ... | 1,913 | 686 | 10 |
| „ Manbazar „ ... | 1,839 | 81 | 0 |
| Total ... | 9,076 | 1,410 | 10 |

Of the number of persons entered under heading *b*, 6,382 were taking cooked food, and 2,694 were being supplied with uncooked rice, and the 1,410 entered under heading *c* were being employed in various ways suitable to their condition. The numbers taking cooked food have largely increased, and those supplied by the relief committees with uncooked rice decreased, which has been caused by this description of relief having been partly taken over by the group officers. This latter form of relief will eventually almost entirely cease to be dispensed by the relief committees. Since the date of the last narrative, four more sub-committees have been established in the Manbazar circle at the places noted in the margin. No more will now, I believe, be required, so that the number finally found to be requisite amounts to 38.

From the above figures it will be seen that relief by the several relief committees has been extended to upwards of 10,000 persons in this district, who, but for this relief, would in all probability have either died or just been able to drag on a painful and precarious existence till the times mended and food again became cheap and plentiful. This it will hardly do until the month of December or January next; so that although the numbers to be provided for will, I trust, gradually decrease, it will not, I believe, be possible to close all relief operations till about that time.

G.—FINANCIAL RESULT.

Total expenditure from the district and sub-divisional treasuries as shown in the last narrative, Rs. 1,66,709-9-8.

Expenditure during the Fortnight up to the 6th June 1874.

PURULIA,
The 17th June 1874.

E. A. ROWLATT, Colonel,
Deputy Commissioner.

No. 31M.A., dated Calcutta, the 18th June 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of my No. 26M.A., dated 4th June 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending May 31st 1874, I have now the honor to submit the Collector's report* for the fortnight ending June 15th 1874.

* No. 690—S.R., dated June 15th 1874.

2. I have nothing special to add to the Collector's narrative. Things are going on just as I expected, and measures are ready to meet distress as it increases.

3. With reference to paragraph 12 of the narrative, I have communicated with Mr. Toynbee on the subject of the Burmah rice.

No. 690—S.R., dated Kishnaghur, the 15th June 1874.

From—C. C. STEVENS, Esq., Collector of Nuddea,
To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of distress for the fortnight ending this day.

STATE OF THE COUNTRY.

As a general rule, grain enough to meet local wants can be had in the marts of this district. Rice of tolerable quality is procurable almost everywhere. The thanas of Kaligunge and Nukusipara in the Sudder sub-division, and portions of thanas Tehatta and Karimpore in Meherpore, and thana Jaguli in Ranaghat, are to be excepted. Private trade is very inactive in these places, and as the stocks in the hands of the mahajuns are falling short, I apprehend that severe distress will be felt in these localities, if local trade do not increase. The stocks which the well-to-do men and substantial ryots secured for their family use, have not yet been completely exhausted. Jali dhan, which has produced a fair outturn this year, is now being harvested in different parts of the district. The outturn of boro dhan has done a great deal of good in the small area in which it was sown.

2. The subjoined statement will show the kind and price of food-grains in the different marts of the district :—

| | | Common rice. | | Kalai. | | Mugh. | | Arhar. | |
|-------------|-----|--------------|----|--------|----|-------|----|--------|----|
| | | Rs. | A. | Rs. | A. | Rs. | A. | Rs. | A. |
| Bongong | ... | 2 | 4 | 2 | 8 | 3 | 8 | | |
| Ranaghat | ... | 3 | 2 | 2 | 8 | 3 | 2 | 2 | 8 |
| Santipore | ... | 3 | 0 | 2 | 8 | 3 | 0 | 2 | 12 |
| Chandu | .. | 3 | 0 | 2 | 4 | 3 | 3 | 2 | 6 |
| Kooshtea | ... | 3 | 5 | 2 | 2 | 2 | 10 | ... | |
| Kishnaghar | ... | 3 | 6 | 2 | 9 | | | | |
| Alamdanga | ... | 3 | 4 | 2 | 8 | | | | |
| Damurhuda | ... | 2 | 13 | | | | | | |
| Kaligunge | ... | 4 | 0 | ... | | ... | | | |
| Dowlutgunge | .. | 3 | 2 | ... | | | | | |
| Kapasdanga | ... | 2 | 13 | 2 | 0 | ... | | ... | |
| Nakasipara | ... | 3 | 2 | 2 | 2 | | | | |
| Chocadanga | .. | 3 | 4 | 2 | 10 | | | | |

The price of common rice has risen everywhere. In Kaligunge it is highest, and in Kapasdanga and Damurhuda it is the lowest. This general rise in the price of rice was only to be expected, and will certainly continue till the aous crop comes in.

3. Regarding stocks I have nothing to add to my opinion expressed in my last narrative, viz., that in most parts of the district stocks are sufficient to carry the people through till the next aous crop is reaped. In the Kaligunge, Nakasipara, Tehatta, and Karimpore thanas, the stocks are very low.

STATE OF THE CROPS.

4. Jali dhan has reached maturity, and it is now being harvested. The outturn will be a tolerable one. Recent rains have done a great deal of good to both aous and amun crops everywhere in the district. The young rice looks very healthy, and if the season continues to be propitious we may reasonably expect a magnificent harvest this year. Amun sowings have been going on for some time. It has been reported to me that a certain amount of land had been left unsown in the distressed tracts. If all goes well the aous crop will be early; the quantity of land under cultivation is said to be considerably larger than usual; not much difficulty has been found in obtaining aous seed; amun seed is more difficult to procure. Loans are being applied for for this purpose by some zemindars. The district relief committee has also authorised the distribution of loans in special cases to cultivators. Indigo and sugarcane are doing very well.

5. Rain has fallen in all parts of the district, sufficient for the purpose of cultivation, but nowhere in excess. Sub-divisions Ranaghat and Bongong, perhaps, require a little more rain. So far the prospects of next season are cheering.

6. Distress is decidedly increasing, but no well authenticated cases have been reported yet which have not been met. The number of grain-thefts reported by the police during the fortnight amounts to 4 only. They occurred in the following sub-divisions:—Sudder 1, Meherpore 2, and Kooshtea 1.

7. There has been a visible decrease in abkari revenue in sub-divisions Ranaghat and Kooshtea. The sub-divisional officers (probably correctly), attribute this decrease to the dearness of all articles of consumption. In other sub-divisions the excise revenue may be said to have remained stationary.

8. I am glad to be able still to report that the condition of the people in general (of course with the exception of the inhabitants of those tracts which have been recognised as *distressed*) is not bad, and there is no increased anxiety on account of famine. So long as the mahajuns have stocks to lend, the agricultural class will not greatly feel the pressure. The weavers and the middle-class people in different circumstances are worse off. But even they are generally better than they were in the corresponding month of 1866. Professional beggars are daily on the increase. Private charity has so long relieved them.

CONDITION OF ANY SPECIAL TRACT.

9. Distress has of late overtaken the northern part of thana Karimpore in sub-division Meherpore. The sub-divisional officer of Meherpore, who is now on the spot, reports: "If an imaginary line be drawn east and west through Hogolberia, the part of the thana cut off to the north would shew the distressed area." This part contains about 50 villages, and calculating 500 persons in every village, the distress actually concerns some 55,000 individuals. It is reported that there is but a very small stock of paddy in that part of the district, and if grain be not imported there, severe distress may be very soon felt by the inhabitants. I have requested Baboo Nafar Chandra Pal Chaudhuri, a neighbouring zemindar, and a very large mahajun, to import paddy in that part of the thana, and I hear he has already made arrangements to do this.

Cholera, which lately was prevalent in some parts of the district, has now disappeared. The completion of the excavation of several tuocavee and Government tanks has been of immense benefit to the inhabitants of the localities so far as drinking-water is concerned.

10. The construction and repair of roads are generally going on in the Sudder. The construction of *kutchu* roads which had been stopped, is now being resumed. The excavation of Government and tuccavee tanks is going on well. The former have been nearly finished. The tuccavee tanks are being inspected. In addition to the relief works already commenced in the shape of constructing roads and digging tanks, paddy-husking, and jute and cotton-spinning have been introduced for those who are not fit for hard labor, or who, on account of their social position cannot come out to work. I have not been as yet able to visit the distressed parts as I intended before. The number of sufferers quite unfit for work has increased very much, and the Dubagram sub-committee has been authorised to open gratuitous relief, spending for the present up to a limit of Rs. 100 per diem. The number of laborers employed in Government tanks and roads, on Saturday last, is 4,391, and the total number of men employed may be roughly estimated at 5,000.

11. *Transport of food*.—Import and export business seems to have been carried on during the fortnight much as before. The approximate quantity of food-grains imported to, and exported from Bongong during the fortnight, amounts to 1,100 and 2,200 maunds respectively. Kooshtea has imported 1,400 maunds of rice, 300 maunds of kolai, and 1,200 maunds of paddy. In Ranaghat, 600 maunds of paddy, 1,300 maunds of rice, 450 maunds of kolai have been imported; and 1,174 maunds of rice, 100 maunds of paddy, and 300 maunds of kolai have been exported. Only 50 maunds of paddy passed through the sub-division. The estimated amount of export from Meherpore comes to 4,000 maunds a fortnight. The exports are generally made to Moorshedabad, and to the other side of the Hooghly.

12. *Charitable relief*.—The distribution of charitable relief has already been commenced by the Debogram sub-committee. The sub-committee has been left to decide whether cooked or uncooked grain should be distributed. The district committee is of opinion that it is better to give uncooked grain. Considering the shortness of the stocks, I have referred to the Commissioner demi-officially on the subject of importing some 5,000 maunds of Burmah rice for charitable relief purposes. This would be desirable for several reasons, if Government can spare the rice.

The committees are not at all regular or punctual in submitting their reports, but I have taken measures which I hope will ensure this in future.

No. 288, dated Julpigoree, the 19th June 1874.

From—CAPTAIN R. C. MONEY, Deputy Commissioner, Julpigoree,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit herewith my fortnightly narrative up to 14th June 1874.

Julpigoree District fortnightly Scarcity and Relief Narrative Report, ending 14th June 1874.

A.—STATE OF THE COUNTRY.

BEING in Debigunge, the centre of our southern distressed tracts, and having for the last few days been going about among the people, and seen every corner of these tokees, I will first report on the state of South Boda.

The state of the country has improved visibly since I was last here some three weeks ago, and the expression used by the people themselves is that the country is now “tanda.” With advances of rice made, and being made by the Cooch Behar estate to jotedars, chukanidars, and peerjahs; with gifts of rice to the poorer classes of jotedars, whose jumma is under Rs. 5; with work on tanks, roads, and bunds, at daily rates for those not able to do task-work, such as women and children, and at task-work for others; with many golahs at which rice is sold at cheap rates to the public; and with relief committees everywhere for relief of those unable to work, and with no one to support them, it is simply impossible that real distress should fall on any one unless he wilfully courts it.

I have during the last week visited every class in their “charees”; not casually, but devoting four days to it, going about from early morning till dark on an elephant, and stopping at every “charee” I passed, and everywhere I now receive the same answer to the question as to their food—“we are eating sircari rice; had it not been for the sircar, many would have died of starvation.”

There cannot be the slightest doubt that the steps taken on behalf of the Cooch Behar State, have done, and are doing exactly what is needed; we have stepped in between the people and starvation.

Another very noticeable change in the state of the country is the large amount of dhan which is now exposed for sale in the hâts, and the gradually falling prices of rice. Rice, however, is nowhere abundant in the hâts. This I believe is simply owing to the fact that those who need to buy it, do so at our golahs, and it is not therefore worth the while of those who ordinarily husk dhan and sell the rice to do so. In this we do not really interfere with trade, as the sale of rice is at all times small in these parts, the bulk of the people consuming their own produce, and those who have to buy in ordinary years, preferring to buy dhan and clean it for themselves, to the direct purchase of rice. Undoubtedly the stock of grain now in the country, *i.e.*, the people's stock, would not nearly have met their wants, still they have grain, and more of it than we had at first supposed, and those holding it are more willing to lend it out than they were a short time back. It is probable that the magnificent promise of the bhadoi crop is the direct cause of this effect, and I look on it as a very significant fact that men of this part of the country, who only a fortnight back were willing to take advances of Government rice at Durwani, to sell in hâts in South Boda, will not now do so; they say that prices will now fall rapidly, and they would be losers.

The crops all round promise splendidly, and the country teems with coming plenty; kownie is also being eaten, and a fair amount is still in the fields to be cut.

I find that there have been successive sowings of this crop, which has made it larger than I had at first supposed.

Jute, in some of the deepest lands, is being cut and steeped, and here and there is even being cleaned and prepared for the market; of course this is exceptional. Everywhere this crop promises very well.

Jameera dhan is in ear, and will be ripe in some 15 or 20 days; in the far north of the district, I have even heard of its being already cut. This crop is not a large one, but what there is of it is very fine indeed.

The Bhadoi dhan is all that the most ardent agriculturalist could wish, and gives promise of an early and bumper crop. The weather we now get, the alternate rain and intense heat of the sun, is the very thing to bring this crop to perfection.

Hymanti dhan is now being rapidly planted out in the deeper lands, where water now lodges; the seedlings of this plant are as fine as it is possible for them to be.

Sugarcane is luxuriant, and already in places five and more feet in height; nowhere do our works compete with agricultural labor. This is owing to the system of advances of rice to the cultivators, and this system is the backbone of all our relief measures. Some 300 maunds of rice are by these advances being daily thrown into the homes of the cultivators, and I can testify to their grateful appreciation of this step.

Grain robberies and thefts have ceased, and the confidence of the people is completely restored. A detachment of the 38th Native Infantry, one of the Cooch Behar regiments, some of our police sowars, and parties of police, have been moved about the country in different directions. The offenders in the cases which took place have been in many instances arrested, and some severe sentences passed, and while those of bad livelihood see that offences cannot be committed with impunity, even under pretext of starvation, the people see that they are protected.

I pass now from the condition of the south to the north of the district, and the Dooars.

The wave of grain offences which rolled over the district, more especially in the north, was promptly checked, and the consequent state of panic and insecurity has ceased.

The result showed that these offences were not the acts of starving men, and were no real indication of want of food among the people. Originating with deliberate offences of men of bad character, such offences seemed to gather strength as a protest against exports which had at that time brought prices all over the north of the district to starvation rates. With the cessation of these offences prices at once fell and export recommenced. The Government rice now received and stored over the north of the district is sufficient for all our probable wants, and was the main cause in lowering prices, as it will be our chief security against a recurrence of such events as I have alluded to. Crops all over the north of the district, and also in the centre of it, promise wonderfully well.

Here and there in the Dooars, and for a few miles south of Julpigoree as far as Cassiabhari, and also north near Titalya, caterpillars have attacked jute, kochooa or yam, and dhan. The damage to a field of jute and kochooa, and to a bed of hymanti dhan seedlings, is occasionally complete; but this is very exceptional, and if no worse occurs the actual loss will not be appreciable. The caterpillars that have attacked jute and kochooa are so large that they must have been hatched some time, and were there more of the same kind elsewhere, we should have heard of it ere this; the flooded state of the fields confines those now in existence to their present abodes.

Dhan, when attacked, and it is quite exceptional, is attacked by a small brownish-white caterpillar called in the district "manjir"; it attacks the very heart of the plant, but the people do not seem in the least afraid of it, and I was assured everywhere that the heavy rainfalls would speedily put an end to its existence and damage.

Condition of the People.—In South Boda, the physical condition of the people is remarkably good; due, doubtless, to the fact that they received their assistance before want and deprivation had really told on them; and, to the extent of their private resources, I believe that all now have food and plenty of it, the State rice having found its way into every home.

For the last few days my time has been wholly spent among the people in our worst tracts; men and women have nowhere lost flesh, thin boys I found in fair numbers, very thin boys were exceptional, and the cause for their being so was invariably attributable to ill-health. One *bond fide* emaciated boy alone have I found whose skeleton-like frame was said to be the result of want of food. It is worthy of note that this boy, an orphan, was in good health, and being fed by his employer, and that his little sister was fairly fat. A peculiar feature among the population of this district is that the girls are always fat and plump, the boys between 6 and 12 thin. The reason assigned by the people is that the girls are kept in-doors and not exposed to the heat of the sun, while the boys are all day at work, of some kind or other, in the fields. I am inclined to believe that another cause may be the system of marriage in this district, under which a girl is usually sold to the husband who can pay most for her, and that hence girls, as valuable property to their parents, are more carefully looked after than the boys. Be this as it may, one great proof that the people in the south of Boda never reached starvation point is found in the fact that a thin girl is not to be seen, and that, except in cases of illness, boys are in their normal condition. On the relief works all the people are in good condition, except the hosts of old women, whose attenuation is due to old age alone. A common trait in the character of the people about here is their readiness to divest themselves of any responsibility as to their aged female relatives. I am constantly told an old woman has no one belonging to her, who I find has at least a son-in-law well-to-do, and hence on our works will be found a very far larger number of old women than men. Among this class especially, I believe, the mortality would have been great had not the means of subsistence been given.

I cannot hear of any one having died of starvation, and should have been greatly grieved and surprised if any one had done so. Our relief scheme should, and I firmly believe does, prevent such a possibility.

One man receiving relief died lately at Chilahati, but enquiry shows that his death, if accelerated by want, cannot be put down to famine. This man, who I was told was 80 years of age, I did not see him, but who is put down by Mr. Bradbury, who did see him, at 60, was an old, infirm creature, who walked from Julpigoree where there is comparative plenty, to Chilahati, a distance of some 20 miles, where there was scarcity; why he did it, or where he was going, is not known; he reached Chilahati ill, and was at once given relief; he lived there over a week receiving daily his quantum of rice and two pice, and then died apparently of old age and infirmities combined. The condition of the people of this district is at all times exceptionally good, and their wealth great, while, save in the matter of the purchase of a wife, their expenditure is small. They dress badly and live in poor houses; as a consequence they must accumulate wealth, and it is my impression, after much inquiry, that we have but a faint idea of their own private resources; and that it is these resources that have this year enabled them to stand loss of crop where it occurred, and continued exportation, so much better than other people could do. The health of the people is remarkably good; fever and outbreaks of cholera and small-pox being less common this year than is usual. This is, perhaps, the more singular, as the mango and jack-fruit crop is unusually large.

The condition of the people in the north of the district is good, and needs no special notice. The Meches in the Dooars are now in better circumstances; about 99 maunds of clean rice, and 1,300 maunds of dhan, have been sent up to them from Meekligunge, and advances are being freely made to such of them as are of comparatively settled habits as cultivators: there is now no fear of their suffering from want of food.

Government Rice.—The 39,000 maunds of rice received at Titalyah were greatly damaged in transit, owing to insufficient covering to the carts; the bags also contained short measure.

I find that the Government rice is not generally of such good quality as that we purchased at Goalundo for the Cooch Behar State, and that short weight is more common among the bags of the former than of the latter. I saw a bag weighed yesterday in which the actual found weight was 1 maund 20 seers, against its assumed weight of 2 maunds or $\frac{1}{4}$ short, and it was one of many, all looking equally empty.

B.—RELIEF WORKS.

Our relief works, though they have answered well as a means of giving relief to the people, have not been as successful in the actual matter of work done as they might have been. This has been owing to the want of proper supervision and staff. Major Thorold, R.E., having been placed in charge of these works, and the staff being strengthened, I trust that we shall now show a better return for the money expended.

All works undertaken are of practical utility, and have been so at the express desire of the people themselves.

There has been a decrease this last week in the numbers who go to our works, notably at the Chenti tank and Doras bund. This is accounted for by the people as being due to the extension of the State advances of rice to classes of cultivators at first omitted, having of late thrown so much rice into the houses of the people that many who before worked, now turn all their attention to their fields, which, as hymanti transplanting has commenced, call for much labor.

The following table gives a list of works in hand, and numbers employed on them on latest date, up to 14th June :—

| Month and date. | Name of works. | NUMBER OF PEOPLE EMPLOYED. | | | Total. |
|--------------------|---|----------------------------|--------|-----------|--------|

Export and Import.—Export in the north of the district still goes on, but not to the former extent.

In the south the opening of sales by Dinagepore and Rungpore near our border has proved of material assistance to us, and has checked the export which still went on in those parts. It is due to this and to the store of rice we hold and open to the people, and the promises of coming crops, that prices are becoming easier in the extreme south, and that rice can be got at 9 seers where lately it was selling at 7.

One of the most peculiar anomalies of our present position is that, although we sell so much cheaper at our golas, still such rice as is exposed for sale in the hats at higher rates always finds purchasers.

For instance, one day last week at Sonahar I bought in the Juggernath hat one rupee of rice and got 7½ seers: within a stone's throw rice was selling at our gola at 10½ seers per rupee for good common rice, and 13 seers per rupee for rice largely mixed with dhans; it was selling to all comers, still the small quantity of rice in the hat was at 7½ seers, and at that high rate found purchasers, and those chiefly of the lower classes.

A small quantity of dhan is being imported from the north to south of the district. It is however very small, and only a few do this for their own private consumption.

D.—TRANSPORT.

Of the 39,000 maunds of rice which were sent from Purneah to Titalyah, 39,319 maunds had been received on the 14th current, and 33,357 and 20 seers sent on to their respective golas.

No difficulty was found in getting carriage; the transport superintendent in this district using some 4,000 carts for this purpose.

Of the 19,604 maunds bought at Goalundo for the State of Cooch Behar, 14,900 maunds have been landed at Ghoramarah and sent on to the golas.

Of the 10,000 maunds to be received from the Northern State Railway, 5,000 maunds have been received and sent on to golas.

The 14,000 maunds purchased by Mr. Bradbury has all been received and stored. Carriage for all this has been easily obtained on the spot.

F.—CHARITABLE RELIEF.

This branch has hitherto been managed by Mr. Bradbury, c.s., and the result, as far as we have received reports up to 14th June, is shown on the margin.

Through Mr. Bradbury 14 maunds 20 seers were distributed, and by the committee at Sunnaseekatta 1 maund 24 seers 4 chittacks.

As more officers have been given to the district for relief work, and Mr. Bradbury has ample to look after in the advances to cultivators and others, the supervision of the committees has been made over to Mr. Clark and Mr. Jones, each of whom has his own circle.

The committee in Chilahati did not or would not work. I believe they considered that the aged female relatives of members of the committees were the most deserving of charitable relief, and thought that charity should begin and stop at home. Relief of this nature is therefore for the present being supervised by the zemindary amlah. The other committees seem to take an interest in their work, and rightly to determine who should and who should not get relief.

G.—FINANCIAL RESULTS.

| | Rs. | A. | P. |
|-----------------------|-------|----|----|
| Relief loans to ryots | | | |
| Laborers' wages | 4,400 | 0 | 0 |
| Charitable relief | | | |
| Transport | 3,041 | 0 | 0 |
| Purchase of grain | | | |
| Miscellaneous | 1,071 | 3 | 4 |
| Total | 8,512 | 3 | 4 |

Rains.—The rains, which were somewhat late this year, are now falling most favorably. That we had less early rain than usual was very fortunate for the rice in course of transport, and for tanks in course of excavation.

W. A. NEDHAM,
Asst. Commr., for Deputy Commr.

RECOVERY OF ADVANCES MADE TO CULTIVATORS UNDER THE ROAD CESS ACT.

No. 4175—S.R., dated Calcutta, the 29th June 1874.

From—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department,
To—The Commissioner of Burdwan.

THE Lieutenant-Governor has had under consideration your sugges-

* *Extract paragraph 6 of a letter from the Commissioner of Burdwan, to the Magistrate-Collector of Bankoora.*

PARA. 6.—It is obviously for the interest of the zemindar to interpose and take an advance to help his ryots, instead of allowing the ryots to borrow direct from Government. If it comes to such a pass that advances are to be made direct to the ryots, it seems to me that the Government, for its own protection, and in order to recover its advances, must be asked to apply the process of attachment provided in sections 10 and 23 of the Road Cess Act (Act X (B.C.) of 1871), and it is for the zemindars to consider what the effect of that procedure would be on their position. You will understand that the law at present does not permit this procedure, but I shall at once point out to Government the facility which exists for applying these sections of the Act if zemindars fail to take advantage of the benevolent offers of Government to aid their ryots.

tion* that if necessary the legislature should apply certain sections of the Road Cess Act to the recovery of advances made direct to ryots for their subsistence during the present season of scarcity.

2. The Lieutenant-Governor is not certain that a sufficient case has yet been made out for moving the legislature in the matter; he would prefer that the zemindars and other superior holders should have full opportunity to fulfil the duties of their position, even though those duties may not be enforced by special enactment.

It may be well, however, to review what has passed on the subject of making advances of money or grain to destitute ryots through or on the security of their landlords.

3. After His Excellency the Viceroy's visit to Behar, the Government of India expressed† their expectation that zemindars would "either make advances to such cultivators from their own funds, or accept with alacrity the assistance offered by Government for this purpose," and it was added that "if these advances should not be realized, and difficulty is found with regard to the security for advances made directly to cultivators, His Excellency is ready to consider whether some legislative provision to the effect that their landlord shall stand security for the repayment, is necessary."

4. Since these orders were issued, the following concessions have been made to zemindars who take advances for the purpose of helping their ryots.

† Agriculture, Revenue, and Commerce Department letter No. 604, dated 16th December 1874.

§ Government letter No. 155, dated 16th January.

|| Resolution No. 403, dated 3rd February.

¶ Government letter No. 3966—S.R., dated the 18th June 1874.

The time for the repayment of such advances was extended‡ to the 31st December 1875; authority was given§ to Collectors to postpone the collection of land revenue instalments from zemindars who distinguish themselves by helping their ryots; the stamp duty on deeds for the repayment of such advances was remitted; the word *zemindar* was made|| to include putneedars, jotedars, and other superior holders having a permanent interest in the land; and lastly, now that all advances for the help of zemindars or ryots are made in grain, the Lieutenant-Governor has authorised¶ the adoption of a cheaper rate of repayment in the case of advances made on the security of zemindars, so as to cover the cost and possible risks of recovery.

5. It will be seen that the Government wishes to enlist the aid of zemindars in this matter, and has made valuable concessions to secure their assistance. At the same time it has been decided that "if in any village it was found absolutely impossible to work through the zemindars to save the people alive, Government must undertake the work, trusting to recover the amount by

* No. 48, dated 25th April, circulated to all distressed districts.

legislation or otherwise." And in the Mudhoobunnee orders* it was said that "advances to ryots must, wherever possible, be made through, and on the responsibility of, the zemindars. * * * * * Meanwhile arrangements for making the advances should go on."

6. The Lieutenant-Governor is glad to be able to say that in many parts of the Patna and the Bhagulpoore divisions, in the Dinagepoore district, and in

parts of Rungpore, the zemindars are doing their duty in a praiseworthy manner, and are either spontaneously making advances themselves, or are giving security for the repayment of advances made direct to their tenants. His Honor hopes that the same course will be followed by the larger zemindars in all districts throughout Bengal, wherever and whenever necessity may arise; and he is aware that in the case of very petty estates, in which shareholders are numerous, it may be almost impracticable for any one owner to come forward with security.

7. Upon the whole, then, the Lieutenant-Governor is not satisfied that there is at present any need for special legislation, inasmuch as the zemindars are already doing their duty in this matter. If at any time it were found that the majority of zemindars in any district abstained from helping the Government in its measures for saving the lives of their tenants, and if it became necessary for the Lieutenant-Governor to propose any special legislation, he would consider your suggestion that the forms and the machinery of Sections 10 and 23, Road Cess Act, be applied to the case of realising advances of money or grain made to ryots for their support during the present scarcity. But he, as already observed, is sanguine that the good sense and humanity of the zemindars themselves will obviate the need of raising such questions.

Rainfall, Weather and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 27th June 1874. }

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|---------------------------|-----------------------------------|---------------------------------------|--|
| BENGAL. | | | |
| <i>Western Districts.</i> | | | |
| BUDDHAN DIVISION. | 1 Burdwan, 29th* June 1874 | 6.75 | Over five inches of rainfall at Raneeunge, four at Bood-bood, three at Cutwa, nearly two at Culna, and three at Jehanabad. The prospects of the crops are most favorable. Cholera abated. Fever as before. |
| | 2 Bankoora, 27th " " | 6.27 | Rain all over the district; very heavy on the 24th June. Agricultural operations going on well. The weather is as favorable as possible for the rice crop. Aous or early rice being planted out. A few cases of small-pox reported; cholera rather bad in some parts. |
| | 3 Beerbhoom, 27th " " | 5.73 | Cool, with frequent rain. Prospects of crops excellent; some local damage from floods. Export of week ending 20th June, 1,471½ maunds, chiefly to Bhagulpore Division. Prices nearly stationary, with downward tendency. |
| | 4 Midnapore, 27th " " | 2 | Over four inches of rain has fallen in the north, and less than an inch in the south; on the whole a desirable distribution. In the north the fall has been sufficient to allow the crops sown broadcast to be ploughed as usual and also transplantation to be made. In the centre of the district the fall has been scarcely sufficient for this. On the whole, the week has been a very favorable one. Prices, however, still manifest a slight tendency to rise. Cholera has almost disappeared. |
| | 6 Hooghly, 27th " " | 1.51 | Cloudy throughout, with light showers of rain. Wind from south and south-east. Rice sowing nearly complete. The rain has been ample, and the crops are promising. Heavy showers on the night of the 28th instant since reported. |
| PRESIDENCY DIVISION. | Howrah 27th " " | .59 | There was more or less rain throughout the district. Weather sometimes cloudy and sometimes clear. Wind from south and east varying. The rain during the week has done good. The amun or late rice seedlings are thriving. The late rice (broadcast) and jute have been sown and are doing well. Lands are being ploughed for transplanting the late rice. Sugarcane plants look healthy. More rain is required at Juggutbullbore, where it has been scanty. |
| | <i>Central Districts.</i> | | |
| | 6 24-Pergunnahs, 29th† June 1874. | 0.47 | Warm and showery. There has been heavy rain in the Diamond Harbour and Barrackpore Sub-divisions, and in smaller quantities throughout the district during the week. The aous or early rice and jute are doing well, and the prospects of the amun or late rice are very favorable. Fever decreasing at Barrackpore. Public health in other sub-divisions good. |
| RAJSHAHY DIVISION. | 7 Naddea, 27th June 1874 | 4.96 | Cool and damp. The weather has been as favorable as possible to the crops. In some parts of the district small crops of some inferior sorts of grain will be reaped in a few days. The earliest of the aous or early rice is in ear. Prices are nearly stationary. |
| | 8 Jessore, 27th " " | 1.83 | Cloudy and close for the most part, with more or less rain throughout the week, including one or two heavy down-pours in various places. The crops are looking and promising well. |
| | 9 Moorshedabad, 27th " " | 2.67 | There has been copious rainfall throughout the district during the week—2.67 at head-quarters, 8.20 at Lullbaugh, 5.06 at Jungipore, and 3.06 at Rampore Haut. As before, the crops are in very promising condition, and there is every prospect of an excellent harvest of aous or early rice if no floods occur. Prices have fallen in the principal bazars, particularly at Jungipore, where rice has recently been received from Eastern Bengal. The health of the district is improving. |
| | 10 Dinagepore, 26th " " | 3.6 | Rain throughout the district nearly every day more or less. The bhadoi or early crop continues in a most flourishing condition. Jute and sugarcane promise excellent crops. Ploughing for hymunti or winter rice crop everywhere proceeding with vigour. |
| | 11 Malidah, 27th " " | 3.09 | Cloudy and rainy. The bhadoi or early crops looking very well; half of the shama (grass-seed) and jali rice (very early bhadoi), which is sown in small quantities, has been cut in Nowabgunge and Kalleachack. Hymunti or winter crop cultivation is going on. Coarse rice at twelve seers per rupoe. Total rainfall from 1st January to 27th June, 16.20. |

* Telegram of the 29th June, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 29th June, received on the same day, shows rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|------------------------------------|--|---------------------------------------|---|
| BENGAL.—(Contd.) | | | |
| <i>Central Districts.—(Contd.)</i> | | | |
| RAJSHAHYE DIVN.—(Contd.) | 12 Rajshahye, 26th June 1874 | 1.75 | There has been much rain all over the district during the week. The rice crops are growing luxuriantly, but in parts of the Mandah, the excessive rain has made the soil so soft as to render weeding difficult. In the Nattore quarters the young amun or late rice plants on the lowest lands have been submerged, and those lands will have to be re-sown. Indigo has benefited much by the rain. Indian-corn and kowni (millet) are thriving, except in Nattore and one or two other places. Prices have fallen in some instances considerably. Public health good. |
| | 13 Itungpore, 26th " " | 6.83 | Rain general and weather cool. Crops everywhere in good order. Late rice being transplanted. Jute prospect good. A further fall of 2.12 inches of rain telegraphed on the 29th instant. |
| | 14 Bogra, 27th " " | 4.52 | Seasonable. The weather continues very seasonable; a bumper aous or late rice crop seems certain, and the people admit there has not been such good aous or early rice for twenty years. Ploughing and sowing the amun or late rice is going on briskly, for which the late weather is very propitious. |
| | 15 Pubna | | Return not received. |
| COOCH BEHAR DIVN. | 16 Darjeeling, 26th " " | 4.25 | Almost incessant rain, though not many heavy showers. In the hills, the Indian-corn promises a good crop; it has begun to ripen, and is being eaten by people on the low lands. The other crops are all doing well; the potatoes are much finer than last year, and more abundant. In the plains, kowni (millet) is mostly gathered in; the yield has been unusually large. Jamira and bhadoi or early paddy are progressing very favorably, and so is the young winter crop. |
| | 17 Julpigoree, 26th " " | 6.27 | Most favorable rains; and promise of jute, bhadoi or early rice, and sugarcane, all that could be desired. Hymanti or winter rice transplanting going on under very favorable conditions. |
| | Cooch Behar, 25th " " | 6.60 | Cloudy, with a good deal of rain. State and prospects of crops satisfactory. Up to the present time the weather has been very favorable for the amun or late rice crop. Only the very low grounds have been planted out as yet. |
| <i>Eastern Districts.</i> | | | |
| DACCA DIVISION. | 18 Dacca, 29th* June 1874 | 1.64 | Seasonable weather. State of crops excellent—could not well be better. |
| | 19 Fureedpore, 27th " " | 1.71 | Rain almost every day during the week, with alternate sunshine. The prospects of the next harvest continue very promising, and the rise of the rivers gradual. Only at Fureedpore and Goalundo has the price of coarse rice fallen. It has risen at Bhanga, Gopalgunge, and Madareepore, owing to importations being limited. |
| | 20 Backergunge, 25th " " | 5.21 | Rainy and pretty cool. State and prospects of crops good. |
| | 21 Mymensingh, 26th June 1874. | 3.80 | Weather showery, rain falling almost every day, but not in large quantities. There has been sufficient rain for the aous or early rice, but more is still wanted for the amun or late rice sowings. The state and prospects of the crops are very good. Some of the early aous (juti) rice has come into the markets in the west of the district. Health of the district good. |
| | 22 Sylhet, 23rd June 1874 | 3.52 | Showery, but very close. Prospects of crops good; more rain would do good. Rice fell on the 21st instant at the Sudder Bazar. About 3,500 maunds of rice, and 12,000 maunds of paddy exported. A few cases of cholera still reported; otherwise the district is healthy. |
| CHITTAGONG DIVN. | 23 Chittagong, 25th " " | 5.71 | Heavy rain nearly every day. Fine and hot intervals, with high wind. From Cox's Bazar 13.21 inches of rain reported up to 23rd instant. The weather continues most favorable to the early rice crop. Transplanting going on actively. Cholera disappearing. |
| | 24 Noakholly, 25th " " | 9.26 | Rainy. The rain has benefited the aous or early rice, which is doing well. The sowing of the amun or late rice is progressing favorably. |
| | 25 Tipperah, 26th " " | 3.19 | Rainy, but not as heavy as usual at this time of the year; heavier showers wanted. The weather has been characterized chiefly by light showers alternately with sunshine. Prospects of the early and late rice crops are still excellent. A little more heavy rain is, however, wanted just now. |
| | 26 Chittagong Hill Tracts, 23rd June 1874. | 4.2 | Heavy rain on the 22nd instant, accompanied with squalls. The hill people are still sowing paddy in their jooms. Indian-corn has begun to ripen here and there in small quantities. The prospects of the crops are on the whole good. |
| | Hill Tipperah, 24th June 1874. | 2.41 | No continued rain at present, but almost daily showers. Seasonable. Crops looking well and promising. Nothing particular to report. |

* Telegram of the 29th June, received on the same day, shows rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather and state of health at date. |
|----------------|-------------------------------------|---------------------------------------|--|
| BEHAR. | | | |
| (27 | Panna, 29th* June 1874 | 4.51 | Weather all that could be desired for the young crops so far, but now a few days of sunshine is wanted to enable the cultivators to weed their fields. Health of the district generally good. |
| 28 | Gya, 27th | 3.09 | Very wet weather; heavy rain throughout the district during Thursday and Friday. Prospects good. Sunshine required. Health good. |
| 29 | Shahabad, 27th " " | 5.41 | Heavy rain in the Arrah and Buxar Sub-divisions; less rain in the Sasseram and Bhubooah Sub-divisions. Ploughing and sowing going on wherever possible. Early sowings have already germinated. In the Rhotas and Sasseram pergunnahs, owing to a want of sufficient rain, seed is reported as not yet sown. Small-pox considerably decreased. Cattle disease has shown itself in Rhotas, but not in a severe epidemic form. |
| 30 | Tirhoot, 27th | 2.37 | Weather sultry and rainy, east wind prevailing. In Seetamurhee Sub-division 2.31 inches of rain fell during the week; weather favorable for crops on the ground. Prospects fair. Public health good; mortality less than in ordinary years. General complaint of want of straw for cattle, but cattle still in fair condition. In Mudhubunee Sub-division 2.99 inches of rain fell during the week; young paddy and bhadoi or early crops are reported everywhere to be in a most favorable condition; transplanting has commenced in many places. No more rain is required at present. In Durbhunga Sub-division 1.05 inches fell during the week; three-fourths of the bhadoi or early crops have been sown and the remainder is being sown; a large portion of that sown has already germinated and looks very promising; something less than half of the other crops has been sown and sowings are general. The paddy sown broadcast in the lowest lands was submerged in early portion of the week. Prospects of crops are at present cheering. In Hajepore Sub-division 3.65 inches of rain fell during the week. The crops are looking remarkably well, and the rain has given every facility for sowing and ploughing. No report has been received from Tajpore. The rain was general throughout the district, and has been of great benefit to the paddy and other bhadoi or early sowings which are now being pushed on briskly. The seed sown germinated freely. Transplanting of paddy is going on. Public health good. The prices of food-grains appear to have a tendency to fall. |
| 31 | Sarun, 27th | 5.34 | Weather rainy and seasonable; east wind prevailing. The rain has been general. Agricultural operations progressing, and are being carried on under most favorable circumstances. Sugarcane is doing well. Indigo appears more promising. The ryots are engaged in preparing their lands for the next sowings. The bhadoi (early), and aghancee (late), crops are being sown. Early shama (grass-seed), tangni, and murwa (millets), kodo and Indian-corn are coming up very well in some places. Weeding has commenced. The timely showers of rain have given hope to the people. Prices steady. |
| 32 | Chumparun, 26th June 1874. | 6.49 | Seasonable weather. Prospects of crops continue very favorable; the early paddy, maize, &c., are coming up well. Health of district good. |
| (33 | Monghyr, 27th June 1874 | 4.10 | Frequent and heavy rain. Favorable prospects for bhadoi or early crops; favorable sowing season for the rice. A few dry days are now wanted. |
| 34 | Bhagulpore, 29th* " " | 2.99 | Over five inches of rain at Bunka, and three at Soopool. A week's fine weather is very desirable for the Indian-corn. Ploughing, sowing, and transplanting going on briskly. Standing crops first-class. Prospects could not be better. General health very good. |
| 35 | Purneah, 27th | 2.10 | Very squally, strong east wind; rain more or less every day. Prospects excellent. The early jamera rice is being cut. The bhadoi or early rice is coming into ear; transplanting of the late rice is going on well except in Arrareah and Kishengunge, where there has this week been too much rain. Kowni and cheena (millets) have been cut and given a good yield. Indian-corn extensively sown in Dhurmpore, coming in by relays. |
| (36 | Sonthal Pergunnahs, 27th June 1874. | 3.77 | Deoghur and Rajmelal cloudy, with showers; Dumka and Godda, good showers of rain. Ploughing and sowing are everywhere going on. The prospects of the crops continue good. Rain all over the district. Bhadoi or early crops most promising everywhere. Public health generally good. |
| ORISSA. | | | |
| (37 | Cuttack, 29th* June 1874 | 3.35 | Very little rain in the interior; this break after heavy rains of last week is good, enabling sowings to go on and young crops to recover from excessive rain. Prospects everywhere excellent. Prices slightly risen. Health good. |
| 38 | Pooree, 25th | 2.23 | There has been general and good rain, and the weather is yet cloudy. The rivers have risen. Cotton has been nearly completely gathered with a fair outturn. Mangoes are over. Cultivation has been greatly benefited by the rain which has been generally good during the last two weeks. Sowing operations are proceeding well on high lands. As soon as the rain water left on low lands subsides, sowings thereon will begin. Sugarcane doing well. Purchases of rice for export have ceased. Prices stationary. Public health good. A sluice in Chowbin-kood has been thrown down by the flood, and the land commanded by it inundated; but no extensive damage has yet occurred. |
| 39 | Balasore, 26th " " | 2.04 | Showery. Present prospects promising in every way. The weather during the week has been very propitious; sunshine having alternated with showers. Sowings are nearly completed, and the young crop is thriving. |

Telegrams of the 29th June, received on the same day, show rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|------------------------------------|------------------------------|---------------------------------------|---|
| CHOTA NAGPORE. | | | |
| <i>South-West Frontier Agency.</i> | | | |
| 40 | Hazareebagh, 26th June 1874. | 1.76 | Rain during the earlier part of the week in showers, but during the last two days it has been heavy and continuous. From the north, i.e., Pergunnah Kharkdiha, are heard grumblings about too much rain, but the experience of the rest of the district is different. About the Grand Trunk Road to the south-east, head-quarters, and the west there has been much rain, mixed with sunshine. The crops are coming forward splendidly. People are applying freely for advances in the north for seed. Rice advances for food are given, and seed is obtained by barter at cheaper rates than the mahajuns give in loan. The condition of the district at present is extremely hopeful. |
| 41 | Lohardugga, 27th June 1874. | .86 | Light rain, with intervals of sunshine; quite seasonable. The prospects at present are most favorable both in Chota Nagpore Proper and in Palamow. Sowing has been carried on actively, and the young crops are growing up vigorously, and will be able to stand out well against heavy rain when it comes. In the interior prices have fallen considerably. General health good. Small-pox subsiding. |
| 42 | Singbhoom, 26th June 1874. | 0.26 | Cool and cloudy. A dry week, but heavy clouds about again. Crops looking superb. Prospects good. Cattle disease reported from parts of the district. General health excellent. |
| 43 | Manbhoom, 27th June 1874. | 0.63 | Showery and cool. Rain has fallen very generally over the whole district, but in slight showers only, which is just what is wanted. At present all the crops on the ground are doing particularly well; in fact, as stated last week, they could not promise better. Cholera and small-pox are still reported from several parts of the district; but the number of deaths is not large. |

Published for general information.

**Abstract of the Results of the Hourly Meteorological Observations taken at the
Surveyor-General's Office, Calcutta, in the month of May 1874.**

LATITUDE 22° 33' 1" North. Longitude 88° 20' 34" East. Height of the cistern of the
standard barometer above the sea level, 18·11 feet.

MONTHLY RESULTS.

| | Inches. | | |
|--|---------|-----|--------|
| Mean height of the barometer for the month | ... | ... | 29·611 |
| Max. height of the barometer, occurred at 10 A.M. on the 1st | ... | ... | 29·787 |
| Min. height of the barometer, occurred at 5 P.M. on the 16th | ... | ... | 29·450 |
| Extreme range of the barometer during the month | ... | ... | 0·337 |
| Mean of the daily max. pressures | ... | ... | 29·673 |
| Ditto ditto min. ditto | ... | ... | 29·539 |
| Mean daily range of the barometer during the month | ... | ... | 0·134 |

| | ° | | |
|--|-----|-----|-------|
| Mean dry bulb thermometer for the month | ... | ... | 87·1 |
| Max. temperature occurred at 2 P.M. on the 19th | ... | ... | 101·5 |
| Min. temperature occurred at 1 and 2 A.M. on the 1st | ... | ... | 72·9 |
| Extreme range of the temperature during the month | ... | ... | 28·6 |
| Mean of the daily max. temperature | ... | ... | 96·0 |
| Ditto ditto min. ditto | ... | ... | 80·5 |
| Mean daily range of the temperature during the month | ... | ... | 15·5 |

| | | | |
|---|-----|-----|------|
| Mean wet bulb thermometer for the month | ... | ... | 80·6 |
| Mean dry bulb thermometer above mean wet bulb thermometer | ... | ... | 6·5 |
| Computed mean dew-point for the month | ... | ... | 76·7 |
| Mean dry bulb thermometer above computed mean dew-point | ... | ... | 10·4 |

| | Inches. | | |
|--|---------|-----|-------|
| Mean elastic force of vapour for the month | ... | ... | 0·902 |

| | Troy grains. | | |
|--|--------------|-----|------|
| Mean weight of vapour for the month | ... | ... | 9·60 |
| Additional weight of vapour required for complete saturation | ... | ... | 3·73 |
| Mean degree of humidity for the month, complete saturation being unity | ... | ... | 0·72 |

| | | | |
|---|-----|-----|-------|
| Mean max. solar radiation thermometer for the month | ... | ... | 144·1 |
|---|-----|-----|-------|

| | Inches. | | |
|---|---------|-----|----------------------|
| Rained 5 days,—max. fall of rain during 24 hours | ... | ... | 0·85 |
| Total amount of rain during the month | ... | ... | 1·16 |
| Total amount of rain indicated by the gauge* attached to the anemometer during the month | ... | ... | 0·99 |
| Prevailing direction of the wind | ... | ... | S. S. W., S., & S.W. |

* Height, 70 feet 10 inches above ground.

L. C. ABBOTT,
Offg. Under-Secy. to the Govt. of Bengal.

Rainfall, Weather and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 4th July 1874.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|---------------------------|----------------------------------|---------------------------------------|---|
| BENGAL. | | | |
| <i>Western Districts.</i> | | | |
| BURDWAN DIVISION. | 1 Burdwan, 6th* July 1874 | 3.82 | The rainfall in the interior is reported to have been general, but not so heavy in the west of the district as elsewhere. The sowings of paddy are nearly finished. Fever as before. |
| | 2 Bunkoora, 4th " " | 0.12 | Slight showers everywhere, but sunshine has been the prevailing feature. Crops generally doing well. Sugarcane very well. Rain is required in the southern part of the district. Cholera again prevalent, and small-pox not extinct. |
| | 3 Beerbhoom, 4th " " | 2.47 | Wet during the former, fine during the latter half of the week. Planting out of the seedling rice in progress. Prospects continue excellent. Exportation of week ending 27th June, 1,739½ maunds, chiefly to Bhagulpore Division. Prices falling. |
| | 4 Midnapore, 4th " " | 2.98 | Seasonable weather. In the north of the district, where the rainfall has exceeded 4 inches, the reports are most favorable, and a bumper aous or early rice crop is anticipated. In the south-east (Tumlook) less than half an inch has fallen, and more rain is needed. General result of the week, fair. |
| | 5 Hooghly, 4th " " | .63 | Rain on Sunday, cloudy and slight showers during the week. Rainfall at Serampore during the week, 2.17. Wind from south and south-east. Rice sowing completed. More rain is required as some of the rice is suffering from want of moisture. |
| | Howrah 4th " " | 1.38 | There was more or less rain throughout the district during the week; weather sometimes clear and sometimes cloudy. Wind from south and east varying. Rain during the week has done good. The seedlings of aman or late rice are thriving. The aous or early rice and jute have been sown, and are doing well. Lands are being ploughed for transplanting the late rice; sugarcane plants look healthy. More rain is still wanted. |
| <i>Central Districts.</i> | | | |
| PRESIDENCY DIVISION. | 6 24-Pergunnahs, 6th† July 1874. | 1.28 | Warm and showery. The early rice (aous) and jute are very promising. Transplantation of aman or late rice has not yet commenced, except to an inconsiderable extent in Diamond Harbour and Barrackpore, owing to there not having been sufficient rain. Public health generally good. Fever gradually dying out in Barripore. |
| | 7 Nuddea, 4th July 1874 | 0.54 | There has been less rain than in the two or three preceding weeks. The weather continues to be most favorable to all the crops. The rivers have been rising somewhat suddenly, but measures are being taken to construct embankments, and it is hoped that damage may be prevented. There is a general tendency to a fall in the prices of rice, and in several thanas it is procurable for less than Rs. 3 per maund. |
| | 8 Jessore, 4th " " | 3.43 | Occasionally bright, but mostly cloudy, with very seasonable showers. The crops are everywhere most luxuriant. The rain appears to fall just as it is wanted. The Collector reports to have seen considerable portions of the central and northern parts of the district during the last ten days, and says that he never saw more promising fields. In Nurrail and Magoorah the earliest rice is beginning to come into the markets. Generally, however, it will be about a month more before the aous or early rice will be ready. The tendency of prices throughout the district has been downwards. |
| RAJSHAHY DIVISION. | 9 Moorsshedabad, 4th " " | 0.41 | Less rainfall than last week throughout the district. Weather close, damp, and cloudy. Very favorable reports are received from all parts regarding the progress of the crops. Transplantation of the late rice is going on. The rapid rise of the Bhagirathce within the last few days has caused the inundation of some important crops lying on low lands in the Jungypore sub-division. A very early aous crop of some importance is being reaped in the Jellingbee thana. Indigo plant is excellent, and a good season may be expected, if the crops on the Deorah lands are not inundated before they can be cut. Mulberry is also in very good condition; but the prospects of the approaching "bund" are still uncertain, and must depend greatly on the weather of the next fortnight. Prices are decidedly better: they are, however, still highest in Kallygungo and Gokara. There has been a considerable fall in the eastern thanas owing to importation, to the cutting of the early aous crop mentioned above, and the promising state of the crops generally. |
| | 10 Dinagapore, 3rd " " | 4.06 | Rain nearly every day throughout the district. Crops on the ground are all doing well, and a first-rate bhadoi or early crop is expected. Operations in respect of winter crops being pushed on. |

* Telegram of the 6th July, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 6th July, received on the same day, shows rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|------------------------------------|------------------------------|---------------------------------------|--|
| BENGAL.—(Contd.) | | | |
| <i>Central Districts.—(Contd.)</i> | | | |
| AJSHAHYE DIVN.—(Cot) | 11 Maldah, 4th July 1874 | 1.98 | Rainy and cloudy. There has been good deal of rain in the north of the district during the last two weeks. The prospects of the bhadoi or early crops continue very good. The only fear now is that some of the crops may be lost by inundation. In Kalichuck the Tugla has overflowed, and some jali rice on its banks damaged. Hymunto or winter rice cultivation is going on steadily. |
| | 12 Rajshahye, 4th " | 0.24 | There has been almost daily heavy rain throughout the interior, but less at head-quarters. The rice crops are everywhere flourishing. In parts of the Bhurind, however, the excessive rain has done some little injury to the seedlings in the nurseries, and in the Nattore thana jurisdiction the amun or late rice has to some extent been submerged; the river has risen very rapidly, and is 12 feet higher than it was this time last year. Prices have fallen everywhere. |
| | 13 Rungpore, 3rd | 4.09 | Weather close, with many showers. Less rain to the south. Crops the same everywhere—progressing favorably. Prices have fallen, and range from 16, in the south and east, to 9 seers a rupee in the north and west of the district. Three inches of rainfall since 3rd telegraphed on the 6th instant. |
| | 14 Bogra, 4th | .91 | Seasonable. The state and prospects of the crops are excellent. An aous or early rice crop of almost unprecedented abundance is certain. Everything is propitious for the sowing and planting of the amun or late rice crop. |
| | 15 Pabna, 4th " | 1.15 | Weather dry and hot, with slight rainfall during the week. The aous or early rice is in ear, and in some places is being cut. The crop even where looks well, and the prospect of the amun or late rice and sugarcane is promising. Harvest of kownee (millet) is not yet commenced. Health of the district good. |
| COOCH BEHAR DIVN. | 16 Darjeeling, 3rd " | 10.09 | Heavy and almost incessant rain and fog. All the crops in both the hills and the plains are progressing very favorably. Jamera paddy is already producing grain in the ear. Indian-corn, buck-wheat, and kownee (millet), are ripening in the hills. |
| | 17 Jalpigoree, 3rd " | 6.16 | The steady daily rain has been most favorable for the crops. Nothing could promise better than the bhadoi or early and the jute crops. Jamera (a sort of early rice) paddy is being cut here and there, and is full crop. The bhadoi or early crops in the Dooms is also in some places being cut, and is very fine. Hymunto or winter rice transplanting going on busily, and everything promising as well as the most ardent agriculturist could desire. |
| | Cooch Behar, 2nd " | | Cloudy, with good deal of rain, chiefly at night. Most favorable. The early kinds of aous rice are being reaped, and the amun or late rice seedlings are being planted out. |
| <i>Eastern Districts.</i> | | | |
| DACCA DIVN. | 18 Dacca, 6th* July 1874. | .58 | Seasonable weather; showers last three days. State of crops very good. Rivers rising fast. |
| | 19 Fureedpore, 4th | .35 | Alternate rain and sunshine; weather good for the ripening aous or early rice. The crops are in a flourishing condition. The rivers are rising very fast. The price of coarse rice has slightly fallen at Fureedpore, Bhanganah, and Gopalgunge, and is stationary at Goulundo and Madareepore. |
| | 20 Backergunge, 2nd " | 6.71 | Rainy. Prospects good. The Collector has lately seen considerable portions of the Gournadi and Katwali thana, and the crops of aous or early and amun or late rice were everywhere in a thriving state. The reports from other parts of the district are favorable, and, if nothing untoward occurs, the aous crop will be much better than was anticipated a few weeks ago. |
| | 21 Mymensingh, 3rd " | 4.42 | The rainfall would appear to have been more heavy in the west and sudder station than in the east of the district. The reports of the aous or early rice are exceedingly favorable from every quarter. In the centre and east, the planting out of the late rice crop is somewhat delayed for want of more copious rainfall. |
| | 22 Sylhet, 30th June 1874 | 4.45 | Very showery all through the week. More water wanted for the amun lands, otherwise prospects good. District healthy. |
| CHITTAGONG | 23 Chittagong, 2nd July 187 | 3.52 | Heavy rain every day till Sunday, 28th June. Since Monday the weather has cleared, and is now breezy and fine. 13.63 inches of rain reported from Cox's Bazar up to 30th ultimo. The aous or early paddy is being transplanted, and the sowings for the amun or late rice have commenced. Prospects continue favorable. Cholera abating. |
| | Noakholly, 2nd " | | Occasional showers; strong southerly wind. The aous or early rice is everywhere reported to be doing well. The amun or late rice has not all been sown yet. |

Telegram of the 6th July, received on the same day, shows rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|-------------------------------------|--|---------------------------------------|---|
| BENGAL.—(Concl'd.) | | | |
| <i>Eastern Districts — (Contd.)</i> | | | |
| CHITTAGONG DIV. | 25 Tipperah, 2nd July 1874 | 2.89 | Showery, with much heavy clouds about, but rain not so heavy as usual at this time of year. The prospects of the next rice crops are excellent. Price of rice is rising owing to large exportations. |
| | 26 Chittagong Hill Tracts, 30th June 1874. | 3.19 | Heavy showers throughout the week. The sowing of paddy and cotton in the jooms has been finished. The plough cultivators are tilling their lands. Indian-corn has begun to ripen here and there in the jooms. The prospects of the crops are on the whole good. |
| | Hill Tipperah, 1st July 1874. | 2.50 | The weather has been as good as could be wished for the crops in the plains and low lands; alternate showers and warm sun. More rain required for the sowings on the hills. Crops round head-quarters looking very well. |
| BEHAR. | | | |
| PATNA DIVISION. | 27 Patna, 6th* July 1874 | 5.76 | Too much rain has fallen. Some fine weather is wanted to allow the cultivators to get on to their fields. Floods to the south of the district said to have done some damage to the bhadoi or early crops. Health of the district, good. |
| | 28 Gaya, 4th „ „ | 5.57 | Rain daily. There has been a heavy flood, but owing to its short duration has not done much injury. The weather is all that can be desired. Bhadoi or early crops growing rapidly. |
| | 29 Shahabad, 4th „ „ | 3.51 | Constant rains, at times very heavy, and appears to have fallen all over the district. Crops are favorably reported on. A little bright and sunny weather would do much good. At the commencement of the week the floods of the Soane in the east, and of the Kudrakao and Durgwotee rivers in the south of the district, have caused some damage to the young crops. Inquiries are being made in regard to this. Health of the district, good. Only a few cases of small-pox. |
| | 30 Tirhoot „ „ | | Return not received. |
| | 31 Saran, 4th „ „ | 1.88 | Weather rainy and seasonable. East wind prevailing. The rain has been general. Agricultural operations progressing favorably. The bhadoi or early and other crops are all coming up well. Indigo prospects improved. A spell of dry weather is now much to be desired to admit of the fields being properly weeded: the weeding operations are in places somewhat obstructed owing to the continuous rain. The paddy seedlings in the nurseries are doing well. Prices of barley, wheat, gram, and cheena (millet). have slightly fallen. |
| BHAGULPORE DIV. | 32 Chumparan, 3rd „ „ | 2.05 | Seasonable. Prospects continue to be very favorable. The bhadoi or early crops are coming up well, and some will be ready in a fortnight. Health generally good. |
| | 33 Monghyr, 4th „ „ | 8.54 | Heavy and continuous rain; no day has passed without some rain; at most places muggy and hot. The bhadoi or early crops are very promising. There was some fear of swamping in consequence of the rapid rise of the Ganges, but the river has begun to fall again. |
| | 34 Bhagulpore, 6th* „ „ | 3.67 | Rain at Soopool 7.60, three inches fell in one day; Muddehpooora 7.70, five inches in one day; Banka 7.80. The unusually heavy rain has as yet in no way damaged the good prospects of any crops, but a few days' sunshine is very necessary, or the Indian-corn must suffer. General health, very good. |
| | 35 Purneah, 4th „ „ | 3.98 | Weather same as last week. The cheena (millet) crop now ripe is being damaged by rain and floods. The weeding of the bhadoi or early crop is impeded by the heavy rains, and the young plant is in some places choked by weeds. The transplanting of the late rice progressing favorably. Indigo prospects are bad owing to heavy rain. Jamera or early rice is being brought into the markets. Prices falling. |
| | 36 Sonthal Pergunnahs, 4th July 1874. | 1.55 | Almost perfect everywhere. Heavy rain, followed by bright sunshine. Excellent everywhere. There was a fear that the heavy rain of the week before last might be too continuous; and in Deoghur the maize, which was well forward, was beginning to droop. The fine weather of the past week has restored everything. Maize and paddy are doing well. Transplanting has begun. The small crops are sown. |
| ORISSA. | | | |
| ORISSA DIVISION. | 37 Cuttack, 6th* July 1874 | 30 | Sowing of principal rice crop nearly finished. Beali rice fields being reploughed. Prospects continue encouraging. Public health, good. |
| | 38 Pooree, 2nd „ „ | 1.34 | Weather hot, cloudy, and sultry. There has been slight rain during the week, and more rain is immediately expected. The seeds already sown have germinated, and the seedlings commenced to grow. Sowing operations are going on. The first floods have ceased, and the rivers have again risen. Prices are stationary. Public health is generally good. |
| | 39 Balasore, 3rd „ „ | .08 | Very little rain has fallen; during the last five days scarcely any has fallen anywhere. The young crops, however, have not suffered as yet. Severe cholera in the centre of the district. |

* Telegrams of the 6th July, received on the same day, show rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|------------------------------------|------------------------------|---------------------------------------|---|
| CHOTA NAGPORE. | | | |
| <i>South-West Frontier Agency.</i> | | | |
| 40 | Hazareebagh, 3rd July 1874. | 4.94 | Continued and heavy rain until the 2nd instant. Two days of fine weather. Reports from all sides excellent, except in a few places, where the rain is said to have prevented weeding. This, however, is a fault on the right side, and a few days of fine weather will set that straight. The people are eager to take advances, but nearly the whole average area is already under cultivation and sown. Small-pox is prevalent in a sporadic form as usual. |
| 41 | Lohardugga, 4th July 1874. | 1.13 | Light rain, with intervals of sunshine. The prospects continue most favorable, both in Chota Nagpore Proper and Palamow. The crops are said to be doing splendidly everywhere. There has been lately far more rain in Palamow than in Chota Nagpore. Upwards of 10½ inches having been registered at Dalton-gunge during the week ending 30th June. Several irrigation works are reported to have been damaged, but the crops have not suffered at all. Prices have fallen. General health very good, though small-pox has not yet disappeared. |
| 42 | Singbhoom, 3rd July 1874. | 1.07 | Close and hot. Heavy clouds about, but rain holding off. More rain now required for the Gora paddy. In other respects state and prospects of the crops excellent. Nothing could be finer than the present appearance of the young rice. Prices easier. Public health, generally good. |
| 43 | Manbhoom, 4th July 1874. | 0.72 | Seasonable and cool. Reports from all parts of the district continue very good, except from Raipore and the pergunnahs in that neighbourhood where the fall of rain had been deficient, and agricultural operations were somewhat delayed in consequence; the latter part of the week was dry, and rain is again wanted. |

Published for general information.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

BENGAL FAMINE.

TWENTY-FIRST SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL,
FROM THE 26TH JUNE TO THE 9TH JULY 1874.

THE Lieutenant-Governor, Sir Richard Temple, writes from Monghyr, on the 7th July, the following remarks regarding the district of Tirhoot to be included in the present narrative:—

“ During the fortnight I have visited Durbhunga, spending several days there, during which a conference was held with the principal relief officers of every part of the Tirhoot district. I also met some of the residents, European and native. The following account of the condition and prospects of this the most important district in the distressed country is collated from the evidence thus gathered together.”

“ As stated in my narrative of the 10th June, the month of June began very unfavorably for Tirhoot, and the general outlook was threatening. But before the first week of that month was ended showers began to fall copiously, and by the end of the second week a change in the aspect of affairs commenced, which change became complete as the rain continued with increasing force to the end of the month.”

"The first days of June in two-thirds of Tirhoot were distinguished by a heated dust-laden atmosphere; by scanty ploughing and sowing; by anxiety for seed; by navigable streams reduced to lowest ebb; by empty tanks and dried up wells, to the distress of men and the detriment of cattle; by grain markets becoming tighter and tighter, prices hardening, and private stores locked up; by an intense demand for Government grain, both for wholesale and retail, as if all were anxious to lay in supplies at once for some time beforehand; by private trade stagnant and traders holding out no promise of importation; by laboring and agricultural classes coming in greater numbers than ever to relief works; by the lists of gratuitous and charitable relief much swollen; by the public health good all troubles notwithstanding; by ryots and cultivators clamorous for advances of food-grain; by a large proportion, in some places one-half in other places three-fourths, of the population receiving assistance from Government in some shape, or from charitable subscriptions; physically in good condition from extraneous aid, but morally depressed and fearful for the future; by relief establishments everywhere strained to the utmost to meet the demands upon them; by transport operations consisting of the final struggle towards the attainment of a long deferred object; by doubts as to whether even the largest allotments of Government grain would carry the people through the months that must be passed before the winter harvest."

"The last ten days of June were, on the contrary, distinguished by rain, by masses of cloud promising further downpour, even to excess; by saturated soil; by extensive ploughing and sowing of every crop of the season, and general sufficiency of seed; by tanks and wells filling fast, to the refreshment of man and beast; by grain-markets still tight, but with an inclination to become easier, no stores indeed produced by traders, but landholders and private persons evidently bringing their hoards into use; by a demand for Government grain diminished and limited more according to the needs of the present moment; by traders collecting their boats and promising importation as soon as the rising streams should afford the necessary means; by labourers and husbandmen all gone from the relief works to the busy fields, leaving only some of the women and children on the works; by the lists of gratuitous and charitable relief still swollen, and the public health still good, these being the only points of likeness between the beginning and end of the month; by ryots and cultivators obtaining advances of food-grains—those who could from their landlords, and those who could not, from the relief officers; by a diminution of the proportion of the people receiving assistance from Government; by a general manifestation of feeling that peril from drought was for the present stayed; by relief establishments partially freed from out-door avocations, and with more leisure to complete returns and accounts; by transport operations nearly over and granaries filled; by confidence that unless some new trouble should supervene, the allotments of Government grain will prove probably sufficient to the end."

"This fortunate change was caused by fourteen inches of rain falling in the course of twenty-four days in Eastern Tirhoot, and 7 to 10 inches in Western Tirhoot."

"Fears have been naturally entertained lest the wide-spreading system of relief—quite inevitable if famine and mortality were to be warded off—depending partly indeed on charitable subscriptions, but chiefly on State funds—embracing first the poorest, then all the labouring and a number of the agricultural and manufacturing classes, and extending latterly to the middle classes—should, in a certain sense, demoralize and pauperize the people, teaching them to forego self-help and to lean on the Government, rendering them unwilling to return to ordinary employment when the change of season should arrive. These fears have been dissipated by the recent conduct of the people."

"It is affirmed by the best witnesses from all parts of Tirhoot that in the first days of July the area sown for the early crops to come on during August is much larger than usual; that various grounds, sometimes high pieces, sometimes low, not ordinarily sown with such crops, have this year been used for these sowings, the circumstance being specially observable in the most distressed tracts of North-East Tirhoot. For instance, an intermediate crop of rice called 'sathee' in the Mudhoobunnee tract, which is ordinarily insignificant, and regarding which we were warned in February last that it could not be depended upon for intermediate food-supply, is now reported to have been sown to such an abnormal extent as to afford a substantial food-supply, provided that

it escapes submergence from the floods which must come if the heavy rains last. The "murwa" (coarse grain reaped towards end of August) crop is scantily grown in Mudhoobunnee, in ordinary years, much less than elsewhere, which circumstance aggravated the case in that quarter, and rendered necessary a proportionably larger provision of Government grain. But it is reported that this murwa has been sown to an extent quite beyond the average, and promises excellently well. When I visited Hattee, East-Tirhoot, in the last days of May, extensive hollows in the surface of the country, ordinarily yielding rice, were abandoned as beyond hope by reason of drought. Instantly after the first fall of rain these lands were for a last chance taken up, and now it is reported that at least half of them are saved from being unproductive. Again, in many places early coarse crops (cheena, moong, &c.,) are being raised as yet with good promise close to the margin of streams, though the cultivators must well know that this produce would be all swamped if the waters were to rise one or two feet more. Instances might be multiplied. It is not, however, that the people have tried anything new in their husbandry; it is rather that this year they have carried many things to a degree which they would not care to attempt in ordinary years. And this is specially observable in respect to the early (August and September) crops from which they can get the first return; their anxiety manifestly being to acquire some grain of their own as soon as possible. An equally good beginning has been made with the sowing for the amun or winter rice crop, the mainstay and staff of life. Much, however, remains to be done for this crop; and to our European eyes the preparations of the cultivators in this respect seem backward; they may perhaps be allowed the credit of being the best judges in this matter, as they have shown such strenuous industry for the other crops. In those parts again where maize and millet are the staples, the preparations are as forward and as extensive as they could be."

"This progress towards large agricultural results could not, of course, have been obtained without the use of the services of every able-bodied person of both sexes and of every age. Accordingly, all those who were congregated on the relief works (as was the case with the great majority of the petty cultivators and field labourers) went off from the 15th to 20th of June with the same rapidity as that with which they pressed on to the works from the 15th to the 20th March last. The outturn of their work in the fields, as now seen, is too great to have been done wholly since they left the relief works. They must have gone on preparing their fields all the time that they were on relief piece-work. The toil undergone during the long days of this fierce summer in order to keep up field husbandry, and yet to earn subsistence at the piece-work, must have been so extreme as to be hardly believed. Nevertheless, the fact is confirmed by much evidence to the effect that the workpeople were often seen at piece-work late in the evening, and during the early hours of the night—the very men who must have been in their fields in the early morning. But they are now devoting all their hours to the fields; and the question is, how are they to find food till the next crop comes in. Some obtain wages in kind; others procure advances in kind from their zemindars and landlords, whose stores are probably considerable; some borrow grain from petty bankers, whose stores are probably small; some live on their savings made while they were on relief works; and the rest receive advances of grain from the relief officers. One way and another, they have all emerged from the worst period in unimpaired condition and in good heart to work for themselves. The surest way of terminating the consequences of the last drought is to preserve the labor-power of the country intact, and to direct it to raising at next harvest the utmost produce which the ground can bear. It is evident that these people, though duly grateful to the Government for its past aid and trustful of aid still being extended while the peril lasts (I am convinced of their gratitude, notwithstanding whatever may be asserted by some to the contrary)—do yet prefer to trust to the work of their own hands. There has from the first been an expectation among the laboring classes that relief would ere long be stopped and that works would be closed. They breathe more freely now that they see a chance of emancipating themselves from dependence on relief operations. The principal relief officer in Tirhoot assured me that this was manifest from their changed demeanour. The trading classes have a similar expectation; traders have sometimes said that they would certainly resume their business as soon as the markets and rivers should permit, because they were sure that

Government would not, or could not, keep up the relief work on its present scale. From their own repeated declarations to me I am sure that they are not at all afraid of Government interference. From no persons have I heard stronger expressions of gratitude, or more distinct assertions that the State had saved the fortunes of the traders by saving the lives of their numerous constituency, than from the principal native traders of Behar."

"The only adverse statement which I have ever heard regarding the cultivators is to the effect, that during the drought of last autumn they often omitted to do what they might have done for petty irrigation. Their conduct in other respects seems to show that such omission must have proceeded from ignorance and not from apathy."

"It is not meant that this good conduct has been pursued by every one. In this large population many instances have been and may yet be found of behaviour the reverse of that above described; indeed at one time there sprung up a class of *mates* or gangmen who, for their own ends, tried to mislead the people and to foster idleness. But if the points as above set forth are in the main correct, as I believe them to be, then what becomes of the argument about the demoralization or pauperization of the people? Is it not demonstrable that neither of these evils has happened or is happening in Tirhoot? In justice to the people of this great district it must be said that the crisis of 1874 has raised them in the estimation of Government, for their fortitude under suffering, their reluctance to come upon relief until driven by want, their diligence in retrieving the position they had temporarily lost, their quickness to seize the first opportunity of reverting to ordinary work. Nor should commendation be restricted to the cultivating and labouring classes. The zemindars have, as a body, done much by executing relief works from funds either their own or borrowed by them from Government, by making advances to their tenantry both for food and for seed; and by becoming security for advances made to their tenantry for those purposes by the Government. The trading class has not indeed shown enterprise, but this is hardly a reproach if their conduct be fairly looked at, inasmuch as they never could have imported without loss. But the traders have shewn alacrity in promoting the distribution of the Government grain among the people, and theirs is the agency for most of what has been or may yet be done in this respect."

"To this review of the condition of Tirhoot at the beginning of July may be added a *resumé* of the allotment, expenditure, and balance of the Government grain in this particular district (the balance being exclusive of wastage and loss)."

| Total allotment, including reserve ● last ordered. | Expenditure to end of May, shewn in narrative of 10th June. | Expenditure during June, chiefly actual, but estimated for the last week. | Total to end of June. | Estimated expenditure during July and August. | Balance expected on 1st September. |
|---|---|---|-----------------------|---|------------------------------------|
| Tons. | Tons. | Tons. | Tons. | Tons. | Tons. |
| 179,044 | 23,600 | 27,279 | 50,879 | 56,500 | 71,665 |

"With the balance on 1st September (whatever it may prove to be after losses and wastage) there will have to be carried on the relief operations to the end of December, that is, four months. If a comparison be made with the expenditure of Government grain during the earlier months of the year, (say February, March, and April,) that would be misleading, because relief was then given chiefly in money, whereas in the latter months it will be given chiefly in grain. Still, so far as can now be seen, the balance is considered sufficient for safety."

"The numbers of persons on the relief works in Tirhoot during some of the days of June amounted to 975,000, which figure represents the highest point. By the 1st July the numbers are believed to have fallen to 300,000. About the same time the numbers of recipients of charitable relief amounted to nearly 210,000. The largest number of all those receiving aid on any one date in Tirhoot, whether by relief wages, by gratuitous relief, by purchase, or by advances, is estimated to have been 1,774,000. This number much exceeds that originally estimated (one million), but it includes large numbers of Nepalese, who all through the hot season purchased at the British granaries near their frontier. The numbers of these latter receiving aid cannot be stated, but they must have been

considerable. After allowance for this, however, it must be admitted that the numbers in Tirhoot receiving assistance during the worst period did somewhat exceed even the high estimates which had been framed."

The Lieutenant-Governor, in continuation of his remarks regarding the Tirhoot district, sends the following general remarks to be included in the present narrative:—

"This narrative relates to the latter half of June, which period had been looked to previously with perhaps greater anxiety than any period since the distress began. I will endeavour to review briefly the main points in the situation, as it stood at the end of June and the beginning of July."

"The critical period of June then has begun and ended most favorably throughout the distressed districts. The rain began early, and has continued abundantly. The preparation of the fields for the early crops of August and September is found to be in a forward state. The sowings for those crops were done quickly and extensively. There was no want of seed for the most part. The area thus sown is believed to be larger than the average of ordinary years. The promise of the young crops to be reaped in August or September is excellent everywhere. The sowings for the later crop—rice to be reaped in December—are going on very well, though not completed. For these also there has been no considerable complaint of want of seed. The weather is very propitious; more sunshine is perhaps desired: if there be a fear at all, it is lest the rainfall should prove to be too much. The rainfall during June, in the distressed districts north of the Ganges, has averaged $11\frac{1}{4}$ inches."

"The demeanour of all classes connected with agriculture, under this happy change of circumstances, has been all, or nearly all that could be desired. The cultivators have attended to their fields with the utmost diligence. The landlords have promptly engaged all the laborers required for field-work, paying the wages in kind; and have made large advances of food-grain to their tenants, where they were able; and have, where they were not able to advance of themselves, co-operated with the relief officers by standing security for their ryots. The cultivators will have enough food to sustain themselves till the next harvest is gathered."

"The public health in the distressed districts has been, and is still remarkably good, excepting only Maunbhoom, and perhaps also Rungpore, and a few places in Central Bengal. The general death-rate is believed to be less than the average. Even the Burdwan fever has somewhat abated. The cattle, too, have been healthy, and no epidemics have broken out among them."

"As would be expected under these circumstances, the number on the relief works has fallen greatly. At the beginning of June the number was 1,770,732, and at the end 893,163. In the most distressed districts the proportion of decrease has been very much greater than that indicated, as in Tirhoot, Chumparun, Dinagepore, and Rungpore, where all able-bodied persons can get work in the fields. In some districts, however, there are many laboring families who cannot do this, and they have to stay on the works. In some places, too, the cultivators—occupants of lands—try to save expense by doing for themselves field-work for which they would in ordinary years employ paid labor. This circumstance would compel such laborers to remain on the works. Immediately on the first indication of the approach of the rains, instructions were telegraphed to every principal relief centre to facilitate and expedite the transfer of relief labourers to the fields or to private employment. In this respect, all, or nearly all, that could be wished has been accomplished. The expediency or otherwise of closing relief works altogether from the 15th July to 1st September has been considered. But after conference with the best authorities the proposal has been abandoned—partly because it might have the effect of unduly enlarging the lists of charitable relief, and partly because numbers may have to be re-admitted to the works after the harvesting of August shall cease to afford employment."

"On the other hand, the numbers on the lists for gratuitous and charitable relief have risen largely. At the end of June the number was 525,600 persons. The increase may have arisen partly from persons who had been on relief works applying for gratuitous relief after the closing or the reduction of the works. But the main cause is this, that as each week advances, distress spreads more and more over those of the lowest classes who cannot work. Though admission may sometimes have been granted without adequate enquiry, still, on the whole, the officers are strict to avoid admitting until the necessity is shown. Persons

who could not make out a case before, who had still some little means unexhausted, are able now to convince the authorities that admission is necessary. Or again, as the circle and sub-circle officers in the interior of the distressed districts go the round of the villages time after time, they find each time more and more persons who have a claim on that humane and merciful consideration which the subscribers to these charitable funds desire to see shown. That it is duly shown, according to the instructions reiterated by the Government to its officers, is to some extent proved by the increase of the numbers."

"In these numbers are included all those who from high caste, or delicate nurture, or social antecedents, or inaptitude for labour by reason of skilled occupation for which the demand is temporarily in abeyance, cannot come forward to ask for relief or to work, but are yet sorely straitened, though not reduced to the verge of danger. There are many varieties of degree among these persons, and it is not easy to classify them statistically, but endeavour will be made to separate approximately the number of them from the number of ordinary recipients of charitable relief."

"The relief being administered to a large extent by charitable funds, includes not only food but some extra articles of sustenance; also clothing in all the worst cases, and sometimes assistance is carrying on some skilled work or manufacture which is depressed from the prevailing scarcity."

"It is to be remembered that some proportion of the recipients of this relief consists of professional beggars, of the sick, and the miserable of all sorts, who have been in ordinary years supported by private charity without State intervention, but who cannot be thus sustained this year, because the donors who have heretofore fed them are now distressed themselves. All these will revert to that private charity which is so extensive among the natives, immediately that returning plenty shall cheapen prices."

"The granting of advances of food-grain to ryots has been more and more recognised as one of the best means of ensuring such industrious cultivation as would help to secure a large yield for those coming harvests which will, we hope, put at end to the distress. If the cultivators, occupants of fields, after having long ago exhausted their previous supply, and having for weeks sustained themselves only by wages on relief works, are to leave the works and devote themselves to the fields until September, how are they to live in the mean time? They really must get an advance of food-grain from some quarter; otherwise their position would for the moment be worse than that of the field laborers who can earn wages."

"If they obtain such advances from the landlord, as they frequently can, or from the grain dealers, as they ordinarily can in good years, and as they can sometimes even in this year—well. If, as is often the case, they cannot obtain the advances from either of these two quarters, there is nothing for it but to avert the mischief by granting an advance from the Government stores. Many applications were made; and the matter was much agitated by the cultivators. As the cultivating season became urgent, it would not have been prudent to await the receipt of individual applications from numbers of ignorant persons who might not know how to apply, inasmuch as mischief might set in before the business could be settled. Therefore the relief organization in the circles and sub-circles was called into play for promptly ascertaining village by village, in the most distressed districts, the circumstances of all cultivators who really needed advances and who could not obtain them otherwise than from Government. Much progress has been made with this work, which from its nature was pressing, and which is probably near completion by this date. Sometimes the cultivator can give security. Sometimes the zemindar will stand security; sometimes the cultivators of a whole village will become joint security one for the other. In every case the officer is to make the best arrangement he can to ensure repayment of the advance. By the returns brought up to 10th June, 3,84,000 maunds of grain, equal to 14,000 tons, had been thus advanced to cultivators. The number of the recipients is not precisely known, but on a calculated average of 2 maunds to a cultivator we obtain a number of 192,000 cultivators, heads of families. If the numbers of the families be calculated (as they ought to be in order to see the total of the persons concerned) the aggregate, at an average of 4 persons per family, would be 768,000 persons. In other words, three-quarters of a million of persons of the class of cultivators occupying land were assisted by advances of Government grain to the 10th

June. The enquiries have been since going on actively, and before the end the total numbers must very greatly exceed those above stated."

"Besides these advances of grain there were many advances of cash from Government directly to the ryots or indirectly to them through the zemindars. These have now been discontinued."

"The sale of Government grain is going on actively at all those places which have been mentioned in previous narratives. It has not been recently extended to any additional places. The amount of grain sold up to the end of the third week in June is returned at 61,000 tons (this does not mean the total of grain expended, which is much more, as will be presently seen). But in this amount is included the grain sold to relief laborers who, having got cash wages, purchase Government grain."

"The selling price of Government rice has been reduced from 12 to 13 seers for the rupee in Behar, including the Patna and Bhagulpore Commissionships, and the western part of the distressed districts; and to 14 seers for the rupee in the Rajshahye Commissionership or eastern part of these districts. This reduction was deemed necessary under the conditions of the rules regarding sale referred to in previous narratives."

"It is impossible to distinguish the labourers purchasing grain from other members of the public, or to state what proportion of the total purchases is represented by purchases made by them. It is believed, however, that at least half, perhaps more than half of the total, represents purchases by the public exclusive of relief laborers. Instructions have been reiterated to all officers to suspend the sales wherever and whenever private trade should bring in supplies, and to avoid interference or competition with such trade. It cannot indeed be affirmed that in no case has trade ever been directly or indirectly interfered with by the Government operations. But such interference has for the most part been successfully avoided. I have frequently received declarations from native traders to this effect. And that this is really the case in the main, is proved by the remarkable activity of private trade in the western part of the distressed area especially. During the period of scarcity nearly 148,000 tons of private grain have been carried by railway up to Behar (including the Commissionerships of Patna and Bhagulpore), and nearly 185,000 tons down; in all 333,000 tons brought by rail. It is more difficult to ascertain the statistics of the river trade in grain to the eastern part of the distressed districts, but it appears as yet to be inconsiderable. Perhaps its turn has yet to come."

"The private grain brought by rail to Behar is apparently not destined for the most distressed places in the north; it will probably be absorbed by the intermediate tracts in the basin of the Ganges. In all the most distressed districts there is no private rice whatever for sale in open market; it is universally declared by those in, and those out of the trade that there would be no rice at all purchaseable but for the Government supplies."

"Since the beginning of the rains the price of rice in Bengal has become cheaper by about 15 per cent. It is (as I learn) the opinion of the principal native grain merchants in the interior of Bengal (except those of Calcutta whom I have not met) that prices will not fall materially till September, when there will be some favorable difference; but that prices must remain dear as compared with ordinary years till the winter rice crop is secured, which cannot be till December. They have generally recommended us to continue selling Government grain freely until at least September. Their testimony to this effect is remarkable."

"The point which next in order suggests itself, is the total expenditure of Government grain. Returns brought up to the end of the third week of June shew a total expenditure of 115,000 tons, including everything, namely, that given in gratuitous relief, paid in kind to relief laborers, sold to the public inclusive of relief laborers, advanced to ryots, but not including anything for wastage or losses."

"In order to estimate the total number of persons receiving assistance of some sort during the first fortnight of June, we have the following data to form a basis:—

| | |
|---|-----------|
| Total number of relief laborers as per paragraph 18 of the 20th narratives | 1,770,732 |
| Total number of persons on charitable relief as per paragraph 24 of ditto | 401,959 |
| Total grain expenditure, in maunds, of first half of June, as per district narratives ... | 843,000 |

"Thus we have 2,172,691 persons receiving relief quite irrespective of those who are living on advances or purchases of Government grain. The amount of Government grain disposed of during the fortnight would give three-fourths of a seer a day to 3,401,900 persons for a fortnight. But among the people who consumed Government grain were all the persons on charitable relief, and a large portion of the laborers. The district narratives show that by the end of the first fortnight of June the practice of paying all laborers in grain, though largely introduced, had not been fully carried out. The Bhagulpore return is the one which best distinguishes between sales to the public and those to laborers; and that shows 98,228 maunds sold to the public, as against 25,628 maunds sold to laborers. All the district narratives show that the non-laboring public are the chief customers at our granaries."

"It would therefore be probably within the truth to take one-half of the persons supported by Government grain as being outside the relief labor and charitable relief lists. By this reckoning the total numbers receiving assistance in one shape or another would be—

| | | |
|--|-----|-----------|
| Laborers and paupers as above | ... | 2,172,691 |
| One-half the consumers of Government grain | ... | 1,700,950 |
| Total | ... | 3,873,641 |

"This revised calculation corresponds closely with the calculation given in my narrative of the 11th June. It then seemed to be possibly too high, but is now seen not to be so. The best estimate that we can frame shows that the number at the worst period was 3,900,000 persons receiving assistance of some sort, which is somewhat above the estimate of 3,500,000 originally framed. The cause is this, that subsequently some tracts became distressed which were not included in the area of distress when the first estimate was made, and were not included in that inquiry."

"The foregoing statement leads directly to the consideration of the adequacy or otherwise of the quantities of Government grain stored in the distressed districts. The quantities allotted amount to close upon 400,000 tons; the quantities already shewn as expended up to the end of the third week in June amount to 115,000 tons; the balance remaining, therefore, would have amounted to 285,000 tons, less abatement for wastage and losses. These stores are under the Government of Bengal, besides which there is the reserve at the Presidency under the Government of India. It becomes important to arrive at a definite opinion as to whether the balance available in the interior of the distressed districts is sufficient for safety. The average monthly expenditure for the two past months from the third week of April to the third week of June, inclusive, has been 53,000 tons a month, or 13,000 tons a week. The best informed persons believe that a somewhat higher rate of expenditure will continue till the third week in August, that is, two months more from the period last named. If an average of 60,000 tons a month be maintained, there would be a further expenditure of 120,000 tons, making a total of 235,000 tons to the third week of August, inclusive; leaving a balance of 165,000 tons, less abatement for wastage and losses. From the end of August it is expected that the rate of expenditure will decrease, if the autumn crops shall prove good. Until the end of August it is probable that the sales will be large; the advances to ryots considerable; the expenditure on gratuitous and charitable relief high, and on relief works comparatively low, and becoming lower week by week. From the end of August the sales will, it is hoped, decrease greatly; the advances to ryots almost cease, while the expenditure on charitable relief will continue high and on relief works may rise again somewhat, though never to the height attained during the hot months. On the whole, it is expected that (if all goes well with the season and crops) the average expenditure during the two months, September and October, will be less than during the previous four months; and still further less during the next two months, November and December, after which the distress will, we trust, cease altogether. The entire duration of the distress must always be remembered; for, from the very first, the estimates of the Government have been based on the anticipation that this distress would last into December in most of the distressed districts, and especially in Tirhoot. It is not necessary to pursue these calculations further, because they partly depend on rainfall which may be vouchsafed or withheld, and on crops which may be gathered in more or less abundance. A general view of the case

certainly shows that (so far as can now be seen) the stores in the districts are sufficient for safety; but that they are not more than sufficient on the whole. It might indeed be doubted whether they would be enough in this sense, were it not that the reserve existed at the Presidency. It is already seen that some particular places have too much grain and other places too little, and every effort is made to transfer grain from the points of surplus to those of deficit. The foregoing remarks refer to the stores in the aggregate. Beyond reasonable doubt we have ample stores in the districts, as a whole, till September. If by that date any fresh danger should arise or threaten, there would be time to throw into the districts additional supplies which would be obtained from the reserve at the Presidency."

"The importance of protecting the Government stores from deterioration during the rains has been remembered. All the numerous storehouses in the interior have recently been inspected by officers specially appointed for the purpose, and are for the most part reported to be efficient. A second inspection as the season advances may be necessary."

"The preparation of the special accounts of expenditure, both of grain and of cash, is being carried on under trained supervision."

"The land transport service, which at one time assumed such pressing importance, has now passed away. In Tirhoot the conclusion of this service was extraordinarily troublesome. The heavy rains falling so early in June, embarrassed the lines of transit, distressed the beasts of draught and burden, causing many casualties among them, and damaged much of the grain. The brunt of this was borne by the reserve carriage (of various kinds) belonging to Government. The value of this carriage at that critical and crucial juncture proved that its presence was indispensable to the final success of the operations in Tirhoot. Many granaries now filled must have remained unfilled, many markets which will be supplied must have remained incompletely supplied, many mouths which will be fed must have remained unfed, but for the reserve carriage belonging to Government. The animals of all sorts are now being taken care of, so that they may recover from their fatigues and ailments—and be ready for more service if necessary, or for advantageous disposal, by sale or otherwise, hereafter."

"The preparation for water carriage as explained in previous narratives are made in case necessity should arise; but no operations in this line are as yet contemplated, except the despatch of a small quantity (about 10,000 tons) of reserve grain to north-eastern Tirhoot."

"The organization of relief circles and sub-circles, with their ramifications penetrating to every village, will still be fully maintained for some time to come in all the distressed districts. There have been casualties among our officers (from accidents on horseback, sunstroke, and the like) but as yet very little sickness. Among the officers and gentlemen engaged in the relief service there are included many Indigo Planters who manage circles or sub-circles with a diligence equal to that, and with a local knowledge greater than that, of any one else. All, Europeans and Natives, official and non-official, are alike animated by unflagging zeal under each change and variety of the ever shifting circumstances: the object aimed at by all to the very end of the distress being this, that of the hundreds of thousands of lives entrusted to their keeping, not one should be lost from preventable causes."

Weather and Rainfall.—The weather continues to be most satisfactory throughout the greater part of the country, and everywhere, except in the comparatively small tract immediately to the east of Calcutta, the rainfall is reported as ample for all requirements.

State of Crops.—The prospects of the crops continue most favorable, and almost everywhere a more than average yield is anticipated from the autumn crops. These latter have already begun to come into the market in some districts.

Prices.—Prices show a tendency to fall almost everywhere through the country. The only districts where a rise is reported are Burdwan, Calcutta, Pubna, the Sonthal Pergunnahs, and Monghyr. In the latter district, though the price of rice has risen, that of barley has fallen considerably. Prices have fallen in Hooghly, 24-Pergunnahs, Nuddea, Jessore, Moorshedabad, Dinagepore, Maldah, Rajshahye, Rungpore, Darjeeling, Dacca, Fureedpore, Sylhet, Chittagong Hill

Tracts, Tipperah, Patna, Gya, Shahabad, Tirhoot, Chumparun, Purneah, Cuttack, and Hazareebagh. In other districts they are stationary. The fall has been most conspicuous in Rungpore and Shahabad. In the former district the price of rice fell from 9-6 to 11-4 seers for the rupee, and in Shahabad rice fell from 10-12 to 11-8, and barley from 18-4 to 20 seers for the rupee.

Private trade to Behar.—The usual note on food-grains will be found in Appendix A. The private trade returns of grain carried by railway show a decrease of 5,077 tons in the up and down traffic; but this is more than compensated by the increase in the river-traffic, which shows an increase of 5,289 tons. Now that the rivers are open, it is probable that the larger share of the traffic will go by that route.

North Tirhoot.—The Lieutenant-Governor has given so full an account of the state of this district that any further remarks in this part of the report are unnecessary.

South Tirhoot.—Prices in this district are reported as easier, owing more to the improved prospects of the crops than to the activity of trade. Sowings have all been completed, and the laborers have left relief works in large numbers for the fields. The prospects of the crops are said to be excellent, and the people to be in very good condition.

Chumparun.—The prospects here are quite as good as in the adjoining district of South Tirhoot, and it is satisfactory to learn that the experience of the past year has had the result of inducing the people to cultivate a much larger breadth of land than usual, much land hitherto fallow having been this year broken up for crops. In Ramnuggur some difficulty in procuring seed has been felt by the poorer ryots, but elsewhere the supplies have been abundant.

Sarun.—There is little change in this district: supplies continue abundant; and prospects are very good; but the general poverty of the cultivators render considerable advances of grain necessary. These are being distributed with as much expedition as is consistent with an adequate inquiry into the circumstances of the borrowers.

South Behar.—The rains here have been as abundant as elsewhere; but while they have been of the greatest benefit to the crops, the unusually heavy rainfall has caused damage to some tracts, as the hill streams, which are numerous in that part of the country, have in several cases overflowed their banks. The most extensive flood seems to have been that caused by the overflow of the Soane near Arrah, but nowhere does it appear that any serious losses have been incurred, and there is still probably time to resow the crops which may have suffered.

Bhagulpore Division.—The reports from this division continue good, and the condition of the people in Bahadoorgunge in Purneah, where distress was reported last fortnight, has much improved. Some slight damage has been done by floods in Monghyr. The zemindars in Soopool, in the Bhagulpore district, are said to have been especially active in assisting their ryots.

Rajshahye Division.—In the Rungpore district this season's rice is said to have already made its appearance in the market, but it does not seem probable that it can have much effect upon the food-supply of the country till the end of August. By that time the whole crop will have been gathered and stored for a sufficient time to render it wholesome. The Collector of Dinagepore, who has written fully on the subject, seems to think that but little of the crop will be available for sale to the public, as most of it will be retained by the growers for their own consumption; but as many of these men are now subsisting on purchased rice, the withdrawal of so much demand will naturally tend to render prices easier for those who have still to buy, and will certainly diminish, though by no means put a stop to, the demand for the Government grain. Mr. Lewis seems to think that as the area under early rice is so much more extensive than usual, it will probably suffice to maintain the growers till the end of January, when the amun crop will be ready for use.

Burdwan Division.—Rain has not been so general or abundant in this division as in the rest of the country, and though there is no great anxiety felt with regard to any of the crops, yet more rain is reported as wanted in Hooghly, Howrah, and the north-east of Midnapore. Throughout the greater part of Midnapore a bumper aous crop is expected. Advances to ryots are being freely given in this division.

Cooch Behar Division, Julpigoree.—No special narrative has been received from this district, but the latest information shows that there is little present distress and every prospect of coming abundance.

Chota Nagpore.—The reports show a great improvement in the condition of the people. At present no part of this division can be considered to be distressed except parts of Maunbhoom, and it is hoped that the autumn crops will bring early relief to this district.

Transport of Grain.—Grain is still going to the Burdwan division, as the recent orders, rendering it imperative on all officers to make advances and pay relief laborers in grain, make it necessary to store grain in all the districts of the division.

Relief Works.—The following statement shows the average number of relief laborers during the fortnight under report as compared with that preceding it:—

| | | Last Fortnight. | This Fortnight. |
|---------------------------|-----|-----------------|-----------------|
| Patna Division | ... | 1,368,087 | 597,962 |
| Gunduk Embankment | ... | 27,574 | 19,848 |
| Soane Canal | ... | 31,945 | 26,352 |
| Bhagulpore Division | ... | 88,448 | 76,724 |
| Rajshahye Division | ... | 155,466 | 107,633 |
| Northern Bengal Railway | ... | 22,622 | 13,274 |
| Burdwan and Chota Nagpore | ... | 72,849 | 51,370 |
| Cooch Behar | ... | 3,741 | Not received. |
| Total | | 1,770,732 | 893,163 |

These returns show a very large decrease over those submitted during the last three months, and as the numbers on the works on the last day of the fortnight were in almost all cases less than the average daily number for the whole period, we may hope for a still further diminution in the numbers during the next fortnight.

The following table shows the numbers employed in each district, with details as far as they are available of those employed on piece-work and daily wages:—

| Divisions. | Names of districts. | Laborers under Public Works Department. | Laborers under Circle officers. | Total Laborers. | Task or piece-work | Daily wages. |
|---------------|------------------------------|---|---------------------------------|-----------------|--------------------|--------------------|
| PATNA | Tirhoot (North) ... | 44,639 | 143,422 | 188,061 | 140,188 | 41,973 |
| | Tirhoot (South) ... | ... | 131,731 | 131,731 | No details. | |
| | Chumparani ... | 42,644 | ... | 42,644 | Ditto. | |
| | Saran ... | 208,549 | 9,548 | 218,097 | Ditto. | |
| | Patna ... | 10,858 | ... | 10,858 | Ditto. | |
| | Gya ... | ... | 2,124 | 2,124 | 1,001 | 1,123 |
| | Shahabad ... | 3,653 | 791 | 4,447 | 4,274 | 173 |
| | Total ... | 310,343 | 287,619 | 597,962 | 151,463 | 43,169 |
| | Gunduk Embankment ... | 19,848 | ... | 19,848 | 34,936 | ... |
| | Soane Canal ... | 26,352 | ... | 26,352 | 26,352 | ... |
| BHAGULPORE | Total ... | 46,200 | ... | 46,200 | 46,200 | ... |
| | Total for Patna Division ... | 356,543 | 287,619 | 644,162 | 212,751 | 43,169 |
| | Moughyr ... | 3,130 | ... | 3,130 | 2,807 | 323 |
| | Bhagulpore ... | 13,086 | 9,761 | 22,847 | 22,779 | 68 |
| | Purneah ... | 10,595 | 16,597 | 27,192 | 27,192 | ... |
| RAJSHAHYE | Sonthal Pergunnahs ... | 23,555 | ... | 23,555 | Chiefly task-work. | ... |
| | Total ... | 50,366 | 26,358 | 76,724 | 52,778 | 301 |
| | Maldah ... | 2,796 | 1,640 | 4,436 | No details. | 25,761 |
| | Dinagpore ... | 32 | 40,513 | 40,515 | 9,405 | Details imperfect. |
| | Rangpore ... | ... | 28,328 | 28,328 | 11,204 | 3,576 |

Gunduk Embankment and Canal.—Work is progressing on the roads and on the canal. About five miles of the latter have been completed. About three miles of the Sarun canal have been put in hand, and labor is said to be much wanted.

Soane Canal.—Work has been much impeded by the heavy rains. About 34 lakhs of cubic feet of earth-work have been completed in the Kurumnassa division during the fortnight.

Northern Bengal Railway.—The work has been much hindered by rain and floods, but notwithstanding 670,000 cubic feet of earth-work have been thrown up during the fortnight. The total work up to date amounts to 6,375,800 cubic feet, equal to 134 miles of 4 feet bank, besides 99 miles of feeder roads. Major Lindsay expects to be able to give employment during the rains to about the same number of work-people as are working now, as he has purposely left a part of the work on the higher ground untouched, so as to give employment to the people during the rainy season.

The following return shows the numbers in the receipt of charitable relief during this fortnight, as compared with that under review in the previous narrative:—

| DIVISIONS. | Names of Districts. | Number of centres | NUMBER ON CHARITABLE RELIEF. | |
|---------------|---------------------------|-------------------|------------------------------|-----------------|
| | | | This fortnight. | Last fortnight. |
| PATNA | Tirhoot, North | 681 | 187,103 | 162,204 |
| | Tirhoot, South | | 21,568 | 13,647 |
| | Chumparun | 50 | 13,552* | 15,684 |
| | Sarun | 18 | 20,955 | 7,122 |

| | Total ... | | 77,171 | 44,784 |
| | Grand Total ... | 1,448 | 525,920 | 404,903 |

* Returns incomplete.

The returns show an increase in all districts except Chumparun, Purneah, Pubna, and Hooghly. In the first-named district the returns are imperfect, and the decrease is probably rather nominal than real; in the remaining districts it is insignificant, except in Pubna, where the inquiries made by the Collector have largely reduced the numbers. Though it can scarcely be expected that these numbers will be largely reduced for some months to come, yet probably they will decrease rather than otherwise, as the present returns show a considerable number of persons who have received a grant of grain on being removed on the relief works, and these will not appear again on the returns. On the other hand, there will be increasing numbers of old and infirm persons, who have hitherto done nominal work on relief works, who will be driven to accept charitable relief from their inability to maintain themselves otherwise.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A. TO THE 21ST SPECIAL NARRATIVE.

Movement of Food-grains.

1. The total exports of food-grains from the Bengal Presidency during June were 14,342 tons; the details are given in Schedule A.

The imports to Calcutta during the same month were 32,883 tons, of which 16,903 were on Government, and 5,980 on private account. The bulk of the latter were from ports on the Orissa and Madras coasts.

The total figures from the beginning of November 1873 to the end of June 1874 are:—

| | | | Tons. |
|------------------------------------|-----|-----|---------|
| Exports from the Bengal Presidency | ... | ... | 240,072 |
| Imports to the port of Calcutta | ... | ... | 436,273 |

2. The following figures show (in tons) the quantity of food-grains "sent up from stations *below* Rajmehal and Jamooee and down from stations *above* Mirzapore, which was delivered at stations between Rajmehal and Buxar (inclusive)" between the 14th and 27th June, compared with the figures for the previous fortnight:—

| | | This fortnight. | Last fortnight. | Decrease. |
|------|-----|-----------------|-----------------|-----------|
| Up | ... | 5,518 | 6,764 | 1,246 |
| Down | ... | 15,173 | 20,190 | 5,017 |

It will be observed from paragraph 4 that there has been a corresponding increase in the river traffic.

The totals to date (from the beginning of November) of the returns on which the above figures are based, and which are for Behar only, are given below. The "Up" figures are only approximately correct. Appendix B, however, shows in detail the destination of all the Government grain sent up from Howrah since the commencement of operations.

| | | | Government grain. | Private grain. | Total. |
|-------|-----|-----|-------------------|----------------|---------|
| Up | ... | ... | 273,638 | 147,615 | 421,253 |
| Down | ... | ... | 39,250 | 184,807 | 224,057 |
| Total | ... | ... | 312,888 | 332,422 | 645,310 |

3. The importations of food-grains to Calcutta by the Eastern Canals, from the 20th June to 3rd July, were 2,264 tons (against 3,394 during the previous fortnight), making 194,690 tons in all since 1st October 1873.

4. The private traffic registered on the Ganges is as shown below:—

| Stations. | Date. | Direction. | Tons. | Up to date from 1st November 1873. Tons. |
|------------|-------------------------------|---------------|-----------|---|
| Sahobgunge | ... 21st June to 4th July ... | Up the Ganges | ... 3,725 | 38,796 |
| Ditto | ... Ditto ditto ... | Down " | ... 1,668 | 13,955 |
| Goalundo | ... 14th to 27th June ... | Up " | ... 2,405 | 27,076 |
| Kooshtea | ... Ditto ditto ... | Down " | ... 116 | 12,715 |

Compared with the fortnightly figures given in last narrative, the figures for the present fortnight show an increase of 3,956 tons in the "Up," and of 1,333 tons in the "Down" traffic.

CALCUTTA,
The 9th July 1874.

G. TOYNBEE, C.S.,
On Special Duty.

SCHEDULE A

Statement showing the Quantity of rice (distinguishing table and other kinds), paddy, wheat, gram, and other food-grains, exported from the Presidency of Bengal for the month of June in the present year, and last year respectively.

No. A, dated Bankipore, the 28th June 1874.

From—A. C. MANGLES, Esq., Collector of Patna,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the following narrative for the fortnight ending Saturday, the 27th instant.

The narratives from the Behar and Barh sub-divisions not having as yet been received, I can only speak regarding the tracts of country comprised in them from information received from other sources, and from letters received from the sub-divisional officers themselves from time to time.

A.—STATE OF THE COUNTRY.

2. The several grain markets of the district continue to be well supplied with all sorts of grains, and no deficiency is reported from anywhere. The figures of private importations continued, up to the 20th instant, to be nearly as high as reported in the last narrative; it having been during the fortnight up to that date 3,49,091 against 3,88,512 maunds. But now, with the constant falls of rain we are having, and the consequent favorable prospects of the coming crops, we may expect the importation to fall off; in fact, I know that they are so falling off, but I trust without any detriment to the requirements of the country.

3. The new siding in the Patna city has not undergone much alteration since the time of my last writing. The kunker for the road has been certainly laid down, but it still remains unrolled. The platform itself is still an unshapely and uneven mass of new earth, and no steps have been taken towards the erection of sheds; at least I could not observe that any such had been taken at the time of my last visit, which was only yesterday. The drain to cross the road diagonally from the level crossing at the north-east corner of the siding and to run into the new cutting is in course of construction; but the work is greatly retarded by the constant and heavy showers of rain we are having at the Patna city station. I am glad to say that there has been a great clearance of the grain lying about; and when the new sheds have been constructed, the roofing for which I saw under preparation, I hope there will be room enough for affording shelter to any further consignments that may come in.

4. The following were the prices of grain prevailing in the principal markets of the district:—

Patna.

| | | | s. | c. |
|--------------|-----|-----|----|----|
| Rice, best | ... | ... | 12 | 0 |
| Rice, common | ... | ... | 13 | 0 |
| Wheat | ... | ... | 17 | 0 |
| Maize | ... | ... | 17 | 0 |
| Barley | ... | ... | 20 | 12 |
| Gram | ... | ... | 21 | 8 |

Dinapore.

| | | | s. | c. | | s. | c. |
|--------------|-----|-----|----|----|----|----|----|
| Rice, best | ... | ... | 9 | 12 | to | 10 | 0 |
| Rice, common | ... | ... | 10 | 8 | to | 11 | 12 |
| Wheat | ... | ... | 15 | 0 | to | 16 | 12 |
| Maize | ... | ... | 17 | 0 | | | |
| Gram | ... | ... | 18 | 0 | | | |

In the interior of the Sudder sub-division rice is selling at 10 to 11 seers, wheat 14 to 16, barley 19 to 21, and gram 18 to 20. In Barh and Behar I do not think that there has been any material change in prices since the submission of my last narrative, but that if anything prices have fallen a little.

5. At the head-quarters we had several heavy and light showers during the fortnight, amounting to 8.70 inches. In Dinapore the fall amounted to 7.75. No return has been received from Barh and Behar sub-divisions, but the fall in those divisions, was, I believe, as heavy as elsewhere.

The sowing of the bhadoi crop has been nearly completed, and the young plants of Indian-corn and maroa are now from 6 inches to a foot high. The broadcast sowing of rice is also nearly completed, and the rice seedlings in the nurseries are looking most flourishing. The weather hitherto has been all that could be desired, as, what with the continual showers, with glimpses of sunshine in between, it has been capital growing weather for the young plants, which look strong and well; but now the cultivators are beginning to call for a little fine weather, to allow of their getting on to their fields to weed them.

6. I may here mention that I have considered it advisable to close as a tentative measure the local fund and relief works on the roads throughout the districts, calling at the same time on the sub-divisional officers, the police, and the zemindars to be doubly watchful, and to bring to my notice at once any village or tract of country in which distress should begin to show itself. My reason for stopping the works were twofold, firstly, because the zemindars and cultivators began to complain that the fields were being neglected, and that enough hands could not be obtained to do the necessary work with the favorable weather that we were having; and secondly, because the Executive Engineer reported that not only would the work on the roads be comparatively useless, but that it would be impossible to find work for the laborers with the side-cuts full of water; and that they would consequently have to sit idle or

nearly so, and become demoralised by getting wages for doing nothing. So great has been the demand for labor in some parts of the district that I have actually heard complaints against the recruiters for the colonies for inducing men to leave their villages and emigrate. Of course, the numbers so emigrating are comparatively very few when compared with the numbers employed on our roads; but I merely mention the fact here, to show that I have not stopped the works without due care and enquiry; and you may rest assured that I will commence them again should necessity arise, which I hope, however, will not be the case.

7. Most favorable reports have reached me as to the productiveness of the soil in those lands on which the new crops have been sown, the young plants being described as much stronger than in ordinary years. This is ascribed by the cultivators themselves to the long continued drought of last year, and to the consequent influence of the sun's rays. This may have had something to do with it, but I should think it was much more likely to be attributable to the fact of the soil having had of necessity a year's rest.

8. No case of misery or starvation was brought to my notice during the fortnight, with the exception of the six cases of professional beggars in Dinapore, as reported in paragraph 6 of my last narrative, who still represent the whole number of those receiving gratuitous relief in this district, and they receive it from private charity. The people now have plenty of grain everywhere, and have no lack of employment.

9. 149 emigrants were recruited and registered in my office during the fortnight for Natal and the Mauritius colonies. They were mostly from Gya and this district, and besides these, I have recruited and sent 31 to Calcutta for British Burmah, I having been asked by Dr. Payne during the fortnight, to recommence the operations which I had previously closed.

10. There were nine cases of grain-thefts reported by the Bengal Police during the fortnight, but mostly of a petty nature and unworthy of notice here. No case of grain-robbery occurred.

B.—RELIEF WORKS.

11. The statement given below will show the number of laborers employed on our several relief works during the week ending the 20th instant, towards the close of which the works were stopped, with the exception of just retaining a sufficient number of men on them to render serviceable by dressing and levelling the work which had already been done.

| <i>Sudder sub-division.</i> | | | Average daily No. |
|---|-----|-----|-------------------|
| Road No. 23, from Ekunger Serai to Mussourhee | ... | ... | 557 |
| " " 9, from Mutopore to Mohabullypore | ... | ... | 463 |
| " " 11, from Nowbutpore to Mussourhee | ... | ... | 126 |
| " " 12, from Durveshpore to Bukrum | ... | ... | 185 |
| " " 22, from Dinapore to Nowbutpore | ... | ... | 110 |
| " " 24, from Rampore to Mohabullypore | ... | ... | 76 |
| Total | | | 1,467 |

| <i>Bark sub-division.</i> | | | |
|----------------------------------|-----|-----|-----|
| Road No. 15, Futwa to Burhea | ... | ... | 884 |
| " " 30, from Mokameh to Surneyra | ... | ... | 115 |
| Total | | | 999 |

| <i>Behar sub-division.</i> | | | |
|-------------------------------------|-----|-----|-------|
| Road No. 29, from Futwa to Behar | ... | ... | 1,154 |
| " " 31, " Bucktearpore to Raneebagh | ... | ... | 3,295 |
| " " 36, " Behar to Asthawan | ... | ... | 1,466 |
| " " 37, " Raggur to Girrick | ... | ... | 775 |
| " " 38, " Futwa to Raneebagh | ... | ... | 1,425 |
| Total | | | 8,115 |

| <i>Dinapore.</i> | | | |
|--|-----|-----|-----|
| Road No. 10, from Phoolwarce to Surowdha | ... | ... | 170 |
| " " 13, " Monair to Purco | ... | ... | 52 |
| " " 14, " Monair to Bihta | ... | ... | 55 |
| Total | | | 277 |

or a grand total of 10,858 (composed of 3,512 men, 5,782 women, and 1,564 children), against 16,846 reported in the last narrative.

12. In closing the above works I issued the following circular to my sub-divisional officers on the 20th instant:—

"The Executive Engineer having brought to my notice that the doing any more earth-work was simply throwing money away so far as the roads themselves were concerned, and that from the appearance of the work-people who come to them there was nothing to show any signs

of distress, I have requested him to issue orders on his overseers to stop all earth-work, except so much as is necessary for rendering serviceable work already done, such as dressing and levelling, and to confine themselves now to the construction of light, inexpensive bridges, over the pynes and water-courses which intersect many of our embanked roads, thus rendering them comparatively useless for wheeled or indeed any sort of traffic.

"2nd.—Should necessity arise, the work now to be abandoned, or some others in their vicinity can be taken in hand again at any time; but I sincerely trust that no such necessity will arise, as with the favorable weather we are now having, the laboring classes should find ample employment in the fields, which is their legitimate work, and from which we should be drawing them to the detriment of the farmer were we to keep our road works open unnecessarily long.

"3rd.—As, however, single and scattered cases of distress may arise, I need not impress upon you how doubly necessary it now is that you should keep yourself well informed of the condition of the people in all parts of your sub-division, and bringing to my notice at once any villages or tracts of country where distress is beginning to show itself, and whence in your opinion assistance should be rendered."

13. The relief works taken in hand by private individuals have been stopped owing to the agricultural operations.

C.—TRANSPORT OF GRAIN.

14. The subjoined statement will show the amount of food-grains imported into this district during the fortnight ending the 20th instant.

| | | | Rice. | Wheat, oat, and barley. | Janera. | Other grains. |
|----------|-----|-----|----------|----------------------------|---------|---------------|
| By rail | ... | ... | 1,13,322 | 1,41,919 | 22,069 | 1,37,021 |
| By river | ... | ... | 6,269 | 59 | | 2,198 |
| Total | ... | ... | 1,19,591 | 1,42,008 | 22,069 | 1,39,219 |

or a grand total of 4,22,887 maunds, whereof 78,796 maunds were Government grain and 3,49,091 belonging to private trade.

D.—STORAGE OF GOVERNMENT GRAIN.

15. I have now got only 2,139 maunds of rice left in the Sudder sub-division, the rest having been forwarded to Tirhoot. Of the 9,000 maunds of grain now left in the Behar sub-division, I have directed the sub-divisional officer to send 5,000 to Tirhoot and to keep 4,000 for any unforeseen emergencies, and as a check on the bunneahs who, if they saw that they had it all their own way as far as Government was concerned, and with very little competition among themselves, might raise their prices unnecessarily high.

16. Acting under the recent Government orders, I am also despatching across the river the grain received from Gya, and have up to date sent some 13,000 maunds, but I regret to say that the weather is most unfavorable for such work. Notwithstanding every precaution, some of the bags got wet from the heavy and penetrating showers which, followed by strong and hot sunshine, causes a damp and steamy atmosphere among the closely packed bags, the consequence of which is that in some instances the grain ferments and becomes unfit for food, and in others it germinates and grows through the bags. Two of the consignments lately received from Gya have been found to be in this state, and it was only yesterday that I received a report from Behar to the effect that, taking advantage of a fine sun-shining day, he had despatched a large number of carts laden with urid and moong for the Sudder station; that the carts had not gone many miles when it clouded over, and that since then they had had almost incessant rain for three days; that the carts had been halted during that time on the banks of a river, which it was impossible for them to cross till the flood or flush caused by the rain had subsided, and that therefore he had sent for them back again, and was greatly afraid that he should find all the grain more or less damaged, though he had taken every care to cover it well over with mats and gunny. As I said before, though every precaution in our power is taken to keep the bags as dry as possible, in most instances the soaking rain finds out some weak point somewhere, and one bag damaged does much to damage all the rest. Unless, therefore, there is the most urgent necessity for the grain being sent at once, I would strongly recommend its despatch being put off for the present.

17. Major deKantzow, whilst deprecating most strongly the transport of grain in this weather, and whilst complaining of the inconvenience caused to himself and those working under him from the stench arising from it, urges us on to send it to him as quickly as possible whilst he has the carts still together, and before they are taken away for indigo manufacture, to say nothing of saving large payments in the way of demurrage, so that it is hard to know what to do, and at the same time most unsatisfactory; for whether one sends it fast or slowly one feels that one is incurring a great expense to Government.

E.—ADVANCES TO PRIVATE PARTIES.

18. None during the fortnight. All the agricultural improvement works for which advances were made have been concluded or brought to a standstill owing to the rain.

F.—CHARITABLE RELIEF.

19.—None in this district.

G.—FINANCIAL RESULTS.

20. As per account already rendered ...

| | | |
|----------|-----|----|
| Rs. | As. | P. |
| 2,55,002 | 6 | 7 |

DURING THE FORTNIGHT.

No. 987F., dated Gya, the 28th June 1874.

From—F. H. SKRINK, Esq., District Grain Officer, for Collector of Gya,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my report on scarcity and relief in the Gya district for the fortnight ending 27th June.

A.—STATE OF THE COUNTRY.

2. The bazars continue to be fairly well supplied at prices which, in spite of the very favorable weather which has prevailed during the fortnight, do not show a marked improvement on those quoted in my last report.

3. The annexed statement will show the number of seers of the different varieties of grain procurable at the chief marts of this district :—

[illegible]

| | |
|-------------------|------|
| Gya | 4.29 |
| Jehanabad | 6.63 |
| Aurangabad | 4.31 |
| Nowada | 8.05 |

4. The rainfall has been heavy and general, as will appear from the marginal statement, which shows the number of inches recorded at the sub-divisional head-quarters. The average for the whole district is nearly 5.8 inches.

6. The consequence of the unusually early setting in of the rains has been most beneficial to all agricultural operations. Paddy sowings are being pushed on with vigor, and will soon be completed. The bhadoi crop may be expected to ripen at least a fortnight earlier than in ordinary years. Murwa and mukai are flourishing, and have been sown over a much larger area than is usually the case.

7. This seasonable weather has produced a decided amelioration in the condition of the laboring classes. All able-bodied laborers may now find employment in the fields, and in Jehanabad several of the pauper inmates of the relief-house have been removed by their friends. The Nowada sub-divisional officer indeed reports an increase in the number of applications for relief under heading "B," and the same is more or less observable throughout the district; but this is probably due to the fact that information as to the terms and nature of the relief afforded is now more widely diffused throughout the district.

8. The reports received from the supervisors confirm the cheerful view I have taken of the situation. No cases of misery or starvation have been brought to light, and I am convinced that a few weeks more of favorable weather will remove all apprehension as to the future.

B.—RELIEF WORK.

9. The rainfall, while it has diminished the necessity for relief works, has interfered with their progress. I append a statement showing the numbers employed on each work.

Fortnight ending 20th June 1874.

| NAME OF WORKS. | ON PIECE-WORK. | | | | ON DAILY WAGE. | | | |
|-----------------------------------|----------------|--------|-----------|--------|----------------|--------|-----------|--------|
| | Men. | Women. | Children. | Total. | Men. | Women. | Children. | Total. |
| Daoodnuggur road | 65 | 15 | 7 | 87 | | | | |
| Surbahda road | | | | ... | 238 | 331 | 15 | 584 |
| Puraya road | 1,063 | 563 | 266 | 1,892 | | | | |
| Bela and Khizer Serai road ... | 649 | 411 | 101 | 1,161 | | | | |
| Sherghotty and Myapore road ... | 152 | 222 | 121 | 495 | | | | |
| Ditto and Imamgunge road ... | 283 | 315 | 260 | 858 | | | | |
| Pukree Barwan road* | 581 | 376 | 355 | 1,312 | 200 | 202 | 64 | 466 |
| Gobindpore road* | 12 | 4 | | 16 | 17 | 8 | | 25 |
| Behar and Rujowlee road* ... | 549 | 1,305 | 618 | 2,472 | 364 | 1,538 | 905 | 2,807 |
| Warishgunge road* | 672 | 477 | 201 | 1,350 | 189 | 206 | 57 | 452 |
| Jehanabad and Hoolasgunge road... | 1,364 | 1,826 | 126 | 3,316 | 977 | 2,996 | | 3,973 |
| Obra road | 176 | 140 | 117 | 433 | 250 | 105 | 65 | 420 |
| Myabigha and Ruffigunge road ... | 804 | 592 | 230 | 1,626 | 177 | 492 | 48 | 707 |
| Tank at Aurungabad* | | | | | 44 | 213 | 13 | 270 |
| Maharajgunge road | | | | | 1,758 | 2,154 | 1,312 | 5,224 |
| Kootoomba road | | | | | 353 | 224 | 128 | 705 |
| Total | | | | 14,018 | | | | 15,723 |

10. There has thus been a decrease of more than 20,000 in the number employed. This decrease is chiefly observable in works on the daily wage system, and is partly due to the cessation of those marked with an asterisk in the above statement. The following comparative statement will show the fluctuations noted:—

| NUMBERS EMPLOYED. | FORTNIGHT ENDING | | Decrease during past fortnight. |
|----------------------|------------------|------------|---------------------------------|
| | 13th June. | 27th June. | |
| Piece-work | 17,430 | 14,018 | 3,412 |
| Daily wage | 32,049 | 15,723 | 16,326 |
| (c) Total | 49,479 | 29,741 | 19,738 |
| Daily average | 3,574 | 2,124 | 1,410 |

11. Cash payments for "piece-work" have been the rule during the past fortnight, but on all works in progress laborers have had the option of exchanging the whole or a part of their wage for Government grain. That this privilege has been largely exercised, will appear from the annexed statement showing the amount recouped by the sale of Government grain.

12. It was considered that by this system all grain required for consumption by laborers and their families would be taken from the Government stock, and that any surplus earnings would be in cash; thus enabling them to purchase a few condiments and luxuries, or to put by any surplus for their agricultural requirements.

Fortnight ending 20th June 1874.

| NAME OF WORK. | Number of laborers. | Amount paid in wages. | | Amount recouped by sale of Government grain. | | REMARKS. |
|-------------------------------------|---------------------|-----------------------|-------|--|-------|----------|
| | | Rs. | A. P. | Rs. | A. P. | |
| Surbahda road | 544 | 43 | 6 8 | 25 | 1 6 | |
| Puraya road, Katari' end | 638 | 62 | 7 8 | 77 | 11 11 | |
| Ditto, Puraya " | 1,254 | 127 | 6 0 | 30 | 8 6 | |
| Bela and Khizer Serai road | 1,161 | 50 | 15 5 | | | |
| Sherghotty and Myapore road | 465 | 130 | 11 3 | 21 | 7 3 | |
| Ditto and Inaungunge road | 558 | | | | | |
| Pukroo Barwan road* | 1,778 | 187 | 15 1 | 171 | 14 7 | |
| Gobindpore rowl* | 41 | 2 | 2 0 | | | |
| Behar and Rujowlee road | 5,300 | 273 | 10 1 | | | |
| Warishgunge road | 1,802 | 207 | 6 11 | | | |
| Jehanabad and Hoolasgunge | 7,280 | 246 | 4 10 | 301 | 10 5 | |
| Obra road | 853 | 40 | 6 0 | | | |
| Myabigha and Ruffigunge road | 2,333 | 55 | 5 11 | | | |
| Aurungabad tank | 270 | 19 | 10 6 | | | |
| Maharajgunge road | 5,224 | 402 | 3 3 | | | |
| Kootoomba " | 705 | 60 | 7 0 | | | |

13. A telegram from the Lieutenant-Governor absolutely prohibiting further cash payment has this day been received, and has been communicated to officers in charge of relief works.

C.—TRANSPORT OF FOOD-GRAIN.

14. There has been a marked decrease in the amount of grain imported, as will appear from the annexed statement:—

| BAZARS. | Wheat. | Barley. | Rice, best. | Rice, common. | Millet. | Maize. | Gram. | Total. |
|-----------------|--------|---------|-------------|---------------|---------|--------|-------|--------|
| Gya ... | 219 | 24 | 5 | 590 | ... | | 166 | 1,004 |
| Nowada ... | | | | 25 | ... | | | 25 |
| Jehanabad ... | 275 | 45 | 125 | 170 | 175 | 45 | 225 | 1,060 |
| Aurungabad ... | 158 | | 13 | 340 | ... | | 150 | 661 |
| Daoodnuggur ... | 250 | 65 | 40 | 325 | ... | ... | 80 | 760 |
| Total ... | 902 | 134 | 183 | 1,450 | 175 | 45 | 621 | 3,510 |

15. The aggregate imports during the previous fortnight were 6,759 maunds. The present return therefore shows a decrease of 3,249 maunds, which is attributable to the fact that the cattle are all employed in agriculture and cannot be spared for transport.

16. The deficiency in the means of transport is a serious evil, and has undoubtedly artificially raised prices in the Sudder bazar. It has also interfered with my arrangements for transporting the 75,000 maunds ordered to Patna. The transport difficulty has been in a measure overcome by the expedient of arranging with traders at Gya and Jehanabad that they should receive a fixed amount of Government grain at Gya and Jehanabad on condition that an equivalent amount should be made over to the Collector of Patna by their agents at the latter place. The evil, however, cannot be fully coped with unless a supply of carts be sent from Patna or elsewhere.

D.—STORAGE OF GOVERNMENT GRAIN.

17. I annex a list of the places selected for the storage of grain. Great care has been taken to keep the golahs in a state of thorough repair, and the stocks have consequently suffered but little from the recent heavy rains.

| GOLAH. | | Quantity originally stored. | QUANTITY ISSUED. | | | | Balance. |
|----------------|-----|-----------------------------|--------------------------|----------------------|-----------------------|--------|----------|
| | | | By sale. | By advance to ryots. | By transfer to Patna. | Total. | |
| Gya | ... | 29,851 | 6,816 | 16 | 5,402 | 12,234 | 17,617 |
| Bela | ... | 3,012 | 11 (Up to 13th June.) | | 253 | 264 | 2,748 |
| Sherghotty | ... | 4,279 | 70 | | | 70 | 4,209 |
| Uttree | ... | 3,930 | | | | | 3,930 |
| Bhelooa Chutti | ... | 991 | | | | | 991 |
| Tuccaree | ... | 2,004 | | | | | 2,004 |
| Futtehpore | ... | 991 | | | | | 991 |
| Imamgunge | ... | 1,435 | 8 | | | 8 | 1,427 |
| Jehanabad | ... | 14,907 | 952 | | | 952 | 13,955 |
| Urwul | ... | 6,958 | | | 3,559 | 3,559 | 3,399 |
| Gundhar | ... | 3,059 | | | | | 3,059 |
| Kinjur | ... | 1,945 | | | | | 1,945 |
| Hoolasgunge | ... | 2,000 | | | | | 2,000 |
| Khazi Serai | ... | 993 | | | | | 993 |
| Nowada | ... | 21,460 | 634 | | | 634 | 20,826 |
| Kadirgunge | ... | 2,814 | | | | | 2,814 |
| Pukree Barwan | ... | 5,182 | 20 | | | 20 | 5,162 |
| Rujowlee | ... | 3,992 | 15 | | | 15 | 3,977 |
| Warishgunge | ... | 2,002 | 28 | | | 28 | 1,974 |
| Aurangabad | ... | 20,777 | 576 | | | 576 | 20,201 |
| Ruffigunge | ... | 3,968 | 111 | | | 111 | 3,857 |
| Kootoomba | ... | 2,997 | 47 | | | 47 | 2,950 |
| War | ... | 4,556 | 92 | | | 92 | 4,464 |
| Daoodnuggur | ... | 4,973 | 72 | | | 72 | 4,901 |
| Total | ... | 1,49,076 | 9,452 | 16 | 9,214 | 18,682 | 1,30,394 |

18. The sub-divisional officer of Jehanabad has managed to despatch 3,559 maunds, 33 seers of rice from Urwul to Patna by boat. He animadverts on the impossibility of obtaining carts for land carriage, as most of the carts in his jurisdiction are already employed in famine transport.

19. I append a statement showing the consumption of Government grain during the past fortnight.

Statement showing the Storage and Consumption of Government Grain in the Gya District for the fortnight ending 27th June 1874.

| NAME OF CIRCLE. | Dates for which figures are given. | Total allotment of Government grain. | Total quantity of grain stored, exclusive of grain transferred to other districts. | TOTAL QUANTITY OF GOVERNMENT GRAIN CONSUMED UP TO DATE. | | | | | | Estimated grain receipts for the ensuing fortnight. | Estimated grain expenditure for the ensuing fortnight. |
|-----------------|------------------------------------|--------------------------------------|--|---|--|----------------------|---------------------|--------|-------|---|--|
| | | | | By sale to the public or laborers. | By gratuitous distribution in any shape. | By advance to ryots. | By payment in kind. | Total. | | | |
| Gya ... | 15th to 27th June | 51,000 | 40,838* | 6,193 | 294 | 418 | 16 | | 6,921 | | 3,000 |
| Nowada ... | 11th to 25th " ... | 33,000 | 35,450 | 500 | 120 | 77 | | | 697 | | 300 |
| Jehanabad | 11th to 25th " ... | 30,000 | 26,303† | 613 | 220 | 87 | | 32 | 953 | | 100 |
| Aurangabad | 11th to 25th " ... | 40,500 | 37,272 | 420 | 370 | 108 | | | 898 | 128 | 1,000 |
| | Total ... | 154,500 | 139,863 | 7,728 | 1,004 | 690 | 16 | 32 | 9,468 | 128 | 4,400 |

* Exclusive of 5,655 maunds transferred to Patna.

† Exclusive of 3,559 " " "

E.—ADVANCES TO PRIVATE PARTIES.

20. The season has, as might have been expected, put a stop to applications for advances under the Land Improvement Act, and none such were received during the fortnight under review. The total number of applications received up to date has been 204, all of which have now been disposed of, 102 having been granted and an equal number rejected.

21. 119 applications from ryots for grain advances have been received in the Sudder sub-division, and 16 of these have been complied with, 53 rejected, and the rest are pending. No precise information on this head has been received from the sub-divisional officers, but I may remark that the Deputy Collector of Jehanabad reports that the return of petitions from the zemindars' endorsement has resulted in the disappearance of 90 per cent. of the applicants.

F.—CHARITABLE RELIEF.

22. The machinery for the administration of charitable relief has been fully detailed in previous report, and the past fortnight has been marked by no material alteration. The special officers deputed on famine duty are all actively engaged in a village-by-village visitation, which cannot fail to elicit all real cases of distress.

23. To the exertion of the supervisors and deputy supervisors in seeking out cases of distress I attribute the increase in the number of recipients of charitable relief, as shown in the annexed table:—

| SUB-DIVISIONS. | B. | C. | D. | Total. | Daily average. |
|----------------|--------|-------|-------|--------|----------------|
| Gya | 5,530 | 514 | 61 | 6,105 | 436 |
| Bela | 1,887 | | | 1,887 | 269 |
| Nowada | 1,750 | 1,502 | 19 | 3,271 | 233 |
| Jehanabad | 1,697 | 6 | | 1,703 | 121 |
| Aurungabad | 5,374 | 1,545 | 14 | 6,933 | 492 |
| Total | 16,238 | 3,567 | 94 | 19,899 | 1,551 |

24. The above statement does not include the number relieved at Sherghotty, whence no return has been received; nor the numbers relieved at Bela from the 20th to 27th inclusive. Making allowance for these, the total number relieved will not have fallen short of 22,400, or the daily average of 1,724, as compared with 15,026 and 1,070 during the previous fortnight. The increase is surely observable in cases coming under heading C, and this is so far a matter for congratulation. The recipients of relief under heading C continues, as might be expected, few.

25. A noticeable feature in charitable relief during the past fortnight has been the issue, in accordance with instructions from the central committee, of blankets to the older and more infirm inmates of our poor-houses, and I am engaged in devising means for affording more extended relief to classes above the position of paupers, but who nevertheless feel the pressure induced by high prices.

G.—FINANCIAL RESULTS.

| | Rs. | A. P. | Rs. | A. P. |

The Collector, owing to indisposition, has been unable to draw up the report.

No. 442, dated Arrah, the 1st July 1874.

From—H. W. ALEXANDER, Esq., Collector of Shahabad,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my fifteenth narrative for the fortnight ending the 27th June.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supplies in the bazars.—The markets in all parts of the district are reported to be sufficiently stocked for all local requirements.

Kinds and prices of grain selling at one or more specified principal marts.—In appendix A, full particulars are given in regard to the kinds and prices of grain selling at the chief marts in the district.

In the Arrah sub-division, as compared with the last return, at Arrah, and Sabar, there has been a slight rise in prices; at Jugdispore and Bindowlia a fall.

In the Buxar sub-division prices have generally fallen.

In the Sasseram sub-division prices have risen slightly in Sasseram, more decidedly at Chennari, while at Akberpore they have remained nearly stationary.

In the Bhubbooa sub-division prices have slightly risen at Bhubbooa, Chynepore and Hatta, and have remained the same at Durganti.

Rainfall.—At Arrah during the fortnight 7.53 inches of rain have fallen; rain is reported to have fallen in the head-quarters sub-division generally; in fact has been abundant, so much so that a little bright weather now would be an agreeable and a beneficial change.

From Buxar Mr. Armstrong reports: "The rain during the fortnight has been heavy, and we have had 9 inches registered at Buxar up to date (26th June)."

Mr. Eyre reports: "Since the night of the 24th the rain has been continuous, and the hill streams Kudra, Kao, and Durganti are in high flood. Ploughing and sowing is for the present impossible. The Durganti, on the bank of which I now am, is very high. The country is one sheet of water. I am informed that the same is the case in the Sasseram sub-division. Traffic, except along the Grand Trunk Road, is quite impossible. The Durganti and Zumaneah road is absolutely submerged."

State of the Crops.—In the Arrah sub-division ploughing and sowing have been carried on wherever possible. In many places the early sowings have germinated, namely rice, maroua, sawan, janera.

On Sunday, and again to a less extent yesterday (Monday), the Soane flooded the lands near Baheera, and Akgaon (two to four miles south of Koolwar) neither flood was excessive; it is generally supposed that the young crops that have been subject to the immediate influence of the rapid stream of the overflow will be totally destroyed. Enquiries have been ordered in regard to the damage so caused, and this will be separately and more fully noticed hereafter.

From Buxar Mr. Armstrong reports, that although the rain has been heavy, there has been a good deal of sunny weather between the falls, so that ploughing has gone on; and the rain having been sufficient for the rice sowings, everything is going on up to date as could be wished, and the people appear generally hopeful of a good season.

In the Sasseram and Bhubbooa sub-divisions, it is impossible to say now what the result will be of the flood previously noticed; the destruction, however, is feared of whatever bhadoi has been sown in low lands, namely, sawant, tangoon, and of nursery and broadcast rice. Enquiries, however, are being instituted over both sub-divisions, and will be duly reported hereafter. The people say that so high a flood of the Durganti has not been known for the last 10 years.

Condition of the people.—The condition of the people remains unchanged. No cases of actual misery and starvation have been brought to light, and every step is taken to meet all cases of distress promptly. Small-pox has very considerably decreased, in fact may be considered to be dying out.

There has been no remarkable increase in the number of grain-thefts. In the Arrah sub-division two cases have occurred, in one eight maunds are reported to have been stolen and in the other, one maund.

In the Buxar sub-division one theft of grain occurred from an unprotected pit near Doomsraon, the grain stolen amounting to 10 seers, and in another 20 maunds of barley are said to have been stolen.

In the Sasseram sub-division six grain burglaries are reported to have occurred during the fortnight, and one grain-theft of 3 maunds of barley. One burglary was of 10 maunds, and the other of 2 maunds 37 seers.

From the Bhubbooa sub-division two petty grain thefts are reported, one of which was of some rice from the Chynepore depôt by some dhunias employed in cleaning cotton. The offenders were punished.

B.—RELIEF WORKS.

In Appendix B are given full particulars in regard to all relief works in progress, and the number of laborers employed on each. The quantity of Government grain sold to the laborers employed on these works is given in a separate statement.

No fresh relief works have been started during the fortnight.

The sub-divisional officer at Buxar reports: "The relief road across the sub-division as nearly reached Itaree, i.e., it is almost completed in the Chousah pergunnah, and the question arises whether it is necessary for us to start fresh relief work for this pergunnah beyond what is afforded by the canals. In my opinion, on the assumption that no applicant for labor will be turned out from the canals, which I am assured is the case, it is unnecessary to open further relief works in Chousah; the canals and the field cultivation now offering sufficient work to all requiring it, and able to do this kind of work."

C.—TRANSPORT OF FOOD.

Private imports and exports by rail to the stations in the Arrah and Buxar sub-divisions are given in Appendix C.

The imports into the Sasseram sub-division during the fortnight are as follows:—

| | | | | | | Mds. |
|----------|----|----|----|----|----|-------------|
| By rail | .. | .. | .. | .. | .. | 978 |
| Interior | .. | .. | .. | .. | .. | 1,775 |
| Exterior | .. | .. | .. | .. | .. | 1,425 |
| | | | | | | <hr/> 4,178 |

The imports into the Bhubhooa sub-division during the fortnight amounted to:—

| | | | | | | M. S. |
|----------|----|----|----|----|----|----------------|
| By rail | .. | .. | .. | .. | .. | 30 |
| Interior | .. | .. | .. | .. | .. | 458 35 |
| Exterior | .. | .. | .. | .. | .. | 1,001 30 |
| | | | | | | <hr/> 1,490 25 |

The decrease, as compared with the preceding fortnight, is due mainly to the difficulty of transport during the rains.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

In regard to the grain intended for storage in the Sasseram and Bhubhooa sub-divisions, Mr. Eyre reports: "The entire consignment of 25,000 maunds has been received. But owing to the floods and the continued rain, I have not attempted to move much of it from the receiving stations where it is safely stored. I have ample in hand on relief works for present requirements. The grain at Zumancah must be moved back to Mogul Serai and despatched thence. The road between Zumancah and Durganti is simply impassable for carts, and the transit of the Kurumuassa a serious obstacle. The contractor's rates have been raised, and measures taken to protect the grain as much as possible from damage on the road. To this end I shall spare no expense."

The mixed grain stored in different golahs in the district has been considerably attacked by weevils, more particularly the gram. Every endeavour has been and is being made to dispose of this grain to the relief laborers before the rice stored, and which is in good preservation, is brought into general consumption. It will take time, however, to get rid of all of this mixed grain, and during this time the insects will not remain idle. Moreover, it is not over-liked by the laborers. I would therefore suggest that it be sold locally, i.e., wherever stored, to mahajuns, &c., in such quantity as they may choose to buy for retail sale. I do not think a fixed price can be put on it; it must be disposed of to the best advantage.

The public will benefit by this arrangement, as this grain when sold will become readily available in different parts of the district; and this is a matter for consideration and of importance at a season like the present, when, owing to heavy rains and floods, it becomes a matter of extreme difficulty and even impossibility to import grain from any distance.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

No advances of any kind have been made during the fortnight.

F.—CHARITABLE RELIEF.

In the Arrah sub-division the relief operations are as follow:—

HEADING B.

Cooked Food.

| | | | Men. | Women. | Children. | Total. | Average. |
|-----------|----|----|------|--------|-----------|--------|----------|
| Moulabag | .. | .. | 295 | 264 | 677 | 1,236 | 82 |
| Gurbanees | .. | .. | 91 | 42 | 17 | 147 | 10 |
| Total | .. | .. | 386 | 306 | 694 | 1,383 | 92 |

HEADING C.

Rope-making.

| | Men. | Women. | Children. | Total. | Average. |
|----------|------|--------|-----------|--------|----------|
| Moulabag | 248 | 69 | ... | 317 | 21 |

Spinning Relief.

| | Men. | Women. | Children. | Total. | Average. |
|----------|------|--------|-----------|--------|----------|
| Moulabag | 127 | 14 | | 141 | 10 |

Road-making.

| | Men. | Women. | Children. | Total. | Average. |
|----------|------|--------|-----------|--------|----------|
| Moulabag | 183 | 133 | 117 | 383 | 26 |

In-door Relief.

| | Men. | Women. | Children. | Total. | Average. |
|------------------------------|------|--------|-----------|--------|----------|
| Moulabag | 12 | 41 | 6 | 59 | 4 |
| Arrah Town | 150 | 900 | 150 | 1,200 | 80 |
| Grand total under Heading C. | 843 | 1,270 | 287 | 2,100 | 141 |

HEADING D.

Uncooked Food.

| | Men. | Women. | Children. | Total. | Average. |
|----------|------|--------|-----------|--------|----------|
| Moulabag | 638 | 1,227 | 104 | 1,969 | 131 |
| Gurbanee | 27 | 42 | 14 | 83 | 6 |
| Total | 665 | 1,269 | 118 | 2,052 | 137 |

Gratuitous Distribution of Money.

| | Men. | Women. | Children. | Total. | Average. |
|------------------------------|-------|--------|-----------|--------|----------|
| Arrah | | 390 | 90 | 525 | 35 |
| Grand total under Heading D. | 710 | 1,659 | 208 | 2,577 | 172 |
| Grand total | 1,639 | 2,235 | 1,189 | 6,060 | 405 |

The following is a statement showing the number of men, women, and children relieved under heading C. fortnight by fortnight from 30th April to 15th June 1874, in the Nonore relief centre:—

| | Men. | Women. | Children. | Total. | Average. |
|--------------------------------------|------|--------|-----------|--------|----------|
| For the fortnight ending 15th May .. | 105 | 28 | 34 | 167 | 11 |
| For the fortnight ending 30th May .. | 56 | ... | ... | 56 | 4 |
| Ditto for 15th June 1874 .. | 51 | 1 | ... | 52 | 4 |
| Total | 212 | 29 | 34 | 275 | 19 |

During the fortnight the three supervising relief officers, and the oanoongo have visited in the—

| | | | | | |
|--------------|-----|-----|-----|-----|--------------|
| Arrah circle | ... | ... | ... | ... | 19 villages. |
| Beheea „ | ... | ... | ... | ... | 0 „ |
| Peroo „ | ... | ... | ... | ... | 37 „ |
| Nonore „ | ... | ... | ... | ... | 16 „ |

In the Buxar sub-division the numbers that have been relieved are as follow:—

HEADING B.

Cooked Food.

| | Men. | Women. | Children. | Total. | Average. |
|---------|------|--------|-----------|--------|----------|
| Chousah | 109 | 173 | 29 | 311 | 22½ |
| Seraya | 32 | 48 | 8 | 88 | 8 |

HEADING C.

Rope-making.

| | Men. | Women. | Children. | Total. | Average. |
|---------|------|--------|-----------|--------|----------|
| Chousah | 78 | ... | ... | 78 | 5½ |

Spinning Relief.

| | Men. | Women. | Children. | Total. |
|---------|------|--------|-----------|--------|
| Chousah | ... | 3 | ... | 3 |
| Saraya | ... | 1 | ... | 1 |

| HEADING | | | | | |
|---------|------|------|--------|--------|-----------|
| | Men. | Wom. | Child. | Total. | Daily av. |
| Chousah | .. | .. | .. | 0 | 4 |
| Saraya | .. | .. | .. | 0 | 6 |
| Buxar | .. | .. | .. | 9 | 2 |
| Berham | .. | .. | .. | | |

Mr. Armstrong further reports : "The three poor-houses at Chousah, Saraya, and Buxar for the Chousah, Doomraon, and Buxar thanas respectively, have now all been opened, and those at Chousah and Saraya have been working during the fortnight. Returns of the relief given in each thana are annexed. The Chousah relief inspector reports having visited 123 villages; the Doomraon relief inspector 85 villages, and the Buxar relief inspector 100 villages. They all assure me that things are going on well; that the rain has been just what is required, and that the people are cheerful about their prospects. I have also again addressed each member of the sub-committees separately, pointing out what their duties are, and with these, and the relief inspectors, and the police and the chowkidars all on the look-out, I think it improbable that distress will anywhere escape notice."

In the Sasseram and Bhubboc sub-divisions the charitable relief operations are as follow :—

| HEADING B. | | | | | |
|----------------------------|------|------|--------|--------|---------|
| Cooked Food at Poor-houses | | | | | |
| | Men. | Wom. | Child. | Total. | Average |
| Sasseram | 310 | 37 | 13 | 360 | 58 |
| Bhubboc | 322 | 45 | | 367 | 81 |
| Jehanabad | | | | | |

Total number relieved under heading B, 2,002.

| HEADING C. | | | | | |
|-------------|------|------|--------|---------|--|
| Rope-making | | | | | |
| | Men. | Wom. | Total. | Average | |
| Sasseram | 413 | ... | 41 | 30 | |
| Bhubboc | ... | ... | 52 | 38 | |
| Chynepore | | | 2 | | |

| Sinner's Debt | | |
|---------------|--|-----|
| Sasseram | | 376 |
| Bhubboc | | 243 |
| Chynepore | | 176 |
| Chand | | 18 |
| Jehanabad | | 26 |
| Mohunia | | 50 |

| Weaving Relief. | | |
|-----------------|----|-----|
| Sasseram | 16 | ... |
| Bhubboc | 45 | ... |
| Chynepore | | ... |

Total number of persons relieved under heading C during the fortnight is 2,145

| HEADING D. | | | | |
|----------------|------|-------|----------|--------|
| Uncooked Food. | | | | |
| | Men. | Women | Children | Total. |
| Sasseram | 22 | 174 | | 199 |
| Bubnowl | 5 | 6 | | 11 |
| Bhubboc | 5 | 2 | | 7 |
| Chynepore | 2 | 3 | | 5 |
| Chand | 54 | 94 | 19 | 167 |
| Jehanabad | 1 | 10 | | 14 |
| Mohunia | 3 | 7 | | 10 |

The Sasseram supervisor has visited 178 villages and 115 persons. The Nakha supervisor had visited 64 villages and 39 persons, and the Dungaen supervisor 92 villages and 40 persons. In the Bhubbhoa sub-division, the Bhubbhoa supervisor visited 117 villages and 65 persons. The Durganti supervisor visited 86 villages and 15 persons, and the Ramghur supervisor 65 villages and 16 persons.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

Is given in a separate statement.

N.B.—My narrative has been delayed a day, owing to the non-receipt of the Bhubbhoa narrative, which was delayed very probably by the rising of the Durganti.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

ARRAH,
The 27th June 1874.

H. W. ALEXANDER,
Collector.

No. 1847F, dated Mozufferpore, the 30th June 1874.

From—C. F. WORSLEY, Esq., Collector of Tirhoot,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative of scarcity and relief in the Hajipore, Tajpore, and Sudder sub-divisions, for the fortnight ending the 27th June 1874.

A.—STATE OF THE COUNTRY.

2. In the Hajipore sub-division prices of food-grains have fallen during the last fortnight.

3. In the Tajpore sub-division prices have generally gone down, and especially in the southern markets of the sub-division. Rice and makai seem the only grains that are really scarce in the bazars; murwa has fallen in price more than any other kind of grain.

4. In the Sudder sub-division prices have generally fallen. In parts of the sub-division, the price of grain in the bazars had fallen below the rates at which Government grain was being sold. This fact must not be taken to indicate that there have been large private importations everywhere where this was observed, but that the prospects of the coming crops are becoming much brighter, and that small stockholders no longer think it expedient to keep back what they have. At the same time it must be remembered that bazar prices have not yet exhibited a decided tendency to a steady diminution. Falls have been spasmodic and have not hitherto continued in any locality long after Government sales have been opened in order to reduce prices below famine rates. The present fall, however, I believe, will not be so short-lived. The prices of Government rice in the town and the country have now been equalized.

5. The subjoined statement will show the price-current of different kinds of grain in some of the principal markets on the 27th instant :—

| NAMES OF MARKETS. | | | | Wheat. | Barley. | Rice, 1st quality. | Rice, 2nd quality. | Indian-corn. | Gram. | Murwa. |
|-------------------|-----|-----|-----|------------------|------------------|--------------------|--------------------|--------------|------------------|--------|
| Hajipore | ... | ... | ... | 13 | 19 | 9 $\frac{3}{4}$ | ... | 16 | 19 | ... |
| Lalganj | ... | ... | ... | 15 $\frac{1}{2}$ | 20 $\frac{1}{2}$ | 10 $\frac{1}{2}$ | ... | 17 | 18 | ... |
| Mowhua | ... | ... | ... | 13 | 16 $\frac{1}{2}$ | 8 $\frac{3}{4}$ | ... | 14 | 16 $\frac{1}{2}$ | ... |
| Tajpore | ... | ... | ... | 12 $\frac{1}{2}$ | 18 $\frac{1}{2}$ | 8 | 10 $\frac{1}{4}$ | ... | 17 $\frac{1}{2}$ | 17 |
| Mozufferpore | ... | ... | ... | 12 | 16 | 8 | 11 | 17 | 16 | ... |

6. The rainfall during the fortnight was as follows :—

| | | | | |
|--------------|-----|-----|------|--------------------------------|
| Hajipore | ... | ... | 8.16 | } from 18th to 27th inclusive. |
| Tajpore | ... | ... | 5.57 | |
| Mozufferpore | ... | ... | 4.69 | |

The fall at Tajpore itself was less than in most other parts of the sub-division. Sun is wanted there now more than rain.

7. In Hajipore, the rainfall has much improved the prospects of the bhadoi crops, and the same satisfactory result is reported from Tajpore. In Mozufferpore prospects are no less favorable. The Rajkhund Circle Relief Superintendent reports as follows :—

“Throughout the circle, the sowing of rice and the planting of murwa is almost entirely completed, and most of the laborers formerly employed on the relief works are now engaged in planting out the young shoots of dhan on the higher ground. The Superintendent has not been able to discover a single instance of ground being left barren on account of the absence of seed-grain, and the ryots to whom advances have been granted have invariably preferred to receive rice in preference to the seed-grain with which they might have been provided at the same rate. The Sub-Deputy Superintendents have been ordered to report on every barren field in their several sub-circles with a view to investigation as to the cause of its not having been sown. Up to the present the only barren land discoverable is stated to have been left vacant for transplanting, since it appears that many ryots, under the impression that their land is unfit for sowing, are in the habit of waiting until they get the opportunity of buying the young shoots of dhan from other cultivators.”

The Belsundh Circle Relief Superintendent writes as follows :—

“Makai, rice, murwa, and satti are everywhere looking well, and growing fast; the rains have been most beneficial, coming as they have in good soaking showers, yet not heavy enough to drown the young plant.”

The Khatra Circle Relief Superintendent reports that the sowings are nearly over, and that the condition of the crops which have begun to appear is good. In short, the accounts that have been received from all parts of the sub-division respecting the crop prospects are satisfactory.

8. The health of the population in Hajipore is good. The people, says Mr. Tute, have begun to take heart. Mr. Wace remarks on the freedom of the people in his sub-division from epidemic of any kind. “In the Bahlempore Circle,” he writes, “where I have spent a good part of the fortnight, I saw a few emaciated babies, but the condition of the mothers of even these could hardly have struck me as abnormal for the class in an ordinary year. I have been over the majority of the relief works during the fortnight, and found the laborers in very fair case.”

The condition of the people in Mozufferpore is good.

B.—RELIEF WORKS.

9. The average daily number of persons employed on relief works is as follows:—

| | | | | | |
|--------------|-----|-----|-----|-----|---------|
| Hajepore | ... | ... | ... | ... | 4,453 |
| Tajpore | ... | ... | ... | ... | 10,680 |
| Mozufferpore | ... | ... | ... | ... | 116,598 |
| Total | ... | ... | ... | ... | 131,731 |

In Hajipore, on many of the relief works the number of laborers has decreased considerably. The rain has withdrawn numbers to agricultural work, and the majority of those that remained were weakly people, who probably would not have found employment in the fields. At Chitwara, however, the number of persons employed on relief works had not been perceptibly reduced, and this was the case also at Chaptah. In Tajpore the number of relief laborers has not decreased much. "Men, however," says Mr. Wace, "number fewer, and if you strike out from the returns the Ganges Embankment, which was started not with a view to relief, but for protection of the railway, you will find that about 2,000 laborers, or a fourth of the whole number on actual relief, have gone off to field-work."

In Mozufferpore the numbers in nearly all circles have decreased considerably, and several tank-works have been closed. Large numbers of persons must, however, be shortly expected to return for Government work. It will shortly be necessary to close all the tanks, but the improvement of village roads, and the maintenance of proper communication between villages and relief centres, will give sufficient employment. In some parts of the sub-division it has been reported difficult to induce persons to leave the Government works for other employment. The Circle Relief Superintendent of Belsundh thus writes:—"In spite of paying more than three times the ordinary rates, Mr. Manners cannot get as many hands as he requires to weed his indigo." All Circle Officers have been properly instructed to take care that agricultural operations do not suffer from the employment we offer; and considering the small number of laborers employed in the Belsundh Circle, and that, as a rule, the smallest reductions have taken place in circles administered by planters, I think the Belsundh Superintendent cannot fairly attribute the scarcity of labor in his circle to the influence of the relief works. In the Rajkhund Circle, "relief works were gradually closed from the 14th to the 18th, and are now being reopened where it becomes necessary. The number at present employed does not, however, much exceed 2,000, of all ages and sexes, of which only 343 are able-bodied men." Mr. Swaine, of Athar Factory, in order to find out if relief works were still necessary in his circle, reduced the rate of his wages from one anna to two-thirds of an anna. All his men then struck in a body; after three days they returned, and he paid them at the reduced rate, but as the numbers began to increase and the rate paid was insufficient, he resumed payments at the previous rate. Payments of grain have been universally made in all the relief circles of the Sudder sub-division with one exception. Mr. Smith, an indigo planter of Bhikanpore, had kindly undertaken the management of some relief works. It was impossible to send him grain from this, as all available carriage was wanted elsewhere, and he made no arrangements himself to supply his laborers with grain. It was necessary then to supply him with funds. No further cash payments will, however, be made to laborers even on his works.

In Hajipore grain payments seem to have been generally introduced, though Mr. Tute makes no direct assertion to that effect in his narrative. He has been asked to report on the matter. "In Tajpore," writes the Sub-Divisional Officer, "grain payments are everywhere in progress except in the Narhan Circle, and on the Narhan and Dulsingserai and Jitwarpore-Dulsingserai roads." The Sub-Divisional Officer has been asked to explain why grain payments are not made on those roads. On the subject of grain payments he thus writes—"If anything hampers the work (Ganges Embankments), it will be the system of grain payments. I was over the embankment a few days ago. The people grumbled at being paid in rice when they could get cheaper grain for money in the bazars, and those living at a distance (some have come from some miles across the river) implored to be paid in money at least every other day. They said they could not send the rice they earned to their families. If these men desert, as I think not improbable, and the river continues to rise as fast as it has lately, the work will not only not be finished, but much that has been done will be undone." In this one instance, which has been verbally represented to His Honor the Lieutenant-Governor, it would, I think, be desirable to make cash payments to such laborers as come across the river to work.

C.—TRANSPORT OF FOOD.

10. Under this head Mr. Wace suggests that the Transport Department be asked to take up all bridges not now required for use, as they block the river traffic. Now that the rivers are rising, waterway importations by this sub-division are increasing. Private importations by carts have not increased much.

D.—STORAGE OF GRAIN.

11. The annexed table shows what grain had been stored:—

| | | | | | |
|--------------|-----|-----|-----|-----|----------|
| | | | | | Mounds. |
| Hajipore | ... | ... | ... | ... | 5,129 |
| Tajpore | ... | ... | ... | ... | 21,660 |
| Mozufferpore | ... | ... | ... | ... | 3,70,610 |

Progress has been made in the storage of grain in the opium godown at Mozufferpore, but carts have not been coming in so quickly as they did at first. A good deal of grain arrived in a damaged condition. Good progress has been made in the storage of mofussil golahs.

E.—ADVANCES.

12. Fair progress has been made in the matter of advances. I believe that the next narrative will show a further improvement. The liberal terms offered to zemindars should encourage many to come forward on behalf of their tenants; at the same time it is evident that many are averse to their ryots' receiving advances from Government. One gentleman, a European indigo planter, objects to taking advances for his ryots on the liberal terms recently offered by Government. He writes—"In giving out loans to my ryots, I agreed to stand their security, and did so, because I thought it only fair to both parties in my double capacity of Government agent and zemindar to make such an offer; but I would no more accept terms differing from those I myself give the ryot, than I would take pay for my services as Superintendent of a circle." This gentleman forgets that he can, if he likes, give his ryots the full benefit of the advantages offered by Government.

F.—CHARITABLE RELIEF.

13. The subjoined table shows the number of persons in receipt of charitable relief. It will be seen they have increased during the fortnight :—

| | | | | |
|--------------|-----|-----|-----|--------|
| Hajipore | ... | ... | ... | 2,398 |
| Tajpore | ... | ... | ... | 4,040 |
| Mozufferpore | ... | ... | ... | 15,130 |

The expenditure under this head will probably be greater during the ensuing fortnight.

G.—FINANCIAL RESULTS.

14. The annexed table shows our expenditure for Hajipore, Tajpore, and Mozufferpore for the fortnight under review :—

MOZUFFERPORE SUB-DIVISION.

MOZUFFERPORE,
The 1st July 1874.

T. E. COXHEAD,
District Relief Officer, for Collector.

* This amount was sanctioned in Commissioner's No. 114F, dated 11th May, 1874, before grain advances were ordered to be substituted for money advances.

No. 769, dated Durbhunga, the 29th June 1874.

From—C. T. METCALFE, Esq., Additional Commissioner, Durbhunga,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending the 27th of June 1874. A pleasant fortnight of rains and cool eastern breezes. The whole aspect of the country has changed. The dry and parched fields, which in May were devoid of all signs of vegetable life, are now covered with rising crops of rice, murwa, sugarcane, and in the north with Indian-corn.

STATE OF THE COUNTRY.

2. Although the prospects of a good harvest are abundant, the whole cultivation of the country, when closely examined, is at present in a very backward state. It is customary for all fields at the first early fall to be turned with the spade. This has not been done, and in many villages the complaint is that field labor is not obtainable.

3. I have just returned from a tour in pergunnah Allapur, and I find the condition of the crops very different in different localities. About Bheya the Extra Assistant Commissioner informs me that many of the laborers are idling their time. At Bhat the villagers are entirely neglecting the preparation of their rice fields, on the ground that they had plenty of occupation in working for the sarkar, and would attend to their fields by-and-by. The occupation alluded to was in constructing stabling for a detachment of ponies. The country to the west of Narayah has been markedly neglected. I found laborers at work here under the Court of Wards, who admitted that they had not touched their fields. The reasons assigned by agriculturists for the present state of things, varying of course in different localities, are—

1st—that the laborer, released from the roads and tanks, has now gone to weed the indigo;

2nd—that the rice seedlings are very backward and unfit to be planted;

3rd—that the fields require more rain to moisten the ground before they can plant the rice;

4th—that the empty fields are held by those who have no seed; and

5th—that many of the cultivators were still absent with their carts on transport.

4. I do not desire to convey the meaning that the population at large wilfully intend to neglect agriculture altogether. It may be that matters will mend hereafter, but still the fact is that the land is not being tilled this year in the manner to which it is accustomed, and I conclude that, however excellent the harvest prospects may be, the want of culture must affect the produce.

5. The behaviour of the people seems, too, to have varied in different localities. In Durbhunga the Magistrate writes:—"The people, after the heavy rain, everywhere abandoned the relief works, and flocked of their own accord to the field; thus refuting the fears that were entertained of possible hindrance to agricultural operations by preference for relief works." Mr. Macdonell writes:—"The result of my late inspection of the country is that, up to the 20th, about 10 annas of the bhadoi crop had been sown, and the remainder was being sown. The seeds had everywhere germinated well, and gave promise in many places of a good harvest. Of the area devoted to boro dhan, i.e., sown broadcast, about half has been sown; of the roopit, or planted dhan, only 6 annas have been sown.

6. In Poopree parts of the country are still to be seen unploughed. The chief reason of this is not the weakness or poverty of the cultivators, but is owing to the backwardness of the dhan seedlings, and is due to the lateness of the early rains. Were these lands ploughed in the rain, they might not retain sufficient moisture for the reception of the seedlings, but by postponing the ploughing until the seedlings are ready, the moisture remains undisturbed.

7. From Mudhoobunnee the report is that the weather during the fortnight has been eminently favorable for agricultural purposes. In Mudhoobunnee more than two-thirds of the bhadoi and one-half of the paddy lands have been sown. In Oomgaon most of the fields have been sown, and the young crops are reported to be in good condition. In Bukwar fields have been well ploughed, and the early crops bid fair to yield a more than average harvest.

8. From Motipore sowings are reported as going on freely, and the relief officer from Jhanjarpore reports a large extent of land sown. The raj sub-manager reports that in Motipore the cultivation is very backward, and that but little is being done to the fields.

9. In Jhanjarpore I was struck by the large extent of unprepared lands. The subdivisional officer's remarks on this point are:—"The report* is based on insufficient grounds; I have visited the whole circle, and it is all in process of cultivation, except a grass tract. The fact of the matter is that the Brahmins are the complainants, as they cannot as heretofore get their ploughing done for nothing."

10. In the Kuchra circle the crops are reported as being very forward. Before I leave the subject of the state of cultivation, I would refer to a fact which strikes me very forcibly, viz., the preference shown for the cultivation of the coarser grains, such as murwa, in preference to Indian-corn. A large area of the country is admirably adapted for the latter crop, but is sparsely sown. I am told by the proprietor of a very large indigo concern that he has frequently offered part of his home-cultivation free of rent to his tenants to grow Indian-corn side by side with his own, but that they do not care to take the trouble. If questioned on this point, the ryot alleges as an excuse that the monkeys and jackals would

* From the Assistant Manager, Raj Durbhunga.

eat up the crop, and this deters him. About Kumtoul there are a few monkeys and many jackals, and there may be some truth that they are destructive. About Muddheypore the monkeys do abound in great numbers, and would no doubt do great damage to the crops, but over other large tracts there are no monkeys to be found; and the truth I believe lies in this, that in the villages inhabited by the higher castes, they do not devote that attention to crops which the lower castes do, and that as the murwa crop requires but little labor, they through laziness prefer to grow it. I find the Indian-corn grown in villages where the laborers are essentially of low caste. I enter into these particulars, for it seems to me that a very early bhadoi crop is wilfully neglected by large numbers of agriculturists. The earliest crop will be reaped in the Narayah circle, where murwa is already in some places in ear and promises well. Next will follow the sathce crop in September.

11. I would venture also to state that the murwa crop is a much more extensive crop than is generally known. Let it be remembered that since the last murwa crop, the whole population, till the Government stores were opened, were existing on this; and yet that after all this enormous consumption, there was still sufficient for seed, and I have no doubt but that many persons still live on it. The murwa crop may therefore be reckoned as one of the staple crops of the country. On this point a good deal at present turns, for if by the end of July a good murwa harvest is reaped, the Government need have no further apprehensions of scarcity, followed, as this crop will be, by the Assin rice.

12. *Rainfall.*—All over the Durbhunga sub-division rain has fallen plentifully; at the Sudder station 5 inches have been registered. In Bahera and Singhea the fall has averaged 10 inches. Mr. Macdonnell writes: "The fears of an indefinite prolongation of the present famine have been dispelled. The effect of the rainfall on the country has been marvellous. The ground, which at the time of last report was devoid of verdure and baked by a four months' heat, now presents a rich verdant aspect." The centre, southern, and western parts of the Poopree sub-division have been visited with a very fair amount of rain; at Poopree itself the gauge shews over 14 inches to have fallen since the beginning of the month; something less than this—3 to 4 inches less—has fallen to the south-east and west of Poopree; towards the north, at Parihar, there have been about 8 inches; and in the Cherute circle a good shower—from 3 to 4 inches—fell on the 18th and 19th, which did an immense deal of good. Indeed, before this shower fell, I was very apprehensive regarding this circle, as the dhan seedlings were looking very stunted and thirsty, but the inhabitants are now as busy there as in all the other parts of the sub-division in transplanting their dhan and finishing their bhadoi sowings. Further falls of rain are still required, though the last few days of fine weather have been useful for crops which required weeding.

13. *Price-current for the fortnight under report.*

| NAME OF PLACE. | Wheat. | Barley. | Rice. | Millet. | Indian-corn. | Gram. |
|----------------|-----------|---------|------------|---------|--------------|-------|
| Durbhunga | 13 | 17½ | 9½ | 15 | 16 | 1½ |
| Bahera | 13½ | | 12 to 13½ | | | 13 |
| Rosera | 13½ to 14 | | 12 to 13½ | 17½ | | 18½ |
| Singhea | 11½ | | 12 to 13½ | 12½ | | 12½ |
| Mudhoobunnee | 10 | | 9 to 10 | 12 | 11 | 12½ |
| Khojowlee | 10 | 16 | 12 to 14 | 12 | 13 | 16 |
| Lowkaha | 11 | 13 | 11 to 13 | 13 | 13 | 13 |
| Harikhee | 13 | | 10 to 11 | | | 13 |
| Ladana | 10 | | 12 to 13½ | 11 | | |
| Banceputee | 14 | 10 | 12 to 14 | 15 | | 16 |
| Seotamurhee | 12½ | 15 | 10½ to 11½ | 15 | 13 | 16½ |
| Shewhur | 14 | | 12 to 13 | 15 | 18 | 16 |
| Jalleh | 14 | 16 | 12 to 13 | 13 | | 16 |
| Sunbersa | 14 | 17 | 12 to 13 | 10 | | 16 |

14. *Seed.*—On this important subject I make the following extracts from the sub-divisional reports.

Narayah.—"A few thousand maunds of dhan-seed were obtained in exchange for rice, but I soon found that there was no real necessity for these exchanges. What with the private stores and advances by the Court of Wards, a great part of this sub-division was well supplied. Muddheypore was worst supplied, but the deficiency has been made good from imported seed."

Mudhoobunnee.—"It has been ascertained that the amount of seed-grain is vastly greater than was believed to exist, and there is at present no apprehension that any very considerable portion of the land will remain unsown through want of seed. This is a fortunate circumstance, as little of the seed that was allotted has been received, and the season for sowing is too far advanced for the imported seed now to be of much good. The cultivators do not readily purchase seed from our golahs, as those who have money prefer to procure the seed they are accustomed to."

The seed disposed of has been chiefly distributed in the shape of gifts to cultivators.

In Durbhunga no lack of dhan-seed has been experienced, while of bhadoi ample has been forthcoming.

In many places the sowings have been very thin, and the outturn will necessarily be very small.

RELIEF WORKS.

15. During the fortnight payment in grain has been universally carried out, except on a contract road in Narayah, about a mile of which only remained to be completed. The Public Works Department at Bahera adopted a system which, till explained, led me to believe that grain payments were not enforced, viz., drawing cash from the treasury, and buying grain through bunniahs in place of indenting on the golahdars. I have written to desire that this arrangement may be altered. A sufficient number of tokens have now been received, and if Public Works officers find any difficulty in paying grain, these can now be used.

16. The following statement shews the expenditure under this head:—

| | | | | | |
|------------------|-----|-----|-----|-----|--------|
| Durbhunga ... | ... | ... | ... | ... | 6,556 |
| Hathee ... | ... | ... | ... | ... | 12,147 |
| Sectamurhee ... | ... | ... | ... | ... | 13,257 |
| Poopree ... | ... | ... | ... | ... | 7,761 |
| Mudhoobunnee ... | ... | ... | ... | ... | 6,420 |
| Narayah ... | ... | ... | ... | ... | 7,131 |
| Total | | | | | 53,272 |

17. The statement in the appendix shows the average daily number of laborers.

In Bukwah there are now only 400 laborers on relief works, and in Umgaon not more than 1,300. In Motipore there has been a decrease of 700 on the tanks, but there are still 3,000 on works. In the Mudhoobunnee sub-division, including the above numbers, there has been a decrease of about 18,000.

In Durbhunga, on the works managed by the circle officers there was an average of 39,921, and in Public Works 9,230, figures which, compared with the last fortnight, show a great decrease.

| NAME OF SUB-DIVISION. | Daily average of laborers on relief-works. | Public Works. | | Circle Officers. | | Court of Wards. | |
|---------------------------------|--|---------------|--------------|------------------|--------------|-----------------|--------------|
| | | Task-work. | Daily wages. | Task-work. | Daily wages. | Task-work. | Daily wages. |
| Mudhoobunnee ... | 79,081 | 17,786 | 9,075 | 25,226 | 26,994 | | |
| Durbhunga, including Hathee ... | 49,201 | 9,280 | | 39,921 | | | |
| Sectamurhee ... | 15,757 | 5,778 | 935 | 7,405 | 1,639 | | |
| Poopree ... | 9,370 | 1,785 | | 7,585 | | | |
| Narayah ... | 34,652 | | | 19,236 | 2,854 | 12,186 | 376 |
| Total ... | 188,061 | 34,629 | 10,010 | 99,373 | 31,487 | 12,186 | 376 |

There has been a still further decrease in the Mudhoobunnee sub-division. On task-work there are now, under Public Work officers, 11,892, and 7,719 on daily wages; under circle officers, 5,372 on task-work and 8,984 on daily wages.

STORAGE OF GOVERNMENT GRAIN.

GRAIN SALES.

22. The following statement, given for the purposes of comparison, shows the sales up to the present and to the past fortnight:—

| | | Present. | Past. | Increase of mds. |
|-------------|-----|----------|----------|------------------|
| Durbhunga | ... | 28,261 | 24,227 | |
| Mahomedpore | ... | 47,166 | 38,944 | |
| Hyaghat | ... | 19,229 | 22,755 | |
| Warisnuggur | ... | 10,970 | 7,804 | |
| Bundhar | ... | 3,283 | 2,247 | |
| Dosowta | ... | 22,864 | 18,796 | |
| Gungdah | ... | 11,106 | 9,214 | |
| Singhea | ... | 12,057 | 8,865 | |
| Rohur | ... | 10,136 | 11,518 | |
| Hirnee | ... | 2,156 | 2,113 | |
| Husunpore | ... | 7,460 | 5,062 | |
| Lehra | ... | 3,035 | 2,500 | |
| Total | ... | 1,77,723 | 1,54,045 | 23,678 |

If to this be added 13,847 paid in kind to labourers, advances to ryots, sales to the public, we have a total public demand of 70,076 maunds, excluding expenditure on charitable relief.

23. For the other sub-divisions the demand was as follows:—

| | | | |
|--------------|-----|----------|--------|
| Mudhoobunnee | ... | ... | 7,790 |
| Narayah | ... | ... | 33,406 |
| Poopree | ... | ... | 32,157 |
| Seetamurhee | ... | ... | 42,580 |
| Total | ... | 1,15,933 | |

On the subject of stocks, Mr. Mosley reports the grain will more than hold out, except perhaps in Perozghur, where there will be a deficiency if the present rate of relief is kept up. I expect to be able to supply any deficiencies by transfer from Narayah. Sales in this sub-division have decreased. The Magistrate of Mudhoobunnee reports the consumption of grain during this month has fallen considerably below the estimated amount. The quantity consumed in Umgaon was very small.

In Motipore and Jhanjharpore sales have steadily increased. Mr. Magrath is of opinion that the earlier sales were to those who, being possessed of means, laid in sufficient to last for a considerable time, anticipating that the Government stores would be exhausted, and that subsequently the sales become duller. The rain, too, has been a preventive cause of people conveying more than a small quantity at a time.

PRIVATE IMPORTATIONS.

24. Although private importations of pulse grain have commenced, no outside rice is coming into the market. Boats are reported as coming up the Koraie in twos and threes, and strings of pack-bullocks, too, may be seen importing private grain, wholly pulses.

The prospects of an early harvest have induced persons to be more open in their information regarding private grain stores. It has transpired that many persons have held large stocks which they have refused to sell, and that only would have been forthcoming had prices risen so high as 7 seers. This rate seems the *summum bonum* of the holders' expectation. The grain, I am told, is mostly buried, and is the accumulation of years. I am also informed that even in the most brisk periods of exportation the surplus stores are very large, and are hidden in regular pits under ground. Here they remain for years, till droughts happen, and are then sold sparingly at prices 7 to (for fine rice) 5 seers per rupee. In the hard times of 1865 the prices actually fell to 5 seers, and the same no doubt would have happened this year had not the Government poured grain into the country. The Government rates have thus kept the private grain at 9 seers. A seven-seer rate is virtually, as far as the poorer classes are concerned, equivalent to a total absence of grain, for they cannot afford to buy it, and therefore these hidden stores were, as far as the poorer classes were concerned, of no appreciable benefit; but for the Government grain and the Government pecuniary aid they must have perished. The pecuniary aid they received gave them at least the power to buy, and they purchased at first the cheapest of all grains, the murwa; subsequently they took more to cargo rice, but among the mysteries of this grain question we have the clearest evidence in one point, viz., that rice grain trade there was none. One firm, that of Baboo Bunwaree Lall, remitted two lakhs to Sherghotty to purchase grain, but the difficulty of procuring carriage has prevented it from being imported. The facts, then, are these, that rice raised from these private grain stores would never have reached either the poverty-stricken population or the poorer agriculturists. It might, and probably would have reached in June the agricultural classes, tenants of those who held the grain, but in the meantime death would have carried off a very large mass of the population.

25. I subjoin the names of persons at present known to hold stock.

| Name of locality. | Name of stock-holders. | Estimated amount. |
|--------------------|--------------------------------------|-------------------|
| | | Mds. |
| Durbhunga | Town stock-holders | 25,000 |
| Lowana | Cultivators | 25,000 |
| Dilawarpore | Chowdhry | 60,000 |
| Jalwara | Cultivators | 25,000 |
| Chuparee | Moharane Sreemuttee | 50,000* |
| Lehra | Ramdut Chowdhry | 50,000 |
| Patour | Baboo | 50,000 |
| Singhea | Dabeepersad | 1,00,000 |
| Pindarose | Mitter Lal | 10,000 |
| Mirzapore | Mohunt Luchmun Doss | 1,60,000 |
| Bhurgam | Thikadar under Court of Wards | 20,000 |
| Dhogam | Talabur Singh and others | 50,000 |

* Chiefly seed.

26. These grain stores are, then, in the hands not of professional grain-dealers, but, if I may use the term, of the landed country gentry. The possession of these stores forms as much a title to respectability as a good balance at the bankers. The owners have apparently no desire to part with these stocks for the sake of gain only. It is not in their nature to sell cheap for philanthropy's sake, but they will sell a part for excessive gains, and a part they feel they must retain to feed the better class of their tenants during the months when, although agriculture must be attended to, they require grain advances to sustain them. It is therefore a mistake to argue that high prices alone will bring out the grain. It will do nothing of the kind, for the tendency is to wait, and wait till the highest price is reached, which in Indian agricultural life means till starvation and death have cleared the villages of many thousands.

I understand, then, that it is this knowledge amongst natives of the tenacious withholding of grain that prompts them to advocate such measures as the fixing of a 'nirick.' They argue, and with reason: "if these landed gentry once understand that they cannot sell beyond a certain price, they have no inducement to withhold the grain from us now."

CHARITABLE RELIEF.

• 27. In Durbhunga the returns shew a great increase over the numbers given in the last narrative. In the Singhea circle the figures have risen from 14,802 to 21,203, including 11,432 children. This is due to grain given to laborers leaving the works as sustenance during the time they may be employed on field-labor being debited to charitable relief. In the Hussanpore circle, the relief officer has used but little judgment in bringing persons on his lists, and in a great measure these details have to be revised. Relief has been given to many persons to whom it should not have been extended.

The characteristics of villagers in this respect vary in different localities. In some places persons of all castes are averse to receiving relief, and indeed seem ashamed of it. In other places even well-to-do persons have no scruples in duping the group inspectors. In the Gungdar and Rohar circles, the increase arises from the number of Brahmins having taken relief.

28. *Relief to Tirhootea Brahmins.*—During the fortnight, relief officers and inspectors have devoted their attention to this class. In Hyaghât, where very careful enquiries have been made, this class are found to exist in considerable numbers only in 8 villages, and in inconsiderable numbers in 12 more. These families have received grain at the rate of half a maund a head. In the Mahomedpore circle similar action has been carefully taken. Here the majority of indigent Brahmins refuse to receive relief gratis. Rice will be sold to them at nominal rates. In the Warisnuggur circle, 696 Brahmins, 94 Rajputs, 1,213 weavers, 124 artizans, such as carpenters, oilmen, potters, are in the receipt of assistance.

In the Pergeghur circle of the Narayah relief division there are upwards of 19,000 shown as receiving relief. I have deputed two other officers, an European and native, to revise these lists, as I am not satisfied that the relief officer has exercised sufficient judgment in dispensing charity.

In Mudhoobunnee there have been no fluctuations in numbers. Printed tickets have been issued in place of slips of ordinary paper. In some cases the substitution of these tickets, the Magistrate reports, have produced an extraordinary effect; numbers of persons in the Kuchra circle requested that their names might be erased from the list.

An explanation of this will be shortly furnished; various surmises have been raised.

In Umgaon the relief officer writes:—"In one sub-circle, half of those receiving charitable relief ceased to apply for it after having received the new tickets."

29. The following statement shows the number of persons on charitable relief:—

| Name of Circle. | | | | NUMBER ON CHARITABLE RELIEF. | |

30. *Miscellaneous.*—The Magistrate of Durbhunga in his report refers to the liberality of Baboos Gunewar and Gopeswar Singh of the Durbhunga family, the former of whom has advanced upwards of Rs. 13,500 in cash and 4,403 maunds of grain to his tenantry, and has given Rs. 4,000 to the local fund. The latter has carried out several relief works, and has subscribed Rs. 4,000 to the local famine fund. To his ryots he has also made advances, and has rendered every assistance in his power to the relief officer of Rohar, placing Rs. 4,000 at his disposal to relieve such cases of distress amongst his tenants as might come to Mr. Harris's notice. I have much pleasure in bringing these two instances to the notice of Government. Both zemindars have acted in a praiseworthy, liberal spirit.

C. T. METCALFE,
Additional Commissioner.

No. 3423—F, dated Sarun, the 3rd July 1874.

Memo. by—J. S. DRUMMOND, Esq., Offg. Magistrate and Collector of Sarun.

FORWARDED to the Secretary to the Government of Bengal in the Statistical Department, Calcutta, for information, with reference to his circular No. 80 of the 17th November 1873.

Narrative of Scarcity and Relief in the Sarun District for the Fortnight ending the 27th June 1874.

A.—STATE OF THE COUNTRY.

Abundance or Scarcity of Supply in the Bazar.

It was thought that with the rising of the rivers importations would largely increase, but this anticipation has not been fulfilled, there being a still greater falling off in the grain imports during the present fortnight, mainly in the Sewan sub-division, where the imports had decreased by more than one-half. The markets, however, continue to be sufficiently supplied, the demand being considerably reduced by the large advances being made to the cultivators.

2. In the Sudder sub-division during the fortnight the imports were: at Revelgunge, 33,200 maunds—nearly all barley, wheat, and gram; at Dooreegunge, 5,048 maunds; at Maharajgunge, 922 maunds, and from Chumparun, 590 maunds. The exports to Tirhoot and Chumparun amounted to 1,694 and 1,346 maunds respectively.

3. Mr. Tonnerre, in charge of the Manjhee sub-division, writes:—

“The imports from Revelgunge and Maharajgunge are going on very slowly; most of the pack-bullocks passing through Ekma take grain from Revelgunge to Maharajgunge, but do not stop in this sub-division.”

4. Mr. Barry, in charge of the Pursa sub-division, writes concerning the prices in his sub-division, as follows:—

“It is worthy of note that the lowest quotations are from the bazar in the Digwara thana, and that the grains are dearest in the northern part of the Pursa thana.”

And he adds as to supplies—

“There seems to be a fair supply of grain in the market, and I have constantly met strings of bullocks laden with grains: on the whole, the markets seem to be easier. I understand that ‘chunna’ is selling at 21 seers in Patna, and I met a number of cartmen returning home from the transport service in Tirhoot laden with this pulse. Such a cheap rate in Patna cannot but affect the rates in this sub-division. I also hear grain is cheap in Lalgunge bazar, in Tirhoot, just on the other side of the Gunduk, but I have not yet received details of the rates.”

5. The following is Mr. Wright's report of the Sewan sub-division:—

“Private importation of grain has fallen off considerably during the past fortnight, but the bazars in the division continue to be fully supplied. The private importations at Darowlee, Sewan, Siswan, and Guthani, during the period under report, amounted only to 23,774 maunds.”

6. Regarding the Huttwa sub-division, Mr. Hodgkinson writes thus:—

“Prices continue to be much lower than they were a month or six weeks ago. The drain upon existing stocks has been materially reduced by the large distribution of advances, and there can be little doubt that, supplemented by our supplies, they will prove to be more than sufficient to carry the population on to the autumn harvest, particularly if the present prospect of an early harvest is realised.”

Kind and Price of Grain selling at the different Marts.

7. The kind and price of grain selling at the principal marts and at the thanas and outposts are given in the annexed statement.

8. With the exception of Gurkha, Bussantpore, Bunniahpore, and Pursa in the Sudder sub-division, and Burhurria, Semmaria, Darowlee, Roghoonathpore, and Burowlee in the Sewan sub-division, where prices are either stationary or show an upward tendency, prices have fallen still further during the fortnight, owing to the continued favorable prospects for the next harvest, and the diminution of the demand on the markets by the distribution of grain advances to the cultivators.

Stock of Food in the hands of the People.

9. Under this head Major Jackson, in charge of the Chupra sub-division, writes thus:—

“This question remains as before, difficult to learn anything about, and only to be judged of approximately. I should say in the north-west of the sub-division some scarcity exists, and not so much in the east and north-east. I judge by the result of advances now making. All want rice; those really in want do not refuse other kinds of grain which those in easier circumstances will not take, but clamour for rice only. I infer the scarcity or abundance of food-stocks accordingly.”

10. For Manjhee, Mr. Tonnerre reports:—

“It is next to impossible to obtain any very definite information as to the stocks held by the people.

“Mahajuns’ ‘arhats’ or golahs are certainly not more than half full. The ryots’ stocks are very slender. As a rule, not more than seven or eight persons in each village possess grain enough for their own requirements. In very large villages the proportion of well-to-do ryots is greater, and even these will not be able to supply grain to the coolies who work for them.

“In lesser villages the stocks are well nigh exhausted. In the few cases where private grain-stores exist, the quantity would last for about one month only.”

11. And regarding the Pursa sub-division, Mr. Barry writes as follows:—

“This is everywhere reported to be low or nearly exhausted, except in some instances in which I have heard it rumoured that men of substance have hoarded large stocks (from 100 to 500 maunds) against the famine with a view to realizing. It is probable that such hoards exist; but with a falling market, and the abundant rainfall and prospect of a good harvest, the owners will have to throw their stocks on the market, and this will tend to lower prices still further. I have made particular inquiries on this head in Dighwara thana, and there seems reason to believe that the people there have but small stocks on hand; but they are pretty well off, the opium crop and rubbee generally having put them in funds.

“There seems to be no scarcity of seed-grain.

“Mangoes are a fine crop, and form no inconsiderable source of food for a short time in a year like the present.”

12. Mr. Hudson, in his narrative for the Musrukh sub-division, reports:—

“There is, I believe, no scarcity of supplies in the local bazars; none has ever been reported to me; and whatever there may have been, must have been pretty well supplemented by the late advances of grain. As these advances progress, all parties will have

stocks on hand, and will no longer be so dependent on the momentary supply at any particular mart."

The steadiness of prices in his sub-division, notwithstanding the large quantities of grain issued from the Government golahs, would however indicate considerable depletion of stocks, as has all along been anticipated.

13. Neither Mr. Wright nor Mr. Rattray makes any report on this point with respect to the state of the Sewan sub-division: stocks are probably low at the places in that sub-division noted in paragraph 8.

Rainfall.

14. There seems to have been abundant rain nearly every day all over the districts: here the rainfall during the fortnight has been 6·66, making, with the rainfall since, a total of 9·74 inches during the month of June. A spell of dry weather is now much to be desired.

15. From his head-quarters at Ekma, Mr. Tonnerre writes as follows regarding the Manjhee sub-division:—

"It rained a little on the 19th, 20th, 22nd, and 24th, and the rain was general. But on the 25th very heavy rain began: it rained without intermission throughout the afternoon, and nearly till morning. On the 26th the rain began afresh with increased force. I was out the whole of the forenoon, and visited the Chainpore and Ramgurh circles. Everywhere I saw sheets of water, and the country about Ramgurh was almost all under water. From the appearance of clouds, I think that we shall have very heavy rain to-day."

16. Regarding the Pursa sub-division, Mr. Barry makes the following report:—

"I have been out in camp a good part of the fortnight, and wherever I have been rain has fallen heavily every day, with two exceptions only. The rain has been abundant, but not out of the common course.

"The constant rain is interfering with the weeding of the bhadoi crops."

17. The Executive Engineer, Captain May, has just returned from a tour *vis* Chitowlee, Barhogah, Barowlee, and Ramcollah, and thence in here, and mentions that he found weeding operations everywhere going on along his route; but I have noticed that the weeding is somewhat backward here, and no doubt the continual rainy weather somewhat interferes with the weeding operations now so necessary for the crops.

18. Mr. Hudson writes thus of the Musrukh sub-division:—

"The fall of rain has been very heavy, and almost without intermission, during the past fortnight, and affords promise of an abundant harvest and speedy termination of the scarcity. As already observed, agricultural operations are now proceeding everywhere in a brisk and lively manner, and it remains only to be feared lest the rains should be so heavy as to interrupt them."

19. The following is Mr. Wright's report of the Sewan sub-division:—

"The rainfall during the fortnight, as measured at Sewan, was 8·77 inches. There has been ample rain for agricultural purposes throughout the division."

20. And concerning the Hutwa sub-division, the following figures are supplied by Mr. Hodgkinson:—

| | | | | | |
|-----------------|-----|-----|-----|-----|-------|
| Up to 13th June | ... | ... | ... | ... | 7·79 |

State of the Crops.

21. The bhadoi crops are everywhere unusually forward, and a considerable area of empty indigo lands has been devoted this year to the makai crop. Generally, indeed, it may

be said that an exceptional breadth of land has this season been occupied by the bhadoi crops.

22. Mr. Tonnerre reports of the Manjhee sub-division :—

"The crops are very promising, and their forward state is quite exceptional. The following crops—*makai*, *massuria*, *janera*, *kodo*, *sawan*, *arhur* or *rahar*, *cotton-plant*, *marua*, *kownee*, and *sathie*, have been or are being sown.

"*Dhan* is being sown broad-cast, and the transplanting of *marua* is rapidly progressing.

"Weeding operations have also begun, and are giving employment to numbers of women and children.

"Nearly all the cheena has been cut, and in a few days there will be none standing. Even the unripe cheena will be cut and kept for seed, and other crops will be sown in its stead.

"The mango season has not been very successful, and the mangoes are few. The indigo crop at Ramgurh, Mobarukpore, and Bunwar factories, is much below the average."

23. Regarding the Pursa sub-division, the following is Mr. Barry's report :—

23. "Everything is looking fresh and green, and no damage of any kind has been sustained by the young crops. *Makai* is sown largely in every village, and, in pergunnah Kusmer, occupies a very large percentage of the ground; it promises to be an excellent crop, and is already nine inches to one foot high in many fields. Weeding is going on; still very much remains to be done. The people do not seem to be pushing forward their work, though no doubt the rain has kept them back. *Kodo*, *sawan*, *marua*, *tengooni*, *massuria*, are much in the same condition, all requiring much labor to weed out the grass.

"Bhadoi rice promises well, but wants weeding much. Plots of rice for transplantation on to the low lands exist everywhere, but the fields for aghani rice (*dhan*) are, with a few exceptions, not yet being ploughed up and prepared. These fields are now covered with grass, but they will all be broken up within the next 15 or 20 days, and the aghani rice planted out when the fields are deep in water.

"In Kusmer pergunnah (which is not a rice-country) almost every field is sown down with *makai*, or some rain crop or other. Whereas from Kapasphorah to Makair the fields are chiefly rice-fields, lying green in grass, so the contrast is very striking. Of course around the villages and on the higher and drier bits of ground, *makai*, *kodo*, *arhur*, and such like have been sown to a considerable extent in the latter tract.

"Indigo promises to be a splendid crop and is growing luxuriantly; the latter sowings are doing well. The weeding gives employment to a large number of persons, and, with fine weather, will give employment to still more."

24. Beyond what is stated at paragraph 18, Mr. Hudson does not notice the state of crops in his sub-division.

25. The sub-divisional officer of Sewan reports as follows :—

"The heavy rains we have had have enabled the ryots to push on and complete the ploughing and preparation of their lands everywhere, and the bhadoi crops are now nearly all in the ground, and have germinated and sprung up well.

"During the first week of the fortnight, I made a tour round by the places named in the margin, and found the crops looking exceedingly well. Those sown early look healthy and strong, and as far as can at present be judged, give every promise of an early and good harvest. If things go on as they are at present doing, the *marua* crop should be reaped before the end of July, and Indian-corn in August. The *dhan* seedlings in nursery beds seem also to be getting on very well."

Pertabpore.
Sreepore.
Hutwa.
Gopalgunge.
Maniarah.
Manjhee and Kahala.

The Sub-Deputy Collector, Baboo Rajkishore Narain, writes as follows of the crops in thanas Sewan and Darowlee :—

"*Kodo*, *rahar*, &c., are already sown everywhere in these ilakas, and have grown up to three inches. Transplantation of *marua* is being carried on. Three-fourths of the *makai* in the ilaka of Sewan, and about half in the ilaka of Darowlee, is already sown, and the remainder is being sown. In some fields it has grown up to three inches; in others it is now germinating. Much of paddy-seed is sown. * * * * * The young plants of paddy also have grown up to four inches, and everything as yet promises well.

"Mr. Rattray in his report states: During the past fortnight, owing to the heavy and continuous fall of rain we have had, cultivation has been extensively carried on. * * * The millet crop is now being harvested, and the outturn has been a very fair one."

26. And regarding the Hutwa sub-division, Mr. Hodgkinson writes thus :—

"The autumn crops have been all sown and planted out, and are at present all that can be desired. Perhaps a day or two of sunny weather would improve the Indian-corn (*makai*)."

Condition of the People.

27. During the fortnight I visited the Chatowlee and Burhogah circles in the Bussunt-pore thana. While elsewhere the physical condition of the people throughout the district appears to the casual observer generally good, I consider that their condition in the Bussunt-pore thana can be seen at a glance to be much below what it would be in ordinary years. The people on the relief works are silent and dull, and the clothing of many is ragged and insufficient, and the look generally under-fed; while here and there among the children pitiable objects of leanness are to be seen. As there, as elsewhere, relief works have been continuously carried on for many months, the exceptionally destitute appearance of the people of those parts can only be accounted for by the fact that the wages received on the relief works are insufficient for full sustenance, and this is Mr. Murray's opinion. The apparent anomaly of the wages sufficing to keep the people elsewhere in fair condition may be due to the fact that where, as in the Bussunt-pore thana, numbers of the higher castes are employed, whole families will not come on the works; while in other parts where the proportion of lower castes is greater and caste prejudices do not prevail, all of the family finding employment, the aggregate wages are found to be sufficient.

28. Regarding the Manjhee sub-division, Mr. Tonnerre reports as follows under this head:—

"The condition of the people is fairly good, but it is wonderful how the people of one village exhibit unmistakable signs of suffering, whereas their neighbours seem strong and stout.

"I have seen many ryots, in one village in particular, though in good health, much under-fed.

"They are, however, all reassured, and feel no anxiety now that grain advances are being pushed on.

"All cultivators are at work in their fields, encouraged by the prospect of unusually fine crops.

"Cultivation is general everywhere, except of course in paddy lands, which are now beginning to be rendered fit for agricultural operations by the late heavy rains.

"The land about Ramgurh is in great measure paddy land, so is not being cultivated as yet.

"I must here contradict a statement made by Baboo Taraprasad, relief superintendent, about Baboo Gugadhar Pershad of Chainpore. Chainpore is in my sub-division, and the reporting Baboo belongs to another. In Chainpore, Baboo Gugadhar Pershad is giving employment to some 250 men in the building or repairing of his residence, and not to 1,000 as stated by the relief superintendent. This I have ascertained from karpardazes and others who know the real state of things. Again, all those workmen are skilled workmen, and the affair is not, as will be seen, one of charitable relief. *Palman qui meruit ferat*: so I am bound to state the real facts of the case.

"I shall allude to the conduct of the Chainpore Baboo further on."

29. The following is Mr. Barry's report of the Pursa sub-division:—

"Considering the famine rates at which food has been selling, the condition of the people generally must be considered matter for congratulation. The wonder is, that it is not far worse. In Kusmer pergunnah, which is supposed to be well off, I was struck with the appearance of the crowds of cultivators who surrounded my tent to apply for advances of grain. I scrutinised each applicant as he was called up, and I found the great majority of them lean, thin, and in bad condition, and decidedly below par. They are far from being so well nourished as in ordinary years, and doubtless this has been brought about by insufficiency of food. I have noticed, on more careful observation, the same thing in Pursa thana, and many of the applicants have apparently been in great want. Many of the higher class of ryots are in a much worse condition than those coolies who have been six months on relief works, the latter being generally plump and strong.

"With regard to the laborers on relief works, I have nothing new to say. The few who are in very bad condition are often those who have been a short time on the works, and who have been driven there as a last resort. I calculate about 5 per cent. are in this predicament."

30. Mr. Hudson, the Musrukh Sub-divisional Officer, has received bad reports of certain villages within his charge, which I refrain from quoting, as they have not as yet been confirmed. Mr. Hudson has been instructed to investigate them personally, and I shall proceed myself to his head-quarters at Gopalpore on the 4th.

31. The Sub-divisional Officer of Sewan makes the following report:—

"The condition of the people continues good. The agricultural classes are now busily engaged in their fields, and are already employing large numbers of the laboring classes."

Of the people in thanas Sewan, and Darowlie, the Sub-Deputy Collector, Baboo Rajkishore Narain, writes as follows:—

"The condition of the people in both the elakas is good. Early and sufficient rains have contributed much to early agriculture, and have given agriculturists much hope of future

goodness. Government aid in different forms has made men even not to feel the common wants of this season."

The following is from Mr. Rattray's report under this head:—

"The condition of the people continues favorable, and reports from the relief circles show that no serious distress prevails. In a tour made by me during the fortnight through the northern part of the sub-division, I did not notice any distress or destitution except amongst the class of professional beggars, who however are being well provided for at the different relief circles. The poorer classes are still finding ample work on the public roads and tanks, and the demand for labor in the fields is gradually increasing as the time approaches for transplanting paddy and other crops."

32. Mr. Hodgkinson has apparently still nothing to add to his former reports under this head, as he does not notice the subject.

Known cases of Misery and Starvation.

33. No deaths by starvation, of which confirmatory evidence has been obtained, have been reported.

Grain-thefts or Robberies.

34. There have been fourteen cases of grain-thefts during the fortnight.

B.—RELIEF WORKS.

35. The annexed statements show the relief works in progress, and the number employed thereon. The mean daily number employed during the fortnight was 218,097, and the numbers on the last day was 156,326, showing a decrease of about 30 per cent. at the end of the fortnight.

Compared with the mean daily numbers of the previous fortnight, the number on the last day of the fortnight under review had decreased in the several sub-divisions below named in the proportions given—

| Sub-divisions. | | | | Mean daily number of the previous fortnight. | Number on the last day of this fortnight. | Decrease per cent. |
|----------------|---------|-----|-----|--|---|--------------------|
| 1. | Chupra | ... | ... | 70,492 | 31,335 | 55 |
| 2. | Manjhee | ... | ... | 34,849 | 12,849 | 63 |
| 3. | Pursa | ... | ... | 11,105 | 7,751 | 30 |
| 4. | Sewan | ... | ... | 31,888 | 16,390 | 48 |
| 5. | Hutwa | ... | ... | 14,196 | 7,222 | 49 |
| Total | | | | 162,531 | 75,547 | 53 |

while the number in the Musrukh sub-division had increased by 19 per cent. The increase in the latter sub-division, concurrently with a large decrease in all other sub-divisions, is due to more work being provided, and affords, in my opinion, evidence of increased distress. Throughout the last fortnight, about one-third of the entire population of the Bussuntpore thana has been on the relief works. Notwithstanding this, the cultivation there, as elsewhere, is exceptionally forward. Now, however, that the weeding must be commencing, Mr. St. Joseph, the superintendent of works there, has been sent instructions to turn off the works all able-bodied persons, both adults and children of either sex, who may be required for this purpose. Though this precaution has been taken, I do not myself think that it will be needed, as the present rates of wages on the relief works are certainly lower than what could be earned in the fields. The rates of grain payment now everywhere in force are the following:—

| | | | | Cleaned rice. | Uncleaned rice. | Other kinds of grain. |
|----------------|-----|-----|-----|---------------|-----------------|-----------------------|
| | | | | Cks. | Cks. | Cks. |
| Men | ... | ... | ... | 10 | 13 | 16 |
| Women | ... | ... | ... | 7½ | 9 | 12 |
| Boys and girls | ... | ... | ... | 5 | 6 | 8 |
| Small children | ... | ... | ... | 2½ | 3 | 4 |

Being the equivalent of the money wages of 1 anna, 9 pies, 6 pies, and 3 pies, at the rate of 10, 13, and 16 seers for the rupee respectively. These rates, though undoubtedly only barely sufficient to sustain life, have been fixed with the view of enforcing resort to task or piece-work on the ordinary labor rates, and it remains to be seen whether the desired end will now be attained. At present the coolies in Bussuntpore are reported to prefer the one anna wages even to piece-work. It was not possible to effect this change until now, when ample means of agricultural employment for the people have at length rendered it safe to introduce it. All tank-works have been closed; and now that the last fortnight's returns have conclusively shown that our relief works do not keep the people from their fields, on further consideration I have decided to continue to maintain such road works as can still be carried on throughout the rains. There is undoubtedly some risk in closing the works altogether, even for a limited time, and it is as well not to incur it.

Sale of Grain to Laborers on the Works.

36. About 20,000 maunds of grain were sold during the fortnight to laborers; and since the issue, on the 18th, of orders from this office, prescribing for the future direct payments in grain for six out of seven days, about 8,000 maunds have been paid away. Since receipt of the Government orders directing grain payments on the seventh day also, directions have now been issued that none but grain payments are for the future to be made. With reference to Government letter No. 526—T.F. of the 26th June 1874, it is explained that the cash payments during this and the previous fortnight have been due to the adoption of the first alternative prescribed by Government order to 2853—S. R. of the 4th May last, under which cash payments, combined with sale of grain on the works, were allowed. Direct grain payments however having been found to be more convenient, as well as preferable on many other grounds, the change has now been effected, and the grain is brought from the golahs by bunneahs, who are paid in money at the rate of two pice per maund per mile as cost of carriage, besides an allowance of one anna for every maund served out on the works by them.

Collection and Despatch of Laborers to Soane Canal Works.

37. The scheme for despatching a body of laborers to the Soane Canal Works has for the present fallen through. Captain May thus explains this result:—

"With reference to your request, desiring to be informed why more coolies than those sent have not gone to Arrah, I have only to repeat what I have already several times told you verbally, that I, as well as the assistant engineers in charge of sub-divisions, and superintendents of works and overseers in charge of works, have used our utmost endeavours to persuade the men to go, explaining to them fully the favorable conditions under which they would go, and the advantages they would gain by doing so.

"They have been suspicious all along that they would be sent elsewhere beyond Arrah, and I personally assured them that such would not be the case with a single man, and offered them my life as their security, in the event of a single individual being sent beyond Arrah. They put forward the difficulty of sending remittances to their homes, and I informed them that this would be arranged for them all in a complete and safe manner, and that all remittances they send would reach their people quite safely, and from whom they would receive intimation of the arrival of their remittances.

"The few who have gone, 71 in number, have been there before, and are mostly men who have no lands to cultivate. A large number of men on the tramway road engaged to go, and asked to be paid up to date, which was done, and then they refused to go, saying that their time for cultivation had arrived, and that they preferred remaining here and doing the best they could for themselves.

"I was at first under the impression that their being able to obtain rice at 16 seers per rupee, and having to take their families with them, were causes which prevented their going, but the stoppage of sale of grain to them, and the cancelling of the order about their families, proved that the above were not the causes; and I can only attribute the cause of their not going, either to suspicion of being sent elsewhere or to their unwillingness to leave their houses."

38. Information was subsequently received from Captain Heywood at Arrah, that he could only provide for about 3,000 instead of 20,000 laborers. It remains to be seen whether this limited number can be obtained later on.

State Emigration to British Burmah.

39. None have presented themselves for emigration during the fortnight, and while the agricultural season lasts, it is not probable that any one will agree to go.

D.—STORAGE OF GOVERNMENT GRAIN.

Distribution and expenditure of Government grain.

40. The usual statement accompanies.

Gradual expenditure from Government grain stores, and possibility of more grain being actually required.

41. The accompanying statement revised according to the latest data, shows the probable grain requirements of the district in the future, and still exhibits a deficit of two,

lakhs of maunds. It is reported that the golahs at Amnour, Musrukh, Bussuntpore, Maharajgunge, and Syedpoorah will soon be exhausted. The grain payments to relief laborers throughout the Musrukh, Chuprah, Bussuntpore, and Manjhee thanas will then be dependent on the transport of supplies from the Pursu golah in the case of the two former thanas, and from the Sewan golah for the two latter. I confess that I do not look forward to the early exhaustion of the grain supplies in the Musrukh sub-division without anxiety; and with reference to the difficulties of transport, when the roads become more cut up, and the carts are all engaged in carting indigo, and also to the necessity of making the grain advances to the cultivator at once if any good is to be done, it seems urgently advisable that this district should be succoured at once, if the grain allotment is to be increased, or if not, the grain payments to relief laborers should be suspended where necessary. Mr. Murray of Burhoga informs me, that he now finds that his original advances to ryots will not suffice, and that more will have to be given to support them. He is already drawing on the Barrowlee golah for 7,000 maunds to make up the deficiency in his original requirements, and there will not be more than 7,000 or 8,000 maunds remaining there, which cannot be abstracted without still further reducing the supplies for the Sewan sub-division.

42. Mr. Tonnerre reports as follows under this head, regarding the Manjhee sub-division:—

"More grain will be required for this sub-division. The entire allotment consisted of 25,000 maunds, and I am of opinion that 10,000 extra maunds ought to be sent for this sub-division *as soon as possible*. More will hereafter be required, perhaps as much as 9,000 maunds. As is generally known, there has been a considerable deficiency in the reputed weight of each bag, *i.e.*, 2 maunds. I have calculated that in the 25,000 maunds allotted to this sub-division, there will be a deficiency of four to five seers per bag. The above average was drawn from weighment of 3,942 bags, some at Ekmah and some at Manjhee. This gives us, then, a deficit of 1,406 maunds 10 seers. This added on to the 19,000 maunds extra required, gives a total of 20,406 maunds 10 seers. This calculation does not, of course, include any grain that may be required for relief works."

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

43. The statement accompanying, shows the advances of grain made up to date, except for Bussuntpore, the correct figures for which, owing to mismanagement of the previous golahdar who has been dismissed, have still not yet been received; and money advances are shown under head "Financial Results."

44. Major Jackson, in charge of the Chuprah thana relief sub-division, reports as follows under this head:—

"Village lists prepared by group superintendents keep daily coming in, but notwithstanding that the arrangement must now be pretty fully understood throughout the country, I find myself delayed with individual applications, all of which take a great deal of time in attending to and answering, many of them belonging to districts out of my sub-division. All applications for grain are at once acceded to, except when coming from parts where it is well known only rubbee crops are grown, such as the Dearah on the river bank &c., where there were excellent crops this last season. I find this does not prevent the application being made, feelings of delicacy not appearing to exist much amongst the general population. In fact the evidences of universal greediness make the position of an advancing officer very difficult. Time cannot be afforded for minute enquiries, and food must be thrown into the country. Very few lists are at the disposal of that officer to prevent his being deceived, and no doubt in many instances he is so; but I have reason to believe in the necessity for assistance to the people, many come in gladly taking whatever description of grain is offered them, whilst the well-to-do at once reject advances of any kind except rice. They of course receive nothing, but time is taken up in listening to their petitions, and I regret that the more deserving have to stand over till their wants have been enquired into. For one village list settled and disposed of, three, four, or five petitions of sorts have to be heard, and orders passed on them. As regards cash advances for seed-grain and bullocks, I confess myself to be in a difficulty. To a man, the villagers are eager to get the money, and merely, as a rule, I believe, to pay off their debts, and not for the purposes ostensibly set forth. The petitions are generally for an amount of cash equal to the grain requirements, and the only check I have is the report of the Group Superintendent, who again can hardly have time to make enquiries into the separate wants of each village. I have only made advances of Rs. 419 under this head, and have returned all others for further enquiry. The Group Superintendents are all new men, and have not as yet got into full working swing. As a rule, they do not realise the necessity for extra care in enquiry into such matters, but I hope next fortnight to obtain better information from them to enable me to act. In Arwa, Mr. MacRae has largely met the wants of his circle in grain, but has only given Rs. 25 for purchase of bullocks. From Gurkha, I regret to say, that again no returns have been received for this fortnight; large grain advances are, I know, being made, but I am ignorant to what extent now I am in possession of the village lists of the circle, or of their distribution to Group Superintendents."

45. I am confident that Major Jackson will not make advances where they are not needed, but as, if any good is to be done, no time is to be lost, I trust that he will press on advances in his sub-division as speedily as possible, consistently with care in their distribution.

46. The following is Mr. Tonnerre's report of the Manjhee sub-division :—

"I have now got all my circles into full working order, but they exhibit very different results.

"*Chainpore* circle, under my immediate superintendence, has been provided for with the exception of *three* villages only—Nyagawn, Atturhee and Jharhee. In all three, the maliks have succeeded in preventing the making up of the lists satisfactorily.

"I have stretched the point for the maliks as much as possible—so far even as to delay the advance of grain for the village of Tuswar for a whole week, owing to representation made by Baboo Gunga Persad Sahee, of Bugowrah. The latter promised to come and prove his assertion, but though about *three* weeks have elapsed, he has not come. I have, therefore, ordered the advance to be made at once. In one village where they are nearly *all* maliks, no advances are needed (Deopoorah). In *all* the other villages advances are *being* made, or *have* been made. All bonds have been filed in my office.

"*Pursah* circle, under Baboo Roopnarain Singh, has yet about thirty-seven villages left unprovided for, and in thirty-six others advances are in progress.

"*Buncar* circle, under Moulvi Imainuddeen, factory manager, shows twenty-seven out of forty-two villages provided for.

"Ramgurh circle, under Oolait Hussen, manager of the factory, shows twenty-four villages provided for out of fifty-one.

"The returns of Jaintpore circle have not been received.

"Making advances is a most difficult task. The advances were assuming such gigantic proportions that I was obliged to return list after list for correction.

"The Pursah circle officer being asked to fix an average of *one* maund per ryot, sent me a list in which *each* man was to receive *one* maund, whether he wanted it or not.

"There is no remedy in such cases. Each list is certified as correct, and I am always told that every chittack asked for is *requisite*, absolutely so, and yet the demands seem exorbitant.

"If I cut down a list, numberless complaints are put in. In many cases, putwarees combine with ryots to obtain excessive advances.

"On the other hand maliks try to prevent the taking of advances at all by the ryots. Under these circumstances, I am forced to give according to verified lists. If any summary measures are resorted to to diminish advances, evil results may ensue, whereas it is the safest to trust to group superintendent, putwaree, and jeyth ryot.

"All lists before being passed are attested by the group superintendent, putwaree (where present), and in the latter's absence, by the jeyth ryot.

"In the bond, the value of the grain taken by each ryot is specified, so that he is perfectly aware of the debt owed by him to Government.

"In my last report, I hope to be able to state that *all* advances have been completed. If the advances are not given out at once, their good effects will be lost. It will be seen, therefore, how difficult it is to combine rapidity and accuracy in such undertakings."

47. Mr. Barry writes as follows regarding the Pursa sub-division :—

"The advances in the Tehtee, Jelalpore, Arwa and Nowada circles are approaching completion, and have been done in a most satisfactory manner. The advances in the Pursa and Seetalpore circle and in my own circles are going on, and now that the machinery of group superintendents is fairly set agoing, I hope to complete the work in a very short time. Six group superintendents have been appointed in Seetalpore circle, and Moulvie Sheikh Abdool Alli is entering with great zeal and spirit into the work. I have explained the rules of procedure to him, and he and his amla are fully alive as to the essential points to be attended to. I expect the work to be well and quickly done; and I hope to visit Seetalpore again next fortnight and to find it pretty well completed.

"In the Pursa circle in charge of the moonsif, 4 group superintendents have been appointed, and the moonsif tells me the work will now proceed rapidly. The moonsif takes a most intelligent interest in the work, and I am satisfied that it will be well done. He has a large number of cases ready for decision, and only awaited my return to head-quarters to have some doubts cleared up.

"For the villages in my own charge in Pursa thana, I have made arrangements for 7 groups with a superintendent to each, and an 8th group, consisting of large and important villages, I have allotted to the sudder canoongo.

"The group superintendents are sending in lists and their reports but slowly, so I cannot say that I have made much progress. The group superintendents complain that putwarees are often absent or absconding, and that zemindars often do all in their power to oppose them and impede the work. Now that I have got power to take up criminal cases, I intend to bring the Penal Code to bear against recalcitrant putwarees; but I hope this will seldom be required. In a good many villages along the banks of the Gunduk, the group superintendents report that the ryots do not need, and do not ask for advances; while, in regard to some villages, it is reported that the zemindars have given their ryots grain, and

thus placed them above want. In this way, the number of villages in the list requiring advances will be diminished.

"Under the system of visitation from village to village, each group superintendent carries with him a list of villages contained in his group, and signed blank perwanahs for the putwarees, and notices for the zemindars in each village in his circle. He has no more to do but to go into a village, serve an order on the putwaree to file his list, and send a notice to the maliks, asking them to become security, make a summary enquiry, and forward his report to me. This looks simple enough in theory, but many obstacles are met in practice; the putwaree is not to be found, or he raises objections and will consult the malik; or the malik forbids his ryots or refuses to take the notice, and so on. I should be happy if each group superintendent could do one village a day. The constant rain also impedes the work. Hitherto the maliks have generally refused to become security; and not seldom they refuse to return an answer to the notice. In these circumstances, I have instructed superintendents to take the best security they can get, and explain that if the security is good, the malik's refusal will not prevent the advance being made. ●

"As to the Kusmer pergunnah, I have been moving about in it for the last five days, and I find that the northern half of the pergunnah is in much the same condition as Pursa. The people are not quite so distressed as in Pursa, yet they are eager and willing to take advances of grain, and yesterday I had no less than upwards of forty petitions from this tract alone.

"I therefore propose to appoint two group superintendents to enquire into these cases, and to visit those villages which are reported as distressed. I hope this will meet with your approval. The southern portion of the pergunnah does not require assistance. The cultivators of this pergunnah were prevented from coming forward to ask for advances in consequence of the false reports circulated by zemindars, that advances would not be made by Government unless the maliks became security, and for four days I received few or no petitions. It was rumoured that the object of Government in making advances was, by inducing the malik to pledge his right in the soil, to get the ryots and malik into its own hands, and at the day of reckoning to sell up the malik, abolish the zemindars and zemindari system, become sole proprietor of the soil, and get the whole country into its grasp, like the Government of Nepaul; and that it was for this purpose solely that so many tehseeldars have been brought down from the North-Western Provinces. I did what I could to correct these delusions, and the consequence was a flood of petitions yesterday for advances. To sum up, there have been advanced up to date 22,986 maunds to about 8,478 persons (the number of persons is not stated in the Arwa return), and about 150 villages have been disposed of, leaving about 360 villages still on hand.

"Thus, in Tehtee circle only 3 villages remain for disposal.

| | | | | |
|--------------|---|----|---|---|
| in Jelalpore | " | 7 | " | " |
| in Arwa | " | 16 | " | " |
| in Nawada | " | 6 | " | " |

In the other circles and groups the work is only beginning to get into full swing, and much remains to be done. I hope to proceed shortly to Rameolah to consult with Mr. Hugh Llewellyn as regards the Marowra circle in which nothing has yet been done, and I have already written to him on the subject.

"There are many villages in which indigo planters have an interest at a distance from their factories, and which they have not included in their circles, or which it would have been inconvenient to include. In such cases I have taken precautions that no advances be made to the ryots without taking the opinion of the indigo planter concerned, who is generally the thiccadar, and has a strong interest in keeping the ryots in a solvent position. Thus the Tehtee factory has many villages in the Pursa circle, and the Rameolla and Arwa factories have villages in my groups."

48. I have heard that such reports as are alluded to by Mr. Barry are elsewhere spread about, and they afford evidence of the obstructions thrown by zemindars in the way of advances for the support of their ryots, whom, at the same time, they very generally decline to assist themselves. Under the circumstances stated by Mr. Barry, his proposal to make advances in the northern portion of pergunnah Kusmer has been approved.

49. Mr. Hudson, in charge of the Musrukh sub-division reports thus:—

"It is well worthy of notice, however, the amount of delay which applicants for tuocavee themselves throw in the way of the speedy disposal of their claims; and how very dilatory even those who have had their applications granted are in coming forward for payment. I have by me now, some half-dozen cases completely finished, and with the certificates prepared, and waiting only the appearance of the parties, who might have been paid a week ago. In one notable instance, they refused at the last moment to take the advance, merely because the zemindars guaranteed repayment of the money, in case the applicants should fail. It is, indeed, absurd to ignore the fact that, as a general rule, ryots and zemindars are antagonistic classes; and that whereas the latter throw every obstacle in the way of their tenants applying for advances, the former regard every intervention on the part of the maliks as an act of direct hostility. Very few indeed of the zemindars have applied for grain advances to assist their ryots; and where they have done so, there is too much reason to fear

that they have been actuated by jealousy of some neighbouring factory, of which the manager has been appointed circle officer. This is especially noticeable in the case of Kalee Persad of Keoteah, whose application for Rs. 6,000 worth of grain has been lying before me, almost ready for payment for the past month, without any intention, I believe, on his part of ever receiving the advance; while he uses the circumstance of his being an applicant to try and establish some hold on certain villages in dispute between him and the factories of Bansghat and Rajaputty. The action of Thakoor Pershad of Dighwa, also, has been of the same character. This zemindar has never been near me but once when I was encamped close to his factory, and has never supported any of the applications of his tenants. But a few days since he sent a hundred of the Dighwa Assamees with petitions to me, that they did not want to take advances from Rajaputty, a proceeding which, considering that applications are *waited for*, and not *called for*, recalls to mind a certain old French proverb.

"The villages in the Bussuntpore and Musrukh thanas which remain, after deducting those included in the relief circles, number 225 in the former and 280 in the latter. These are now mapped out, the former into 24 and the latter into 28 group superintendships, each group superintendent having, on an average, ten villages in his beat. These men are to send in a weekly report of the condition of affairs in their groups, and are, moreover, commissioned to test the lists filed by villages applying for advances, and the securities offered by applicants.

"There are now no less than 47 cases in the hands of the group superintendents of the Musrukh thana. Advances of grain to village communities are proceeding briskly. I have made 31 of these during the past fortnight, and also 58 advances of money to individual ryots, for the purchase of seed grain and cattle."

50. The following is the report of the Sewan sub-divisional officer:—

"No advances have been made by me during the fortnight; all applicants have been referred to Mr. Rattray. The following is his report under this head:—

"The preparation of the village lists for grain advances is progressing fairly in spite of the opposition of land-holders and others. Lists of 597 villages have been prepared and sent in to me. These have been approved of, and grain is now in course of distribution in these villages. The grain allotted to these villages amounts to 76,185 maunds 8 seers 8 chittaks. Lists of over four hundred villages are still under preparation, but owing to the apathy of several of the circle officers, and their fear of responsibility, there is a likelihood of some delay in the completion of these lists."

"In some of the relief circles those whose names have been entered in the lists for grain advances are being put to inconvenience by the circle officers delaying the distribution of the grain, arising from a fear of accepting any responsibility in the matter. I have personally urged upon them the necessity of their taking a more lively interest in their charge, and I hope I shall have no occasion to make a special report on the subject."

NOTE.—This shews, at all events, that care is being exercised in the distribution.

J. S. D.

"It will be seen that the allotment of grain made in accordance with the village lists, together with grain already given in advances to zemindars and others, amount to close upon the total quantity of Government grain in store in the sub-division, and on the completion of all the village lists now under preparation, the requirements will exceed the quantity in store. It is obvious that personally I cannot enquire into every individual application of grain. A very large number of the village lists were rejected by me owing to the quantity of grain allotted being excessive; very few, if any, of the circle officers personally enquire into the status of the people or the village lists. Judging from the condition of the people and the favorable progress in cultivation, I do not think there will be any necessity for the distribution of the total quantity of grain mentioned in the village lists, and I have, therefore, directed advances to be made in monthly instalments of one-fourth of the allotment of each village.

"Very few applications were made to me by zemindars for grain advances during the fortnight. The prices fixed by Government, the division of the allotments into instalments, and the fact of applicants being required to stand security for advances made to their tenants, are the reasons urged by applicants for their refusal. There were four applicants, and the

* Given partly in instalments.

quantity of grain advanced amounted to 591* maunds of the value of Rs. 1,726-0-5. Advances by circle officers to zemindars for their private consumption amounted to 1,218* maunds, value Rs. 3,434-13-0.

"Grain advances, amounting to 962 maunds, were made by the circle officer at Hulpore, but particulars have not been received. The sum of Rs. 4,000 was paid to circle officers for advances for the purchase of seed-grain and cattle.

"The sum of Rs. 10 was paid for the completion of a well.

"The arrangement of giving the grain advances to the ryots whose names appear in the village lists, in four instalments, is the best that could be devised under the circumstances, as delay in giving the grain or a portion of it, at present, would do away with the benefit it is intended to confer on the ryots; but in accordance with the Commissioner's verbal orders,

Mr. Rattray has been directed to make special enquiries, before the second instalments of grain are issued, regarding the status of the men taking the advances, as it is feared that many of them are men well-to-do, who do not require assistance, and others are taking advances far beyond their means ever to repay. The Commissioner wishes that grain advances should be made in proportion to the quantity of land that each ryot on the list cultivates. This can easily be ascertained by a reference to the zemindars, and from the putwarees' papers."

51. Mr. Hodgkinson reports under this head as follows, regarding the Hutwah Estate :—

“The first distribution of advances has just been concluded; and the second instalment is now being given out. Up to date of last reports, 52,712 maunds 15 seers 5 chittacks have been distributed.

52. It is thought by some that the ryots in this crisis should be left to the tender mercies of the mahajuns, and obtain advances at the cost of a life-long enslavement; but I have ground for supposing that this is not the intention of the Government, and I can conceive no more legitimate way of expending the Government grain than in advances for the support of the ryots under the pressure of these trying times.

F.—CHARITABLE RELIEF.

53. The number receiving this description of relief is shown in the annexed statement.

54. Mr. Tonnerre makes the following report under this head, regarding the Manjhee sub-division :—

"No returns have been received from Pursah, Ramgurh and Taintpore circles, and I really cannot account for the delay.

"In Chainpore circle, cotton is being given out to purdanasheens, &c., more strictly speaking, to any woman of a high caste who will not do coolie's work.

"A seer is given to each with 12 annas in money. This supply lasts them for a fortnight, at the end of which they bring back $14\frac{1}{2}$ chittacks of thread, and the process is repeated.

"The same system is in force all through the sub-division.

"I am trying to start a colony of distressed weavers to convert all the thread into cloth.

"I have given cotton to 35 women, and in Bunwar circle 227 have received cotton.

"I have settled the following rates for distribution of grain as charitable relief, no money being given at all:—

| | | | | |
|----------------|-----|-----|--------|----------------|
| | | | Soers. | |
| Full grown man | ... | ... | 26 | cleaned grain. |
| Woman | ... | ... | 20 | " |
| Big child | ... | ... | 15 | " |
| Small child | ... | ... | 10 | " |

The above quantity is given for a month in fortnightly instalments. The following is the system followed. A list of all lame, blind, &c., being drawn up for a village, they receive tickets for fortnightly supply of stores according to prescribed scale. The grain is given to the putwaree or jeyth ryot for distribution.

"Many attempts are made to obtain charity without need of it, but they are mostly detected.

"I append a statement of money spent in charitable relief. No return having been received from Jaintpore circle, its operations are not included in the return."

SUB-DIVISION OF MANJHEE.

Cash account for month of June 1874.

55. Concerning the Pursa sub-division, Mr. Barry writes as follows:—

"Under this head I have little to say. Things are much as they were last fortnight. Instead of money, grain is now being given out to the poor at Seetapore, and I have made similar arrangements for Kusmer, Dighwara and Pursa circles. At Kusmer there were no complaints; at Dighwara a few, but matters have been put right. As to the other circles, the work is safe in the hands of the English circle officers.

"I have undertaken no charitable relief myself as I must be constantly on the move.

"As far as I can judge, the work is going on in a satisfactory manner, and very few people come to my tent asking for relief, which would seem to show that the wants of those in need are fairly met.

"In the villages as yet visited by group superintendents, very few persons in need have been found or reported as in want of assistance. The names of any such are sent to the charitable relief circle officers for disposal.

"During the fortnight in 7 circles (excluding Kusmer, returns from which have not arrived) there were no less than 5,568 persons on the registers as charitably relieved. The lower rates for spinning and weaving have been promulgated and accepted by the people."

56. The following from Mr. Hudson's narrative of the Musrukh sub-division, under this head, may be quoted. He writes:—

"I cannot refrain from taking this opportunity of informing you of the result of the action taken by me, for the saving of the lives of cattle during the excessive drought. You are aware that you sanctioned my permitting each putwaree to expend Rs. 100 on the part of Government in digging "baooles" in empty tanks; and a purwanah was issued to each individual putwaree to that effect. The great majority of these purwanahs were received; for I have the reports of action taken on them now filed in my office. Yet not one single "baoolee" is reported dug."

57. As the zemindars would be likely to throw obstructions in the way of the putwarees carrying out the instructions received with the reservation I deemed it proper to enforce in the interests of Government, I somewhat anticipated this result. But in the absence of reports to the contrary, it is to be hoped that notwithstanding the undoubtedly great scarcity of water at one time, the people managed to tide over the difficulty without any great loss of life among the cattle, and without necessitating the expenditure of Government funds.

58. The following is Mr. Wright's report of the Sewan sub-division:—

"The accompanying statement shews the number of persons who have received gratuitous relief, and those who have received relief in the way of cotton spinning. Four hundred and twenty-six persons have received cooked food at the Sewan poor-house."

No reports have been received of any orphans being thrown on charity by the famine.

59. And Mr. Hodgkinson supplies the following figures for the Hutwah Estate:—

"The numbers in receipt of charitable relief is shewn in annexed table. 3,763 maunds 4 seers and 1 chittack of grain had been expended up to date of last reports from centres.

| Serial number. | Name of Circle. | Average number receiving cooked food. | Number receiving uncooked food. | Number receiving food in payment of wages for cotton spinning. | Number specially relieved by village officer under (D.) | Total. |
|----------------|--------------------|---------------------------------------|---------------------------------|--|---|--------|
| 1 | Hutwah | 55 | 1,079 | 163 | | 1,297 |

" Child ... 9 pica.
Total amount disbursed in wages during the fortnight, Rs. 1,901-9-8.

No. 2144F., dated Motiharee, the 29th June 1874.

From—H. KEAN, Esq., Collector of Champaran,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit the fortnightly narrative of scarcity and relief, for the fortnight ending the 27th June 1874.

A.—STATE OF THE COUNTRY.

The weather during the past fortnight has been most favorable for agricultural operations, (heavy rains alternating with bright sunshine), and the prospect of the crops throughout the district are most promising.

In the Motiharee sub-division the very early rice is already over a foot high, and will be harvested in another five weeks. In the country north of the Shikrana river, cultivating operations are going on more briskly than in the south, and it is there that the greatest numbers have left the relief works. In July, however, the same state of things will take place probably in the southern tract, when weeding and transplanting will be carried on at the same time. There is still no deficiency, Mr. Oldham says, of seed-grain, on the contrary a larger area than usual has been sown this year. In the Dhaka sub-division also, Mr. Kilby reports that there is no want of seed-grain, and that he does not think that a single beegah will remain unsown, by far the greater portion having already been sown, and all lands are being got ready. These favorable prospects have necessarily affected the prices. The mahajuns, it is found, are unearthing their stores, and it is by no means an uncommon thing, Mr. Kilby says, for persons who had applied to him for grain loans, and into whose circumstances enquiries had been completed, to come forward and say that their mahajuns had consented to carry them on. This the mahajuns had steadily declined to do while prospects were gloomy. This fact has reduced the amount that would otherwise have been given out in loans, and may be said to apply to the whole district more or less. Large numbers are employed in weeding indigo, and almost all who can, and will work, are able to find employment in the fields. As a proof of the satisfactory manner in which the group officers are working, Mr. Kilby mentions that the factories are no longer besieged by beggars.

In the Gobindgunge sub-division the bazars are becoming better supplied, and here also the mahajuns are now opening out their stores, and endeavouring to sell before prices fall. The sudden change for the good in the prospects of the next crop, has no doubt been a great disappointment to these gentry.

The maize, kado, murwa, sawan, and rice are all said to give most excellent promise, and the condition of the people has improved; but laborers when not employed on the relief-works or in the fields, are said to be hard-up as the ryots cannot generally afford to give them labor. They say that they have enough to do to feed themselves without paying for hired labor.

If such is the case, the procedure enjoined in Circular No. 3667—S.R. of the 8th June should be followed.

In the Bettiah sub-division, Mr. Samuells reports that the bazars are well supplied, and that the mahajuns are bringing out their stores; coarse rice is selling at some places at 15 seers. Ten to twelve inches of rain have already fallen in this sub-division, and the early dhan will be ready for cutting in some places in another three weeks, and maize and kado are coming up vigorously. The cheena (millet) crop has been very plentiful towards the Gunduk, and seed-grain, so far from being deficient, is procurable at 20 seers the rupee (kutoha), and in Bettiah itself has been sold at 18 seers.

The condition of the people, Mr. Samuells reports, is excellent. The representation made by the high level canal Engineer that he had met with distress of a severe nature in certain villages, has been carefully enquired into, and found to be altogether incorrect. Mr. Brookes, it seems, referred to a state of affairs supposed to have existed a month ago; it is evident therefore, that had matters been as reported by him, a catastrophe must ere this have occurred, unless additional means of relief had been at once afforded. But as Mr. Brookes did not report the matter to the relief officers, no additional measures were of course taken, as the existing arrangements were considered by those who knew most about the condition of the people, sufficient to meet all requirements. Work was easily obtainable at fair rates, the charitable relief scheme was in force, and grain had been largely advanced by private individuals; no catastrophe has occurred up to date, so that it is evident that Mr. Brookes must have been imposed upon. His conclusions, moreover, are not borne out by Mr. Fahie (his *locum tenens*), or by his subordinates.

The matter will form the subject of a separate report, and need not therefore be enlarged on here.

In the Ramnuggur sub-division Mr. Howe reports that the weather has been very favorable for the cultivators. Heavy rain has fallen everywhere except in the east circle, where occasional and rather heavy showers prevailed with intervals of fine weather. At Bugaha 10½ inches of rain have fallen since the 8th June. The bhadoi crops have been sown everywhere, but a considerable deficiency has occurred in the bhadoi paddy sowings. Mr. Fiddian (circle officer at Bugaha), writing of that circle says: "a good deal of bhadoi is already above ground, and the plants look very thriving; the sugarcane crop is also in a forward state; the principal difficulty however just now is about bhadoi paddy seed-grain. The cultivators are making every effort to obtain it, some of them bringing in small

quantities from a considerable distance, and bunniahhs are selling it at 15 seers per rupee; but there is no doubt that the supply itself is deficient, and that the full amount of bhadoi seed will not be put into the ground this year.

"The Shohurya cultivators are backward both in ploughing and sowing, but a very seasonable supply of seed-grain has arrived on account of the Bettiah estate, which is rapidly being carted to Shohurya."

In the eastern portions of the sub-division they are better off in this respect. In tuppehs Deorar and Chagwan in the central portion, again, there is a deficiency, though a great deal of bhadoi paddy seed has been sown. Regarding the aghani crops, Mr. Howe writes:—

- "The sowings have not as yet commenced on a large scale. About 1,000 maunds of Government seed-grain (aghani), out of the amount (25,000 maunds) promised, have arrived. This is being sold, and also advanced where the cultivators are so miserably poor that they cannot purchase it. At first the people showed considerable distrust, some idle rumours having been spread that it would not germinate, but I had a small quantity sown near the shop at which it was sold, and on its springing and appearing a fine vigorous plant, purchases have become more general."

The arrival of the remainder of the allotment (25,000 maunds) is anxiously looked for; steps have been taken to expedite its transmission. The deficiency in the aghani seed-grain is greater, Mr. Howe says, than in the bhadoi.

Regarding the state of the markets, Mr. Howe reports that, to a small extent, trade has revived in the eastern circle: "This is caused by monopolists being now compelled to bring their stores (which they have hitherto concealed) to market." Colonel Boulderson, who has been requested to watch the markets very carefully, and to be cautious that the Government sales do not interfere with private trade, writes: "I do not think that any large amount of private grain has been exposed for public sale, and perhaps with the exception of a few of the wealthier zemindars, private stores do not exist in this circle."

The Government sales therefore continue in the east, though both for this and other reasons (noted below, heading D), the sales have considerably diminished. Regarding private sales of rice in the Ramnuggur bazar, Mr. Howe states: "The quantity exposed for sale is so small, and the prices at which it is sold are still so high, that it can hardly be considered a revival of private trade. On the last bazar-day 3 rupees worth of private rice only was exposed; this rice I think has not been imported, but that holders of private stores are getting rid of their hitherto concealed grain, which, in the Ramnuggur circle, has been smaller than elsewhere. There has been, however, a brisk sale, and importation of gram from the west, which is now procurable at 14½ seers in considerable quantities."

In the Bugaha circle, there are as yet no sales from private stocks of either rice, wheat, or cheena; but several kinds of dāl at 11, 12 and 13 seers, maize at 20, and suthoo at 11, are to be had in fair quantities. There is no probability that Government sales can be dispensed with for some time to come. Seed-grain paddy was selling at 15 and 16 seers.

The fact that holders of private stocks are now coming forward in the east of this sub-division is no doubt a satisfactory sign; but as Mr. Howe says the necessity for continuing and extending Government sales remains, and: "throughout the greater part of the sub-division, people still depend entirely on Government rice." Of the condition of the people Mr. Howe writes: "a considerable improvement has taken place in the condition of all classes, and this has been specially marked among the agricultural population, the majority of whom have been able to return to ordinary field-work. Tuccavee advances (which, as will be seen hereafter, have been very nearly completed), have done much to bring about the result of enabling cultivators to subsist while carrying on their field work. If the seed-grain difficulty can, as I trust, be settled satisfactorily during the next ten days, there need be no anxiety about the agricultural classes. There is one large section of this community whose condition, however, requires attention. I refer to those who in addition to the loss of their crops have, during the present season, lost nearly all or the whole of their personal property by fire; most of these have received tuccavee advances, and to some relief under rule f has been given, but I think a more general measure necessary, and have reported the matter specially." On the whole the condition of the people "has decidedly improved and prospects for the future are reassuring."

This account of the tract which has all along given most anxiety, is very encouraging.

Price-current.—The following statement will show the rates at which food-grains have been obtainable in the bazars:—

No. 1, Motiharee sub-division.

| Grand total number of persons employed is | ... | ... | ... | 1,040,573 | |
| And the daily average is | ... | ... | ... | ... | 74,364 |

The numbers have therefore fallen more than half since the previous fortnight.

In the Motiharee sub-division, no works have been permanently closed. They are so scattered, and so comparatively few, that they cannot be closed till the scarcity has ceased, and there is, moreover, work to be finished on all of them. "Results," Mr. Oldham writes, "have shown that by giving the lowest rates of wages compatible with health, and at the same time exacting full task-work, the people leave the works as soon as ever they can find occupation elsewhere." At present nearly all the able-bodied men have deserted, and the women and children carry on the dressing, turfing, and patch-work which is now going on. Mr. Oldham's rates, which are also followed by the Public Works Department, are :

| | Chutacks. |
|---------------------------------------|-----------|
| I. Able-bodied men, with tools | 12 |
| II. All other adults | 9 |
| III. Children above six years | 5 |

The fullest work is exacted at Segowlee, the gangs being supervised by Captain Knowles' troopers. Some of the works here were measured by the Executive Engineer, who found that they were being executed at the rate of Re. 1-8 per 1,000 cubic feet. At the former higher rates the terms given by agriculturists for their labor are much higher than this; and now that the rates have been lowered, while the same tasks are exacted, there is not the slightest anxiety on the subject of people being attracted to the works who could find occupation elsewhere, or of work being given to those who do not need it. "The fact that advantage has been taken of the large supply of labor available to bring a quantity of land hitherto fallow under cultivation, shows that our works are not competing with the cultivators' demand for laborers." Mr. Oldham proposes to permanently close any work on which the daily attendance sinks to 50 or thereabouts, making provision for the laborers who are attending it when closed; but to maintain the other works as a safeguard till September next, that is, such of them as were intended to afford relief till that period. Several minor works will be finished very much sooner.

The numbers employed on task-work (in the sub-division) is shown below:—

| | | On task-work. | Not on task-work. | Total. |
|-------------------------------|-----|---------------|-------------------|---------|
| Under Public Works Department | ... | 48,808 | 24,404 | 70,212 |
| „ Circle officer | ... | 146,974 | 48,691 | 194,765 |

The numbers employed during the past fortnight have fallen from 36,823 to 23,711. In the Dhaka sub-division during the last week of the fortnight most of the works were closed, and the rates on the remainder reduced to mere subsistence wages. Mr. Kilby has arranged for conservancy works in many villages, and intends extending the scheme throughout the sub-division. Each group officer supervises the works in his village, and has a moonshee (paid in grain) to look after the coolies in each village. These small gangs are employed cleaning out drains, filling up holes, and improving village paths. The rates fixed are so low that there is no fear of our competing with the agriculturists; indeed for the present chiefly those persons only will be employed who would, if these works were not provided, require gratuitous assistance. This village machinery will, as Mr. Kilby says, be "ready in case we find people coming on our hands again when field-work slackens." The decrease in this sub-division in the numbers employed is shown in the margin.

| | | |
|------------------------|-----|--------|
| Previous fortnight | ... | 41,939 |
| Fortnight under review | ... | 15,837 |

In the Gobindgunge sub-division not many relief works have been closed altogether, but the numbers employed thereon have decreased from 40,989 (daily average) in the previous fortnight, to 14,458 in the fortnight under review. The condition of the laborers is said to be "fair, though many are still thin."

In the Bettiah sub-division, some of the works under the circle officer have been closed, in order that the laborers might resort to their fields, and the numbers employed on the remaining works have fallen from 9,000 to 7,000 under the Public Works Department and from 11,000 to 4,000 under the circle officer. A further decrease is expected during the present week. Payments in grain, as already reported, are universal, and the system of cash payments on the seventh day was dropped almost as soon as introduced, as it was not liked by the laborers. In the Ramnuggur sub-division also, there has been a large decrease in the number of the laborers; they have fallen from 11,949 to 6,783 in the past fortnight. Payments have been made everywhere in kind except on the seventh day, and in accordance with recent orders grain payments have been ordered on this day also. Turfing has commenced, and task-work is introduced everywhere. The general rate (paid in kind but expressed in cash), is Re. 1-14, or Re. 1-12 per 1,000 cubic feet. Several works, chiefly tanks, have been closed.

Under this head I would mention that the Rs. 43,000 shown in my last narrative as paid in cash on relief works, consisted of Rs. 9,000 which belonged to a former fortnight, and omitted by an oversight from that fortnight's financial statement, and of Rs. 34,000 expended by the Public Works Department on bridges required for relief roads. The order to pay skilled laborers if possible in grain, has now been circulated to all the relief officers and Engineers, and will be attended to; as also the general order (also lately received) to pay grain on all seven days of the week. I would also notice that the total number of persons employed on relief works was by an oversight wrongly stated in my last narrative. The numbers on the Upper Gunduk Embankment should have been stated as 302,267, the grand total of laborers as 2,281,443 and the daily average 162,960.

C.—TRANSPORT OF GRAIN.

No private importations have taken place in the Motiharee sub-division, and importations from a distance are said to have ceased in the Dhaka division, but continue to take place from Patna and Revelgunge into the Gobindgunge sub-division. In the Bettiah, and parts of the Ramnuggur sub-division (as stated under heading A), private trade is going on.

D. STORAGE OF GRAIN.

The disbursement of Government grain is shown below, and a subjoined statement gives the information required by Circular No. 3369—S. R. of the 26th May.

In the Motiharee sub-division sales have slackened. Mr. Oldham has been instructed to sell at 12 seers, the rate hitherto obtaining being 11. More grain it will be seen has been disposed of in this than in any other sub-division, Mr. Oldham having very nearly disposed of a lakh of maunds. Much of the grain has found its way into the Dhaka and Gobindgunge sub-divisions, where sales of Government grain have not till very lately been extensive, in consequence of the existence of private trade.

In Bettiah the sales to the public have slightly decreased, but so slightly as to call for no remark; 8,470 maunds were sold in the past fortnight, against 9,500 in the previous fortnight. The ryots, Mr. Samuells says "do not exhibit much confidence in local resources, as is shown by their unwillingness to desert the Government stores." The sales, he anticipates however, will still further decrease the "nearer the certainty of a coming harvest is approached." If the present favorable prospects continue, there is no doubt that these expectations will be found correct. In Ramnuggur the decrease has already taken place, being largest in the east portion under Colonel Boulderson, who gives the following reasons for the falling off:—

1st.—The introduction of grain payments on all relief works.

2nd.—The payment in kind by petty maliks to agricultural laborers engaged in field work.

3rd.—The opening of private stores. Besides which it is evident that sales must diminish as prospects improve; and the large tucavee advances must also tell. The plan of storing small quantities of grain in the custody of respectable zemindars in the interior is being carried out.

* Includes amount sold to Bettiah Raj.

† Includes advances to Opium Department.

In the two golahs of Shikarpore and Chamardeeha, weevils are reported to have appeared, and some damage from dampness has taken place at Barh in the Gobindgunge sub-division.

E.—ADVANCES TO PRIVATE PERSONS.

In the Motiharee sub-division 17,019 maunds have been advanced to ryots up to date. Of this 7,250 maunds were given out through the agency of the Opium Department. Mr. Oldham reports that his advances are now nearly completed.

In the Dhaka sub-division 10,616 maunds have been advanced under this head, and 5,235 maunds were sanctioned lately. In fourteen or fifteen villages which were in farm to the Seeraha factory, inquiries were complete, but as the manager wished to make the advances, the papers were made over to him, and he has given out his own grain, and applied for a loan of 2,000 maunds of Government grain, which has been sanctioned. Another zemindar has only actually taken delivery of 461 maunds out of a sanctioned loan of 15,000 maunds. Messrs. Begg and Macqueen are both, Mr. Kilby reports, giving him much assistance; the former gentleman having, besides the 2,000 maunds referred to above, advanced Rs. 10,000 in cash, and Rs. 5,000 worth of grain to the ryots, and the latter Rs. 3,600 worth of grain. Much assistance has also been rendered by Mr. Cooper, sub-deputy opium agent.

In the Gobindgunge sub-division 13,136 maunds have been advanced.

The manager of the Hutwa raj has agreed to stand security for loans to the necessitous ryots in all the raj villages, and in the remaining portion of the sub-division, nearly all of which belongs to the Bettiah raj, the manager has agreed to advance for the present 5,000 maunds to the poorest of the ryots. To the rest Mr. Weekes is advancing grain on the collective security of the ryots of each village.

The manager of the Pipra factory has advanced a large sum of money, and has been authorized to make farther advances of Government grain.

The same may be said of another large concern (Barah). In the Bettiah sub-division the lists of ryots requiring advances have all been prepared except in one circle. They shew ryots who can give security and ryots who can give none. "The village community go bail for the whole amount. It seemed better to give the advances to the latter class of ryots in charity, but many of them refused to accept it except as an advance, and scorned the notion of charitable relief." The exact amount advanced cannot be given, but the loans are made only to the poorest class of ryots to enable them to employ labor in their fields.

In Ramnuggur the tucavee advances are now nearly completed. Mr. Gibbon has come forward, and authorised Mr. Howe to make advances in the southern and south-eastern tuppehs, and to send him bills for the amount. By this plan Mr. Howe says that nearly all the advances made under Circular No. 48T.F., will be changed into advances made under the zemindar's security and the account closed. The amount advanced during the fortnight was 4,596 maunds, and from the commencement 25,803 maunds have been advanced either on the security of the Rajas of Ramnuggur and Bettiah, or of petty but substantial maliks, and the direct system (except in a very few cases) abandoned.

F.—CHARITABLE RELIEF.

The subjoined table will show the numbers who receive relief under this head. The numbers have generally increased, but this will probably be more marked in the ensuing fortnight. There are 14 orphans at Ramnuggur who are for the present being looked after at the poor-house.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

39. Total expenditure from the district and subordinate treasuries, as shewn in the last narrative, full details of which were therein given Rs. 23,17,137-2-2.

Expenditure during the fortnight under report:—

Shikerpore returns not received.

Fortnightly Narrative of the District of Monghyr for the Fortnight ending the 27th June 1874.

A.—STATE OF THE COUNTRY.

THERE has been abundant rain all over the district. In the Bukhtiarpoore circle there has been so much rain that some of the late sowings of murwa have been swamped; but, on the other hand, the greatest possible benefit has been caused to the bhadoi dhan, early murwa, and kiri. The numbers of the laborers on the village works have decreased, and the people are returning of their own accord to their usual avocations. In the Begoo Serai sub-division the state of the crops is most promising. Makai, the great stand-by of the lower orders in the way of food, has been sown over a much larger area than usual, and is coming up strong and healthy. There was a little local distress amongst the poorest class of agriculturists in a corner of pergunnah Naipore, but Mr. Wilkins the moment he heard of it proceeded thither, and by timely distribution of grain advances has entirely met the difficulty. Throughout the Jamooee sub-division there has been almost constant heavy rain, notwithstanding which Mr. Money and his staff have been moving about Chakai, Pertabpore, and Gidhour, as best they could upon elephants.

The general result of their investigations is most reassuring. The area of janera sown this year is much larger than in ordinary years, and the plant is strong and healthy. The nurseries of aghani dhan are most flourishing, and will be ready to transplant in a fortnight. Sathi dhan has been sown broadcast in nearly every village, and the murwa is being transplanted. This last-named operation is giving abundant employment even to the weak and old. One village only—Katowna—Mr. Money found in a very backward state, and he promptly distributed relief tickets and grain advances.

The price of rice in the bazar has fallen to the Government rate of sale, and Mr. Money has therefore stopped the sales of Government rice. Both the janera and the sathi dhan will be ready by the beginning of September; and Mr. Money is moving down 10,000 maunds from the surplus golahs of the Lucki Serai triangle to meet any pressure that may be felt between this and then.

Khurruckpore continues flourishing, and in the Sudder sub-division there is no indication of any pressure existing.

B.

Three petty relief works have been opened during the fortnight for those who are not yet absorbed by the usual agricultural labor. On the other hand, six have been closed, either on completion, or because the laborers no longer present themselves, being employed in the fields instead.

In the Begoo Serai sub-division all the relief works have been closed in consequence of the heavy rain, except the large tank at Begoo Serai. Petty repairs of roads in the north-west of the sub-division afford sufficient labor for all who want it locally; whilst a large number who can work have flocked to the Ganges bund, which is being constructed by the Tirhoot authorities.

In Jamooee there is only one relief work going on—the abkaree tank, and there the laborers present themselves in such small numbers—30 to 50 a day—that it hardly seems necessary to keep even this one work open.

In the Sudder station the heavy work of excavation of dhobees' tank (a municipal work) has been finished, and now all the light labor gangs have been set to level the new earthwork and to turf the slopes.

C.

There is very little to report under this head. There is no movement of grain necessary in Bukhtiarpoore. Mr. Money is a good deal hampered by the flooded state of the roads in his endeavours to move the 10,000 maunds granted him from the surplus golahs, but will, I have no doubt, overcome the difficulties. All the Begoo Serai golahs are in good condition. The transport of the 20,000 maunds from the Lucki Serai surplus golahs has been much delayed; *first*, by the breaking down of a ferry boat on a river between Sheikpoora and the railway; and *second*, by the fact that this fortnight has represented just the time when the roads become impassable to carts, and yet the little streams are not sufficiently full, nor the country sufficiently flooded, to render the water-carriage generally available. However, now the water has risen so very considerably that all despatches by cart are out of the question, and the remainder of the consignment is going by boat.

D.

Every thing is *in statu quo*. In the Bukhtiarpoore golah the bags have been enumerated and sorted.

E.

Mr. Manson has advanced 475 maunds to nine zemindars, and 7,410 maunds to 3,384 ryots; Mr. Wilkins has advanced 7,614 maunds to ryots, and Mr. Money 1,270 maunds

to ryots; and I have given out 1,601 maunds and 30 seers to 12 zemindars. The above results take very little space on paper, and might perhaps be overlooked in consequence; but when it comes to be considered that it shows that about 20,000 maunds have been distributed in driblets, and ikrarnāmas and securities taken, it reveals an amount of patient work which should not be overlooked because it can be recorded in a few lines.

F.

The numbers receiving gratuitous relief have increased in the Bukhtiarpore circle, and Mr. Manson expects no great reduction until the end of July. Rajah Leela Nund Singh has swelled the numbers by discontinuing all private relief since the group system was finished. All the poor in his village are now supplied by Government.

At Jamoore the poor from the poor-house have been sent to their homes with tickets, so that at Jamoore itself there are only 29 inmates, and at Simultollah only six.

The following information is in accordance with Government letter No. 125:—

Committees.

Monghyr, Jamoore, and Begoo Serai.

Sub-Committees.

Lucki Serai, Sheikpoora, and Bukhtiarpore.

(2). Special sub-division opened and officered.

Jamoore.

(3). Lucki Serai, Sheikpoora, and Bukhtiarpore.

(4). Jamalpoore ... Native gentlemen connected with railway.
 Chapran ... Mr. H. Christian.
 Bassoni ... „ J. Christian.
 Gurpurrah ... Hooley.

(5). The annexed statement will give the information required.

Daily average number of persons relieved at the Relief-centres and Poor-houses in the District of Monghyr for the week ending the 27th June 1874.

RAM RUTUN MOJOMDAR,
Assistant Engineer, in Executive charge,
Monghyr District.

No. 678—S.R., dated Bhagulpore, the 1st July 1874.

From—V. T. TAYLOR, Esq., Collector of Bhagulpore,

To—The Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the 16th fortnightly narrative for this district.

A.—STATE OF THE COUNTRY.

2. The past fortnight has been one of constant rain throughout the district, and a week of fine weather, of which at present, there appears but little prospect, is very desirable, especially for the Indian-corn, though up to date no harm has been done to that, or any other crop. Ploughing, sowing, and transplanting of paddy has been, and is being, most energetically carried on, and the general prospects could not possibly be brighter than they are at the present time.

3. The total rainfall of each sub-division from the commencement of the year to the 27th instant is given below; that for head-quarters is to the 30th June; the figures for Muddehpooara are, I think, a little under the mark, as the returns for a week or two are not forthcoming. The figures from the 1st January to 30th June 1873 are also given for comparison, and it may be mentioned that the total rainfall of the whole of 1873 was not much more than 28 inches.

| | 1874 | 1873 to 30th June. |
|-------------------|-------|--------------------|
| Head-quarters ... | 21.28 | 6.58 |
| Banka ... | 17.54 | 8.58 |
| Muddehpooara ... | 13.78 | 8.59 |
| Soopool ... | 18.27 | 7.37 |

4. There is but little to say regarding grain-supplies or prices generally. The supplies are unaltered, and the tendency of the prices is to fall, certainly not to rise.

5. The following statement will show the difference in prices this year and at the corresponding period of the year 1866; it will also be seen that common rice is cheaper now than when the last fortnightly was submitted:—

| | Rice (common) | | Pulses. | | Indian-corn | | Wheat. | |
|-------------------|---------------|-------|---------|-------|-------------|-------|--------|-------|
| | 1866. | 1874. | 1866. | 1874. | 1866. | 1874. | 1866. | 1874. |
| | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. |
| Soopool ... | ... | 9 14 | ... | ... | ... | 13 10 | ... | 11 0 |
| Muddehpooara ... | ... | 14 0 | ... | ... | ... | 15 0 | ... | 11 0 |
| Banka ... | ... | 11 4 | ... | ... | ... | 13 8 | ... | 12 8 |
| Head-quarters ... | 9 7½ | 11 6 | 10 1½ | 17 0 | ... | 15 2 | 11 6 | 14 8 |

6. The general condition of the people throughout the district has improved, and is still daily improving. The Banka officer remarks, from his own personal knowledge and the reports he has received, his whole sub-division is in every respect in good condition, and there have been no cases of grain-theft during the fortnight. The Soopool officer writes—“Opinions differ as to any change in the general condition of the people, but the general opinion (in which I concur) appears to be that on the whole there has been a marked improvement, as indeed there well might be after the liberal relief of all kinds that has been afforded.” Of this marked improvement I have no doubt, knowing what I personally saw when in the north at the beginning of June. In the diary of Mr. Fanshawe, an exceedingly promising officer, who has been working right well, the following remarks are entered:—“The condition of mature people below 50 is always better, but that of old persons and children by no means in every case shows improvement.” And again, referring to the eastern portion of the Soopool circle, he says—“The condition of the people on this side is immensely improved;” and again “the condition of the people has improved in so marked a manner in all the villages, that I have not only struck off many names, but reduced the amounts given, and that while giving the full necessary relief to each person.” Under date 23rd June, he says—“I visited the Soopool tank yesterday with Mr. King, some 600 people were at work on it, whose condition is of the best.” Again, referring to Chandail, south-west of Soopool circle, he says—“I was immensely pleased to see the improved condition of the people generally.” Mr. Dennys, relief superintendent of Narradigur, makes very similar remarks:—“I may say the state of the people is much improved, and their progress is now very steady for the better;” and again “the crowds of faces I see daily convince me that our relief measures are at present sufficient to meet the requirements of the circle;” and he also remarks “I think distress may be described as being now at the turning point.” It is a matter for great thankfulness to think that the condition of the people is really so good. There is no doubt the spirits of the people generally have been greatly raised by the present good prospects of the crops. A few bright days would be invaluable for the bhadoi crops.

7. The statement of cases against property for June will be sent with the next fortnightly.

B.—RELIEF WORKS.

8. I annex the usual statement showing the progress of the relief works during the fortnight, and the work done by the Durbhunga Court of Wards, as also the information called for in Government Circular No. 144—F, dated the 5th May, as far as I have got the information.

9. The numbers show a considerable reduction. It is quite clear from the reports received that these works in no way interfere with the agricultural operations so far; cultivation is being carried on, notwithstanding, in a way rarely seen at this season of the year, and the time for transplanting the aghani rice crop has hardly yet arrived, by the time it does, road-work will be almost impossible.

C.—TRANSPORT OF GRAIN.

10. The exports and imports at the Bhagulpore station were, during the fortnight, 9,795 maunds and 27,260 maunds, respectively; of the former, 15,691 were wheat and 7,600 gram for Howrah, 181 maunds wheat for Burdwan, and 323 maunds rice up for Benares; of the latter, 16,005 maunds were wheat, and 10,755 maunds were gram from all sorts of places far up-country, 440 maunds were jowar, also from up-country. There is but little traffic at the other stations.

11. There is no private importation of any kind to the north of the Ganges, as far as I can ascertain.

D.—STORAGE OF GOVERNMENT GRAIN.

12. There is nothing further to remark upon under this head for the past fortnight.

E.—ADVANCES TO PRIVATE PARTIES.

13. Advances made to zemindars for the purpose of helping their ryots, under Government Circular No. 4020, dated 18th December 1873 :—

| Name of Applicant, | Profession. | Residence. | Amount. | Date of sanction. | By whom sanctioned. |
|------------------------------------|--------------|-----------------|-------------------------|------------------------------------|---------------------|
| Mr. A. Christian ... | Planter .. | Patterghat ... | Rs. 1,000 in rice ... | 16th June 1874 ... | Collector. |
| Thakoor Mun Singh ... | Zemindar ... | Sookhpore ... | „ 4,000 in grain ... | No. 5510-SR, dated 23rd June 1874. | Commissioner. |

F.—CHARITABLE RELIEF.

14. The statements annexed show what has been done towards disposal of the grain. Some few golas, it will be seen, are behindhand with the information; for these 20,000 may be safely estimated. The statement shows a sale to the public in the Soopool sub-division up to the 24th June of 1,17,645 maunds, and a total disposal of some 2,09,832 maunds, out of an original allotment of 5,66,000, and of actual storage, not calculating loss of weight, of 5,40,512. The Muddehpore return is complete up to the 20th June, and shows a total sale to the public of 25,741 maunds, out of a nominal allotment of 1,65,979, and of actual storage, not calculating loss of weight, of 1,68,980 maunds. I need only repeat that these sales have been of very great benefit to the people generally, and has proved one of the best forms of relief. The fortnightly estimate of grain expenditure has been slightly exceeded in both sub-divisions, and I have little doubt that 1½ lakhs more will be disposed of during the month of July; but, if the present prospects are not marred, the end of August will, I am certain, show a very material decrease in applications for assistance of any kind, and the sales will be next to nothing.

15. Up to the 20th June some 5,055 maunds of seed-grain have been given out as advances, and sales of it are going on at Ekar, Bongong, Nowabakur, and Soopool, and about 1,000 maunds have been thus disposed of. “Many bags (as mentioned by me in my last fortnightly)” Mr. Kirkwood writes “unfortunately contain several sorts of paddy indiscriminately mixed, and these are regarded with much disfavor.” Mr. Dennys reports an increasing demand for seed in Narradigur, and additional supplies have been sent to him at Nowabakar.

16. Mr. Kirkwood also reports as follows, regarding advances generally :—“Up to the 20th June the figures were 7,133 ryots, for issue to whom orders for 24,964 maunds of grain had been given; up to the same date orders had been given to 57 zemindars for 26,589 maunds of grain for distribution to the ryots as advances, making a total of 51,553 maunds

of grain, of which 4,591 maunds were seed-grain. Since that date information has reached me, in some cases up to the 24th, in some to the 27th. During these few days orders for advances have been issued to 1,956 ryots for 349 maunds seed-grain and 6,309 maunds rice. During the same time orders for advances were issued to 4 zemindars for 115 maunds seed-grain and 1,050 maunds rice; this increases the total to 9,089 ryots receiving 31,622 maunds of grain, of which 1,039 maunds were seed-grain, and 61 zemindars receiving 27,754 maunds of grain, of which 4,016 maunds were seed-grain. Thus total grain advances were 59,376 maunds, of which 5,055 maunds were seed-grain." Mr. Kirkwood adds—"There are 14 villages in the Narradigur circle in which we shall have to make advances, and will be enquired into during the current week." The zemindars are said to be generally behaving very well to their ryots, and making large advances; the most notable exception, Mr. Kirkwood remarks, is Dhunput Singh, zemindar of pergunnah Harrawuth, who has done nothing whatever for his tenantry. But I believe nearly the whole of that gentleman's estates in this country are leased out in *putnees*.

17. In the matter of house-to-house relief, Mr. Kirkwood submits the following figures:—

| | | | | Maunds. |
|-------------|----|----|----|---------|
| Ekar | .. | .. | .. | 6,679 |
| Narradigur | .. | .. | .. | 16,225 |
| Soopool | .. | .. | .. | 4,679 |
| Bongong | .. | .. | .. | 1,446 |
| Bhowanipore | .. | .. | .. | 635 |
| Kamp | .. | .. | .. | 910 |
| Bhulooa | .. | .. | .. | 1,000 |
| Simrahi | .. | .. | .. | 4,000 |

35,574, as against 33,330 the previous fortnight.

18. *Cooked food relief.*—The following figures are also given by Mr. Kirkwood:—

| | | | Men. | Women. | Children. | |
|--------------------------------|----|----|------|--------|-----------|------------|
| Soopool hospital | .. | .. | 14 | 8 | 8 | |
| Soopool poor-house | .. | .. | 9 | 19 | 30 | |
| Bongong ditto | .. | .. | 23 | 16 | 12 | |
| Patchgachia ditto | .. | .. | 27 | 37 | 37 | |
| Ekar | .. | .. | 13 | 27 | 34 | |
| Nowhatta (closed on 16th June) | .. | .. | 8 | 12 | 20 | |
| Simrahi hospital | .. | .. | 19 | 9 | 12 | |
| Simrahi poor-house | .. | .. | 14 | 32 | 14 | |
| Bhulooa | .. | .. | 17 | 26 | 21 | |
| Nathpore | .. | .. | 6 | 9 | 13 | |
| Muddehpooa | .. | .. | 13 | 18 | 19 | |
| Bhowanipore | .. | .. | 24 | 42 | 7 | |
| Kamp | .. | .. | 3 | 10 | 2 | |
| | | | 190 | 265 | 229 | Total 684. |

as against 945 in the previous fortnight, a very satisfactory decrease.

The only "centres" now open are Bhaptiahi and Dighia, in Narradigur, though I think these will by this time have both been closed.

19. Fresh supplies of cotton have been received. The numbers on this relief are thus shown for the fortnight by Mr. Kirkwood:—

| | Spinning. | Weaving. | | Spinning. | Weaving |
|----------------|-----------|----------|----------------|-----------|---------|
| Soopool .. | 78 | 32 | Burgaon .. | 311 | 56 |
| Hurdi .. | 119 | 17 | Semani .. | 107 | 6 |
| Rutowle .. | 134 | 5 | Bhulooa .. | 408 | 212 |
| Chundail .. | 173 | 6 | Kamp .. | 182 | 42 |
| Sookhpore .. | 121 | .. | Bhowanipore .. | 582 | 82 |
| Bongong .. | 462 | 36 | Narradigur .. | 600 | 40 |
| Muheshi .. | 10 | .. | Simrahi .. | 300 | 50 |
| Patchgachia .. | 384 | 27 | | | |
| Ekar .. | 31 | 44 | | 4,002 | 693 |
| Nohotha .. | .. | 38 | | | |

as against 5,465 of the previous fortnight. The falling off is attributed by Mr. Kirkwood to short supply of cotton.

20. General abstract of relief for the fortnight:—

| | | | |
|---------------------------|--------|----------------------|--------|
| Private works .. | 3,000 | Spinning and weaving | 4,695 |
| Circle and light labor .. | 9,761 | | |
| House-to-house relief .. | 35,574 | | 53,714 |
| Cooked food .. | 684 | | |

as against 60,124 of last fortnight, the reduction being under the headings of private works, cooked-food, and spinning.

21. Mr. Smith expresses regret at not having been able to show figures in detail of expenditure in relief under the various headings, as he has been fully employed with the Special Accountant-General during the fortnight; but he is now engaged upon them, and I hope they will soon be ready in a complete form.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

| | Rs. | A. | P. |
|--|----------|----|----|
| • Total expenditure from the district and sub-divisional treasury, as shown in the last narrative | 6,83,443 | 0 | 2½ |

V. T. TAYLOR,
Collector

No. 2200—F., dated the 1st July 1874.

From—W. KEMBLE, Esq., Magistrate and Collector of Purneah,
To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to forward herewith my fortnightly narrative for the period ending the 27th June.

Fortnightly Report for the period ending 27th June 1874.

A.

The supply of grain in the bazar continues to improve.

The Deputy Collector of Arrareah reports that "the markets are now well supplied with grain, large quantities of which are brought from Purneah, coarse rice sells at 10 seers."

In Purneah bazar the price varies from 10 to 10½ seers the rupee, with a tendency to get cheaper; makai is coming into the market, and is selling at 20 seers for a rupee.

The market at Kissengunge is now supplied from the Purneah bazar, and from the advances of Government grain made to traders. Prices there have fallen to 10 seers for the rupee. Mr. Coles, who has taken the place of Mr. Meiklejohn at Bulrampore, reports that rice is there selling at 10 seers for a rupee.

Rainfall and state of the Country.

The rainfall during the week has been great, viz., 4.09 in Kissengunge, 5.96 in Arrareah, and 2.30 at the sudder station, making a total up to date of—

| | | | | | |
|-------------|-----------|-----------------------|-------------|-----------|----------|
| Sudder | ... 17.87 | } inches, being ... { | Sudder | ... 6.34 | } inches |
| Kissengunge | ... 23.77 | | Kissengunge | ... 11.65 | |
| Arrareah | ... 26.29 | | Arrareah | ... 16.29 | |

more than had been recorded on this date last year, when the recorded figures in the Gazette of July 2nd were—

| | | | | |
|-------------|-----------|--|----------|-----------|
| Sudder | ... 11.53 | | Arrareah | ... 10.00 |
| Kissengunge | ... 12.12 | | | |

Last year between the 22nd and 28th June no rain at all fell in the Purneah or Bhagulpore districts. Complaints have been made that in some places the people have not been able to weed their fields, owing to the quantity of water in them; this, however, I look on merely as an ordinary farmer's grievance; no harm has yet been done.

Reports from all sides show that all the crops are excellent. Farming operations are in full swing everywhere. Mr. Carnac says—"There is at present a sixteen-anna crop everywhere in the sub-division, and the area of land under cultivation is, I hear, much larger than in ordinary years."

Mr. Gouldsbury says—"The crops promise not only a very abundant but also an early harvest,—in some places the dhan (bladoi) being 3 feet high and proportionately thick."

In Dengra the early juncera is said to be ripe and fit to cut. In Arrareah in some villages they have had a bumper crop of cheena, which, it is said, will put them beyond want; and in pergunnah Sripore the murwa crop is good.

In Dhurrumpore, makai (Indian-corn) is coming on, Mr. McQueen says, by relays. The Indian-corn sent up by Government has been largely used for seed all over the district, and afforded much relief.

The condition of the people is improving; complaints have almost ceased. The strong and hearty find plenty of employment on the roads, or more generally in the fields, while the hospitals and relief-houses afford shelter and help to the sick and infirm.

There have been no more grain-robberies in the north, and the petty thefts reported, as shown in the annexed table, amount only to 31.

Concerning Bahadoorgunge, which in my last narrative I said was the worst part of the district, Mr. Carnac writes—"I have not been able to visit the south of Bahadoorgunge; in the north of Bahadoorgunge there is no great distress. I was at Bibigunge on a market-day, and there were some 3,000 people collected. I went through the throng of people, but could not pick out any case of particular distress."

*Statement showing thefts of grain reported in the District of Purneah from
14th June to 27th June 1874.*

| Name of Station. | Number of cases reported. | Worth of grain stolen. | | | |
|------------------|---------------------------|------------------------|----|----|-------------------------------|
| | | Rs. | A. | P. | |

| Dhumdaha | 1 | 1 | 0 | 0 | |
| Total | 31 | 266 | 9 | 5 | |

B.

Mr. Cordner's return shows a great falling off in the number of laborers; the reduction is entirely owing to their being more profitably employed in their fields.

The total employed according to the return is 75,365, against 94,718 last fortnight; the daily average has fallen from 13,531 to 10,766. The reduction is general and uniform all over the district. Payments in grain have been instituted everywhere and still give satisfaction. The tokens have just arrived, and will be sent out immediately. On the relief officers' minor works the returns for the month show a daily average of 16,597 laborers. I have not fortnightly returns to compare with those of the last fortnight, when the returns showed 18,374. The reduction this fortnight must have been considerably more than 2,000. In Kissengunge sub-division the numbers of women and children on second-class works have decreased, while in Bahadoorgunge circle the number of works on which they are employed have increased; this is as it should be, as it is impossible for women and children in that circle, which is more subject to inundation than any other, to travel far for work.

As the demand for labor by cultivators is great, Mr. Carnac reports that in Kissengunge circle all able-bodied persons have been struck off from the works, and that some have been supplied with food, which, with advances of grain now given to employers of labor, will enable all able-bodied men to get employment in the fields. The same plan is also now adopted in Bahadoorgunge circle, where grain is now plentiful enough to allow of advances being made. In Kusba Amour Mr. Gouldsbury has reduced his works, and employs only women and children, whose condition is, he says, improving daily, as is also that of the people generally. Mr. Rattray reports that on his works principally women and children are employed; he has done good work on his roads, and could continue it on the high sandy land in his sub-division throughout the rainy season, if necessary; but measures similar to those adopted in Kissengunge will be enforced more strictly here.

C.

Transport work is now a matter of difficulty, especially in the Kissengunge sub-division, but I hope all the difficulties will be overcome by the sub-divisional and the circle officers.

Mr. Carnac reports:—"Every little nullah is now a serious obstacle; they (nullahs) are too broad to bridge quickly, and boats to be used as ferries cannot get up some of them. I have been trying to fill Bibigunge from Kulligunge, but the difficulties are so great that the cartmen and owners of ponies can with difficulty be persuaded to go. Baboo Rojoninath has engaged 200 more ponies." He has made arrangements to send 500 ponies additional to Mr. Bertelsen to keep the supply in his Bahadoorgunge golahs. 2,000 maunds were, at the time of writing his last report, going to Khurkuri, and 2,000 maunds to Powakhali by boat. It has been found we must try and work boats up the Kankai River, which, owing to its strong current, was reported unnavigable by Lieutenant Gaselee. The route may be difficult, but it must be adopted.

The Dengra golahs, from which all the despatches are now made, are reported in capital order, and the condition of the rice good. Mr. Bolst has left Dengra, and is employed on the river as transport officer in charge of the Dinagepore allotment of 60,000 maunds, and also the additional 40,000 maunds ordered from Godagaree.

This extra 1,00,000 maunds will be allotted as follows:—

| | Mds. |
|----------------------------------|--------|
| Kissengunge sub-division | 50,000 |
| Arrareah " | 20,000 |
| Bulrampore circle | 10,000 |
| Sudder " | 10,000 |
| Kusba Amour | 10,000 |

In Arrareah Mr. Rattray has made contracts to bring up grain in boats from Dengra, and is working 420 ponies, as well as carts, in distributing it. The extraordinarily heavy rain coming upon us just at the commencement of the rainy season was very trying. The arrangements are now, I hope, in working order, and boats are as plentiful at Dengra as carts used to be at Caragolah.

The numbers of pack-ponies engaged and registered when Captain Anderson visited the circles, are as follow:—

| | Working. | Registered. |
|--|----------|-------------|
| Sudder | ... | 270 |
| Dengra | 350 | ... |
| Kusba Amour | 170 | 300 |
| Bulrampore | 150 | ... |
| Bahadoorgunge | 510 | 250 |
| Kissengunge | 540 | 400 |
| Arrareah | 420 | 5 |
| Kudbah | 600 | 400 |
| Total | 2,740 | 1,625 |
| Engaged since Captain Anderson's visit to Kissengunge | ... | 4,365 |
| Grand Total | ... | 200 |
| | | 4,565 |

D.

I have nothing much to note under this head. The golahs are now in good repair; the first burst of the rains put them to a severe test, and did some damage, which has now been repaired. The minor golahs are all stocked; three new ones have been opened in Kulliaingunge, at Dimp tee, Bhatgaon, and Dhuntola.

E.

No advances were made during the fortnight.

F.

A copy of the district relief monthly return is herewith submitted. The last monthly return, with which it should be compared, is incorporated with my narrative for the week ending 30th May. It will be seen that the numbers relieved by cooked food have decreased, as have also the numbers on light-labor tickets, while the numbers receiving uncooked food and relief by village tickets have largely increased. The returns under these two heads have got mixed up; in fact, it is hard to make any difference, as all persons entitled to get relief have tickets, and the only difference between the two heads is whether one or more days' supply is given at a time.

The numbers relieved by spinning and weaving and other means, which includes basket-making, jungle-clearing, sowing up bags, making up nets, &c., continue much the same. Since Mr. Carnao joined as sub-divisional officer, the Kulleagunge thana has been put under Moulvie Abdul Majid, Sub-Deputy Collector, and made into a separate circle.

Sudder.—The sudder circle is now under Mr. Meiklejohn who, owing to ill-health, was obliged to leave Bulrampore, which has been made over to Lieutenant Coles. Here the numbers of women and children on the tank-work have been largely reduced. 15 days rations and a piece of cloth, generally that made by those who have received cotton and thread in advance from the relief officer, is given to the discharged persons, whose names and residences are noted.

Dengraah.—Light-labour ticket-holders have almost disappeared, but the recipients of village relief have increased.

The minor golahs and sub-circles are here working well, and Lieutenant Thornton and Mr. Money are hard at work, sending supplies to more backward circles.

Kusba Amour.—Mr. Gouldsbury, I regret to say, has been laid up with bad fever. His monthly returns show a large number of persons on petty relief works who have now been discharged and otherwise relieved. Hauts and sales at minor golahs here work very well and smoothly.

Kudbah.—In this circle the work of relief is going on steadily, the numbers have increased during the month, but are, I hear, now falling.

Bulrampore.—Mr. Cole's 14 minor golahs are all stocked, and relief is distributed from them. Grain is brought up from the Mahanuddy by small boats to within about 1½ mile of Bulrampore, and from thence on ponies, more of which will be sent from Kudbah. The people here have good crops of vegetables and mangoes, and gladly buy and work for Government rice. All the persons in receipt of village tickets are entered in column 3 of the return.

Bahadoorgunge.—Mr. Bertolsen's great difficulty has been transport, but as the rivers fill this will disappear. He is very active in visiting his villages and in relieving all cases of urgent distress. In getting grain up the rivers by boats and across them on ponies, he has been working well.

Kissengunge.—Here there has been a large increase in the number of persons relieved by village tickets.

Arrareah.—The number of inmates of poor-houses have largely decreased, as have also the holders of light-labour tickets.

I submit a return of grain submitted by the relief officers, which shows a total allotment of 7,50,000 maunds. Up to date 2,93,902 maunds of grain have been disposed of. Besides this, according to last fortnight's figures, there were in the minor golahs 75,511 maunds, and 50,000 maunds have been sent to Julpigoree. This makes a total of 5,50,282 maunds. Out of the balance, amounting to 1,99,718 maunds, 1,00,000 maunds has not yet started, and more than 50,000 maunds are on the way between Maldah and Dengraah, and the rest is on its way from Dengraah to Government and minor golahs.

Taking the figures roughly, it may be said that our position as regards grain is this: 6,50,000 maunds have been sent to us, 1,00,000 maunds more is to come from Godagaree and South Dinagore. We have sold one lakh, given away half a lakh, advanced to ryots one lakh, paid as wages half a lakh, sent to Julpigoree half a lakh, out of the balance of four lakhs; two lakhs could not till the recent rise of the rivers be pushed on to its destination, the other two lakhs is stored; this is sufficient to feed the (nearly) 670,000 persons for six weeks or two months, shown by the last returns to be on our hands, exclusive of the Department Public Works laborers, and to offer for sale to the public about 1,50,000 maunds; this they will take gladly, as in parts of Kissengunge and Bahadoorgunge, since supplies have ceased to come in from Julpigoree, the number of respectable people with money who seem dependent for their market-supplies on Government stores is enormous.

Statement showing the number of persons relieved by Roy Lutchmiput Singh, Bahadoor, at his Khas Zemindaries in the District of Purneah for the period ending Saturday, 27th June 1874.

W. KEMBLE,
Magistrate and Collector,

PURNEAH DISTRICT.

Progress Report of Famine Relief Works for the week ending Saturday, 20th June 1874.

| Names of Roads. | Progress in marking out relief works. | Progress in opening works. | Number of laborers thereon. | | | Supply of food thereat. | | Condition of laborers, and general feature of the country. | Mode of payment. | Rate of wages. | Arrangement of tools. | Disbursement during the week. |
|-----------------------------------|---|----------------------------|-----------------------------|-------------|-------------|-------------------------|--|--|--|---|--|-------------------------------|
| | | | Class I. | Class II A. | Class II B. | Total. | Amount of Government grain sold to laborers. | | | | | |
| No. 1, From Purneah to Keogaana. | The whole line of road, about 40 miles in length, has been fixed, and estimate in progress. | 3 parties working. | 4,659 | | | 4,659 | Mds. Srs. 253 12 | Ra. A. P. 707 8 0 | Towards the close of the week the number of laborers on this road have decreased, owing to the heavy rain that has fallen, and many having left for work in the fields. The crops are everywhere looking excellent, and there is every prospect of a splendid harvest. The general condition of the people is good, and they appear more hopeful and contented than a few months ago. | The system of paying the laborers in grain in place of cash has now been in force since the 23rd of May, and it is giving general satisfaction to the people on our works. In fact, I believe that if the option was now given to them to choose between grain and cash payments, the former would be almost universally preferred. The laborers are wholly in readiness and profitable sale for any that they may carry over and above that required for their own consumption. As the tokens have not yet been received, the following arrangements have been made for paying the laborers in grain. The Sreer or Mohurir measures up the work done by each gang (four being now universally carried on by contract), and gives a payment to the laborer for the amount of grain, according to the value of the work done. The Duffadar takes this pay-order to the nearest Government measures shop, and after receiving the grain distributes it to his gang. | As there is a large quantity of Burnmah rice in this district, we almost invariably indent for and use it; and in fixing the rates for day-labor and contract-work, one sort of rice is taken as equivalent to one anna, so that the rates remain the same as before, viz., earth-work according to the nature of the soil and height of bank, varies from 30 to 40 seers per 1,000 cubic feet, 30 to 40 seers are, however, the usual rates; anything above this being very exceptional. The rates for Class II A and B are as follows:— Class II A. Seers. Men ... 1½ Women ... 1 Class II B. ... 1 Men ... 1 Women ... 1 Child ... ½ These rates are lower than the old cash rates, and have been reduced so as to correspond with those given on class works, in order that there may be no inducement for people to accept anything but contract work. | Ra. A. P. 707 8 0 |
| No. 2, From Etwaro to Natsopore. | The whole line, 82 miles in length, laid out and levelled, estimate in progress. | 14 parties working. | 29,253 | 1,827 | | 31,110 | 287 11 | 766 1 0 | The number of laborers on this road have decreased considerably since last week, as many of them have been kept away by the heavy rain that has fallen, and others have left for the purpose of weeding in the fields. A few days' fine weather would be of advantage to admit of field-work being more rapidly carried on. The crops are looking well all over the north of the district, and there is every prospect of an abundant harvest. | The Sreer or Mohurir measures up the work done by each gang (four being now universally carried on by contract), and gives a payment to the laborer for the amount of grain, according to the value of the work done. The Duffadar takes this pay-order to the nearest Government measures shop, and after receiving the grain distributes it to his gang. | Every effort has been made to induce the laborers to bring their own tools, but it is to be regretted that this has not been attended with any very great success, and especially since we began to issue large quantities of Government tools to each of the works. When the works were first started, but very few Government tools were issued, and most of the laborers came to our works brought their own. It was feared, however, that villagers were beginning to think that it was no use applying for work unless they brought kodals, so that, after a consultation with the Magistrate, tools were issued to each work; and now, as a rule, the laborers work with Government tools. These remarks only apply to the unprofessional laborers, as they and others, as a rule, have their own tools and bring them to the works. | 766 1 0 |
| No. 4, Kibhen-gunge to Neckmurd. | The whole laid out and levelled, and estimate submitted for sanction. | 2 parties working. | 4,731 | | | 4,731 | 204 16 | 545 0 0 | The heavy rain that has fallen, and the necessity of attending to their fields, have caused a considerable decrease in the number of laborers on this road. The crops are looking well in every direction, and the condition of the people is universally good. | The Sreer or Mohurir measures up the work done by each man (four being now universally carried on by contract), and gives a payment to the laborer for the amount of grain, according to the value of the work done. The District Officer takes this paper-order to the nearest Government measures shop, and after receiving the grain disbursements to his gang. | These remarks only apply to the unprofessional laborers, as they and others, as a rule, have their own tools and bring them to the works. | 545 0 0 |
| No. 5, Dengra Ghat to Toor-belly. | The whole line has been laid out and levelled, and estimate submitted for sanction. | 4 parties working. | 4,831 | | | 4,831 | 511 22 | 1,364 2 1 | There is a considerable decrease in the number of people at work on this road, as in some places the work was stopped for a few days in consequence of the heavy rain that fell during the week, and many of our laborers have given up road-work in order to attend to their fields. The crops look well, and there is every prospect of a good yield this year. | The Sreer or Mohurir measures up the work done by each man (four being now universally carried on by contract), and gives a payment to the laborer for the amount of grain, according to the value of the work done. The District Officer takes this paper-order to the nearest Government measures shop, and after receiving the grain disbursements to his gang. | | 1,364 2 1 |

| No. | Description | Unit | Estimate | Actual | Remarks |
|-----|--|--------------|----------|--------|---|
| 24 | Finlay's Dam - repairs to existing old road. | 1 party ... | 298 | | This work is simply repairing the old road and is being carried on by a contractor. |
| 25 | Main-dam - repairs and banking district roads. | 1 party ... | 174 | 10 36 | This work is simply repairing the old district road. |
| 26 | Line marked out and estimate submitted for sanction. | 2 parties... | 3,300 | 125 30 | Many of the laborers have left this road on account of the heavy rains, and in order to attend to the weeding of their fields. The crops are looking well, and there is every prospect of a good harvest. |
| 27 | Line laid out and estimate submitted for sanction. | 1 party ... | 4,579 | 91-35 | The heavy rain that has fallen, and the necessity for the people to attend to their fields have caused a considerable diminution in the numbers on our works this week. The crops are looking well, and the general condition of the people is improved. |

R. A. CORDNER,
Executive Engineer, Puneah District.

No. 575—S.R. & Co. and Doomka, the 1st July 1874.

From—J. BOXWELL, Esq., Offg. Deputy Commissioner, Sonthal Pergunnahs,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative for the fortnight ending the 28th June.

2. My narrative is two days late. This time the sub-divisional officers are not in fault : but I only came back to Doomka yesterday, after a visit to meet the Commissioner at Jamtara yesterday week.

A.—STATE OF THE COUNTRY.

3. This fortnight is the first of the rains. It was critical in many ways, and the crisis has ended favorably.

The three dangers were absolute—want of food for the present season, want of water and food for cattle; and want of seed for next year's crops. The least of these dangers was bad enough to have been a great calamity if it fell heavily. Of the three, two have now absolutely passed away. The rain has come and has filled rivers and tanks. There is abundance of water and young grass everywhere; and cattle, though a little thinner, are in fair working condition, have not died in any unusual numbers, and have now plenty to eat and drink.

Farming operations are fairly advanced. Quite the usual quantity of janera and other bhadoi crops has been sown. A great deal of rice has been sown and some planted out. In fact it is now certain that there was no scarcity of seed in the district; that neither our relief works, nor want of cattle, nor want of food, nor any cause or combination of causes, has had any appreciable effect on cultivating, sowing, or planting, or any agricultural work in the district. Weather is perfect, and the prospects for next year are now as good as it is possible they could be.

The third danger, want of food for the present, it is not safe to say has been removed, although I don't believe in its existence. In six weeks we shall have the first of the new harvest; and every day for six weeks we shall be nearer to want than on the previous day. We don't know the quantity of grain in the country. We do know that store-keepers run up prices on every chance, and that the prices are very high in spite of all our imports. We also know that in most places even a small import of Government rice at once acts in bringing prices down two or three seers. It is impossible to believe that ample stores of seed-grain were in the country, and that there was little or nothing else. Therefore, though I cannot say that I know the third danger has been removed, I can say that I don't believe it exists. I now go on to particular heads.

No failure of food has been reported. Prices are still high, but, except in Rajmehal town, where the experiment has only been tried on a very small scale, they go down at once before an import of Government grain. I have just returned from a tour of about 20 miles radius with Phuljori mountain for the centre. I rode from Jarmundi to Deogarh, going slowly, and not keeping to the road.

The maize is from an inch to a foot high, and looks in excellent condition. Sowings were a little late because the rain was late in coming. The rains began about the usual time, the 15th of June, but the casual rain in May had not been enough to complete ploughing. Since the 15th we have had abundance of rain everywhere, alternating with odd hours of bright sunshine, most favorable for the young makai. Some people say a good deal more than the usual area has been sown with makai, and no one says less has been sown. A fair amount of dhan for transplanting has been sown, and a fair amount has been sown broadcast.

Ploughing was going on actively everywhere, as well as weeding and hoeing of makai.

This crop is further advanced in north-west Doomka and north-east Deogarh than anywhere else that I have seen.

The condition of the people is good everywhere; laborers are strong, both in the fields and on our works. I have visited Jamtara, Nala, and Kundahit in the last week, the three places where famine was supposed to have shewn itself at last. At Jamtara I had to transfer to piece-work a number of very fine, young women whose plea for *haziri* was that they had no husbands. There were a few lepers and cripples hanging about, and one or two thin, old men and women, but no sign of general scarcity of food.

At Nala I saw about 30 miserable cripples getting fed. They would have been fit subjects for charity in any year.

At Kundahit people looked well, the town was full of women and children, and the golah surrounded by laborers coming to be paid as I rode in. There was no sign of want of food anywhere. I can understand why a great cry should have come up from Kundahit; and also why there should really be no famine in the country.

Kundahit is finely situated on high unbroken ground; it is largely inhabited by Bengalis, and the land all round the village is sown now with rice. There are a few tanks in and near

the town on the top of the hill; and now that we have cleaned and deepened them, they will hold a great deal of water; but last year many hundreds of beeghas of rice, depending altogether each field on its own rainfall, must have been lost from drought.

Generally the south-east of the district is extremely jungly, very much more so than I thought before I saw it. It is unusually well supplied with tanks and bunds, many old and many of this year's making. The cultivated land is almost always in hollows, which must retain a good deal of moisture down to a late period of even a very dry season. The small population has its pick and choice of a wide area for cultivation, and has the jungle to supplement tillage. Therefore I believe not only that there was no famine in Jamtara this year, but also that there could have been none.

But I believe that a great many cultivators in and about Kundahit suffered great loss; they did not choose their lands like the people farther west, but cleared a wide space of rather poor sandy soil and sowed it with dhan instead of janera. They had no way of watering it, and when the rain failed they were lost. It will be so again this and every year if the rain fails never so little.

From Jamtara to Doomka the makai has been sown. It is not so forward as between Jarmundi and Deogarh, but it is coming up well. Cultivators are a little nervous about the heavy rain. Young makai wants sunshine; and they think they have hardly had enough; but in eight days I counted up five which gave several hours each of hot sun. Three were either constantly wet or cloudy, and it rained heavily every night.

The sub-divisional reports are as satisfactory as my own observation. There is plenty of rain everywhere, with slight nervous anxiety that there may be a trifle too much. Every officer reports farming operations going on well. They might have said positively that the usual amount of seed had been sown up to date, but I take their reports to mean this. Mr. Grant says expressly that a larger area than usual is being sown with janera.

Mr. Wood says the alternate rain and sun is favorable for farming and growth, and that people who had kept no seed can get it by barter.

Mr. Stewart says crops are backward but good, and that there is nothing to complain of.

Mr. Wilmot says bhadoi crops are promising well; Indian-corn being hoed, and sathi dhan in first-rate condition. Crime is not unusually bad either in quantity or quality. The health of the people is excellent in Deogarh, and fair everywhere. Cholera is constantly breaking out on the borders, but it never spreads much or lasts long.

It is thus plain that our one anxiety is this. Is there enough grain in the country to feed the people for two months? Every day shews that there is more than was supposed previously. Mr. Wilmot and Mr. Hand have been very successful in making the mahajuns come to terms with their customers, as well as inducing landlords to make advances to their tenants. A considerable quantity of Government grain has been expended, most advantageously I think, in loans to zemindars and mustagirs. I myself believe that if we stopped all relief from to-day, a few old and weak people would die, and that every one would get hard terms from the mahajuns, but that there would not be anything like famine before the bhadoi crop is in. We have staved off distress in many places there is no doubt, and saved a good many lives possibly. From henceforth I have no fear of anything bad occurring beyond the spoiling of some rice in carrying it from places where it is not wanted to where it is.

B.—RELIEF WORKS.

4. Numbers of laborers are falling off everywhere; yesterday orders were passed to stop certain works, and no new works are being undertaken.

The tables give all required information about particular works.

The two questions which I need take up here are payment in grain, and piece-work *versus* daily labor. For some time the orders to pay in grain have been increasing in stringency and definiteness, and we have all been trying to obey them. Our works are spread much more generally over the district than our grain golahs. Our original grain allotment was not intended for payment of laborers. Quite lately I asked whether I was to indent for fresh grain to be able to pay all labour or not. The orders I got were "pay all labor in grain," and "indent for what you want." I have since seen the Commissioner, and still later had a letter from him. He gives me 3,000 maunds and directs me to take the rest from my Maldah contribution and my own stores. I am quite sure this arrangement will answer our purpose excellently; we shall have enough rice, and not too much, but it will be impossible to get it where it is wanted without a good deal of delay. If we had been ordered earlier to indent for grain for all works, or to stop all works when we had no grain, we could have obeyed implicitly; but I never got the latter order at all, and the former order only very lately, and with very great restrictions. I now go on to shew the results.

One of our greatest and best works is a bund near Katikund in the Daman. We never had any rice stored there. The crops in the neighbourhood were very good for the year. I started the work both because it was sure to be acceptable to the laborers, and because it was

sure to be so valuable in itself. But ~~the~~ of the results was a rise of price. I indented for 1,000 maunds for Katikund, and the Commissioner ordered me to find the 1,000 maunds in the District. This I can do quite easily, but Katikund is very far from any of my old golahs; and till the rice is landed there, I must either pay in coin or stop the work, which is nearly finished. I have never been ordered to stop it, and to do so would be simple madness.

Again, another of our best and most forward work is the road 40 miles long from Doomka to Jamtara, crossing the two largest rivers in the district, the More and the Ajay. This work has been going on for several months under the Executive Engineer. It was planned before we ever heard of a famine, and is indispensable. The line chosen for engineering reasons skirted the country we have lately been so anxious about—Kundahit, but did not run through it. The numbers of laborers was considerable, spread pretty evenly along the road. I have had rice at Jamtara since the middle of May; but not enough to spread over the road. I wanted it for Pabia, Nala, and Kundahit, and could only spare a little for the road. I had no rice at Doomka.

Another of our roads was from Doomka *via* Iarmundi to Deogarh, about 44 miles. I had no rice at either end of this road.

The great stores of rice were along the Godda and Barasat road, and in the Rajmehal Daman, and the sub-divisional officers have been paying for their works in grain for a considerable time. We have made a good many mistakes, and lost time in handing grain backwards and forwards between the civil officers and the Public Works Department, and have had some difficulties with moodees. These mistakes can't be excused. All we can do is to say they occurred, and that we are very sorry: but the great reason why payment in grain is not universal in the district is very simple, and has nothing to do with any mistake.

I chose most of my works early enough, and one or two were chosen for me. They were spread widely over the district.

My allotment of grain was made for me, not by me, and it was stored where the first signs of want appeared. Much of it was of course close alongside works, and all of it within reasonable distances; but many works were very far distant from any grain.

The district is well enclosed by railway. Seventeen stations are available for import of grain. Nearly all the worst parts of the district lay near railway stations; it is almost always much easier to get rice from Calcutta to any distressed part of the district than to move grain about in the district. This is the reason why I indented a few days ago for 33,000 maunds of rice and was quite satisfied with 18,000. It is all but certain that most of our relief works will have stopped before we can get the grain to them to pay laborers. As I have said before, early orders to indent for grain to pay all works, or late orders to stop all works where payment could not be made in grain, could have been implicitly obeyed.

A simple order to pay *everywhere* in grain must be interpreted *quam proxime*.

As to piece-work, it is all but universal; daily labor was lingering in Jamtara longer than anywhere else. The officers there now understand that they must put on piece-work every man and woman able to do it. Mr. Hand was inclined to let a very large number of stout young women, who said they had no husbands, work by the day. I made them take their choice between piece-work and none.

Mr. Wilmot has explained the rise of rates. He thought the long lead and hard cutting called for it.

I raised rates in two or three places in Nala and Kundahit this last week. One very high bund, even now holding a great quantity of water, wanted strengthening in the middle, where it is highest and weakest. I turned on a large gang to build a buttress bund and nearly doubled the rate. I am quite sure we understand the wishes of the Government, and are doing our best to carry them out. As I have said, agricultural operations are going on as well as if we had never had a man on relief works. We are letting workmen go every day, and are finishing off works that will spoil if simply stopped. Rates are raised only where the work is of such a kind that present rates are unfair.

From this day every effort will be made to curtail expenditure in every way.

C.—TRANSPORT OF GRAIN.

5. We have had some trouble in getting grain across the country from both the loop and the chord line to Nala and Kundahit. Nala is only 16 miles from Jamtara; but the Adjai lies between. It is 45 from Saintia by Kundahit, Nagar and Soory. The 16 miles with the Adjai are about equal in difficulty to the 45, and some grain has been spoilt by wet. Carriage is also dearer, because men, cattle, and carts, have plenty of work in the fields.

I have just got 2,500 maunds from Saintia to Doomka with little loss.

D.—STORAGE.

6. I have nothing of importance to report.

E.—ADVANCES OF MONEY AND GRAIN.

7. Rs. 1,350 have been advanced this fortnight. Mr. Wood has advanced about 9,000 maunds of grain to cultivators through their mustagirs in Sultanabad. Mr. Grant is advancing grain to villages in Godda. Mr. Hand has advanced the zemindar of Jamtara 2,000 maunds, and is prepared to make further advances.

F.—CHARITABLE RELIEF.

8. Our charitable relief is of the smallest dimensions. There is little or nothing for any large committees. Messrs. Wood, Grant and Hand feed a few paupers every day; all that I have seen are lepers, blind, lame, and diseased. I should think the numbers will steadily increase for two months; after that we may throw them off.

G.—FINANCIAL RESULT.

9. Financial results are shown in tables.

List showing the Relief Works in the Sonthal Pergunnahs, and the average of daily laborers on each.

Progress Report of Famine Relief Works for the week ending Saturday, the 20th June 1874.

| No. | Names of Works. | Progress in making out relief work. | Number of laborers thereon. | | | Quantity and value of rice received and issued to the laborers. | | | | Supply of food thereat. | Condition of the laborers and the general features of the country. | Mode of payment. | Rate of wages. | Arrangement of tools. | Disbursement during the week. |
|-----|--|--|--|----------------------|--------|---|--------------------|---|---|--|--|--|--|-----------------------|-------------------------------|
| | | | Class I. | Class II. | Total. | Name of golah. | Quantity received. | Value of quantity received. | Quantity issued to laborers. | | | | | | |
| 4 | Hansdia to Godda road. | 32 chains in 1st mile, 19 in 8th, 42 in 14th, 20 in 10th and 5 in 12th. | 2,228, or 72 cent per | ... | 2,228 | At Godda. | ... | 40 mds 107 12 9, 14 srs. and 15 ch ks. at 15 seers per rupee. | Rice in golah at Godda | Condition of the laboring class is poor and miserable. General feature of the country is hilly and jungly. | Payments made every alternate day, 25 per cent. by sub-cashiers in cash, and 75 per cent. in rice. | PIECE-WORK. From 4 as. to 5 as. per 100 cubic feet. | Tools are mostly supplied by Government. | Rs. A. P. 77 10 6 | |
| 10 | Metalling Bha-ulpore and Soory road. | Complete project. | 74 or 332 or 72 per 24 per cent. | ... | 808 | Nil | Nil | Nil | Same as last week. | | Daily to day. Digging kunkur from 4 as. to 5 as. per 100 c. ft., and carting ditto at 8 as. per 100 c. ft. work by sub-cashiers. | PIECE-WORK. Supplied by Government. | 210 0 0 | | |
| 13 | Repairs to Bha-ulpore and Soory road. | Ditto | 73, or 42, or 63 4 per 35 32 per cent. | ... | 115 | Nil | Nil | Nil | Same as last week. | | Ditto ditto by overseer in charge and sirkars. | Ditto | 20 8 0 | | |
| 14 | Repairs to Bha-ulpore and Bur-hatt road. | 8,121 cubic feet of earthwork, 200 superficial feet. Dressing 3,200 cu-bic feet natural ballast. Tempora-ry bridges, &c. | 1,332 or 777 per cent. | 339 or 253 per cent. | 1,740 | Nil | Nil | Nil | Two goldadars are appointed on this road, one on the 2nd mile and the other on the 13th. Three moodies are wanting, one for 5th mile, one for 7th, and one for 8th mile. Food-grains are not sufficiently obtainable in Hattas. Shop-keepers have stopped selling from 5th to 8th mile. | Coolies healthy. The condition of the laboring class is not in a miserable state. | Every 2nd day by sub-cashiers. | PIECE-WORK. Earthwork from 4 annas to 5 annas per 100 cubic feet. DAILY LABOR. Rates various, according to variety of works. | Supplied by Government. | 271 9 6 | |

| | | | | | | | | | | | | | | | | | |
|----|---|--|--------------------------|-------|------------------------------|----------------------------|-----|-----------|-------|-------|-------|-------|--|--|---|---|---------|
| 16 | Pakoor to Heer- anpore road. | | Earthwork cubic feet. | 7,423 | 445 or cent per cent | | 446 | Nil | Nil | Nil | Nil | Nil | Food-grains are obtain- able in Hattias and basars. | The condition of the people is not in so mi- serable a state by which it can be deduced that distress will be soon felt. Most part of the labor- ing class is engaged in cultivation. | Ditto | From 4 annas to 5 annas per 100 cu- bic feet of earth- work. | 26 11 6 |
| 17 | Doomka station roads. | | | | 70 or 59 32 per cent | 45 or 40 68 per cent | 118 | Nil | Nil | Nil | Nil | Nil | Same as last week. | Digging Kunkur, at 4 annas per hundred cubic feet. | Ditto | 10 12 6 | |
| 20 | Mohespore and Doomka road. | 13 miles of road marked out and entire laid out. 7 miles laid out. Total 20 miles. Levels of 7 miles taken and level pegs put over 3 miles. | 7 miles | | 592, or cent per cent. | | 592 | Not known | | | | | Rice is supplied by the civil officers, who have been requested on the 14th to grant credit orders to the sub-cashiers, for food- grains on several oc- casions for the introduc- tion of grain payments among the laborers. The proposed system is not introduced as yet. | The people are engaged in sowing jowaree crops and having had the advance of rice from the civil officers are not in need of resorting to relief works. There are classes of people called the Korhis and Dhan- gars who come for work on the road. Very few Santals now apply for work. The country between Ari- choah and Saldoba is very hilly and that between Mohespore and Arichoah about 14 miles in length is generally table-lands intersected with nul- lahs and rivulets, some of which are unfordable during the rains. | Daily by sub- cashiers in copper and silver. | No more tools were issued by the Depart- ment. Public Works in ad- dition to those issued by the civil officers, as reported before. | 250 0 0 |
| 21 | Constructing a bund at Kati- coond. | | | | 730 or 62 76 per cent. | 57 or 7 24 per cent. | 787 | Nil | Nil | Nil | Nil | Nil | Same as last week. | 4 annas to 8 annas per 100 c. ft. of earth work. | Supplied by Government. | 69 1 6 | |
| | | | | | | | | | | | | | | DAILY LABOR. | | | |
| | | | | | | | | | | | | | | Men .. 3 0 Women .. 1 3 Children .. 1 0 to 0 9 | | | |

* The reduction in the number of laborers can be ascribed to incessant rains during the week, and to reasons stated in 7th column. It is believed that after 6 weeks or so, when the jowaree crops will be over, the people will be relieved of their distresses. At this period about 4th of the population having no lands of their own, such as Koras and Dhangers, will feel the necessity of earning their livelihood by working in the wood.

DENO NATH MOOKERJEE,

Accountant, for Offg. Executive Engineer, on tour.

No. 950—S.R., dated Berhampore, the 29th June 1874.

From—W. WAVELL, Esq., Offg. Magistrate and Collector of Moorshedabad,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative for the fortnight ending Saturday, the 27th June 1874.

During the last three days I have been over a considerable extent of country in thanas Gokurn, Bhurtapore, and Khurgaon, and was much pleased to see how very favorable the prospects of the winter rice crop are, and what good promise of an early and very abundant crop there is at present. The seed that was sown broad-cast has germinated freely, and the plants are strong and well advanced; the seedlings in the nurseries are plentiful and healthy; and in the lowlands, in which sufficient rain-water has collected, transplantation has been and is being actively carried on. Earlier in the week I saw a good deal of the aous country, and from what I saw and have heard from various parts of the district the crop will, if there be not too rapid a rise of the rivers, be early, abundant, and reaped from an unusually extensive area.

Narrative of Scarcity and Relief in the Moorshedabad District for the Fortnight ending Saturday, the 27th June 1874.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supply in the bazar.

1. The supply of food-grains in the bazars and hâts of the head-quarters sub-division is reported to be still sufficient for the daily wants of the people. The rise of the river Bhagiruthoe has helped the importation of rice and other commodities. In the Lalbag sub-division the supply of all sorts of food-grains in the city, Baluchur, and Azimgunge, is still abundant; but the supply in thana Bhadurihaut, where many villages have no shops and even existing shops are ill supplied, still continues deficient. In the Jungipore sub-division the bazar best supplied with rice is that of Dhulian. The Raghunathgunj bazar has lately received a good supply of purbi rice, the river being open for Dacca palwar boats. In the smaller bazars the supply continues to be as scanty as ever. In the Rampore Hât sub-division the supply is still reported to be scarce in the principal markets of Nalhatee, Palsa, Khargram, and Rampore Hât.

Kind and price of grain selling at one or more principal marts.

2. The average price of common rice in the head-quarters sub-division has slightly risen during the fortnight; the average of 12 of the principal marts being $10\frac{1}{4}$ seers per rupee, whereas the last fortnight's showed $10\frac{3}{4}$ seers per rupee. It is dearest at Gokurn, Dowlatabad, and Hurihurpara, the rate at Gokurn being $8\frac{1}{2}$, and at the other places 9 seers per rupee, and cheapest at Gorabazar, Gowas, Jellinghee, Nowadah, and Bhurtapore, where the rate is 11 seers per rupee. The dearness of rice at Gokurn is somewhat singular, and is, I believe, partly to be attributed to the fact of there being only one small shop at Gokurn itself, and to the absence of any large villages or marts in the interior of the thana; but still more to the proximity of the thana to head-quarters. I know, from personal observation in November and December last, that the failure of the winter rice crop in this thana was not nearly so considerable as in other western thanas, Kalyangunge, Bhudrohat, Mirzapore, and Nalhuttee, for instance, in each sub-division, and that in the low lands of the Telkar Beel a good average crop was obtained, and yet the prices in those four thanas are lower than at Gokurn, from 1 at Kalyangunge to $3\frac{1}{2}$ seers at Nalhuttee. The reason I believe to be this, that the cultivators and others have been unable to resist the comparatively high prices offered by merchants of Berhampore, Moorshedabad, and other places, and that by the sale of stocks early in the season this part of the district has become depleted of supplies. One of the results of this is that at Gorabazar and Sujagunge (the head-quarters thanas) rice is selling at from $10\frac{1}{4}$ to 11 seers, though these places must of course draw their supplies from the interior, while in the supplying country prices are far less favorable. The dearness of rice at Dowlatabad and Hurihurpara, which border on the head-quarters thanas, is due partly to the same cause and partly to their distance from the Ganges, by which river imports are now being made into the east of the district. The average price of grain in the above-mentioned 12 marts is $14\frac{1}{4}$ seers for rupee, being dearest at Gokurn, where it is selling at 13 seers per rupee, and cheapest at Gowas, where the price is 18 seers per rupee, the price given in the last fortnight. In the Lalbag sub-division the prices of best, common, and purbi rice in the several marts vary from $8\frac{1}{2}$ to 10, $9\frac{1}{4}$ to 11, and 11 to $11\frac{1}{4}$ seers per rupee respectively; those of wheat, barley, and gram, vary from 12 to $13\frac{1}{4}$, 18 to $20\frac{1}{4}$, and 16 to 18 seers per rupee respectively. The above shows a slight fall in the price of rice from what was mentioned in the last narrative. In the Jungipore sub-division, in the Roghoonathgunge bazar, the retail price of common rhari rice continues to be the same as last fortnight; whilst the retail price of purbi rice has decreased from 13 seers to $13\frac{1}{4}$ seers per rupee. At Shumshergunge rice sells at $13\frac{1}{4}$ seers for uncleaned and 12 seers for cleaned rice. At Sooty the latest quotation is $11\frac{1}{2}$ seers per rupee. Rice is dearest at Mirzapore, where it sells at 11 seers per rupee. In the Rampore Hât sub-division the price of fine rice varies from $9\frac{1}{4}$ to 10 seers; that of coarse rice from 11 to 12 seers per rupee; that of gram from 13 to $14\frac{1}{4}$ seers per rupee. It is reported that fine rice is not procurable at Palsa.

Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots, and others.

3. The stock in the hands of mahajuns, zemindars, and well-to-do ryots in the headquarters sub-division is not known, but it is believed that many mahajuns and zemindars have sufficient to enable them to lend seed-grain to the poorer class of ryots. The Sub-Divisional Officer of Lalbag reports that there is every reason to believe that the stock in the hands of the merchants at Baluchur and Azimgunge is still considerable. The large amount of grain which was imported for sale at Patibona and Debidaspoore golahs on the Ganges during the past fortnight is being removed to Bhugwan Golah, in consequence of the rise of the Ganges. The Sub-Divisional Officer of Rampore Hât says that the stock in the hands of mahajuns and zemindars is not accurately ascertained, but is supposed to be insufficient.

Rainfall, if any.

4. There has been very considerable rainfall during the fortnight throughout the district. The rain has been of the greatest benefit to the young crops. It has prepared lands for the transplantation of hoimonto dhan and the aous crops. Indigo, sugarcane, mulberry, jute, and til crop have been much benefited. Vegetation has greatly improved, and the general appearance of the country is verdant and hopeful.

State of the Crops.

5. The prospects of the crops, as before reported, are very favorable. In the headquarters sub-division both aous and amun are reported to be doing well. Indigo is being cut in some places. The Sub-Divisional Officer of Lalbag reports that the rain has done an immense deal of good to both the aous and amun paddy. The plants are thriving well, and the cultivators are very busy preparing the lands for transplanting the amun paddy. Indigo, mulberry, sugarcane, and Indian-corn, are promising. The Sub-Divisional Officer of Jungipore speaks well of indigo and sugarcane; jute and bhadoi seedlings are promising. Shama and kooda, two different kinds of inferior food-grains, in thanah Sooty, are being cut. A good harvest of these is expected. Transplantation of hoimonto seedlings has commenced, and is being vigorously carried on in parts of the district. The Sub-Divisional Officer of Rampore Hât reports well of both aous and amun. The yield of boro paddy in thana Khurgram was 14-16 of an average crop, and has greatly assisted some of the poor and cultivating class of the people of nearly 50 villages in that thana. If there be no inundation, the prospects of the aous crop on the banks of the Bansloi in thana Pulsa are good. In thanas Roghoonathgunge, Dewansera, Shumshergunge, and the eastern part of Sooty, the prospects are brightening. If the rise of the river be not too rapid, an abundant harvest of bhadoi dhan is likely to be reaped. The margin of bhadoi cultivation has been much extended, and the only fear is, lest a flood should destroy the growing crops on low lands. In Mirzapore and Western Sooty, where there is no bhadoi crop, the Sub-Divisional Officer states that the prospects continue gloomy. The prices, however, before given of rice in Mirzapore and Sooty, 11 and 11½ seers, cannot be considered as indicative of any very great or widespread distress. If the bhadoi harvest cheapens rice, the people of Mirzapore and Western Sooty will doubtless, the Sub-Divisional Officer remarks, be benefited by the cheapness; but it may well be doubted whether such cheapness will continue for more than a month or two.

Condition of the People.

6. The condition of the people remains much the same, and there is hardly any change to report. To a certain extent it will naturally depend very much on the prospect of the crops, and so long as the dearth of food continues it cannot change for the better. In the Lalbag sub-division, within the municipality, as well as in thana Bhugwan Golah, there does not appear to be more distress than would be naturally expected from the rise of the prices. The blind, the lame, and others unable to help themselves, are the only classes which require charitable relief, as private charity has been stopped to a great extent. Labor is scarce and difficult to be procured within the municipality, and the laboring classes cannot be said to be suffering much. The case is, however, very different in Bhudrihaut thana, where the population is principally composed of the laboring classes and petty cultivators. Both these classes have been affected considerably by high prices and the shortness of their stores. The cultivating classes have now got work in their fields, and numbers have been and are applying for advances to carry on cultivation.

Actual facts as to any known cases of misery and starvation.

7. No such cases have come to light.

With reference to the case of a woman selling two of her children, reported in the last narrative, it appears that while the Relief Assistant attached to the special sub-division of Kandi was at Joyjan on the 5th of June, he heard that one Jatan Bewa, of Chand Singhati, in Khargram thana, not being able to support herself and her three children, sold two of them to one Bajlu Meah, of Joyjan, for a rupee. The Relief Assistant saw Bajlu, who told him that Jatan sold two of her children to him, but after two days she repaid the money and took them back. It appeared that Jatan's grandmother gave her the money to get back the children. The Relief Assistant then went to Chand Singhati and found that Jatan was absent from her home with her three children. Jatan's grandmother, who said that her circumstances were not such as to enable her to support her grand-daughter's family, corroborated the statement of the Joyjan people, and told the Assistant

privately that Jatan had gone to Kandi with her children in order that they might be fed at the cook-house started there. The Relief Assistant then took a chowkeedar with him from the village and went to Kandi cook-house, where he found that Jatan Bewa had refused to dine at the cook-house, but managed to feed the children privately. The Assistant thereupon gave her food for herself and her children for 15 days. The Special Sub-Divisional Officer of Kandi saw the woman and the children, and reports that her condition was bad, and that her three children had clearly suffered and were suffering from privation. He ordered an allowance of rice to be given to her, and intends to make her a small allowance for bazar expenses. Meanwhile he has requested the Assistant Surgeon to attend to the ailments of the youngest child. This is, he thinks, the worst case of distress he has as yet come across.

Grain-thefts or Robberies.

8. Eighteen cases of grain-theft of a petty nature have been reported during the fortnight in the head-quarters sub-division. In the Lalbag sub-division there was a grain-theft at Sagurdighee. The chaprassee attached to the golah was found guilty of having stolen 16 seers of Government rice, and one individual guilty of having received the same as stolen property, and each sentenced to receive twenty stripes. In the Jungipore sub-division, during the fortnight under report, two women were punished for committing grain-theft. A case of theft of a cup, due to scarcity, was also brought to notice. In the Rampore Hât sub-division four petty grain-thefts have been reported during the fortnight. A crime statement is annexed, from which it will be observed that there has been a considerable increase of crime during the present as compared with the past two years. This increase must certainly be attributed to the prevalent high prices acting on classes of men who, though work is available, prefer criminal courses. The number of these is, I fear, very considerable in this district, especially in the Bhurtpore thana, in which they belong chiefly to the low castes of Hindoos, who are numerous in that thana. Many of the dacoities which have been frequent in this thana are of anything but a serious character, being in fact only aggravated burglaries.

Condition of any Special Tracts.

9. Cholera and small-pox both appear to be on the decrease. The Sub-Divisional Officer of Jungipore contrasts as follows the condition of his thanas, Mirzapore and Shumsheregunge, as far as relief works are concerned. In the latter thana the relief works opened on the roads in the neighbourhood of the station have proved so unattractive, that the small sum of Rs. 100 sent to the Sub-Inspector upwards of a month ago has not yet been all spent. The fact is, Dhulian employs a large number of laborers who are paid at 3 annas 3 pie per diem, whilst a laborer on the roads can hardly make more than 2 annas 6 pie per diem. On the other hand, it might be doubted a fortnight ago, i.e., before the regular setting in of the rains, whether the relief works in the Mirzapore thana were adequate enough. It must not, however, be imagined that there is no distress in Shumsheregunge. There is in this thana as in others a class of poor, infirm people who must be helped. Fortunately, this class in Shumsheregunge is small.

B.—RELIEF WORKS.

The average number of persons on the various relief works is 4,592. Increased difficulty in procuring supplies of food is reported at most of the works, but as by this time rice is generally given in lieu of cash payments for six days out of seven at the minor works of the Relief Committee, as well as at the Government works, there can be no difficulty on the part of the laborers in obtaining the chief article of their consumption. In some of the minor relief works under the Committee, it has not been found expedient to extend rice payments, but as a general rule payments have during the fortnight been made by means of Government grain according to the recent instructions. The rate of issue remains the same as last fortnight, viz., 12 seers per rupee for clean, 14 seers per rupee for Burmah, or other partly unhusked rice. In some cases the new system was very unwillingly accepted by the laborers, notably on the Badshahee road in thana Khurgaon, where there certainly is scarcity and a certain amount of distress, and where I should have least expected opposition. The difficulty has, however, been overcome, and the system is working well. The orders received yesterday to discontinue all cash payments will now be carried into effect, and instructions have been given to the Executive Engineer accordingly. From what I have seen lately I doubt whether the employment of laborers, a good many of whom on some works are females, has any injurious effect on the agricultural operations of the season. A statement showing the money expenditure on relief works during the fortnight is herewith submitted. The Executive Engineer informs me with regard to the expenditure on the Bhugwangolah road that only Rs. 27 were paid for labor, the remaining sum being on account of metal. With regard to the sum expended for the Jungipore and Khanna road, he states that Rs. 200 were paid on the 11th instant, but are shown in the account for this fortnight, as information of the payment was not received in time for the narrative of the preceding fortnight. Payments in rice are now going on for laborers on this as on other works.

C.—TRANSPORT OF FOOD.

From a return of the Station-master at Azimgunge, it appears that 379 maunds were exported, and 12,776 maunds and 30 seers were imported into the Lalbagh sub-division. Of the latter 12,124 maunds and 20 seers were received from Howrah, and 652 maunds and

10 seers were imported from the Burdwan district. It appears that 1,591 maunds of food-grain have been exported from the Rampore Hât sub-division, and 2,689 maunds of food-grain imported into the same sub-division. During the fortnight under report purbi rice has been imported into the Jungipore sub-division. It is by no means easy to say what the extent of such imports is, but there is reason to believe that with the opening of the rains the imports from some of the eastern districts will considerably increase. The slight decrease in the price of rice in the eastern parts of the district near the Ganges has doubtless been caused by these imports.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

The following places have been selected for the storage of grain, viz.—

| <i>Sudder Sub-Division.</i> | <i>Lalbagh Sub-Division.</i> |
|----------------------------------|--------------------------------|
| Berhampore. | Lalbagh. |

At Lalbagh, Jungipore, and Rampore Hât, storage accommodation has been found in the thanas; at all the other centres convenient houses have been procured in the villages, or small golahs of the ordinary native shape have been built. Each golah is provided with a golah-keeper, a chowkeedar, and two coolies,—the former on a salary of from Rs. 10 to 12 a month, according to the requirements of the place; the latter are paid in rice, at the rate of Rs. 4 a month. In a few places pound-keepers were appointed as golah-keepers, but I fear this arrangement will not answer in some cases, and that regular men will have to be appointed.

23,207 maunds of rice have been received into the district, of which 16,000 maunds have been sent to the various golahs in the district.

Only 200 bags have as yet been returned to head-quarters, owing to orders having been sent to the golah-keepers to send them on the 1st of each month. It is necessary to keep a stock of good bags at a golah to replace some of the bad ones received from Calcutta. There is an ample supply of Government grain for present requirements.

Under orders from Government, arrangements have been made to draw on the Maldah reserve as required; 7,000 of this has been already drawn from Godagari. A small steamer would be found most useful here, not only for keeping up regular supplies from Godagari as we require them, but also for internal distribution. It is really very difficult to get boats now at anything like reasonable rates from Godagari; and, as we cannot afford to stand out for low rates on account of the delay that would be caused thereby, it would be better to provide our own carriage, get our supplies regularly, guard effectually against the chance of running short, save considerable expenditure, and avoid the chance of the grain being plundered in transit,—a contingency which it is impossible to guard against with boats. Much of the relief work of this district is performed gratuitously by non-official members of sub-committees, and it is not an unfrequent experience to receive very urgent applications from these for immediate supplies of rice, owing to the consumption of former supplies. The necessity of giving timely notice of their wants has been impressed on the sub-committees, but with little effect, and stronger measures cannot be adopted. The head-quarters of many of these sub-committees are on or near the Bhagiruthee, and their wants could be speedily supplied if a steamer were available. One of the several small steamers that are, I believe, going as reserve to Maldah might conveniently work here, and could, if required, be sent to that place without delay.

I beg to annex a statement showing, on the materials available, the consumption of grain in the district for the past fortnight. This statement is, however, very incomplete, owing to the omission on the part of the sub-divisional officer of Lalbagh to furnish the required information, and the palpable incorrectness of the returns furnished by the sub-divisional officers of Rampore Hât and Jungipore. The former, for instance, gives the consumption by gratuitous relief at only 50 maunds, when, as a matter of fact, that amount at least is consumed at one place alone, and he has at least four places in his sub-division at which gratuitous relief is given. We may estimate his expenditure under the head of gratuitous relief at 200 maunds at the very least. I will, however, give his own figures in the return annexed. The statement received from the relief sub-divisional officer of Kandi is also incomplete, inasmuch as several of his sub-committees, whose expenditure under this head is very large, have been omitted altogether from his return. The same remarks apply to Jungipore. In the return also submitted by the Executive Engineer of grain issued to laborers in lieu of money-payments, there are omissions which affect the correctness of the return, as the statement of the expenditure of grain by two of his subordinates for the second week of the fortnight has not been given. At the rate of issues by these for the first week the consumption should be increased by more than 300 maunds. I consider the

expenditure of grain in the district may safely be put down at treble what is given in this return, and I very much doubt whether it would not be under-estimated even at that amount.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

There were 16 cases pending at the close of the previous fortnight under the Land Improvement Act in the Sudder sub-division; only two fresh applications were received during the present fortnight. Out of the total 16, 9 cases are under investigation; in 2 cases order for payment has been made, and in the remaining 5 cases the securities tendered have been found to be insufficient. During the fortnight a sum of Rs. 965-8 has been advanced, of which Rs. 22-8 have been advanced in grain. No advances have been made in any of the sub-divisions.

F.—CHARITABLE RELIEF.

The statement prescribed by Government No. 1251—S.R., dated the 5th March last, is annexed, as regards each sub-division separately.

There was a balance of Rs. 37,168-3-7 at the close of the last fortnight, the receipts during the fortnight amount to Rs. 75, making the amount of total receipts Rs. 37,243-3-7. The total actual expenditure during the fortnight amounts to Rs. 4,435-10, leaving a balance of Rs. 32,807-9-7 at the credit of the relief fund. A considerable amount of this balance will be diminished as soon as the price of Government rice, purchased by the relief committee on a very large scale, has been paid.

During the fortnight a small cook-house has been opened at Rungamuttee under the Gokurn relief sub-committee. The relief given in the shape of cooked and uncooked food has much increased of late, and continues to increase. A large majority of the recipients of relief belong to the professional beggar classes, and to those who from age, infirmity, disease, or great poverty, usually obtain charitable support in the villages. Some of the children, however, who come in great numbers to the poor-houses for cooked food, belong to the more respectable agricultural classes, who, though averse to resort to these for relief in person, do not object to send their children there. Enquiries have been, and are being, made to discover what persons are deserving of relief under heading (d) of the Central Committee's notification, which relief is usually given by the bestowal of a supply of rice for a month or so, and in some cases by an additional pecuniary allowance for other expenses.

In the Ialbag sub-division, Nawab Mansur Ali Khan Bahadur has subscribed Rs. 600 to the sub-divisional relief fund, and the committee have resolved to start charitable relief within the city of Moorshedabad. In thana Bhudrihat, which appears to suffer most in this sub-division, work has been started on eight different roads. Road repairs have also to a certain extent been taken in hand by the committee in thana Assanpore, and it is contemplated to start other works in that thana. Out of the total number shown in the statement, 997 persons were in receipt of gratuitous relief, and the remaining 570 represent persons employed on relief works. The following is the financial state of the relief fund in this sub-division:—

| | Rs. | As. | P. |
|---|-------|-----|----|
| Balance at the close of the last fortnight .. | 1,659 | 4 | 8 |
| Subscriptions realised during the fortnight under report .. | 600 | 0 | 0 |
| Government contribution received .. | 4,905 | 11 | 6 |
| Total .. | 7,165 | 0 | 2 |
| Expenditure during the fortnight .. | 213 | 3 | 0 |
| Balance .. | 6,951 | 13 | 2 |

In the Jungipore sub-division, numbers have been at work on tanks and road-repairs. During the fortnight under report, one person received a dole of pice amounting to Re. 1; 32 persons who had their houses destroyed by the late great fire at Raghunathgunge were paid Re. 1 each; 23 persons were relieved under heading (d) of the Central Committee's notification dated the 4th March 1874, of whom 3 received doles of pice in amount Rs. 2-2, and 20 persons received doles of rice weighing 9 maunds; 162 persons received wages for jute-spinning, amounting to Rs. 60; 1 person received wages for spinning cotton amounting to 8 annas; and 9,257 persons, of whom some were fed in the annachatra started there on the 21st instant, and others assisted with doles of rice. The total receipts of the sub-divisional relief fund amount to Rs. 4,073-0-4, and the total expenditure Rs. 2,640-5-4, leaving a balance of Rs. 1,432-11-0.

Out of the number, 6, shown in column 5 of the statement annexed, 4 only are as yet in working order.

The following is the statement of receipts and disbursements on account of the Rampore Haut sub-divisional relief fund :—

W. WAVELL,

Offg. Magistrate and Collector of Moorshedabad.

No. 1375—S.R., dated Dinagepore, the 29th June 1874.

From—E. E. Lewis, Esq., Officiating Magistrate of Dinagepore,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending 29th June 1874.

A.—STATE OF COUNTRY.

The health of the people has been on the whole good. Cholera still lingers in a few localities, but has almost disappeared; a few cases of small-pox also have been reported, but the disease does not seem to spread. The weather for the past three weeks or a month has been all that could be desired. There has been a good fall of soaking rain, with alternations of bright sunshine, which has assured the prospects of the early rice, and given hope for the winter crop. It appears that, taking an average one place with another, about twice the usual area has been this season sown with bhadoi rice, and everywhere the crop is described as most flourishing, the villagers confidently counting on reaping a good return. Jute and sugarcane, too, have come up wonderfully during the last month, and will turn out well. The rain has also moistened the soil, and enabled the ploughing for the hemanta to be pushed on; while the moisture has caused the seed in the seed-beds to germinate freely, and covered the nurseries round the ryots' houses with vigorous rice-seedlings, which in some few places will soon be fit to transplant. The earliest sorts of bhadoi, of which there is a little in this district, will be fit to cut in a week or two, while a good deal more is in flower, and will be reaped by the end of July. The people themselves are no longer despondent. Assured of support till the bhadoi comes into the market, certain of a good early, and with a fair prospect for their winter crop, they feel that there is no further cause for anxiety. This seasonable weather has also had the good effect of loosening the mahajuns' purse-strings, and I learn that with good prospects for the future, money can now be obtained, which a month ago would not have been procurable. This feeling of confidence has further had the effect of slightly lowering rates in some of the markets, the few stocks in reserve having been thrown on the market: very little rice is to be had in any bāt, but small quantities of old dhan are exposed for sale, which is taken and husked at home. There is still plenty of seed-grain procurable at prices varying from 14 to 18 seers per rupee: the supply of seed-grain is not limited, and all who wish to do so can obtain supplies. Boro rice in the Porsha circle, where it is extensively grown, is selling at 14 and 15 seers for the rupee, while common country rice sells at 11; there is therefore no demand for Government grain in that quarter, except to a certain extent in the way of advances. In other places the price varies from 8 to 9 seers per rupee; in some few places going up to 7 to 7½. Rice is now dearest in the Beergunge and Thakurgaon circles, where the villagers got in some places a pretty fair crop; but where tempted by the high prices, the villagers sold almost more than they could spare. There seems to be a great demand for Government grain in that quarter; the mahajuns' stores are completely exhausted; the villagers have no more to dispose of; and the rice we send in boats to the golahs in the Beergunge circle is brought off the boats, and carried off as soon as the vessels arrive. A great many of the villagers there have rice sufficient for their own needs in their houses; but those who have no such stocks, find it rather difficult to obtain supplies. It is generally reported that the Government operations and the past seasonable weather have so far restored confidence,

that holders of stocks are now parting with them, and that the slight fall in prices is due to this circumstance. It is gratifying to find that the panic, which undoubtedly existed during the earlier part of the year, has been allayed,—a panic which, but for Government interference, would have caused most disastrous effects. The very slight fall in prices, caused by the stocks of rice in the country being thrown on the market, proves that we were not far out in our estimate of the requirements of the country, or in our calculations that the amount of grain in hand was not nearly sufficient for the supply of the district,—a deficiency which could, under the circumstances, only be supplied by Government, as no private firm could or would undertake business of such magnitude. Favorable weather, and Government operations combined, have drawn out the stocks, so as to prevent prices rising above $7\frac{1}{2}$ or 8 seers per rupee; but there is not the slightest doubt that, but for the above combination, prices would have gone up to 4 or 5 seers for the rupee, if it could have been got even at that price. More than 4,00,000 maunds of Government rice have been disposed of up to date, and yet prices continue very much as they were. A comparison, however, of the prices current this year with those ruling in 1866 or any other year is no test of the comparative severity of the want; for in the Orissa famine, prices rose through a panic which there was nothing to stay or mitigate, whereas this year they have risen steadily in spite of every effort to afford help and make the market easier. Nothing but importation on a scale at once costly and extensive sufficed for the emergency; private enterprise declined the task, and Government in taking it up and carrying it out has undoubtedly saved the district from a great disaster, and that this is a fact is admitted by all. With the prospects of the next crop assured, it becomes a question how far price of grain and the general condition of the people will be altered for the better, when such crop comes into the market. The experience of 1866 teaches us to expect that the appearance of the early crop will make very little, if any, amelioration in the condition of the people, and in that case we may calculate on the distress lasting, in a very slightly modified form, until the winter crop comes in. I do not, however, consider that this will be the case. It is true that in 1866 the coming in of the bhadoi or aous crop made very little difference in the rates throughout the district; but then in that year a larger area than usual of bhadoi was not sown; the crops in this district had not suffered to any extent, the prices having been raised by excessive exportation; and there was nothing therefore to induce the people to interest themselves in a crop which is kept for local consumption only. This year it is different; about twice the usual area has been sown with bhadoi, and twice the usual supply in the hands of the villagers, it seems to me, must tell on the market rates. Those who are fortunate enough to own lands suitable for this crop will keep enough to last themselves till the end of January, and it will only be the surplus stocks that will come into the market. The grain, too, is coarse and said to be unwholesome if eaten fresh. With all these reservations, however, I expect prices in the end of August or beginning of September, to fall to about 15 or 16 seers per rupee. I am not sure that they will hold at that figure however. I suspect after the first rush, prices will rise again to perhaps 12 seers per rupee during November and December. I do not expect the demand for Government grain entirely to cease after the 1st September; bhadoi is a coarse, and I believe, if fresh, an unwholesome grain; the sales from our golahs will, therefore, probably continue till the winter crop comes in. Some say that the bhadoi will make very little difference in prices, but the majority seem to think it will have the effect described above. There is, as I have said, plenty of seed-grain in the market, and the villagers, notwithstanding their complaints, have generally managed to supply themselves: in a few cases it is reported that cultivators are unable to procure funds: in such cases the circle officers will be prepared, if, just before the season is over, it is evident that help is really needed, to advance the necessary funds, charging it to charitable relief.

B.—RELIEF WORKS.

The work on the roads has now been almost stopped, the coolies having gone off in numbers, taking advantage of the rain to plough up their lands. There has been no necessity to disperse the coolies with a present of grain, for the system of task-work has never held out any inducement to any person to neglect cultivation: the relief works have from the beginning been a great boon to the people, enabling them to earn a livelihood, but as all had to earn their wages, they have never staid longer than was absolutely necessary. Many of those still at work manage to work in their fields one-half the day, devoting the other half, often till late at night, to digging chowkas on the road-side; cultivating, and earning enough to support themselves at the same time. Instructions were issued directing circle officers to disperse their coolies by the 1st July, giving a donation of a fortnight's supply of grain to those who could not otherwise leave: the grain will, however, be required in comparatively few instances, for the coolies are going off of their own accord, and the few who remain on 1st July, will be men who cannot otherwise obtain employment, and to such men, I presume, it is not the wish of Government that a fortnight's supply should be given. A certain small proportion of our laborers are men who do not engage at any time in agriculture; there are men who make mats and baskets; there are Haris who earn their living as musicians &c.: it would be inexpedient to give such persons a fortnight's supply, for at the end of that period they are sure to return on our hands: it would be better in every way to continue to employ these men, paying them in grain for work performed, rather than to let them idle for a fortnight on gratuitous assistance. I have always insisted on some return being given for help afforded, and do not see the good policy of doing otherwise now. There is yet another class that I do not consider should obtain the

fortnight's advance at once: a number of our laborers are men who follow agriculture, but who, having no land of their own obtain their livelihood by working for others: some of these men will certainly not obtain employment until the planting-out season comes on, and then only for a short time; others will not obtain employment at all, for many a ryot who used to employ three or four hands, doing no manual labor himself, has, in these hard times, been obliged to reduce the number of hands employed by him, making up for the deficiency in hired labor by working with his own hands. Men thus remaining unemployed also may be unobjectionably employed, it being distinctly understood that they are kept on such subsistence allowance, that they will be glad to obtain employment elsewhere if they can. Such of our women and children as require employment will be employed in repairing and turfing roads, or doing other light labor, coming under heading C of the Central Relief Committee's rules. The earth-work on nearly all the roads has now been completed; it only remains to make them passable by putting up temporary bamboo bridges. We have been enabled to open out some most important lines of road, placing the head-quarters in direct communication with localities that used to be almost, if not entirely inaccessible during the rainy season.

C.—TRANSPORT.

No Government rice is being now brought into the district from outside, though some little internal transport operations are going on, the recently established circles of Beergunge and Thakurgaon having to be supplied, where owing to the ryots having parted with their stocks somewhat indiscreetly, there is a demand. Very little is done in the way of importation, a few boat-loads of rice are sometimes brought up the Atrai river from Pubna, and are bought up at 9½ or 10 seers per rupee. The cost of carriage, I presume, hinders more being done in this way, for rice could be sold without the least difficulty at 10 seers per rupee alongside of our sales at 13, for we sell at present only Burmah rice, in order that all fear of competition may be removed. Supplies of country rice all over the district are scanty; but private enterprise, even now that the rivers are open and communication free, has not stepped in to supply the deficiency.

D.—STORAGE.

Our golahs are distributed conveniently all over the district, so as to place supplies within reach of all, the distribution of grain among the people being easily carried out through the agency of the local paikars; hundreds of these men, failing to obtain their supplies elsewhere, obtain grain from our golahs at wholesale rates, they undertaking to retail at a certain fixed rate in the markets they are in the habit of frequenting. These men are paid no salary, they merely obtain their supplies at a seer per rupee cheaper than they retail to the public. We have in fact created no new agency, but merely utilised the existing machinery whereby supplies reach the market in ordinary years. The amount of grain stored in the district will, I think, be sufficient for our wants. Allowing for wastage, and a quantity we are about to send to Purneah, there are about 10 lakhs of maunds stored in the district; up to the end of June we will have disposed of about 4,50,000 maunds; our consumption during July and August may amount to 3,00,000, or perhaps more, which leaves 2,00,000 or 2,50,000 for consumption during the time that intervenes between the coming in of the bhadoi and the ripening of the winter crop.

E.—ADVANCES.

A considerable amount has been issued during the past fortnight in the shape of advances, the people are very eager for help in this shape, and though the zemindars have hitherto been very backward as a body in standing security for advances made to their ryots, I hope when the extremely liberal terms Government are prepared to give become known, more of them will come forward. The name of one zemindar has been particularly brought to my notice, he having not only set an example to others in the matter of advances, but having been of great assistance to the circle officer in many ways. I allude to Babu Shamanath Rai, of Mohadebpore thana, Putnitolla. This gentleman, when we first began to import rice, offered us accommodation free of cost; he has since superintended charitable relief in his own neighbourhood, and has all along supplied the circle officer with all the information in his power; further, when the question of advances was mooted, he offered to become security for the grain advanced to his ryots. I have much pleasure in bringing the services of this gentleman, who is of an old and once powerful family, to the notice of Government. I may add that Mr. Payter also, a Government farmer, has done a great deal for his ryots, advancing money for their assistance in the most liberal manner. Zemindars as a rule have shewn a decided unwillingness to become security for their ryots; the headmen and respectable inhabitants however, have shown a better spirit, and have generally become security jointly with the other villagers. The circle officers take care that the security pledged, viz., the holdings and coming crop, are sufficient to cover the price of grain advanced, but as the produce of the land is, as the land at present stands, hypothecated for the rent, I fear the zemindar, for whose ultimate good these advances are made, will forestall our claim by distraining the crop for rent due. Considering that the land-owner is the ultimate gainer, I think the question is deserving of consideration whether some legislative interference is not called for. Where a cultivator has no security to offer, he gets grain, not as an advance to be repaid, but as a charitable dole. The circle officers have been at some pains, ascertaining

the real wants of the villagers in this respect, having to guard against the villagers asking for more than they actually required, and inquiring into the sufficiency of the security pledged. These advances have been a great boon to the villagers, enabling them to obtain means of subsistence during this slack period, when little or no work can be given them by Government officials, and when their cultivation demands their presence at home. Mr. Pollen, the circle officer of Durgapore, reports as follows:—"There can be no doubt that these advances have in many cases proved the salvation of the village. They could not have been delayed any longer with safety to the community, while they have been delayed quite long enough to enable the zemindars to assist their distressed, ryots, had they been so disposed. I confidently expect that the greater portion of these advances will be recovered without difficulty. I consider grain advances to village communities one of the most effective, and least objectionable ways of meeting a great calamity like the present scarcity."

F.—CHARITABLE RELIEF.

The numbers on our lists are on the increase, and now that road work has stopped, they will probably go on increasing. Our organization, however, for meeting distress is now complete, and will, I feel sure, be equal to any strain put upon it. The group system sketched out in Sir George Campbell's minute, has been adopted with some slight modifications. Charitable committees we have none of; everything is managed direct by the circle officer, subject to the supervision of the Magistrate. It seemed to me very inexpedient that action should be hampered by reference to an irresponsible committee: while, therefore the circle officers were directed to avail themselves to the utmost of local experience and knowledge, each one was told that he was responsible for the management of the division put under him, and as a rule right well have they all performed what were often arduous duties. The village munduls are entrusted with the duty of distributing charitable relief, each within his own village, or if a neighbouring village is small, he perhaps has charge of that too: the mundul makes out lists of his paupers, obtains passes, and distributes grain obtained from Government stores among the poor, reports fresh cases of distress &c. All this the mundul generally does without reward; in some cases he gets a donation of rice for his trouble, in others he is content with the recognition of his status as headman by the sircar. It was suggested at first that picked munduls should be appointed over every eight or ten villages, thus forming the group superintendents alluded to by Sir George Campbell: it was found however that the scheme would not work: a mundul willing to look after his own villagers was seldom willing to give the time and trouble necessary to looking after others, so the idea was abandoned, and each mundul allowed to look after his own village only. To look after the munduls, there are, attached to each circle, a certain number of inspectors and assistant inspectors, who have circles of 30 or 40 villages put under them, of which they have charge, their duty being to look after any relief work going on in the portion of the country allotted to them; to inquire into and report about advances to villagers, and to supervise the proceedings of the munduls, calling up the persons whose names stand on the list as paupers, seeing that they are fit objects for relief, &c., &c. Each mundul being thus responsible for so limited an area, and his operations being supervised as above described, it is impossible that any distress should remain unalleviated. Many of the inspectors are military men, whose services His Excellency the Commander-in-Chief has very kindly placed at our disposal: these native gentlemen have been most useful; they are active and intelligent, doing their duty with a will; they are also so thoroughly open and honest that the circle officers feel they can depend upon them with the most complete confidence. The Commander-in-Chief will, I am sure, be glad to hear that the services of his nominees are so appreciated, and that they have succeeded so completely in winning the approbation and esteem of those under whom they are serving.

G.—FINANCIAL RESULTS.

The total expenditure up to last fortnight was Rs. 17,68,697-6-11

No. 1450, dated Rajshahye, the 1st July 1874.

From—W. H. D'O'LY, Esq., Collector of Rajshahye,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative for the fortnight ending 27th June.

A.—STATE OF THE COUNTRY.

The crops are progressing most favorably. In parts of Nattore the late sowings of amun rice in the lowest lands have suffered from the excessive rain, but not over any considerable extent of country. Rice and dhan are being imported in large quantities, and prices have everywhere fallen; though in a less degree in Godagaree, Tannore, and Manda, and in a portion of Singra, than elsewhere. In these thanas, prices still range from 9 seers, to 10 seers 8 chittacks per rupee. The numbers of persons seeking relief at the several poor-houses are increasing, although work is exacted from all who are capable of doing work; and I think we must not expect that the numbers will much diminish till the aous harvest commences, when there will be work enough in the fields.

As far as I have been able to ascertain, it would appear that in the year 1866 there was a larger area of aous cultivation than usual, but all seem to agree that this year aous has been more extensively cultivated than it was even in 1866. The scarcity in 1866 was caused chiefly by damage done in 1865 by *high floods*, not by drought. The Bhurind crops were excellent, but those in the low lands suffered, and it was chiefly where the lands are low that aous was extensively cultivated in 1866. In that year prices fell in June and July, but that I believe was, as in this year, owing to large importations as the rivers began to rise. The aous crop did not affect the market till August and September, when prices suddenly fell (about 2 seers), but they rose again in October in Beaulah. This year the aous crop being so much more extensive, should have a more lasting effect on the markets.

The condition of the people generally is good, and there have been no cases of starvation. Petty thefts and cases of house-trespass have increased in number, though not to an unusual extent.

B.—RELIEF WORKS.

The daily average on district works during the first week of the fortnight was 1,092½, while that during the last week was 938½. Grain has for some time past been given for six days in the week, and lately on all seven days of the week.

C.—TRANSPORT OF GRAIN.

See statements.

D.—STORAGE OF GOVERNMENT GRAIN.

See statement showing consumption of Government grain.

E.—ADVANCES TO PRIVATE PARTIES.

Advanced up to end of previous fortnight.

| | | | | | Rs. | As. | P. |

* No return has been received from this sub-division.

† These advances have been made through the zemindars.

W. H. D'O'LY,
Collector.

No. 671F., dated Maldah, the 29th June 1874.

From—F. WYER, Esq., Offg. Magistrate-Collector of Maldah,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to forward my narrative for the fortnight ending 27th instant.

A.—STATE OF THE COUNTRY.

There has been a very plentiful rainfall during the fortnight over the whole district. The prospects of the bhadoi crop are very good indeed, and in all probability there will be a bumper harvest. In Kalliachak thana, where during the preceding fortnight, owing to the absence of rain, cultivation was nearly at a stand-still, the people are now busy sowing their lands; but judging from the number of people relieved there, distress must be still somewhat severe. In the Borin, lands are being ploughed up and sown with the hymanti crop. Some of this is already growing, and so far the prospects of this all-important crop are fair. There are many complaints of want of seed-grain for this crop; but I am confident that the ryots either have it, or will be supplied with it by the mahajuns. Of course they would much prefer to get advances from Government free of interest, but I think that those advances are not necessary. During the past fortnight there have been large imports to English Bazar of rice and dhan, chiefly from Dacca; altogether 3,280 maunds of the former, and 3,516 maunds of the latter having been brought in by boats up the Mohanunda. During the last three days there has been a further importation of 2,920 maunds of rice and 1,191 maunds of dhan by the same route, so that the local markets are well supplied, and in no place in the district is rice higher than 10 seers for the rupee. I have stopped the sales of Government rice in Maldah. The sales in Chanchal have increased, 1,498 maunds having been sold during the past fortnight.

The following tables give the latest prices of paddy and common rice at the chief markets in the district, and the quantity of grain imported during the fortnight:—

| | Paddy : number of seers per rupee (80 tolahs.) | Common rice : number of seers per rupee (80 tolahs.) |
|--|--|--|
| English Bazar | ... | 12 |
| Old Maldah | ... | 12 |
| Gazole | 15 | 12 |
| Nowabgunge | 18 | 10½ |
| Rohanpore | 16½ | 10½ |
| Chanchal, Toolsigunge, Samsi, and Abadpore ... | 15 | 10 |
| Kalliachuck | 16 | 10½ |
| Sheebgunge | 17 | 10 |

| <i>Importation.</i> | | | | Rice. | Paddy. |
|---------------------|-----|-----|-----|-------|--------|
| From Dacca | ... | ... | ... | 3,045 | 2,040 |
| " Sylhet | ... | ... | ... | 0 | 1,050 |
| " Burisal | ... | ... | ... | 150 | 0 |
| " Furreedpore | ... | ... | ... | 0 | 80 |
| " Nilpore | ... | ... | ... | 0 | 75 |
| " Rohonpore | ... | ... | ... | 65 | 250 |
| " Bulbulchandee | ... | ... | ... | 20 | 25 |
| Total | | | | 3,280 | 3,520 |

Rainfall.

The following quantity of rainfall was recorded at the head-quarters, viz.—

| | |
|---------------|-------|
| Head-quarters | 6·01 |
| At Chanchal | 13·44 |

Condition of special tracts.—Since the heavy rain in Chanchal, cholera has nearly entirely disappeared. There were a few cases in other parts of the district, as well as some cases of small-pox.

B.—RELIEF WORKS.

During the past fortnight there has been a large falling off in the number of people employed on relief works. The daily average of the number employed under the Department of Public Works has decreased from 2,567 to 1,640, and under the circle officers from 3,915 to 2,796. Thus there has been a decrease of 2,052 persons, or about one-third of the average number which was working during the preceding fortnight. This decrease is owing chiefly to the laborers having gone off to till their fields, and in a minor degree to the introduction of grain payments. The following table will show the number of persons employed in each circle, and under the Public Works Department:—

| NAME OF SUB-DIVISION. | | Number of Public Works Department laborers. | | | Number of laborers under Circle Officers. | | | |
|------------------------|-----------------------|---|--------|-----------|---|--------|-----------|--------|
| | | Men. | Women. | Children. | Men. | Women. | Children. | Total. |
| SUDDER SUB-DIVISION | Sudder circle ... | 1,474 | | | | | | 2,576 |
| | Gazole circle ... | 3,778 | 1,408 | 246 | | | | 1,200 |
| | Maldah circle ... | | | | | | | 5,474 |
| | Sheebgunge circle ... | 5,270 | 1,080 | 306 | | | | 700 |
| | Gomastapore circle... | 2,362 | 1,309 | 623 | 4,058 | 2,027 | 1,309 | 8,894 |
| | Nawabgunge circle... | 2,725 | 1,304 | 391 | 10,090 | 508 | 428 | 11,635 |
| CHANCHAL SUB-DIVISION. | Chanchal circle ... | | | | 6,563 | 1,674 | 492 | 8,668 |

REMARKS.—The returns for Gazole and Sheebgunge have not been received, but the number is about 1,200. The figures given are very nearly correct.

| | |
|--|--|
| Total number of laborers under Department Public Works ... | <div>Men 15,609</div> <div>Women 5,791</div> <div>Children 1,566</div> |

| 763 | 1 | 6 | 4,086 | 0 | 0 |

The laborers at work in the Chanchal circle have now been given employment on village roads &c., near their own villages.

C.—TRANSPORT OF GOVERNMENT GRAIN.

During the last fortnight 20,000 maunds more of the Purneah rice were sent to Dengra Ghât. This will make in all 74,000 sent direct from here to Dengra Ghât, to which add the 65,861 previously sent to Dumroil. Total, 1,39,871. The quantity received at Dengra was, according to the last accounts, 95,000 maunds; 10,000 maunds from the Maldah supply were sent to Godagaree for the Moorshedabad district, and 1,600 maunds have been sent from Hyatpore to Rajmehal for the Sonthal Pergunnahs.

D.—STORAGE OF GOVERNMENT GRAIN.

The following quantity of grain has been stored in the district, viz. :—

| | Mds. |
|--|----------|
| English Bazar golah | 40,462 |
| Old Maldah „ | 27,195 |
| Gazole „ | 9,995 |
| All the golahs of the Chanchal circle | 44,910 |
| Gomastapore „ | 1,125 |
| Nowabgunge golah „ | 8,750 |
| Jhelim „ | 1,000 |
| Parbuttypore „ | 1,000 |
| Sheebgunge „ | 1,500 |
| Total | 1,35,937 |

The following amounts of grain were sent to the undermentioned golahs for expense in those circles, viz. :—

| From English Bazar— | | Mds. | Srs. |
|-----------------------------------|-------|------|------|
| To Sheebgunge | 567 | 0 | |
| „ Bulbulchundi | 487 | 10 | |
| „ Charitable circle | 209 | 30 | |
| „ Kalliachuck | 97 | 15 | |
| „ Executive Engineer | 53 | 26 | |
| „ Maldah Jail | 22 | 39 | |
| „ District Relief Officer | 152 | 25 | |
| | 1,590 | 25 | |
| From Old Maldah— | | | |
| To Nowabgunge | 5,000 | 0 | |
| „ Gomastapore | 500 | 0 | |
| „ English Bazar | 200 | 0 | |
| „ Charitable circle, Malda | 89 | 24 | |
| Grand total | 5,789 | 24 | |

The total quantity of Government grain disposed of up to date is 35,488 maunds 17 seers 13½ chittacks.

To this must be added 10,000 maunds sent to Godagaree for Moorshedabad, leaving a balance of 90,448 maunds 22 seers 2½ chittacks.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

No advances of money have been made during the fortnight, either for purchase of grain or for land improvements. 2,908 maunds 33 seers 8 chittacks were advanced to ryots; the total quantity advanced up to date is 9,311 maunds.

F.—CHARITABLE RELIEF.

The daily average of the number of people relieved during the past fortnight was 12,730, showing the large increase of 3,168 on the preceding fortnight. This increase has taken place in the Chanchal, the Sudder, and Maldah circles, where the total fortnightly increase was 14,358; 22,437; and 7,018 respectively. In the Sudder, the increase in the number of persons relieved was chiefly in Kalliachak the. The number given under this head includes those who are relieved by spinning jute, cotton &c. There will not, I think, be any decrease in the

numbers until the end of July or middle of August, but on the contrary a small increase. The following shows the number relieved during the fortnight in each circle:—

| Name of Circle. | | | | | | Number of people relieved. | Rice distribution. | | | REMARKS. |
|-----------------------|--------------|-----|-----|-----|-----|----------------------------|--------------------|------|-----|----------|
| | | | | | | | Mds. | Srs. | Ch. | |
| SUDDER SUB-DIVISION | Maldah. | ... | ... | ... | ... | 31,864 | 441 | 11 | 15 | |
| | Gazole | ... | ... | ... | ... | 5,700 | | | | |
| | Sudder | ... | ... | ... | ... | 38,570 | 426 | 18 | 13. | |
| | Sheebgunge | ... | ... | ... | ... | 2,400 | 75 | 23 | 12½ | |
| | Nowabgunge | ... | ... | ... | ... | 33,124 | 681 | 22 | 0½ | |
| | Gomnastapore | ... | ... | ... | ... | 20,174 | 170 | 3 | 0 | |
| CHANCHAL SUB-DIVISION | Chanchal | ... | ... | ... | ... | 46,248 | 891 | 36 | 13 | |

To this must be added 5,700 as the number of people relieved in Gazole, and 2,400 as the number of people relieved in Sheebgunge. The actual figures have not been received for these circles, but the numbers given above are, I believe, nearly right. Thus the daily average number of people relieved was 12,730.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

Total expenditure from district treasury, as shown in the Rs. A. P.
last fortnightly narrative 3,33,945 6 2

F. WYER,
Offg. Magistrate-Collector.

No. 16, dated Rungpore, the 27th June, 1874.

From—E. G. GLAZIER, Esq., Offg. Magistrate and Collector of Rungpore,
To—The Secretary to the Government of Bengal, Scarcity and Relief Department.Narrative of Scarcity and Relief in Rungpore District for the Fortnight ending Saturday, the
27th June, 1874.

A.—STATE OF THE COUNTRY.

During the fortnight the supplies in the market have been abundant and prices have fallen everywhere; new aus rice, old amun stores, this year's millet, are to be met with, all from local sources. Importation still remains active; the Rungpore market is largely supplied in this way *via* Sundergunge, and Govindgunge receives supplies liberally from the south; but the trade is breaking up; the large improvised markets on the banks of the Brahmapooter near Kallygunge, usually exporting stations, have dwindled to near nothing as new selling depôts became opened on the small rivers. In Sadullapore the coolies sell in the markets the Government grain which they receive in excess of what they need to consume, and it is surprising what a marked effect a little extraneous supply of the kind independent of the usual trade has in reducing prices all round. But the people show their marked preference for their own coarse rice, to which they are accustomed, to the Burmah rice, and buy the former even when it is one to two pice a seer dearer than the latter. In the southern division the sale of Government rice on passes has almost come to a stop, the trade returning to its old channels.

But still along the extreme west the red land of Molung, and all to the north of the district, prices continue comparatively high, and the Government rice is eagerly sought after. In Duwrahee the sales have increased at a rapid rate. The Relief Officer has been selling lately over 500 maunds a day; the last two days' returns show each a total of 560 maunds, in addition to which he has, during these two days, given passes to traders in Chillakhal to the amount of 1,400 maunds.

In Sundergunge a large accession of local supply brought down the prices to 16 seers a rupee at the close of the fortnight; other quotations are as under:—

| | per rupee | Seers. |

The rainfall has been copious; 9·99, or nearly 10 inches, is the return at head-quarters. Everywhere it has been the same. A week ago I commenced a short tour southwards, and the country was swimming in quite a flood of water, which poured down almost incessantly. The crops could not be better. In Sundergunge 4 annas have been already cut of a crop which will yield $\frac{1}{2}$ more than the average. Elsewhere the harvest is expected to be a bumper one. It is described as a 20-anna crop, under the old common style of calling a full average a 16-anna crop; but according to the new instructions of counting an average crop as 12-anna, I should class this as promising a 16-anna crop. The later aous in Mahigunge and the western tracts is looking well. Amun is being transplanted everywhere, and in Govindgunge and other late parts the seed beds are fully prepared and look healthy.

The condition of the people has wonderfully improved. The famine has, so to speak, collapsed in some parts very suddenly. I quote on this subject some very pertinent remarks of Captain Brehen, the Sundergunge Relief Officer, as it deals with the question of the advances taken by zemindars in the early part of the operations,—a system which, in this district has been largely resorted to, and to which I attribute in a great measure the comparative mildness of the distress in some of the tracts that at the outset distinctly revealed the most serious symptoms of scarcity, and to which alone is owing the unprecedented cultivation of the aous crop, the benefit of which we have now begun to reap:

“The collapse, so to speak, of the famine in this circle has been so sudden and complete as possibly to betray even those who have had opportunities of watching its progress all along into forgetfulness of the state of things that prevailed three months ago, and to produce an impression that the danger tided over was not so great after all. I venture, therefore, in conclusion, to recall to notice a few facts connected with the earlier history of the famine and relief operations in this circle, which will serve to put the matter in a truer light. In the middle of March last when the circle organization was first started in this district, Sundergunge was looked on as one of the worst parts. It was known that the condition of some of the villages in the neighbourhood was exceedingly bad, so much so, that in one, named Sonarai, about two miles from here, a large number of the inhabitants, on the refusal of the zemindar to afford them help, left the village in a body and emigrated to the further side of the Teesta. When I took over charge of the circle, I found the great mass of the people in not a destitute but a very impoverished state, and the appearance both of themselves and their cattle bore witness that they were suffering in no ordinary degree. But as I rode along from village to village, the cry was not for food and work, but for seed and for money, to help to put it in the ground; that the zemindars did nothing to help them; and that if they could not sow their fields they must die. The lands around many of the villages, where acres and acres were left untilled, gave evidence that their representations were not made without cause. I accordingly lost no opportunity of pressing the subject of advances on the agents of the zemindars, who had property in the neighbourhood, and constantly brought the matter under the notice of the Magistrate of the district in my reports. The result of the action taken on these reports, and similar ones made by other Relief Officers, was that the zemindars were shamed out of their selfish and short-sighted line of action. In villages where the people had at first complained loudest, they began to acknowledge that they were receiving help, and by the beginning or middle of May almost every available acre had been put under cultivation. The result of this and of the favorable weather of the last two months is a splendid crop of aous rice, three-fourths of which has been actually cut, and which has brought the price of this grain down to Rs. 2-8 and Rs. 3 a maund. Thus the famine has been brought, I may say, to a close in this circle with a comparatively trifling expenditure. One result, however, of the line of action thus pursued was that the great body of the people were kept off relief works by having to work in their own fields, and thus what is generally looked for to prove great distress, viz., a large number on works, was wanting. Had a different course been adopted, had the people been driven by absolute want to crowd on to works to the neglect of their fields, there would have been less room to doubt the reality of the famine, but distress would not have been brought to an end so soon, or at so little cost to Government.”

I visited the divisions of Molung and Pirgunge, and met the Govindgungo Relief Officer at Palashbaree, in the Govindgunge division. The condition of the people is everywhere bettering; all along the eastern side where the land is loamy operations will speedily close. On the red land distress is still keen, and will so continue for some time. Mr. Damant remarks on this head as follows:—

“Distress has not increased, and we have now begun gradually to close relief works; it is confidently expected that after three weeks more relief measures may be almost entirely closed in the part of the thana lying east of the Karatuya; in the neighbourhood of Kamdya relief measures will probably be necessary for two months more, as the aous crop there is much later than in the rest of the thana. It will probably, however, be necessary to keep a few annochatras open for some time longer to provide for the few people who have no land of their own, and in an ordinary year would be dependent on the charity of others.”

The group system is now fully inaugurated in these three thanas. In Molung 95 villages have been so dealt with, 56 on the red land, and 39 on the loamy; the latter will only need detailed inspection for a short time. In Pirgunge 131 villages have been grouped, and in Govindgunge, 153 on the Kamdya side and 150 on the east. The superintendents have been allowed 10 to 15 rupees a month; in some cases the assistant himself does all the work, and superintendents are dispensed with. The work is progressing as favorably as before; village

jungles have been cut, village paths have been widened and joined with the main roads. The people everywhere take a great interest in this endeavour to improve their village communications. In one village in Sadullapore they put on some able-bodied laborers at their own expense to direct and help the women and children in their labor. A good foundation has thus been laid to enlist the sympathies of the people in case it should be subsequently decided to lay on a cess for the improvement of village roads, and they will the better understand the object of Government in the matter.

But while distress has generally so remarkably decreased in some places, the opposite results are seen. And first: in Mahigunge division the numbers on charitable relief already large have become larger. This is owing to the close of many private annochatras prematurely. The thana is a nucleus of beggars; a larger number of poor who are not agriculturists is to be met with here than anywhere else. So in Durwanee, applicants for relief are increasing; this is owing to the continued strain of high prices there. In fine, while pressure of the scarcity proper has been confined to the southern part of the district, its back stroke, as it were, is felt in the north now at about its close consequent on the constant drain of produce from those parts. At the same time the gradual curtailment of relief operations has been kept in view, and I have given detailed instructions to the Circle Officers in this matter. Those receiving cotton relief will get a short time allowed for doing their work, so as to strike off the bad workmen, who will revert to former occupations, or be put on charitable relief; and in all cases of relief fresh enquiries will be made with a view to relegate the recipients to their relatives or former mode of subsistence as quickly as possible.

I went to Molung with a view to look personally into the question of the need for advance of cash for seed-grain. I have received sanction to the Rs. 5,000 asked for, but instructed the Relief Officer not to give any money without my order in each case. There is no doubt that there is a certain want of seed, not in the supply but in the ability to buy it. A part of the khair land in Molung is owned by small putneedars, who cannot help their ryots in this crisis. But I have now arranged that all ryots who want seed-grain must take advances of rice, and they can sell that rice readily enough in the market. I shall not now advance one pie in cash without special report to the Commissioner. I have instructed all other Circle Officers that they can give advances for seed-grain under the same principle. These advances will be under the same rules as those for subsistence; there will be no difference; in fact, the ryots will get the rice and will eat it, or sell it, or do what they like with it. In some cases of course the state of the market and the reaction against the Burmah rice is such that its sale will be made at a loss; this will merely enhance the cost of the seed—a purely commercial result—and will at the same time act as a test that those who do not need it will not take it.

Mr. Damant had special sanction of Government to advance cash for seed-grain to the amount of Rs. 10,000, and he had distributed Rs. 1,844 up to date; he expects to give only Rs. 300 to Rs. 400 more. He reports: "I was very much pleased to find that the people seldom asked for more than was barely sufficient, and showed great reluctance to burden themselves with debt; these advances have done a great amount of good."

Elsewhere I do not expect the ryots would have hesitated to take any amount of cash, but they certainly draw back from burdening themselves with more rice than they absolutely need, as they are well aware the value will have to be refunded in cash when their harvest is ripe and the price of rice is low.

I arranged with the different officers while on tour about completing these advances for subsistence. This fortnight's return shows that 2,400 maunds have been given in Molung to 977 families. In Pirgunge a commencement has been made with 286 maunds. The Relief Officer may perhaps use 3,000 maunds in this way. In Govindgunge 490 persons, laborers on the roads, have received at the rate of 1½ seer a day, and more will be required. The majority of the people have, however, put by money. There has been no great demand as yet for advances, but in view of late orders of Government I have specially instructed the officer to give them liberally wherever required. In addition to the three circles above noted, advances to some extent will be made in Mahigunge and Sadullapore. The condition of the payment of these advances, as set forth in Circular No. 3966, do not seem to be applicable to this district yet, but I have applied to the Commissioner for the extension of the same here, and suggested that where clean rice is charged at 12 seers cargo rice should be 16, and where clean rice is 16 cargo rice should be 20. As soon as reply to this communication is received, further detailed directions will be issued, and I hope in next fortnight's return to be able to show that most of the advances have been given.

B.—RELIEF WORKS.

The return of laborers again shows a reduction of one-half, from 34,833 to 15,702. Govindgunge takes the lead in the decrease. The people on the khair lands, who before crowded in thousands, have now almost entirely left for their cultivation; and on the pali they are fast decreasing as the aous ripens. Sadullapore, too, shows a great improvement. The former Relief Officer, Sub-Deputy Behari Lal Mitra, proved worse than incompetent, and Mr. Damant, engaged in Govindgunge, could not exercise so close a supervision as was desirable. I removed him and placed in charge Sub-Deputy Upendra Lal Mozoomdar, who Borobaree Circle successfully; he has taken off the roads the large number of women and children, and set right the details of management. As I before reported, grain payments have been made for six days out of rice on all the roads, but in Sadullapore and

Molung divisions the officers have been careless in carrying out the rules, and have allowed the laborers to crowd to the works on the cash days in excessive number. On finding out that this was the case, I yesterday sent special orders to all circles that even on the seventh day rice instead of cash was to be given, as the coolies could sell the grain if necessary. To-day the Government telegram to the same effect has been received, and the orders have been reiterated.

Molung division shows a great decrease, as do the others noted. The majority of the laborers still at work are on the red land. On one special road there are still 1,161. The road (Bolua to Satibari) was opened very lately at the earnest request of the people. They had refused to take loans from their zemindars, preferring to work out their living instead of getting into debt, and they work half the day on the road, which passes through their villages, and half the day on their fields. Earlier in the season they had worked on distant roads, but made special application for the opening of the road now in progress, which connects two important markets, so that they might have work near their homes and not be driven by their necessities to load themselves with obligations they would find it difficult to meet.

Abstract Statement of the Relief Roads for the Fortnight under report.

| DIVISION. | TOTAL NUMBER OF COOLIES EMPLOYED. | | | | Number on piece-work. | Number on daily wage. | REMARKS. |
|------------------------|-----------------------------------|--------|-----------|--------|-----------------------|-----------------------|------------------|

C.—TRANSPORT OF FOOD.

Little remains to note. Transport is alone active in the Durwanee division to keep up the supply for sale from the railway golahs and from Chillakhal.

D.—STORAGE OF GOVERNMENT GRAIN.

The sales to the public have been principally at Durwanee, Chillakhal, and Sankamari (Rungpore); by far the largest amount at the first-named place. The payments to laborers in kind now show a large amount, being over 11,000 maunds in the two principal divisions of Govindgunge and Molung. No returns have been received from Kumargunge for either headings B or D, and I must specify this officer, Mr. G. D. Khan, as very irregular in this respect.

Statement showing Storage and Consumption of Government Grain in the District of Rungpore for the Fortnight ending 27th June, 1874.

F.—CHARITABLE RELIEF.

(Prepared by the District Relief Officer.)

The state of the country has become exceedingly prosperous, both as regards the present outturns of (aous) early rice and as to the prospect from the cultivation of the (amun) late rice. It is reported from all quarters that a considerable diminution of those requiring charitable relief may now be looked for. With the exception of Gobindgunge, Molung, and Mahigunge, no organised charitable relief will probably be found to be necessary in any part of the district after the close of July.

Everywhere discrimination is used in returning to their homes and to their relatives those who are unfit to be retained on the charitable relief registers.

Private charity continues as previously reported, and is every day becoming more general.

The closing of the Mahigunge private relief centres, where 1,749 people were being fed during the previous fortnight, naturally led to a temporary increase of the numbers at the Government annochatras in that division, which rose from 246 to 700 daily average. To guard against temporary suffering from the suddenness of the closing of these relief centres, it was arranged by the Secretary to the Central Relief Committee that each of the recently closed relief centres should be kept open by the zemindars on certain days of the week, so that cooked food should be every day obtainable by the habitual resorters to the kitchens of this neighbourhood, until the people can look about and betake themselves to their usual courses without inconvenience. Funds have been applied for, and care is being taken to provide for the wants of the helpless destitute in accordance with the generous instructions given regarding the distribution of charitable relief. While the general relief operations are being brought to a close, there will be many in want of assistance. People will not be able to recover their self-dependence for some time; for, owing to a still existing feeling from the panic caused by the dread of famine, alms will not, it is expected, be so freely given as they might easily be until the amun crop is assured. And for the same reason the husking of the jotadars' grain, which gave employment to many poor neighbours now mainly dependent upon publicly organized Government and private relief, will not be available for their support; and in ordinary times many poor women and children, who cannot go far from their homes to beg, will therefore continue to require such help as is afforded by gifts of food and clothing, with or without employment. Regular beggars who go their rounds or haunt particular spots can easily get their living now in their usual way. The distribution of relief is going on regularly. There has been no marked general increase of numbers. The apparent increase is due from transfers from roads to light village work.

G.—FINANCIAL RESULTS.

The reason of the large expenditure in Molung is, as explained under B, the excessive number of coolies at work on the cash days, who worked hard to earn what they could. They averaged about 8,000 during the fortnight, and the Relief Officer informs me that they each gained more than a rupee by their concentrated labor in those days. At the same time it should be observed that in this division over 5,000 maunds of rice have been paid in kind to the laborers. In Govindgunge the cash payments were only Rs. 2,000, and the Relief Officer has a large balance of cash in hand which will be refunded to the treasury. The Durwance payment is principally for transport, as relief works have been stopped there. The Sadullapore debit is an adjustment of previous drawings at the sub-divisional treasury. The outgoings during the last fortnight amounted only to Rs. 1,737 for road works.

No. 1268, dated Bogra, the 27th June 1874.

From—E. J. BARTON, Esq., Offg. Magistrate and Collector, Bogra,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative of relief operations which is now due.

CONDITION OF THE COUNTRY AND PEOPLE.

2. Since the 26th of May last, the prospects of the country and the people, the supply of food, and the state of the crops have been steadily improving. During the last fortnight this improvement has perhaps been greater than in the preceding fortnights. Last fortnight I drew attention prominently to the cheapening of food-grains all over the district. There has been a further fall this fortnight. For the purposes of comparison, I append figures which show the prices of rice at all the relief circles of the district both this fortnight and last. The fall is very appreciable. Everywhere excellent country rice is procurable at these rates. The bazars all over the district are well supplied.

3. The aous crop continues excellent. Many old ryots have admitted to me that for the last 30 years such an aous crop has not been seen in Bogra.

4. The weather continues most propitious. The rain falls very seasonably for the purposes of vegetation. From the 13th instant up to last night we have had a rainfall at Bogra itself of 9·64 inches, which was well distributed over each day of the fortnight. Every part of the district has had most propitious rain. The ryots could not have had a better seed time for the amun crop, which they are now putting into the ground.

5. The people physically are in their normal condition. Mr. Lyons, the civil medical officer of this station, was good enough to comply with my request to examine the laborers on two of the relief roads. These laborers are drawn exactly from those sections of the people which have all along been the worst pinched by the scarcity. The result of that examination is given in this table which I append.

| | DINAGEPORE ROAD. | | | | | DUPCHANCHIA ROAD. | | | | |
|----------------------------|------------------|------------|------------|------------|-------------------------------|-------------------|------------|------------|------------|-------------------------------|
| | Men. | Women. | Children. | Total. | Percentage of total examined. | Men. | Women. | Children. | Total. | Percentage of total examined. |
| Normal condition ... | 224 | 83 | 305 | 612 | 81·48 | 129 | 130 | 321 | 680 | 85·67 |
| Under-fed ... | 18 | 5 | 29 | 52 | 6·92 | 2 | 4 | 13 | 19 | 2·65 |
| Aged ... | 39 | 45 | | 84 | 11·18 | 25 | 39 | | 64 | 9·45 |
| Sickly ... | | | 3 | 3 | ·39 | 1 | | 8 | 9 | 1·32 |
| Aged, blind and infirm ... | | | | | | 2 | 2 | 2 | 6 | ·88 |
| Total ... | 281 | 133 | 337 | 751 | | 159 | 175 | 343 | 677 | |

6. Mr. Lyons expresses thus his general inference from the inspection made by him—
 “The general physical aspect of the masses in this district, as far as my personal observation goes, has not been appreciably to any extent affected by the scarcity.

There is always to be found in this district a floating class of people who look, and in reality are, under-fed.”

7. With regard to the almost inappreciable difference which the scarcity has effected upon the general physical condition of the people, I hold one great cause of it to be due to the fact that a vast majority of the population are Mussalmans, and eat almost anything, while the Hindus of caste who have prejudices with regard to what they will use as an article of food, form an exceedingly small minority. The Mussalman ryot of this district is a well-nourished man in nine cases out of ten. The food-supply of the country has further been appreciably increased by a good fruit harvest, and especially by an abundant outturn of the *jack fruit* (*artocarpus integrifolia*), which has been especially luxuriant this year, and which grows to an extent in Bogra almost unprecedented in other parts of Bengal.

RELIEF WORKS UNDER THE EXECUTIVE ENGINEER.

8. There is little to record this fortnight with regard to them. The season is unfavor-

| For what time. | Daily total average number employed. | No. of women and children in this total. |
|--------------------|--------------------------------------|--|
| Last fortnight... | 27,020 | 20,053 |
| This fortnight ... | 16,520 | 12,311 |

able to the prosecution of road-work and tank-digging. There has, therefore, been a very considerable falling off in the numbers who have recourse to these works. The figures in the margin shew this. This fortnight, out of a total of 16,520, only 4,209 are men, and of these men many are old and quite ineffective. Very few able-bodied persons remain on our works.

9. As earth-work and tank-digging are impossible in the rainy season, which is now fairly upon us; and as coming to our works in the rain must be injurious to the young and the aged and the women, who are almost the sole occupants of our relief-works, I am of opinion that the time is now fully come for shutting them altogether. This will, however, be done only gradually and with caution. I have ordered work to cease on the eight roads noted on the

| Name of road. | Daily average number employed on it during last fortnight. |
|------------------------------|--|
| Khetlal ... | 132 |
| Buroganj and Dupchanchia ... | 635 |
| Badalgachi ... | 170 |
| Badalgachi and Adamdighi ... | 16 |
| Dupchanchia ... | 219 |
| Shariakaudi ... | 167 |
| Sultangunge ... | 8 |
| Madhupore ... | 367 |

margin, at once. It will be seen that very few laborers are engaged on these roads, and the people who are working on them will be duly provided for. When each road is shut up a relief officer will be present upon it, and will give to each person an order for a month's food upon the nearest golah. The names of these persons will also be entered in the registers, so that any distress into which they may subsequently fall will be relieved. I do not, however, from the present prospects of the country, anticipate that each of

them will fail to earn for himself, independently of our aid, an adequate livelihood.

10. The closing of the works will enable us to dispense with the temporary road establishment, which is very inefficient, and cost, moreover, above Rs. 4,000 a month. The Executive Engineer will energetically hurry forward the settling of his accounts with each one of these subordinates, and then dispense with his services.

11. Grain payments to the laborers on the roads have continued to work smoothly and effectively during the fortnight, and have give satisfaction to all concerned.

12. The process of weeding out the very old and feeble was continued. Mr. Clay, c.s., sent off the works 1,240, and Mr. Collier, c.s., 1,200 during this fortnight. This makes a total of 7,958 of these old and feeble creatures who have, during the last five weeks, been taken off the roads and sent back into their villages with a month's supply of food each.

TRANSPORT AND STORAGE OF GOVERNMENT GRAIN.

13. Movements of grain from golah to golah, according as necessity arises, continues. We can use the rivers now, which greatly facilitate our operations. The transport and storage proper are completed.

ADVANCES.

14. The advances in cash stand as follows:—

| | Rs. |
|--|--------|
| (a.)—Advances to traders and others for the purchase of grain, (paragraph 4, circular No. 80) ... | 500 |
| (b.)—Advances to zemindars for improving water-supply of a village (paragraph 21, circular No. 80) ... | 3,150 |
| (c.)—Advances to zemindars to help their ryots (see Government letter No. 463—S.R., dated 3rd February 1874) ... | 50,870 |
| Total ... | 54,520 |

15. The advances in grain stand as follows:—

| | Mds. |
|------------------------|------|
| C. G. Ridge, Esq. ... | 102 |
| Tohurennesa Bibi ... | 218 |
| Piari Lal Mozumdar ... | 115 |
| Gour Ramani Dasya ... | 18 |
| Total | 453 |

16. Only advances in grain are now given. Advances in cash have ceased for some time.

SALES OF GOVERNMENT GRAIN TO THE PUBLIC.

17. The bazar rates of rice, which I quoted in paragraph 2 of this narrative, will be sufficient to show the Government that, as our selling prices now stand, the sales of our rice out of our gôlahs must necessarily cease altogether in a very short time. In my last narrative I called prominent attention to this, and I suggested the only remedy, viz. cheapening our rates and giving the local officers a discretion to fix the sale price in accordance with the bazar rates ruling at each locality (see paragraphs 19 to 23 of my last narrative). I have not yet been favored with the orders of Government on these suggestions.

| NAME OF CIRCLE. | Amount sold last fortnight. | Amount sold this fortnight. |
|-----------------|-----------------------------|-----------------------------|
| | Ms. S. | Ms. S. C. |
| Sheebgunge ... | 199 0 | 20 27 8 |
| Sherpore ... | 224 32 | 133 8 12 |
| Khetlal ... | 156 26 | 258 8 13 |
| Bogra ... | 670 0 | 340 20 0 |
| Adamdighi ... | 210 24 | 450 0 0 |
| Panchbibi ... | 1,165 35 | 934 28 13 |
| Total ... | 2,638 37 | 2,106 13 14 |

18. I give in the margin figures which show what sales have been effected in each relief circle, both last fortnight and this fortnight. As was to be expected, the sales have fallen off during this fortnight.

19. The money actually transmitted to the treasury as realised from the sale of Government grain amounted in the fortnight to Rs. 5,066-13.

20. I have done everything to foster these sales. The selling prices of the Government

grain all over the district stand at the rates which are noted on the margin. I am actually selling in the Bogra circle one seer per rupee cheaper than the rates fixed by Government, and in all the other circles the Government grain is freely offered at the maximum rates prescribed. Buanniahs sell in the villages. Notwithstanding, the business done is very small, and as the markets get easier, it will become smaller still. The only remedy is to sell cheaper, and, as I have previously urged, I think the time has come when the Government rates might be safely lowered to 16 seers for clean and

| KIND OF RICE. | Number of seers per rupee in Bogra circle. | Number of seers per rupee in other circles. |
|--------------------------------|--|---|
| Best country atab rice (clean) | 11 | 10 |
| Country ushna (clean) ... | 12 | 11 |
| Burmah atab (ditto) ... | 12 | 11 |
| Red ushna (ditto) ... | 13 | 12 |
| Country ushna (mixed) ... | 15 | 14 |
| Burmah ushna (ditto) ... | 16 | 15 |

20 seers for mixed rice, as recommended in paragraph 23 of my last fortnightly narrative.

LOANS OF GRAIN TO CULTIVATORS.

| NAME OF RELIEF CIRCLE. | Amount of grain lent to ryots last fortnight. | Amount of grain lent to ryots this fortnight. |
|------------------------|---|---|
| | Mds. S. C. | Mds. S. C. |
| Shibgunge ... | 44 10 0 | 2,089 39 8 |
| Sherpore ... | 77 5 0 | 38 35 0 |
| Khetlal ... | 2 10 0 | 427 24 4 |
| Bogra ... | 313 12 0 | 404 10 0 |
| Adamdighi ... | 452 20 0 | 1,477 30 0 |
| Panchbibi ... | 130 0 0 | 1,009 10 1 |
| Total ... | 1,019 17 0 | 5,445 28 13 |

21. As the amun crop had to be sown, such of the ryots as were in poor circumstances and had been earning money by extraneous labor had to leave these works and betake themselves to their fields. I, therefore, relaxed the restrictions which I had previously imposed on these loans, and urged the relief officers to work this form of relief vigorously, so as to see that in all proper cases the really necessitous, and only those, should be assisted with an advance of grain. I give on the margin figures contrasting the loans of this fortnight with those of last fortnight.

22. With the exception of the circles of Sherpore, Khetlal, and Bogra, where there seems to have been a want of energy, these loans have been very strenuously worked in all other parts of the district. I have called the attention of the relief officers of Sherpore, Khetlal, and Bogra to this matter again.

CHARITABLE AND GRATUITOUS RELIEF.

23. The figures in the statement below will enable the comparison to be made between the work under this head done this fortnight and last. The falling off in the numbers is attributable to the general improvement which has taken place in the condition of the country.

24. Nearly the whole of this gratuitous relief was given in grain, the expenditure of which I note in the 4th column of the table below. Very little was given in money, save in

the case of a few Brahmin families who were found in a state of privation, and who were relieved by cash.

| NAME OF CIRCLE. | | | | | | Total number relieved last fortnight. | Total number relieved this fortnight. | Expenditure of grain in gratuitous relief. | |
|-----------------|-----|-----|-----|-----|-----|---------------------------------------|---------------------------------------|--|-------|
| | | | | | | Mds. | Mds. | Mds. | S. C. |
| Shibgunge | ... | ... | ... | ... | ... | 3,303 | 1,430 | 500 | 10 8 |
| Sherpore | ... | ... | ... | ... | ... | 1,313 | 2,200 | 339 | 11 6 |
| Khetlal | ... | ... | ... | ... | ... | 2,119 | 2,520 | 349 | 37 14 |
| Bogra | ... | ... | ... | ... | ... | 5,367 | 1,011 | 777 | 22 0 |
| Adamdighi | ... | ... | ... | ... | ... | 859 | 950 | 456 | 17 10 |
| Panchbibi | ... | ... | ... | ... | ... | 742 | 1,160 | 611 | 21 4 |
| Total | | | | | | 13,703 | 9,362 | 3,035 | 3 10 |

25. *Spinning and weaving relief in cotton and jute.*—The marginal figures give the number relieved under this head both this fortnight and the last. There is a marked falling off in the Bogra circle, also attributable to the improved condition of the inhabitants.

| NAME OF CIRCLE. | No. relieved last fortnight. | No. relieved this fortnight. |
|-----------------|------------------------------|------------------------------|
| Shibgunge | 645 | 1,607 |
| Sherpore | 426 | 220 |
| Khetlal | 2,277 | 2,313 |
| Bogra | 4,380 | 460 |
| Adamdighi | 1,092 | 1,547 |
| Panchbibi | 591 | 609 |
| Total | 9,419 | 6,646 |

26. The new rates and the new mode of payment (five parts in grain and one part in money) work well. The manufactured material continues upon our hands. I have tried to sell it locally and failed. I have written to other districts where relief operations are going on, and offered to send it to be converted into cloth by the weavers whom they were relieving. The Collector of Burdwan

only has offered to take a portion of the cotton yarn. The jute twine, or yarn, is in no way saleable here. I recommend that the jail department be ordered to take the cotton and jute yarn to be woven by the prisoners into cloth and gunny bags. Thus only do I see any chance of disposing of the Government yarn without incurring a heavy loss.

VILLAGE VISITATION AND REGISTRATION.

| NAME OF CIRCLE. | Number of villages visited, of which the registration has been completed during the fortnight. | Number of villages of which the registration has been completed during the fortnight. |
|-----------------|--|---|
| Shibgunge | 86 | 14 |
| Sherpore | 133 | Not given. |
| Khetlal | 120 | 48 |
| Bogra | 84 | Not given. |
| Adamdighi | 142 | Ditto. |
| Panchbibi | 89 | 73 |

27. This work has, in most of the circles, been actively prosecuted during the fortnight. These figures show that the relief officers have been moving within their circles to such an extent, that they must have become cognizant of any severe distress within them. Such village registration as is necessary has been almost completed. It is only necessary in three or four tracts, as the condition of the rest of the district does not require this special treatment.

POOR-HOUSES OR ANNACHATRAS.

| NAME OF CIRCLE. | No. of poor-houses opened during the fortnight. | No. relieved at them. |
|-----------------|---|-----------------------|
| Khetlal | 2 | 1,334 |
| Shibgunge | 2 | 180 |
| Bogra | 1 | 31 |
| Adamdighi | 3 | 150 |
| Sherpore | 5 | 1,443 |
| Total | 13 | 3,144 |

28. In the margin I give the statistics of annachatras for the fortnight. Besides these, the Raja of Dighapathia has four relief kitchens, at which a daily average of about 977 persons are fed.

29. The absence of any distress of a really severe type was shewn when we opened the annachatra at Bogra. The daily average fed never exceeded six. The annachatra was, of course, closed, but it is ready should the necessity for it ever arise.

FINANCIAL RESULTS OF THE FORTNIGHT.

Total expenditure as shewn in the last narrative ... Rs. 4,50,624 A. 9 P. 8

E. J. BARTON,

Offg. Magistrate and Collector.

No. 1109, dated Pubna, the 30th June 1874.

Memo. by—W. V. G. TAYLER, Esq., Magistrate of Pubna.

SUBMITTED to the Secretary to the Government of Bengal, Scarcity and Relief Department, for information.

Narrative for the Sudder Sub-division for the fortnight ending the 29th June 1874.

A.—STATE OF THE COUNTRY.

THE improvement mentioned in last report still continues. There has been a marked and general fall in prices. There is a general belief that the worst is over. Teel and kaon have turned out well, and the aous crop is very forward and promising. Every endeavour is being made to reduce the already moderate number receiving gratuitous relief. The health of the district continues good.

B.—RELIEF WORKS.

The numbers employed on the several roads are as follows:—

| | | | |
|------------|---------|------------|---------|
| Maligacha | ... 157 | Maldah | ... 73 |
| Ataikula | ... 23 | Sujanuggur | ... 177 |
| Chatmore | ... 240 | Dulai | ... 150 |
| Fureedpore | ... 64 | | |

D.—STORAGE OF GRAIN.

2,000 maunds of rice have been stored at Pubna, and is being used for advances and payment of coolies. We have not received the second 5,000 maunds indented for. There has been no difficulty about storage.

E.—ADVANCES TO PRIVATE INDIVIDUALS.

Rs. 4,600 have been advanced before rice was received; since then 526 maunds have been given.

F.—CHARITABLE RELIEF.

Charitable relief is given in the sub-committees to all persons who are found destitute and unfit for road work. Daily average number of recipients of charitable relief in the several sub-committees, 337.

G.—FINANCIAL RESULTS.

No more subscriptions promised or realised in this fortnight. Expenditure as detailed below—

| | | | | Rs. | As. | P. |
|---|----------------------------|---------------|-----|-----|-----|----|
| Paid for wages of coolies on the | Sujanugger road | ... | ... | 600 | 0 | 0 |
| Ditto | ditto | Chatmore road | ... | 300 | 0 | 0 |
| Ditto | ditto | Maligacha | ... | 300 | 0 | 0 |
| Ditto | ditto | Dulai | ... | 200 | 0 | 0 |
| Pay of a sircar of | Malanchi road for May 1874 | ... | ... | 7 | 0 | 0 |
| Sent to Pubna sub-committee for charitable relief | ... | ... | ... | 100 | 0 | 0 |
| Charges for the transport and storage of 2,000 maunds of rice received from Dhapari dopôt | ... | ... | ... | 116 | 3 | 0 |

Since the receipt of rice from Dhapari no cash payments are made. Rice is given to the coolies on the roads. Details given below :—

| | | | | Mds. | Sr. | Ct. |
|---|------------------------|-----|-----|------|-----|-----|
| Given to the | Maligacha road coolies | ... | ... | 140 | 0 | 0 |
| Advanced to Pubna sub-committee for charitable relief | ... | ... | ... | 75 | 0 | 0 |
| Ditto | Onumkola | ... | ... | 100 | 0 | 0 |
| Ditto | Ataikula for ditto | ... | ... | 65 | 0 | 0 |

Eleventh Fortnightly Narrative of Scarcity and Relief in the Serajgunge Sub-division from the 11th June to 24th June 1874.

A.—STATE OF THE COUNTRY.

THERE has, during the past fortnight, been a very marked improvement in the condition of the people. This is attributed to the fall in prices, the cutting of the kaon and til crops, and the promising appearance of the aous crop and jute fields.

The supply of rice in all the bazars has been sufficient. The following table shows the extent to which prices have fallen :—

| NAME OF MARKET. | | | Number of seers per rupee in last fortnight's return. | Number of seers per rupee according to last return. | Date of last return. |
|-----------------|-----|-----|---|---|----------------------|
| | | | Seers. | Seers. | |
| Serajgunge | ... | ... | 11½ | 13 | 24th June 1874. |
| Shazadpore | ... | ... | | 12 | 22nd „ |
| Ullapara | ... | ... | 10½ | 15 | Ditto. |
| Raigunge | ... | ... | 10 | 11½ | Ditto. |
| Pangasi | ... | ... | 9¾ | 13½ | 21st „ |
| Taras | ... | ... | 9 | 9 | Ditto. |

The ryots have now in stock or in the fields a quantity of kaon sufficient to carry on most of them until the aous harvest. There are, however, many villages in which little or no kaon was sown. There is little rice in the district, except that required to meet the current demands of the retail trade.

All the shops are supplied by imports. There is now free water-communication between most of the markets and the eastern districts, whence we draw our supplies. The only exception is at Taras, where rice continues to sell at 9 seers the rupee, although 12 miles off, on the banks of the Phooljore, it is to be had steadily and in any quantity at 13 seers the rupee.

Although there has been so much improvement, it is not to be supposed that the distress is over. The class of women who live by husking rice, generally the widows of cultivators, will not get employment until the aous crop is cut. The ryots who have enough to eat have nothing to spend, and so there is no demand for commodities, and private charity is suspended. Moreover, in some places there has been but little kaon or til to cut, and the ryots of such villages are still living on insufficient food.

One case of starvation is reported, but it has not ended fatally. A woman was found lying senseless in a field near Taras; she was taken to the annochatra and was there found to be starving. It turned out that her husband has refused to maintain her, and that she complained to the zemindar. The zemindar had the parties before him, and directed the husband to give

her food. He, however, again deserted her, and in trying to follow him she became faint for want of food and fell down on the path where she was found.

The rainfall during the fortnight has been 5·61 inches.

About half the kaon crop is still uncut. It is doing remarkably well, and the outturn is most satisfactory. The aous crop looks exceedingly well towards Bogra, though not quite as good as it is in this district; it is more backward in the south-east; on the whole, it promises to be a twelve-anna crop, that is, a fair average yield.

There have been no grain-thefts, but many disputes as to cutting crops, some leading to fights. The number of reported cases of this nature is not so great, but I have found out while in the interior, that the owners of kaon fields find it hard to keep the produce from their hungry neighbours. Where the villagers are on good terms with each other and the pressure is severe, the produce of each field is divided among them as cut.

The condition of the people of Taras is getting worse. There has been no kaon and little aous, in that quarter.

B.—RELIEF WORKS.

The system of paying coolies in grain six days of the week has been introduced during the fortnight, and has had the effect of encouraging the villagers to come to the works when in distress, but it has driven away the professional workmen, who have hitherto been employed at Chunderkona. The total number of coolies now at work is 617. As I have visited most of the works during the fortnight, I may here make some notes as to their progress:—

The road at Chunderkona is a continuation of the high road from Bogra towards Serajunge. It is to be about 21 miles long, of which 16 miles to 17 miles have been completed, as far as earthwork is concerned. The break of from four to five miles is from Pungashi towards Dhangora, where the road crosses the Phooljore. If we could complete it, our communication with Bogra would be excellent. Even in its present state it does much good. The kaon crop has been excellent along this route, and so local laborers are few. The coolies from other parts of the district left during the fortnight, and now only 30 are employed. I am instructing the superintendent to go to Taras and bring a detachment of the coolies working there, if possible.

The road from Chunderkona towards the Ranee's land has come to very little. As workmen did not come in sufficient numbers to do it and the Serajunge-Bogra road, it has been neglected after the first mile and is now deserted.

The Hurnial track is meant to be a mere fair-weather cartway, as distinguished from the unbanked road at Chunderkona. It is designed to facilitate communication along the principal route from Pubna and the Ganges to Bogra, as far as the route passes through this sub-division. There were 232 workmen employed on it on the 20th June.

Recent rains have almost stopped the works. In the same neighbourhood 56 men are employed in cutting jungle on Government khas mehals.

The Gaita tract is to connect the bheel country south of Taras towards the Chalun bheel, with the Phooljore river at Ullapara. 80 coolies are employed on it.

68 coolies are working at two small tracts at Shahzadpore and Jhaul; the former on the Pubna-Serajunge, the latter on the Serajunge-Ullapara routes. About 40 are working at a similar tract, connecting Kacjuri with the Oorasagar river. 143 coolies are working at opening up an old khall at the deserted Challa factory: distress is severely felt there. Some 30 men are working at a khall at Porjana, and nine at Dussika. The latter would be the most useful work of any, but distress having become less there, on account of the good kaon crop, workmen do not come to it.

All these minor works are calculated to improve the condition of the neighbourhood in which they are carried on.

C.—TRANSPORT OF FOOD.

The storage of 1,700 maunds of rice at Taras, was completed during the fortnight. We will have to send more rice to that neighbourhood in July, when the bheel communications open out. The rice is primarily intended for the coolies on the Hurnial track, and the khas mehal laborers; charitable relief being given from Raigunge. But later on, when the scanty aous of the neighbourhood is exhausted, we may have to make it a centre. Before that time distress elsewhere will have ceased.

D.—STORAGE OF GRAIN.

During the fortnight no rice has been received. Our storage accommodation is everywhere sufficient.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

During the fortnight 831-10-8 maunds of rice have been lent to private parties: 212 maunds 20 seers to khas ryots, and 618 maunds 10 seers to zemindars desirous of assisting ryots. This was done first at the rate of Rs. 3-5-4 a maund (12 seers the rupee), latterly at the rate of Rs. 3 for Burmah, and Rs. 3-8 for cleaned rice. If the new system of giving 18 seers Burmah rice is introduced quickly, very large loans could be made, but at present there is no great necessity for such a measure.

F.—CHARITABLE RELIEF.

The only form of charitable relief given generally over the whole sub-division is supplied at annachatras, where cooked grain to persons in need of a meal and unable to work is given on the following scale :—

Morning Meal.

4. Chittacks of rice.
2. Ditto of dāl or potatoes, or kaon, or any cheap food.

Evening Meal.

2. Chittacks of rice.
2. Ditto of dāl or potatoes or kaon.
1. Ditto of salt.
- $\frac{1}{16}$. Ditto of long pepper.
- $\frac{1}{16}$. Ditto of oil.

Until the middle of May there were but five annachatras, but the distress then becoming severe, they were increased to 14. I have now again reduced them to eight, namely one at each police station and outpost, except at Soobgacha in the north, where there has been a fine kaon crop; and one at each of the following places, Ichla, Chunderkona, and Koymy. The annachatras are managed by committees. I have returns showing the number relieved only from 10 of the 14; and these show 687 persons relieved on the last day, or 69 to each annachatra. If the four others have the same average, the total number in receipt of this form of relief will be 957. At the relief stations of Ullapara and Raigunge most of those fed are ticket-holders who have to wait half a day for their supply of rice, the work of weighing being great. The only other places where large numbers come to the annachatras are Belkuchi, Nraijuri. At Beleoochee, a quarter of the expenses is contributed by a zemindar who manages the institution, and who I fear is a little lax. At Kaijuri there is a good deal of temporary distress, there having been little kaon, boro, or till in that neighbourhood, and even the aous being backward.

In Raigunge and Ullapara thanas, the system of house-to-house visitation, and the issue of the monthly doles to all found in distress and unable to do road-work has been adopted. Where the destitutes can work on cotton or jute, such work is exacted. During the past fortnight I have allowed the superintendents to give less time to inspection and more to accounts, and have personally helped them to check the issue of tickets by rejecting all persons sent in by the assistants who seemed able to work. In this way the number of tickets, which was previously increasing most rapidly, has been somewhat reduced. On the 17th June the number outstanding at Raigunge were :—

| | | Monthly allowance in rice according to scale. | |
|--|--------------------------|---|------|
| | | Mds. | Srs. |
| Gratuitous | { Full .. | 724 | 9 |
| | { Half (for children) .. | 3,701 | 24 |
| Total | | 4,425 | 34 |
| Industrial (for cotton, and jute work) | | 1,723 | 23 |
| Grand total | | 6,148 | 57 |

The average consumption of rice issued on these tickets from 1st to 20th June was 51-12 maunds, so that it appears that some of the ticket-holders have ceased to attend.

The latest return from Ullapara, on this point, is only up to the 10th June.

It is as follows :—

| | | |
|--------------------|---------------|-------|
| Gratuitous tickets | { Adults .. | 844 |
| | { Children .. | 3,470 |
| Total | | 4,314 |
| Cotton .. | .. | 1,602 |
| Jute .. | .. | 1,033 |
| Thread.. | .. | 1 |
| Grand total | | 6,950 |

Since the 9th I have been twice to each station, and have myself cancelled many tickets, and I know that the superintendent is engaged in the same work. On the other hand, fresh tickets continue to be issued, particularly to distressed weavers and persons, other than those dependent on cultivators. These classes have been benefited by the fall in prices, but have no share in the relief derived from the actual reaping of the crops. In one weaving village tickets have been freely issued during the fortnight, though it is in Shazadpore thana, as the inhabitants were in a very reduced state, and were reported to be living on jute leaves and other such innutritious food.

The total number of persons receiving charitable relief in any form may be put down in round numbers at 1,400. In my report No. 87, dated 10th February 1874, I estimated for 10,000. It is certainly large when compared with the small number of coolies on road-works. But it so happens that the distress has been most severely felt in a part of the district

where labor for hire was almost unknown, and the people felt an antipathy to undertake it. Had they sought employment they could always have had it from private persons. Of course, they would rather have worked in any form than submit to starvation, but I found that they would not undertake it in order to maintain the beggars, the widows and children not immediately connected with them, the sick and infirm, and in fact the large pauper or semi-pauper population which is to be found, on enquiry, in most villages. The able-bodied ryots have derived no help from charitable relief. They have in great measure been supported by the money and rice advanced on loan to zemindars. It might have been supposed that the landlords would neglect them, on account of the rent disputes which have prevailed in the sub-division. But, in fact, they have been rather more free in taking and giving advances than in other districts, and nowhere more so than in the disturbed neighbourhoods.

(G.)—FINANCIAL RESULTS.

Purchase of grain—

| | Rs. | A. | P. |
|---|--------|----|----|
| Paid for 2,620 maunds of grain, ordered from Mr. Alexander, before Government grain arrived ... | 11,091 | 4 | 9 |

Conveyance charge—

| | | | |
|---|-----|----|---|
| Paid for conveying 565-39-10 maunds of rice from Serajgunge to the annachatras and road works ... | 170 | 4 | 6 |
| Paid for conveying one set of scales to Bogra ... | 6 | 7 | 0 |
| Erecting a mauchan in Serajgunge grain golah ... | 87 | 12 | 0 |

Charitable Relief.

| | Rs. | A. | P. |
|---|-----|----|----|
| Paid to annachatras for purchase of dāl, fire-wood, and for contingencies ... | 248 | 3 | 6 |
| Paid to relief superintendent of Raigunge relief station for purchase of dāl, jute, cotton, &c. ... | 500 | 0 | 0 |
| Cotton purchased at Serajgunge for Raigunge relief station ... | 185 | 0 | 0 |
| Paid to superintendent of Ullapara relief station ... | 496 | 6 | 6 |

Roads—

| | | | |
|--|--------|----|---|

| Paid on Executive Engineer's cheque on account of Chunderkona road ... | 455 | 10 | 3 |
| Paid for coolie labor, &c., on petty roads ... | 225 | 0 | 0 |
| Total ... | 13,522 | 6 | 7 |

REMARKS BY MAGISTRATE.

THE improvement in Serajgunge still continues, except at Taras. This is to be accounted for by the fact that river communication is still closed, and land communication not easily available; but from our experience as regards other places, we may confidently expect that once the river is open matters will immediately improve. Mr. Nolan wishes to import Government rice there; I can scarcely think this will be necessary, and as I am reluctant to take any measure that has a tendency to interfere with private trade, Mr. Nolan has been called on for a further report. The case of starvation alluded to requires little comment; the same may have occurred in any year. It is satisfactory that there has been a decrease in the number receiving gratuitous relief.

W. V. G. TAYLER,
Magistrate.

The 30th June 1874.

No. 144—S.R., dated Burdwan, the 1st July 1874.

From—C. T. BUCKLAND, Esq., Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

1. I HAVE the honor to submit in original the District Fortnightly Narratives which have been received up to date, for the fortnight ending 29th June.

2. *Hooghly.*—I have little to add to the Collector's report. There is a tendency to a fall in the price of rice. There has been a sufficiency of rain, and the prospects of the season appear good.

3. The total daily number of laborers employed on relief works of every sort is given at 4,026 against 4,539 of the previous fortnight.

4. The exports of private rice are returned at 5,918 maunds. The amount of Government grain imported during the fortnight was 2,014 maunds. The Collector has applied for a further supply of 3,000 maunds, which has not yet reached him, but is much needed.

5. The return of persons receiving charitable relief during the fortnight has been duly classified under headings B., C., D., and shews a daily average of 3,923 against 4,043 of the preceding fortnight.

6. *Beerbhoom.*—The Collector submits a generally favorable account of the state of the district. There has been, and there is, considerable pressure and distress, but it has not been exaggerated, and the efforts which have been made to relieve it, have been judicious and sufficient. The first impressions of Mr. O. Donnell on his joining the district as Relief Officer, are described by him with much vivacity, and will be read with interest.

7. The average daily number of persons employed on public relief works, as shewn in Statement C., is 13,146 against 10,913 of the previous fortnight. But the actual number employed on the last day of the fortnight is shewn as 9,352. This is, however, apparently due to the omission of the laborers on the Kamra to Aundee road.

8. The exports of rice from the district were 5,514 maunds against 8,672½ maunds in the previous fortnight. The Collector is in much want of the further supplies of Government grain for which he has indented, and which had not arrived when he wrote his report; but I understand from a private note from the Relief Officer to my special Assistant that four or five thousand maunds reached Bhulpore yesterday (30th June.)

9. In Statement No. 4, the total daily number of persons receiving charitable relief is given as 18,014, out of which 13,088 are in receipt of purely gratuitous relief. The number shewn in the return of the previous fortnight was only 10,913. In the classified Statement under headings B., C., D., the total number of persons receiving relief on 20th June was 17,855. This shews a large increase of pressure on charitable relief, and I have applied for further Government agency to superintend it under the Relief Officer.

10. *Bankoora.*—The Collector gives a good account of the state and prospect of the crops, but he adds that distress has increased and is increasing, especially amongst the higher classes. "Relief, however, (he observes,) is within reach of all, and our difficulties lie not so much in giving, as in refusing to give."

11. The statement of labor shews a daily average of 4,866 persons against 3,823 during the previous fortnight. This is attributed to the completion of tank-works for private parties.

12. The Collector's report is not so clear as could be wished, on the subject of Government grain. From the statement appended to his report, it appears that he had received 3,912 maunds, of which 1,947 maunds had been gratuitously distributed, and 1,740 maunds had been advanced to ryots. But in his 11th paragraph he states that out of a total amount of Rs. 18,756 of advances to private parties, he had been able to supply only 25 per cent. of grain, and 20 per cent. in cash, on account of the urgency of the case. His fortnightly estimate of expenditure is set down at 4,000 maunds, which is usually sent to Rancegunge, and thence forwarded by cart. I have asked for information as to the consignment which he is expecting from the Collector of Balasore, but I do not see that a sufficient case has been made out for the establishment of a Telegraph Office at Bankoora, although the wires run through the station.

13. The classified statement of charitable relief shews a large increase of numbers against the previous fortnight.

| | | | Previous fortnight. | Present fortnight |
|-------|----|-----|---------------------|-------------------|
| Class | B. | ... | 9,972 | 17,670 |
| " | C. | ... | 3,609 | 4,683 |
| " | D. | ... | 865 | 2,282 |
| Total | | | 14,446 | 28,635 |

The increase is so large, and the pressure on the Collector is becoming so great, as he has no European Assistant or subordinate for relief purposes, that I would recommend that a special Relief Officer should be deputed to this district, if one can be spared.

14. *Burdwan.*—The report of the Collector is more than usually interesting. I am not able to ascertain from what remarks of mine the Collector infers that I disapproved of his practice of giving an abstract of the sub-divisional reports, but provided that the information required by Government is submitted, it is immaterial to me in what particular form it is given by the Collector.

15. The rainfall has been very abundant, and the prospects of the crops are good. It is to be noted that the seed grain sent to the Cutwa sub-division, was not wanted there.

16. The Collector has sent me a copy of a telegram addressed direct to him and other Collectors, by Government on the 27th ultimo, absolutely prohibiting cash payments to relief laborers, and holding Relief Officers personally responsible for cash expenditure on works or advances until explanation is given. The Collector has offered a full explanation shewing, in my opinion, sufficient reasons, why payments in grain had not been generally adopted in the district, and why they could not be adopted on certain roads, for which contracts had been given to public contractors. It will be seen that he reports that he has ordered all existing contracts to be set aside, with the exception of those on which funds not belonging to Government are being spent, or works in the Embankment Department. He does not state what is the amount of contracts thus cancelled; and the chief ground for hoping that the loss on this account may not be heavy, is to be found in the statement that but little work now remains

to be done. The application which the Collector is submitting for overseers, sirkars, and store-keepers to carry out the system of payments in grain, will be submitted as soon as received, for the orders of Government.

17. The receipt of Government grain amounted during the fortnight to 13,736 maunds, of which 9,366 maunds had been consumed in advances, and in feeding paupers. The Statement No. 2 shows that 20,725 maunds had reached the district, of which 5,632 maunds had been gratuitously distributed, 5,770 maunds had been advanced to ryots, and 745 maunds had been used for payments in kind to laborers. The Statement No. 4 shows that 308 applications for advances had been granted, but the "Remarks" in that statement leave it doubtful, if all the advances were made in grain. I must call attention to paragraph 6 of the Collector's report, which forcibly represents the existing feeling of the people of Burdwan in their applications for Government advances.

18. The statements of charitable relief are imperfectly drawn up. Statement No. 6 gives the daily number of persons receiving relief at 26,599 against 13,651 in the previous fortnight. I understand that these figures include the 3,279 persons entered in Statement No. 7. But last week, I took a different view of these returns, and calculated the total number relieved daily as 15,382. The Collector will be requested to explain what is really meant, and to submit his returns more clearly and correctly in future. I request attention to the Collector's remarks regarding the food-depôt at Bheddiah, on which I submitted a special report last week, but have not yet received the orders of Government upon it. Even as a sensational relief station, inspected by philanthropic visitors animated with Sydney Smith's principles of vicarious charity, an assembly of only 1,800 candidates for relief could be collected out of the tens of thousands of the population of the district. I greatly regret that any such sensational movements should interfere with the operations of relief which are really needed in the district, and for which ample provision had been made, until a fictitious excitement on the subject was created. It will be seen from paragraph 6 of the Collector's Narrative, that in consequence of the telegram of 27th June, he has stopped all charitable relief in cash, for advances of different sorts, and even for expenditure on nutritious diet and milk for fever patients. I have submitted a special report to the Lieutenant-Governor on tour shewing that it is absolutely necessary that nutritious diet and milk should be supplied as usual to fever convalescents, on special medical authority, and that cash expenditure must continue for this purpose. To all other recipients of gratuitous charitable relief, or relief for light labor, the uncooked Government rice will be served out in future.

No. 190, dated Hooghly, the 29th June 1874.

From—F. H. PELLEW, Esq., Officiating Collector of Hooghly,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending Saturday, the 27th June 1874.

A.—STATE OF THE COUNTRY.

2. There is no scarcity of food-grains in the bazars of the district.
3. Kind and price of grain selling at certain specified marts:—

| 1 | 2 | 3 | 4 | 5 | 6 | | | | | |
|-----------------------------|--|---------------|-----------------|---------------|-----------------|---------------|-----------------|---------------|-----------------|---------------|
| Names of principal marts. | QUANTITY PER RUPEE BY THE SEER OF 80 TOLAHS. | | | | | | | | | |
| | Wheat. | | Barley. | | Rice, best. | | Rice, common. | | Gram. | |

| Chunditalah ... | ... | ... | ... | ... | ... | 10, 0 | 10 " 12 | 12 " 0 | 10½, 0 | 12 " 0 |
| Hydabatty ... | 13 | 13 | 17½ | 17½ | 8 to 0 | 8 " 0 | 12½, 0 | 13 " 0 | 13 " 0 | 13 " 0 |
| Bhudressur ... | 12½ | 12 | 16½ | 15 | ... | ... | 11½, 13 | 11½, 13 | 13½, 0 | 13 " 0 |

4. On the whole there appears to be a tendency to a fall in price.

5. Information as to the kind and price of rice in the hands of zemindars, traders, &c.—Same as previously reported.

6. Rainfall, if any.—It rained during the fortnight in almost all the thanas of the district.

At Hooghly the fall was as follows:—

| | | | | | |
|-----------|-----|-----|-----|-----|-----|
| 17th June | ... | ... | ... | ... | 01 |
| 19th " | ... | ... | ... | ... | 45 |
| 20th " | ... | ... | ... | ... | 01 |
| 24th " | ... | ... | ... | ... | 87 |
| 25th " | ... | ... | ... | ... | 22 |
| 27th " | ... | ... | ... | ... | 50 |
| 29th " | ... | ... | ... | ... | 69 |
| Total | | | | | 275 |

At Serampore the fall was greater, being 3.75.

7. *Prospect of crops.*—The early rice is now growing in the high lands, and though planted rather late, promises a fair crop. The seedlings of the late rice have also been got in and are growing in the nursery beds; but the low ground is not yet sufficiently inundated to admit of the seedlings being planted out, nor are they generally sufficiently advanced yet to stand transplantation. Probably last night's fall of rain will enable the ryots to commence the transplantation. The rainy season appears to have set in on the 24th, when the barometer fell, and a damp south wind brought heavy clouds and continuous rain. If this weather continue, the rice crop will be unusually good.

8. *Condition of the people.*—I have to note no change in the condition of the people. The cultivators are busy with their labours; crime is light.

9. *Grain-thefts.*—Two cases occurred, one in the town of Chinsurah and another in the town of Hooghly; there was nothing remarkable about them.

10. *Condition of special tracts.*—There is no tract here which can as yet be said to be in a specially distressed condition.

B.—RELIEF WORKS.

| Name of road. | Number of coolies. | Supply of food. | Condition of laborers. | Mode of payment and rate of wages. | Arrangement for tools. | REMARKS. |
|---------------------------------|---------------------------|--|------------------------|--|---|---|
| <i>Hooghly Sub-division.</i> | | | | | | |
| Dhunyakhally road, metalling... | 310 Including carters. | Coolies purchase their own food from the nearest market. | Fair | Generally all works are done by task labor at fixed rates. The coolies get 2 annas daily as khorakee, and the carters get 5 annas; accounts are settled weekly, or as soon as the contractors are able to do so. | Contractors supply | Nearly 66 men belong to the Pandooah thana and 30 are local. The rest are from Burdwan and Beerbhoom. |
| Sharunge and Tribany road | 8 | Ditto | Do. | At annas 3-3 per day. | Ditto | All local coolies. |
| Tribany to Gooptiparah... | 15 | To be had from the nearest market. | Do. | Paid at annas 3-3 per 100 cubic feet of earth-work, getting annas 2 as khorakee, and accounts settled twice in the week. | Partly by contractors and partly by department. | The coolies are all local. |
| Pandooah to Culna road | 120 | Ditto | Good | Paid at annas 8 per 100 cubic feet of metal broken and stacked, but receiving annas 2 as khorakee, and accounts settled twice within the week. | Ditto | About 45 are local. |
| Moolye to Jamgram | | | | | | Earth-work finished. |
| Koolayparah to Nischindeepore | 25 | To be had from the nearest market. | | At annas 3-3 per 100 cubic feet. | | Under Executive Engineer. All local. |
| Dakechara to Ballaghur | 15 | Ditto | Good | Ditto | | Ditto ditto. |
| Khonyan to Chapta | 79 | Ditto | Do. | Ditto | | Ditto ditto. |
| Chandpore to Bukooliah... | 78 | Ditto | Do. | Ditto | | Ditto ditto. |
| Baksagore to Chandra | 108 | Ditto | Do. | Ditto | | Ditto ditto. |
| Dhunyakhally to Khanpore | 89 | Ditto | Do. | Ditto | | Ditto ditto. |
| Naksa to Digsui | 65 | Ditto | Do. | Ditto | | All local. |
| Tahirpore to Mamoodpore | 18 | Ditto | Do. | Ditto | | Ditto. |
| Pandooah to Cooltee | 76 | Ditto | Do. | Ditto | | Ditto. |
| Chapta to Sikra | 25 | Ditto | Do. | Ditto | | Ditto. |
| Mahanad to Gopikantpore | 132 | Ditto | Do. | Ditto | | Under Baboo Joggodissar Bhutacharjee. |

| Name of road. | Number of coolies. | Supply of food. | Condition of laborers. | Mode of payment and rate of wages. | Arrangement for tools. | REMARKS. |
|---|----------------------------|---|---|---|---|---|
| Bhastora to Goorooop | 32 | To be had from the nearest market. | Good ... | At annas 3-3 per 100 cubic feet. | | Under Baboo Joggesaur Singh. |
| Mugrah to Nasarye | 50 | Ditto ... | Do. ... | Ditto ... | | Under Joint-Magistrate. |
| Bhastora to Dhunyakhally | 13 | Ditto ... | Do. ... | Ditto ... | | Under Baboo Joggesaur Singh. |
| Dwarhasinoe to Kamryo | 18 | Ditto ... | Do. ... | Ditto ... | | Under Baboo Joykissen Mookerjee. |
| Total ... | 1,278 | | | | | |
| <i>Serampore Sub-division.</i> | | | | | | |
| Branch Grand Trunk Road ... | 12 | Coolies supply their own food from the nearest bazar. | Fair ... | Rs. 6-8 per month; receiving Rs. 1 khorakoe every week. | Partly by contractors and the rest by department. | All imported coolies; no local coolies can be had here for road work. |
| Sheakhalla road | 102 | Ditto ... | Do. ... | Coolies get 3 annas 3 pie per day; jhama-breaking at 10 annas per hundred cubic feet. | Contractors supply tools. | 40 local. |
| Bordyabatty feeder-road ... | 80 Including car- ters. | Ditto ... | Do. ... | Ditto ... | Partly by contractors and the rest by department. | 20 are local. |
| Old Benares road | 88 Including car- ters. | Ditto ... | Fair, i.e., not so well off as in latter years. | Ditto ... | Ditto ... | About 30 men are local. |
| Bhola to Nalicoel and junction of old Benares road. | 47 | Coolies supply their own food from the nearest bazar. | Fair ... | At as. 3-6 daily ... | Contractors supply tools. | Out of this about half local and half imported. |
| Chundranuggore and Bhola road. | 10 | Ditto ... | Do. ... | Ditto ... | Partly by contractors and the rest by department. | These are local coolies employed in rectifying defects of slope cuttings. |
| Tarakoshur road | 10 | Ditto ... | Do. ... | Ditto ... | Contractor ... | Ditto Ditto. |
| Connuggore and Jonye road ... | 12 | Ditto ... | Good .. | Ditto ... | Ditto ... | Coolies are scarce; gone to cultivation. |
| Bora to Nussecpur | 26 | Ditto ... | Do. ... | Ditto ... | Ditto ... | All local coolies work under Baboo Unoorup Chandra Mookerjee. |
| Jonye to Bora | 63 | Coolies supply from the nearest bazar. | Do. ... | Ditto ... | Contractors supply. | All local coolies work under Baboo Aunoorup Chandra Mookerjee. |
| Jonye to Barnaset | 18 | Ditto ... | Do. ... | Ditto ... | Ditto ... | All local coolies work under Baboo Chandra Kant Mookerjee. |
| Harida to Baksa | 55 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Ditto ditto. |
| Dorghango to Dargurampore ... | 24 | Ditto ... | Do. ... | Ditto ... | Ditto ... | All local coolies work under Baboo Sarat Chandra Banerjee. |
| Bhudrepore to Nussibpore ... | 31 | Ditto ... | Do. ... | Ditto ... | Ditto ... | Under Baboo Rajkristo Banerjee. |
| Serampore ... | 578 | | | | | |
| Hooghly ... | 1,276 | | | | | |
| Total ... | 1,854 | | | | | |

12. The Collector of Howrah will give the Howrah works separately.

13. The following laborers were employed daily on tanks and works in the municipalities, towns, and unions:—

| | Total. |
|------------------------------|--------|
| Hooghly and Chinsurah | 468 |
| Serampore | 169 |
| Kotrung | 25 |
| Ballagurh | 75 |
| Total ... | 737 |

14. Under the Executive Engineer, Northern Drainage and Embankment Division, the following work is in progress :—

| Thana. | Name of work. | Daily average No. of coolies during the fortnight. | Condition. |
|---------------|-----------------------------------|--|---|
| Bydabatty ... | Kana nuddee and Surrosutty canal. | 158 | Good; no local laborers. |
| | Ordinary embankment repairs. | About 39 | Good, local; the laborers occasionally leave for cultivation. |

15. The returns of work on 32 tanks which are being dug or improved from tuccavee advances have been received. These show a daily average number of 1,238 coolies employed, of whom 391 are local. Almost all the tanks are nearly complete; dressing and turfing alone remain to be done at most. No return of coolies employed in the Ghca nuddee has been received.

16. I give here a comparative statement of the number of coolies employed on relief works, as shown in the last and present report :—

| | | Last report. | Present report. |
|---|----------------------------|--------------|-----------------|
| Roads, &c., under the chairman of road cess. | Sudder sub-division ... | 1,202 | 1,276 |
| | Serampore sub-division ... | 510 | 578 |
| Total ... | | 1,742 | 1,854 |
| Municipalities, towns, and unions. | Hooghly and Chinsurah ... | 570 | 468 |
| | Serampore ... | 203 | 169 |
| | Towns and unions ... | 528 | 100 |
| Under the Executive Engineer, Northern Drainage and Embankment Division ... | | 135 | 197 |
| Employed on works executed from tuccavee advance ... | | 1,361 | 1,238 |
| Grand Total ... | | 4,539 | 4,026 |

C.—TRANSPORT OF FOOD.

17. The following is an abstract of the Railway traffic return for the fortnight ending 20th June 1874 :—

Up—Outward.

| STATION. | UNDER 150 MILES. | | OVER 150 MILES. | | OVER 300 MILES. | TOTAL. | |

| | | | 2,773 20 | Sooltangacha | | 98 0 0 | 98 0 0 | |
| | | | | Mahanad | 401 0 0 | | 401 0 0 | |
| Serampore | 833 21 | 514 | 1,347 21 | Dwarbasinee | 100 0 0 | | 100 0 0 | |
| | | | | Boichee | 27 0 0 | 100 0 0 | 127 0 0 | |
| | | | | Haral | 15 0 0 | 100 0 0 | 115 0 0 | |
| | | | | Bhastarah | 12 0 0 | 100 0 0 | 112 0 0 | |
| | | | | Goorup | | 160 0 0 | 160 0 0 | |
| | | | | Makhalpore | | 70 0 0 | 70 0 0 | |
| | | | | Basce | | 100 0 0 | 100 0 0 | |
| | | | | Dhunyahally | | 100 0 0 | 100 0 0 | |
| | | | | Bhandarhatty | | 100 0 0 | 100 0 0 | |
| | | | | Sahabazar | | 96 0 0 | 96 0 0 | |
| | | | | Muggrah | | 10 0 0 | 10 0 0 | |
| | | | | Bansberya | 29 10 0 | 30 0 0 | 59 10 0 | |
| | | | | Executive - Engineer, Hooghly. | | 170 0 0 | 170 0 0 | |
| | | | | Police for Sorais ... | 16 20 0 | | 16 20 0 | |
| | | | | Municipality | 144 0 0 | 113 0 0 | 250 0 0 | |
| Total | | | 4,121 1 | Total | 1,273 20 0 | 1,500 0 0 | 2,773 20 0 | None. |
| | | | | Seerampore Sub-division. (Mofussil details not yet given.) | 370 12 8 | 476 27 8 | 847 0 0 | 500 21 |

19. From this it is clear that all the rice which has been sent to Hooghly has been without any delay sent to different parts of the district. The Serampore sub-divisional officer has been ordered to despatch what is at Serampore at once to the mofussil.

20. On the 18th June last I applied for 3,000 maunds more grain, and I expected to have received the amount on the 23rd or 24th at latest, and I sent out all the rice with me as fast as possible to the interior, except 170 maunds, which I have made over to the Executive Engineer for relief works, but the amount is not enough for fully supplying all store-houses arranged for, and I consequently have not been able to stop the issue of pice at those places for which I had no rice. I have to request that grain may be sent me at once, to enable me to comply with the Government orders to stop money relief.

21. As the orders of Government are very stringent, I beg here further to explain that from the moment the Government orders for sending rice to Hooghly, viz. on 28th May were received, I have been incessantly occupied in arranging proper accommodation for it, and for its safe transport in showery weather. In the prospect of the approach of the rainy season it was necessary to secure good pucca houses which are not easy to find; and as many roads are impassable in the rains, it was necessary to get considerable quantities out to the store-houses before the rainy season. Hence some of the nearer centres are still unsupplied with rice, and I am unable to supply them till Mr. Toynbee sends me more.

Statement showing the Storage and Consumption of Government Grain in the District of Hooghly for the fortnight ending 27th June 1874.

Name of circle—Shewn in the statement under heading D.

Date for which figures are given—For the fortnight ending 27th June 1874.

| | | | Mds. | S. | C. |
|--|-----|-----|-------|----|----|
| Total allotment of Government grain | ... | ... | 4,121 | 0 | 0 |
| Total quantity of grain stored, &c. | ... | ... | 4,121 | 0 | 0 |
| Total quantity of grain consumed up to date— | | | | | |
| By sale to the public or laborers | ... | ... | Nil. | | |
| By gratuitous distribution in any shape | ... | ... | 335 | 5 | 2 |
| By advance to ryots | ... | ... | None. | | |
| By payment in kind to laborers | ... | ... | 46 | 8 | 8 |
| Total | ... | ... | 381 | 13 | 10 |
| Estimated grain receipt of the ensuing fortnight | ... | ... | 3,000 | 0 | 0* |
| Estimated grain expenditure of the ensuing fortnight | ... | ... | 3,000 | 0 | 0 |

Note.—Only five returns from the mofussil of expenditure of Government grain have as yet been received; the expenditure is considerably above what is shewn. The estimate in the last column is an estimate of the quantity I wish at once to store in the mofussil.

E.—ADVANCES TO PRIVATE PARTIES.

| | | | Ra. |
|--|-----|-----|--------|
| 22. Advances for grain as already reported | ... | ... | 18,000 |
| Advance to municipalities | ... | ... | Nil. |
| Advance under the Tuccavee Act up to date of last narrative... | ... | ... | 37,561 |
| During the fortnight | ... | ... | Nil. |

23. Some of the tanks, for the excavation of which advances under the Land Improvement Act have been granted, are reported as complete, and inquiries are being conducted by the Sub-Deputy Collector.

F.—CHARITABLE RELIEF.

24. Number of committees as yet appointed :—

| | | | | |
|--------------------------|-----|-----|-----|----|
| District committee | ... | ... | ... | 1 |
| Sub-divisional committee | ... | ... | ... | 1 |
| Sub-committees | ... | ... | ... | 62 |
| | | | | 64 |

This is less than the number shewn in previous reports, as I have been obliged to supersede many of the old committees by bodies exercising supervision over an increased area, in consequence of the setting in of the rains and the orders to give relief in grain. Besides there are seven serais for the use of travellers.

25. Daily average number of persons relieved during the fortnight under the three heads is shewn below :—

| B. | | | | |
|----------|-----|-----|-------------|-------|
| Men | ... | ... | ... | 583 |
| Women | ... | ... | ... | 1,866 |
| Children | ... | ... | ... | 1,028 |
| | | | Total | 3,477 |
| C. | | | | |
| Men | ... | ... | ... | 31 |
| Women | ... | ... | ... | 80 |
| Children | ... | ... | ... | 14 |
| | | | Total | 125 |
| D. | | | | |
| Men | ... | ... | ... | 49 |
| Women | ... | ... | ... | 175 |
| Children | ... | ... | ... | 97 |
| | | | Total | 321 |
| | | | Grand Total | 3,923 |

* Only.

G.—FINANCIAL RESULT.

26. The disbursements to Executive Engineer and others during the fortnight were as follows :—

| | Rs. |
|--|--------|
| To Executive Engineer | 20,000 |
| To zemindars, road cess committees, &c. .. | 1,600 |
| For tuccavee advances | Nil. |
| Total .. | 21,600 |

| | Rs. | A. | P. |
|--|-------|----|----|
| Local subscription to relief committee realised up to date of last fortnight | 7,150 | 15 | 0 |
| During the fortnight | 95 | 0 | 0 |
| Total .. | 7,245 | 15 | 0 |

| | | | |
|---|-------|---|---|
| Government contribution for the month of May .. | 951 | 0 | 0 |
| Received from the central committee .. | 3,000 | 0 | 0 |

| | | | |
|---|--------|----|---|
| The disbursements are as follows :—Up to date of last narrative | | | |
| During the fortnight | 18,747 | 3 | 3 |
| Total .. | 2,269 | 6 | 9 |
| Total .. | 16,016 | 10 | 0 |

27. The decrease in expenditure on relief over that shown in last report is owing to the substitution in the middle of the fortnight of rice relief for money relief over almost the whole district.

No. 330, dated Soory, the 29th June 1874.

From—R. D. HIME, Esq., Offg. Collector of Beerbhoom,
To—The Commissioner of Revenue, Burdwan Division.

I HAVE the honor to submit my district narrative for the fortnight ending 27th June 1874.

A.—STATE OF THE COUNTRY

There is again a large increase in the number of paupers, but, on the whole, I think the condition of the people is improving; agricultural operations are going on vigorously, the planting out of the seedling rice has commenced; and there is every promise of an early and abundant harvest; cholera and small-pox are gradually disappearing; epidemic fever seems slowly burning itself out; no death from starvation has been reported, and the relief agency continues to work successfully. The lower castes, the Haris, Bhowries, Dhangars, Domes, &c., are able to strengthen their curries with snails, which are now in season, and form an important adjunct to their food-supply. Frogs, crabs, shrimps, and other small fry, which can be caught in almost in every pool, and snakes, which many of the semi-aboriginal inhabitants of this district eat freely, are now abundant; the middle classes, however, to whom such things are unclean and an abomination, seem to feel the pressure unabated. I submit a copy of the report of the special relief officer, Mr. O'Donnell, which is both interesting in itself and as exhibiting the impressions of a fresh observer: there is, of course, some distress among the poorer members of the higher classes, as Mr. O'Donnell observes, but I do not think there is sufficient cause to warrant any general system of loans; sufficient aid can be given in individual cases by the charitable committee if on enquiry they appear to require relief. The Khamars of Itanda who waited on Mr. O'Donnell, met me at that village with a similar tale of misery some two months ago; and on my remarking on their excellent physical condition, said I should have seen them a month previously to judge how they had fallen off! It is satisfactory to learn that, though nothing has been done to relieve them, they are still alive and hearty: on the whole it is, I think, reassuring to find that an officer, whose special mission it is to search out distress has found so little actual privation. Full instructions for the conduct of the weekly food distributions, copy of which is submitted, were issued to the relief agents some days ago: two grain-robberies occurred during the fortnight; rice can be procured in all the principal marts at the prices given in Appendix I.

B.—RELIEF WORKS.

Two new relief works, the metalling of the Bulpore to Bangchatra road, and a road from Mahamed Bazai to Malarpore, Nos. 22 and 23, have been opened during the fortnight to give employment to laborers withdrawn from other works approaching completion; cash payments have been perforce continued during the fortnight, owing to the non-execution of my indent for Government grain, and the consequent deficiency of supply: the number of laborers on district works of all kinds is given in Appendix form C.

C.—TRANSPORT OF GRAIN.

Exportation continues, 5,514 maunds of rice having been exported against 8,672½ maunds of the preceding fortnight; there has been no importation of Government grain during the week although an indent for 2,000 maunds was despatched on 15th instant, and the entire stock in hand has been expended in allotments to charitable centres, and to zemindars under concession G. Transport will now be a matter of extreme difficulty owing to the flooding of the rivers, and the country generally, which, except there where are good roads, has become almost impassable for the few carts the district can turn out, and the general employment of the draught cattle in ploughing. When I get grain for the laborers on the relief roads, I purpose organising some of them into a transport service, which will serve the double purpose of carriage, and of relieving the pressure on the works and engineering staff. The rice shewn as in store in last report is now partly in process of transport to different centres and police stations to which it was allotted; partly actually stored at those destinations; partly actually consumed by paupers and chowkeydars, and partly awaiting removal by the zemindars to whom it has been allotted under concession G. There is not nearly

enough in stock to meet the last mentioned allotments, and, if my order for this week* (5,000 maunds), is not quickly executed, I shall be forced to purchase rice locally for several of the relief centres, whose supplies are now running short.

D.—STORAGE OF GRAIN.

This heading is blank, no supplies having been received during the fortnight.

E.—ADVANCES TO PRIVATE PARTIES.

Are shewn in Appendix tables II and III.

F.—CHARITABLE RELIEF.

Vide appendix return IV and V.

G.—FINANCIAL RESULTS.

Up to date Rs. 61,615 have been drawn from the treasury on certificates granted under Act XXVI of 1871; Rs. 79,635 have been placed to credit of the executive engineer for relief works; Rs. 7,000, have been advanced to Messrs Farquharson and Campbell of Ilambazar; Rs. 2,504.2 to Mr. Jones of Gonotia; Rs. 750 to Baboo Kishore Mohan Roy of Naguri; and Rs. 105 to the Mundals of Kulliar, for the construction of roads chargeable to relief. Rs. 1,200 have been disbursed for the Rajah's tank, which is now nearly completed, Rs. 4979.3 placed to credit of the charitable fund on account of the Government subscription, and Rs. 591.8.7 drawn in advance to meet charitable expenditure.

From—C. J. O'DONNELL, Esq., Special Relief Officer, Beerbhoom,
To—The Magistrate of Beerbhoom.

I HAVE the honor to submit a report on the result of my tour through the parts of the district which may be considered the most important from a scarcity point of view. I have visited all the relief agencies from Ilambazar to Gonotia, and from Bungehatra to Batikar. This tract includes that part of the district which has been visited by the Burdwan fever, and also where the failure of the rice crop was most marked. The actual condition of the people naturally engaged my first attention. With this object, I seized every opportunity to make enquiries on which I could form an opinion. My ordinary procedure was this: when passing through a village, the people, who seemed to be wonderfully well-advised of the movements of the relief sahib, came to me with a petition. I then at once went to the house of the first signer of it, then to that of the fifth or tenth, then back to the second or fourth, and so on. There never seemed to be any preparations to receive me in the house, as I used to find the women working or cooking, and saw other signs of my being unexpected. The conclusion generally at which I arrived was that there was considerable distress; that there are not stores of rice in the houses of the peasantry, even of the higher castes; and that there is ample room for charity and assistance in the form of loans. As to stores of rice, I examined altogether, in different houses, a couple of thousand large earthen kolshis in which rice is ordinarily stored, and did not find a grain anywhere. Another point that struck me, was the alacrity with which even Brahmins showed me through their houses, some of which were packed, regularly "up-stairs and down-stairs and in my lady's chamber," for I usually saw all the female members of the family. I took this, I think fairly, as a proof that they really were willing to yield some of their caste-prejudices to the present pressure. There was a great absence of ornaments and brass-vessels, which I found much more abundant in the houses of some of the laboring classes than in those of the humble numbers of the high castes. To be sure, I met with some most ridiculous instances of exaggeration, as at Etanda, where a body of as sturdy Kamars as we could see assured me they were fast dying. At Ramnagar a Brahmin came up to me with a similar assurance that he was not long for this world, if the State did not feed him: I went straight for his house, and was nearly regretting my hasty curiosity, by being almost run over by half-a-dozen of his cows, which were at the instant coming out, perhaps driven out of his enclosure. However,

these occasional cases of folly, or worse, did not prevent me from being convinced that the scarcity falls heavily on two classes, viz., the lowest of the low castes, Haris, Domes, and Moomies, and on the poorer of the high castes. This pressure is to be met, in the former case, by charitable relief and relief works; in the latter by advances of grain, which I believe in nine instances out of ten would be recoverable.

As to the relief now being given, I can say that, so far as road-work goes, judging from the appearance of the laborers, men, women, and children seem sufficiently nourished on all the roads where I have come across them. The relief-houses for charitable distribution are in most cases working well, at least as far as the choosing of deserving objects goes. I was pleased to find that at the outlying villages of Etanda, Ramnagar, Ekshoodhara, and others, the fever-sick and real poor were in receipt of relief. I was present at the selecting of deserving relief-recipients at Ilambazar, Gonotia, Labpore, and Bungehatra, and thought the selections made by the agents in charge were judicious. The great fault is crowding and crushing at the time of distribution. I have, therefore, in every agency pointed out to the agent how the crowd could be best dealt with, by means of bamboo barriers, behind which he could sit and relieve the paupers in small batches. The system would here be much improved if the tickets were made of substantial paper, if possible card-board. The present slips of Bengal paper rarely last a week without being torn or soiled so as to render them illegible. I have to mention the relief agent of Bungehatra as having his rice most carefully stored, and his books and papers in the best order.

Instructions to Relief Agent, Kusba.

(1.) THE name, father's name, and residence of each pauper is to be entered in the register with serial number, and a ticket with corresponding name, number, and residence given to the pauper.

(2.) A strong bamboo enclosure is to be made with one gate for entrance, and another for egress.

(3.) On distribution day all the ticket-holders are to be served before the new-comers, the women and children being served first, the men afterwards: after all the ticket-holders are served, male and female, the new comers are to be attended to in the same order,—first the women and children, then the men.

(4.) Six ticket-holders only are to be admitted to the enclosure at one time, being admitted as they come without reference to their serial numbers in the register. As each ticket-holder receives the allowance, a mark is to be put after the corresponding name and number in the register, and the ticket returned to the pauper, who will pass out by the exit gate at once. When the first six have been disposed of, a second batch of six is to be admitted, and so on. All the ticket-holders having been disposed of, the new-comers will be disposed of in the same way.

(5.) The police are directed to employ the chowkeedars receiving weekly allowance from them in keeping order, and rendering any other assistance required by the relief agent.

(6.) Each adult is to receive four seers, and each child two seers per week.

Abstract Statement of Men, Women, and Children, employed on Public Works in the District of Beerbhoom during the 14 days ending Saturday, the 20th June 1874.

| Serial No. of Work. | NAME OF WORK. | Total number of persons employed during the 14 days. | | | Mean daily number of persons employed during the 14 days. | | | Number of persons employed on the last of the 14 days. | | | How long work is likely to give employment. | REMARKS. | | | |
|-----------------------|-------------------------------------|--|--------|-----------|---|-------|--------|--|--------|-------|---|----------|--------|------------|--|
| | | Men. | Women. | Children. | Total. | Men. | Women. | Children. | Total. | Men. | | | Women. | Children. | Total. |
| 1 | Scoory to Cynthia | 409 | 4 | | 413 | 29 | | | 29 | 37 | | | 37 | 1 month. | All doing full work and receiving full wages except some 700 day-laborers on the Doobraypore-Iambazar road, paid at the rate of 1 anna for each adult and 1 anna for each child. The work-people are of the ordinary laboring classes, including under this term cultivators who work on their own fields, but not generally on public works; payment has been made altogether in cash during the fortnight, the indent for Government rice not having been complied with. |

APPENDIX RETURN II.

Statement showing the Storage and Consumption of Government Grain in the District of Beerbhoom, for the fortnight ending 27th June 1874.

- 1.—Name of circle, Beerbhoom.
- 2.—Date for which figures are given, from 18th to 27th instant.
- 3.—Total allotment of Government grain, 1,000 maunds per week.
- 4.—Total quantity of grain stored exclusive of grain transferred to other districts, none during the fortnight.
Total quantity of grain consumed up to date.
- 5.—By sale to the public or to laborers, none.
- 6.—By gratuitous distribution in any shape, 1,550 maunds disposed of to charitable committee.
- 7.—By advances to ryots, none.
- 8.—By allotments to zemindars, 2,770 maunds.
- 9.—By payments in kind to laborers, none.
- 10.—Total, 4,320 maunds.
- 11.—Estimated grain receipts of the ensuing fortnight, 10,000 maunds.
- 12.—Estimated grain expenditure of the ensuing fortnight, 10,000 maunds in charity, advances to proprietors under concession G, subsistence allowances of chowkedars under special orders of Government, and payment of laborers on relief works.

APPENDIX TABLE III.

Statement shewing the number of applications under the Land Improvement Act XXVI of 1871 up to 27th June 1874.

| | | | | | Amount. |
|--------------------------------------|-----|-----|-----|-----|----------|
| | | | | | Rs. |
| Number of applications registered... | ... | 683 | ... | ... | 2,82,823 |
| Ditto ditto disposed of | ... | 683 | ... | ... | 2,82,823 |
| Ditto ditto granted | ... | 232 | ... | ... | 72,830 |
| Ditto ditto refused | ... | 451 | ... | ... | 2,09,993 |
| Ditto ditto pending | ... | ... | ... | ... | ... |
| Ditto of certificates drawn | ... | 181 | ... | ... | 61,615 |

APPENDIX, STATEMENT IV.

Statement shewing the progress of charitable relief in the District of Beerbhoom, for the fortnight ending 27th June 1874.

| | | |
|--|-----|--------|
| Number of committees and sub-committees as yet appointed | ... | 10 |
| Number of special relief sub-divisions opened and officered | ... | 20 |
| Number of regular relief circles opened and manned by special officers | ... | 12 |
| Number of relief circles opened and manned by planters, zemindars, and other residents | ... | 11 |
| Number of work-houses, or centres for the distribution of food and gratuitous relief | ... | 21 |
| Number of men, women and children (with total) in receipt of gratuitous relief in any shape through the charitable relief organization daily | ... | 18,014 |

Remarks.—Of the total number of recipients of charitable relief 3,926 are spinners and weavers, and 1,000 are employed in light labor on village-tanks and roads, leaving 13,088 in receipt of purely gratuitous relief.

APPENDIX STATEMENT V.

Statement showing the number of persons relieved up to 20th June 1874, submitted with reference to Government No. 3216—S.R., of the 19th May 1874, para 5.

| | No. | Rs. | A. | P. |
|---|---|--------|----|-----|
| B.—Total number of meals given up to 20th June, i.e., persons fed for one day | 401,302 | | | |
| Total number of persons receiving gratuitous relief in rice at present on the 20th June | 12,929 | | | |
| Total disbursement up to 27th June, including cost of out-door laborers | } By cash for rice ... } By Government rice ... } Miscellaneous „ ... | 13,957 | 11 | 8½ |
| | | 2,675 | 0 | 0 |

| | | 16,908 | 12 | 7 |

| | | | | |
|---|--|--|--|------------------|
| C.—Total number of weavers and spinners supplied with thread and cotton and advance on the 20th June, and laborers employed on light out-door work | | | | 4,926 |
| Total disbursement to 27th June, weavers and spinners only | | | | ... 15,429 3 9 |
| D.—Total number of families under heading D on the 20th June | | | | 12 |
| Total disbursement up to 27th June | | | | ... 34 15 6 |
| Total number of persons in receipt of relief on the 20th June | | | | 17,855 |
| Total disbursement up to 27th June under all heads | | | | ... 32,372 15 10 |

Vide Appendix return V of the fortnight ending 30th May. Of the laborers under heading C, 3,926 are spinners and weavers, and 1,000 out-door laborers engaged on village tanks and roads.

R. D. HIME,
Offg. Collector.

No. 576, dated Bankoora Collectorate, the 29th June 1874.

From—W. R. LARMINIE, Esq., Offg. Collector of Bankoora,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my report for the fortnight ending 29th June 1874.

STATE OF THE COUNTRY.

2. Prices have remained nearly stationary. The prevailing rates are given below. Rice is to be had in sufficient quantities in the chief bazars, but some difficulty is experienced in procuring it in outlying places. This is probably due to the fact that those who have grain are now either advancing it to their ryots, or supporting their laborers therewith.

| | | | Rice, best sort. | Rice, common. | Wheat. | Barley. | Gram. |
|----------------|-----|-----|------------------|---|--------|---------|-------|
| | | | Sr. Ch. | Sr. Ch. | | | |
| Bankoora | ... | ... | 10 10 | $\left\{ \begin{array}{l} 12 \ 8 \\ \text{coarse} \\ 14 \ 6 \end{array} \right\}$ | 12 12 | 21 0 | 13 4 |
| Bishenpore | ... | ... | 11 0 | 13 8 | 12 8 | 24 0 | 13 8 |
| Chatna | ... | ... | 12 8 | 13 0 | 13 8 | 17 8 | 13 8 |
| Ondah | ... | ... | 11 0 | 13 0 | 13 0 | 22 0 | 14 0 |
| Gungajulghatty | ... | ... | 11 0 | 12 0 | 13 0 | 17 0 | 14 0 |
| Burjorah | ... | ... | 11 8 | 12 8 | 15 0 | | 13 8 |

3. There has been heavy rain throughout the district during the last ten days, and even the small tract to which I referred in my last report has fared as well as the rest. Agricultural operations are progressing very favorably; sowings are nearly completed, and the rice seedlings are being planted out in all directions: sowings of other crops, such as Indian-corn, shakartil, cotton, and arhar have commenced, and the Sonthals are sowing their favorite kudû.

4. The giving of grain-advances is the great question just now, but as I am furnishing a special report on the subject, it is unnecessary for me to discuss the matter here. Figures are given below under the proper head.

5. Distress has increased, and is increasing, more especially amongst the middle classes, but relief is within reach of all, and our difficulties lie not so much in giving as in refusing to give.

6. No serious grain-thefts or robberies have been reported; in fact, crime is rather less than usual at this time of the year.

7. No cases of starvation have come to light.

RELIEF WORKS.

8. The accompanying table shows an increase of 1,000 in the number employed on roads since the date of my last report. This is partly due to the gradual completion of tanks by private parties. Our rates are too low to admit of the solution that coolies are unnecessarily attracted to road-work.

TRANSPORT OF FOOD.

9. There is nothing particular to note under this head.

STORAGE OF GOVERNMENT GRAIN.

10. The accompanying statement gives details. I may say that our stock is exhausted; the requirements for giving advances have been so great, that none was available for payment to laborers. I trust the supply will in future be more nearly equal to the demand.

I have already reported, there is great difficulty in procuring carts at this time of the year, and the Joint-Magistrate of Raneegunge, who has done all in his power to help me, reports that the supply of cartage is not more easy in that sub-division. The Collector of Balasore has advised me of the prospective despatch of a consignment of rice, but has not stated the quantity thereof. In this matter of importing grain, a telegraph-station here would be of great advantage; I have already reported to you the facility with which one could be opened.

ADVANCES TO PRIVATE PARTIES.

11. Up to the 26th instant, 319 applications for advances were made; only 44 remained undisposed of. The total amount sanctioned was Rs. 18,756. I have only been able to supply hitherto 25 per cent. of the grain sanctioned to each of the applicants, and the last few days I have been obliged to allow a small sum, 20 per cent., of the total allowed in these cases in cash, as, in the present state of cultivation, if ryots do not get assistance now it will be useless to offer it afterwards.

CHARITABLE RELIEF.

12. The accompanying statement shows a very considerable increase in the number receiving relief. The number under Class B ought to be much less, and that under Class C proportionately greater, but the increase in the number of the middle classes requiring relief is so great, that it is impossible at once to supply light work to those who cannot work at roads, tanks, &c.

13. The number getting relief under Class D is also increased, and it is exceedingly difficult for me to keep the number down. A very stringent certificate from some member of the district committee is required before a family is admitted; but still I am of opinion that all do not deserve the indulgence shown them. If, however, persons who have received certificates from members are subsequently refused, even by my orders, the members granting the certificates are offended, and they are the persons on whom I have chiefly to depend for information.

14. In short, in dealing with large numbers of applicants, a strength of character is required which can hardly be expected from native subordinates, and, being single-handed here, it is impossible for me to leave head-quarters. It is doubtless satisfactory to know that all distress is likely to be relieved, but I confess to dislike seeing able-bodied men receiving relief and doing nothing in return.

15. Previous to the issue of the liberal instructions by the Central Relief Committee, willingness to work on the part of an able-bodied applicant was a *sine qua non* to the getting of relief, but now everyone claims to be by social position exempted from even twisting a little hemp. The really respectable who are in want decline to take gratuitous relief, and ask for work, while the drones of the hive, who at all times subsist on the labors of others, take their stand upon their respectability, and decline to move a finger to help themselves.

16. The accompanying statement gives detailed information as to the nature and extent of relief given:—

Statement of Charitable Relief.

- (1.) One central committee.
- (2.) Twenty-nine sub-committees.
- (3.) Thirty-three „

BANKOORA COLLECTORATE,
The 29th June 1874.

W. R. LARMINIE,
Offg. Collector.

No. 587—F.R., dated Burdwan, the 29th June 1874.

From—E. H. WHINFIELD, Esq., Offg. Collector of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the fortnightly narrative due to-day. As I gather from your remarks on my last narrative that you disapprove of the practice which I have hitherto followed of giving a separate summary of each of the six sub-divisional reports regarding the state of the country, I shall discontinue it, and in future give one general summary of all reports and information received regarding the whole district.

A.—STATE OF THE COUNTRY.

2. The supply of rice continues to be much the same as previously reported. Prices are slightly higher. The prices of common rice in the several sub-divisions are as follows:—

S. Ch.

| | | | | | | | |
|------------|----|----|----|----|----|----|---------|
| Burdwan | .. | .. | .. | .. | 13 | 2 | a rupee |
| Raneegunge | .. | .. | .. | .. | 11 | 12 | " |
| Bood-bood | .. | .. | .. | .. | 12 | 11 | " |
| Cutwa | .. | .. | .. | .. | 11 | 6 | " |
| Culna | .. | .. | .. | .. | 12 | 0 | " |
| Jehanabad | .. | .. | .. | .. | 12 | 8 | " |

The Cutwa Deputy Collector says that, in searching for storage for the grain to be sent to him, he found most of the golahs empty. The rainfall has been heavy almost everywhere. The number of inches recorded in each sub-division is as follows:—

| | | | | | | |
|------------|----|----|----|----|-------|---------|
| Burdwan | .. | .. | .. | .. | 11.16 | inches. |
| Raneegunge | .. | .. | .. | .. | 8.15 | " |
| Bood-bood | .. | .. | .. | .. | 8.25 | " |
| Cutwa .. | .. | .. | .. | .. | 7.11 | " |
| Culna .. | .. | .. | .. | .. | 3.15 | " |
| Jehanabad | .. | .. | .. | .. | 1.35 | " |

The sowings are everywhere reported to be progressing favorably, and seed-grain is reported to be abundant everywhere but in Bood-bood. Some seed-grain has been sent there for distribution. Some seed-grain was sent to Cutwa for distribution, but the Deputy Collector says it is not wanted. Distress is said to be increasing in Cutwa and Bood-bood, and relief measures have been extended to meet it. No deaths from starvation have come to light. 51 emigrants were registered at Bood-bood; and a case of theft there is reported in which the accused pleaded hunger.

B.—RELIEF WORKS.

3. These are shown as usual in Statement I. With reference to His Honor the Lieutenant-Governor's telegram of the 27th instant (copy whereof has been sent you under separate cover), I beg to report that the laborers on the roads in Cutwa under the immediate superintendence of the Deputy Magistrate of that sub-division have been paid in grain for some time, so far as the rice held out, but elsewhere in cash. The reasons why payments

in grain were not introduced everywhere immediately upon receipt of Government letter No. 3255—S.R., dated 20th ultimo, are as follows:—

With the exception of the Cutwa roads and one in Raneegunge, all the roads in charge of the Executive Engineer and other officers are being made or repaired by contractors, under formal contracts executed at various times antecedent to 20th May last.* At the time these contracts were executed, the total estimated cost of each work was (according to the usual practice) at once paid to credit of the Executive Engineer or other officer in charge, and, therefore, in order to introduce payments in grain it would have been necessary, in the first place, to break all these contracts (either paying compensation to the contractors or abiding the not doubtful result of suits by them in the civil court), to recover such advances made to them as had not been worked out, and to organise a complete establishment of ticea overseers and sircars on each road to measure up the work and issue cheques or tokens to the laborers for grain, and another establishment of storekeepers and mohurrirs on each road to keep the grain and the accounts, and serve it out to the laborers in exchange for the cheques or tokens given them by the overseers. In the second place, it was to be considered that on that date (20th May) the season for earth-work was very far advanced and would be still further advanced by the time the new system could be organized, establishments appointed, grain imported, and stores of grain formed on all the roads in hand. In the third place, the Government letter No. 3255—S.R., of 20th May (which was the first intimation of its being intended to send grain here), said that 2,000 maunds of grain would be sent to Burdwan for payment of laborers, &c., but that more might be sent for advances (not for payment of laborers) if required. Then, again, a very considerable number of the works in course of execution are paid for from chowkeedary union and town committee funds, to which it is presumed the orders of 20th May do not apply. Another set of works are the ordinary annual embankment repairs and the Kana Nuddee works, which, though shown in the narratives of this district, are in no way under my control. In view of the above considerations, and the great pecuniary loss which (it seemed to me) a sudden change at this advanced season of the year to the system of grain-payments would certainly entail on Government, I thought that I was consulting the interests of Government and at the same time not transgressing the spirit of the Government orders, by refraining from taking the very strong measure of cancelling existing contracts. As, however, I now find that I was mistaken, I can only say that I regret the misapprehension, and I have ordered all contracts be set aside and payments of grain at once introduced on all works with the exception of the chowkidary union, town committee, and embankment department works, to which I suppose the Government orders do not apply. If I am wrong in making this exception I solicit correction. As the season is now so far advanced, and so little work remains to be done, I am not without hopes that the contractors may now be induced to give up their claims to execute the small portions of work remaining to be executed under their contracts without demanding compensation for the breach of their contracts. A statement of the establishment of overseers, sircars, and storekeepers necessary to be entertained to carry out the system of payments in grain is in course of preparation, and will be submitted for sanction immediately.

C.—TRANSPORT OF FOOD.

4. The imports by rail for the fortnight ending 20th June were 30,497 maunds, and the exports 13,998 maunds.

D.—STORAGE OF GRAIN.

The Statement II required by Government letter No. 3369—S.R., dated 26th ultimo, gives the particulars of this. At the commencement of the fortnight, 4,000 maunds in all had been received, whereof 2,000 maunds were then stored at Khanoo Junction, 1,200 maunds had been sent to Cutwa, and the remaining 800 maunds had been distributed to various places in the sudder sub-division. During the fortnight under report, 13,736 maunds in all have been received from Calcutta, whereof 4,096 maunds have been stored at Boodbood, 2,000 maunds at Gooshkara, and 7,640 maunds at Burdwan. The consumption up to date amounts to 9,366½ maunds; it has been used mostly for advances and to feed the paupers at the food-dépôts.

E.—ADVANCES TO PRIVATE PERSONS.

6. These are shown in Statements III & IV. The recent concession, allowing advances of grain to be made on the joint security of not less than six persons, has had the effect of making the people take these advances much more freely. In some, but not many, cases, previous to the receipt of His Honor the Lieutenant-Governor's telegram of 27th instant, I availed myself of the permission granted in Government letter No. 3369—S.R., dated 26th ultimo, to make advances of cash for the purchase of seed-grain. The number of applicants for advances of grain is very large. Every day I have applications from 200, 300, and even more people*; the exact number cannot be given as many applicants join in one application. I examine these people, and after striking out the names of those who are evidently well-to-do, have local enquiries made by the sub-deputies and relief officers into the condition of the rest. In a few cases, so few that they might be almost counted on the fingers, I

* N. B.—It is only the sudder sub-division and a few Bood-bood people who apply at Burdwan.

have found amongst these applicants persons who appeared to be in positive distress; but such cases are not frequent, even among the chowkeedars, who as a class are certainly badly off. The majority present no appearances of distress; their bodies are well oiled, and appear generally to be well nourished. Moreover, in several, I may say in numerous, cases this fortnight, when the investigating officer has gone to make local enquiry, the applicants have refused to take the advance or to give security, in some cases giving the reason that they are not distressed to such an extent that they need to eat Burmah rice. The question naturally suggests itself, why should the people apply for advances in such numbers if they do not really need them? There are several reasons, I think, for this: in the first place, the terms on which we are advancing rice (*i.e.*, without interest) are favorable to an extent hitherto unheard of. The mahajuns' usual terms for advances of grain (*barhee*) are, I believe, 25 per cent., and this year I have heard of as much as 50 per cent. being asked. To get an advance, therefore, without interest, is a *bargain* which tempts people, though they do not really want it. Secondly, there is a firm belief amongst the poorer ryots that Government will not recover these advances, and that it could not do so, in many cases, even if it wished. When a ryot is well-to-do, and has lakhiraj land and garden, &c., he is very chary about signing one of these bonds, because he knows that if anybody had to pay, it would be he; but the mass of applicants have nothing but *jamai* lands held on tenancy-at-will, or, at most, under a right of occupancy, and they feel pretty safe in signing anything. Of course we inform and impress on them all that they will have to pay, but they think they know better. And, indeed, I myself think there will be great difficulty in recovering many of these advances, except in the few cases, where the talookdar has stood security. Thirdly, there is a set of *dalals* who go about inciting people to apply for advances, in order to get the job of writing the petition for a few annas. I annex a form of bond which I have had printed for use in these cases.

F.—CHARITABLE RELIEF.

7. The particulars of this are shown in Statements V, VI, and VII, the last being the special statement of relief to respectable persons required by Government letter No. 3216—S.R., dated 19th ultimo. It will seen that there has been a very considerable increase in the attendance; this is in consequence of the opening of several new depôts, and of increased attendance at some of the old ones. The numbers have been swelled, partly on account of clothes having been distributed at some of the depôts. Wherever this is done, it is found to have the effect of causing a rush to the depôt. At Bhedia, in particular, the sub-committee appear to have become quite demoralised, so much so as to admit all comers without restriction. Dr. Gupta, one of the inspecting medical officers, reported on Friday that he had found the attendance swollen all at once to about 1,800, and that the whole was a scene of confusion and want of arrangement. I could not understand the reason of this at first, as when I was there about the 19th instant, the attendance was only about 500 (at which figure, or thereabouts, it has been for a long time) and the arrangements seemed fair and orderly. But at last, I found that the local relief inspector had reported the cause. It seems that a week or two back the "*Friend of India*" invited people to go up to Bhedia and see the state of things there, and apparently some gentleman from Calcutta, or elsewhere, acting on this invitation proceeded to Bhedia, and he walked about the place saying to the sub-committee (no doubt with the best intentions) "give!" "give!" "give!" This, the inspector reports, was the tenor of his conversation, and the result is the state of confusion now reported by Dr. Gupta to exist there. I have taken measures to get the place in hand again. During the fortnight under report the central committee sent us a cheque for Rs. 5,000, to be applied to the special purpose of purchasing clothes for distribution to the poor. Accordingly, I have purchased that amount of the thans of cloth made by the weavers, who have received advances from this district committee, and am having the clothes distributed to the poor at the depôts. The proceeds of this cloth (Rs. 5,000), being a legitimate portion of the income of this committee, have been credited to the relief fund as such and afterwards disbursed and paid into the treasury to the credit of Government in part payment of the value of the Government grain supplied to the district committee for use in its depôts. The rate for cargo rice having been fixed at 14 seers per rupee, the district committee has consequently now paid for 1,750 maunds of Government grain. With reference to His Honor the Lieutenant-Governor's telegram of the 27th instant, I have, pending further orders, stopped all further relief in cash, viz., advances to weavers for the purpose of weaving cloth, advances to *harpis* to import seed-grain, purchase of seed-grain for gratuitous distribution or loan, permanent advances to relief officers for relief of urgent cases, expenditure on dâl, vegetables, and salt, used along with rice in the depôts, and expenditure on milk, &c., for fever patients. Cash expenditure for payment of relief establishments and contingencies, and for expenses of transport and storage of grain cannot, of course, be avoided.

I.

Statement showing progress of works in the Burdwan District for the fortnight ending 27th June 1874.

E. H. WHINFIELD,
Offg. Collector.

No. 1997, dated Chota Nagpore, the 25th June 1874.

From—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my half-monthly narrative for the fortnight ending 22nd instant.

2. The accounts from all the districts are now very favorable. The necessity for relief operations is subsiding in Hazareebagh, Palamow, and Singhbhoom; whilst in Manbhoom, where doubtless there would be still distress if they were prematurely discontinued, they fully attain their object, and all are relieved who are in need of assistance.

3. The weather since last report has been most propitious everywhere; there has been sufficient rain, and the early sowings of rice, Indian-corn, millet, &c., are well up, and so far promise an abundant yield; besides which, the area this year under such cultivation is unusually extensive.

4. Prices of common rice are in Manbhoom steady at the quotations of previous weeks, and those quotations were, on the whole, somewhat easier than the rates at the commencement of the month. In the other districts the quotations up to the 20th, compared with those which preceded them, show a downward tendency. The price in the Ranchee market had risen to 14 seers for the rupee on the 19th; it was 15½ on the 24th; yesterday 16. I see no reason for anticipating another rise, and in Singhbhoom common rice, which had risen to 16, is now steady at 20.

5. Health has improved. Dr. Wood informs me that cholera has almost ceased in Manbhoom; it is, however, reported to have appeared in Dhulbhoom (Singhbhoom), but I have no particulars.

6. *Hazareebagh*.—Since my last, the Deputy Commissioner of Hazareebagh has made a circuit through the northern part of his district. He found the relief works almost deserted, and the people all busily engaged in cultivation. The mahajuns were asking most exorbitant terms for the usual advances of seed-grain, but they more readily supplied it for cash. The ryots were taking loans of Government rice and selling it, and with the cash purchasing seed; by this they saved 200 per cent. The mahajuns demanded bonds for credit transactions, which would have given them a profit of 300 per cent!

7. Rice-payments to laborers have been adopted in all parts of the Hazareebagh district where Government rice was available. This is, I presume, in consonance with the orders on the subject. It would cost much in carriage to have it conveyed to the southern and south-western portions of the district, where no preparations had been made. With reference to the concluding clause of your letter No. 4321.F., of the 12th instant, to Mr. Beadon's address, I am confident that in his next monthly return that officer will show that he has done his best to carry out the orders of Government. The effect of the measure, where it has been introduced, has been to clear the works of all who were not really in want, or who could get work elsewhere. I have not yet obtained statistics, but am informed that on the Dhunwar works the number of the people employed has dwindled down from 7,000 to 522.

8. *Lohardugga*.—*Palamow*.—The half monthly report* of the Officiating Assistant Commissioner for the fortnight ending 13th instant, is submitted herewith. Mr. Forbes writes that the table of prices of grain under Part A shows that there has been everywhere a rise in the price of the principal food-grains, but this is a mistake. The table given in his previous narrative shows that the price is now slightly lower at all the marts except Daltongunge. During the fortnight under review in Mr. Forbes' narrative, task-work and payment in kind, and within Mr. Forbes' circle, a small reduction to bring down the rates below those offered by the zemindars for agricultural labor, were rigorously introduced, but the work-people gave us but little opportunity of continuing the new system. Those of the ordinary laboring classes at once transferred their services to the farmers and proprietors, who had been for sometime begging for this reduction, and cultivators went off to work on their own jotes. The numbers fell from 25,040 1,493!

* No. 473, dated 19th June 1874.

9. There can be no doubt that, of the people who had been employed on relief works, many, since January, were fully prepared to leave them the moment the rains fell; since with the rubbee harvest, which was good, what there was of it, and with abundant mohwa crop, wild fruits, and jungle produce, the Palamow people could have pulled through without the employment given in May, but during the respite from field-work a large number of ryots deemed it wiser to work than to sit idle, and, with their families, flocked to the works, and, living for the most part on the cheap coarse food spontaneously produced, they saved what they earned to subsist on when engaged in their own farming operations.

10. The only persons now paid in money are masons constructing bridges and culverts; and the road coolies kept on are for the most part working with the masons.

11. Under the head of relief works, Mr. Forbes notices what has been done to improve Government villages by irrigation works. Some very extensive works of this nature were proposed by the Officiating Assistant Commissioner, but it was necessary to obtain the opinion on these of an Engineer of experience. This has lately been obtained, but as relief works are now virtually closed in Palamow, we cannot go on with them. I have, however, submitted some, and intend to submit others to Government through the Board of Revenue as I receive them. It will be a great object to have such projects matured and ready to take in hand when funds are available, for there cannot be a doubt that they would be highly and rapidly remunerative, and reservoirs are much wanted in Government estates in Palamow.

12. The minor works included in Mr. Forbes' scheme were taken in hand during the season. They comprised new reservoirs in four villages, and repairs and improvements to the old embankments in twenty-nine villages; the work has been examined and measured up, and Mr. Forbes pronounces it to be good and cheap. Owing to the abandonment of the works by the laborers, we must find other means of disposing of the rice we had stored. There will be no difficulty, except in regard to the 10,000 maunds still at Dehree. This I asked for as a reserve only, but it was not removed because not required. The Government have directed its being removed to, and used in Palamow, and the Assistant Commissioner has been ordered to arrange for its transport, but this will now be difficult, and very expensive. If it can be utilised at Dehree, it would be a far more economical arrangement for the Government.

13. Mr. Forbes has informed me that some of the ryots of Government estates have applied to him for cash advances to buy seed. There is no scarcity of seed in Palamow, but the mahajuns are everywhere hard in the conditions on which they this year make advances. I have directed Mr. Forbes to give the ryots loans of Government rice, which, if they like, they can convert into cash and so purchase seed.

14. Some time ago I directed that the native gentlemen who had not completed the purchase of the rice they had agreed to supply should not be required to do so. The money in their hands will be refunded.

15. It appears from the statement under section E, that advances in cash are still made for land improvements; this should now be stopped. Baboo Gopal Chunder Mitter, 2nd special Commissioner, sent as relief officer to Palamow, has been deputed to measure up and report on the several works constructed from the land improvement loans.

16. The expenditure of relief committees in Palamow is now hardly worth noticing, all the money given by the central committee is to be refunded; they will find it difficult to expend the sums locally raised.

17. *Manbhoom*.—Colonel Rowlatt's report of the 17th instant for the fortnight ending the 13th is in the hands of Government. It shows that, at a considerable cost, all was going on well, but the transport of grain from golahs to depôts and sites of work becomes very difficult as we advance in the rains. The agricultural class who have hitherto supplied much of the carriage will no longer do so, as their cattle have now full work in ploughing. I have had some further correspondence on this subject with Colonel Rowlatt, and I am in hopes that he will be able to charter a sufficient number of carts for the conveyance of grain where there are roads, and for transport of rice to places inaccessible by carts. I have

authorised him to employ gangs of coolies, and make that a relief work paying them in grain, and to have a pack-bullock train, (there are plenty of pack-bullocks not used in agriculture); and also to hire all the elephants* he can get belonging to zemindars.*

18. The difficulty of conveying Government rice to the different remote works, has somewhat retarded the adoption of payment in grain ordered by Government. In his narrative up to the 13th, Colonel Rowlatt only states that the system had been enforced in all the minor relief works; but in a letter dated the 21st, he informs me that he is extending it as rapidly as possible to roads, the construction of which is not in the hands of contractors, I have not heard that many coolies had left the work in consequence of the change, but Colonel Rowlatt remarks that the farmers are not this year giving employment to anything like the usual number of laborers, and I am inclined to attribute this, not so much to the poverty of the former, as to the superior attraction of relief work which is open to the latter.

19. This includes the employment of between three and four thousand persons in excavating tanks in villages, perhaps their own villages. Colonel Rowlatt says: "as a rule only those resort to these tanks who are unable to obtain work as agricultural laborers." I infer from this that some who could get work elsewhere, prefer the local work. I have directed Colonel Rowlatt to ascertain the rate at which farm laborers are everywhere paid in his district, and to reduce the rates for local works if he finds that he is out-bidding the ordinary employers.

20. The whole allotment of Government rice, 2,12,211 maunds net, had been despatched from the Burrakur on the 14th instant. The Govindpore and Nirsha golahs had been stocked, and of the remainder only 11,000 maunds remained on the north bank of the Damoodur, which Captain Grant informs me will be crossed and pushed on in 3 or 4 days. The grain is being rapidly pushed on from Hidjellee on the south bank, where there were 20,000 maunds on the 14th. 25 maunds only were destroyed at Burrakur by sudden and heavy rain, but some bags have sustained injury in transit to Rughoonathpore and Purulia; more efficient protection is being given.

21. I have nothing this fortnight to report from Singhbhoom. Captain Garbett's narrative for May is in the hands of Government, and I have no later information, except that food-grain is much cheaper, rice having dropped from 16 to 20 seers at Chybassa.

No. 473, dated Daltongunge, the 19th June 1874.

From—L. R. FORBES, Esq., Offg. Assistant Commissioner of Palamow,
To—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore.

I HAVE the honor to submit herewith my ninth narrative of scarcity and relief in the Palamow sub-district, for the fortnight ending Saturday the 13th June 1874.

Ninth Narrative of Scarcity and Relief in the Palamow sub-district, for the fortnight ending Saturday, the 13th June 1874, submitted in accordance with orders contained in Government Circular No. 80, of the 17th November 1873.

A.

Abundance or scarcity of supply in the bazars.—All the bazars are well supplied.

Kind and prices of grain selling in one or more specified marts.—The table given below exhibits the kind and prices of grain selling at four principal marts. It will be observed that everywhere the price of rice and wheat has risen; mowha, again, is considerably cheaper, while gram is somewhat dearer. I anticipate a considerable fall in the price of grain within the next fortnight, now that the Government golahs have been opened for advances to ryots and others:—

| NAMES OF MARTS. | QUANTITIES PER RUPEE BY THE SEER OF 80 TOLANS. | | | | | | |
|--------------------|--|---------|---------------|---------|--------|--------------|-------|
| | Wheat. | Barley. | Rice. | | Mowha. | Indian-corn. | Gram. |
| | | | Wholesale. | Retail. | | | |
| Daltongunge | 12'6 | 18' | 11'50 | 10'38 | 53' | | 14'62 |
| Garwah | 12'25 | 18'50 | 12'36 | 11'24 | 54' | 16'37 | 14'75 |
| Huasonabad | 12'04 | | 11'25 | 10' | 38'50 | | 15'18 |
| Satberwah | | | Not received. | | | | |
| Manka | 11'25 | | 12'50 | 07' | 67' | 16'25 | 14'75 |

Information regarding the amount and kind of grain believed to be in stock.—I have nothing to add to what I have already reported under this head.

Rainfall.—The amount of rain registered during the fortnight was 5·09, making a total of 9·07 inches since the setting in of the monsoon.

State of the crops.—Up to date the rain has fallen most propitiously for the sowings. There has just been that amount of alternate rain and sunshine that is requisite for the production of a good bhadoi harvest. A large area of Indian-corn, kodo, sawan, and gondeli has already germinated, and in some places Indian-corn has advanced sufficiently for the first weeding and hoeing to take place.

Condition of the people.—The condition of the people throughout the sub-district is all that can be desired. With the exception of small-pox, there has been no sickness whatever to speak of.

Actual facts as to any known cases of misery and starvation.—No such cases have come to light.

Grain-thefts and robberies.—Nothing to report under this head.

Condition of any special tract.—No tract requiring special notice.

B.—RELIEF WORKS.

The works in progress are—

| " 5 | ... | ... | 11 | | |
| " 6 | ... | ... | 12 | | |

Grand total ... 1,493

The above shows an enormous falling off in the number of laborers. The decrease is due to the introduction of task-work, and the substitution of grain for money wages, and to the commencement of ploughing and sowing. A few days even before the rain fell, landlords and others were murmuring at the detention of their people on road work; and I was assured by many that the time had arrived when the employers of agricultural labor were prepared to give work in the fields, and to pay in kind at the rate of 1½ seers of rice, or 3 seers of coarse grain per diem. Under these circumstances as soon as it was determined to pay laborers on relief works in rice only, I decided to set off by offering a smaller quantity of rice than the people could get for field-labor. I fixed the low rate of 1 seer of rice (kutchu weight) for an adult man as a test. If he could get 1½ seers from his landlord he would naturally leave the work, and it would have been unfair to the landlord, and imposing an unnecessary burden on the Government, to retain him on the works. Had I offered wages equal to that which the landlords were willing to give, there cannot be a doubt that the decrease in numbers would not have been nearly as great as it has been. Palamow being a purely agricultural country, almost the only labor procurable is agricultural labor; and it was, I think, only proper that the people should have been dismissed to their homes as soon as there was employment open to them there. They had been employed by Government for several months, and a very large proportion of them had laid by a portion of their wages. It would have been unjust and impolitic to have tempted them on to the works by good wages. By far the greater portion of them were of the Kummaya class, i.e., they and their families were the bondmen and farm laborers of the landlords and wealthy ryots, who, had the men remained on the works, would have been unable to cultivate their lands. I have no fear of the laborers returning to the works between this and the cutting of the bhadoi harvest in August. But should such happen, and their numbers will be very few, they will be employed to assist the masons in completing bridge work. There will be no reason then why the rate of wages in rice should not be slightly increased.

Supply of food thereat.—There is now no necessity for remarks under this head.

Condition of the laborers.—I have nothing to report under this head. There is now no reason why the people should be in anything but good condition.

Mode of payment.—Though I have attributed decrease in the number of laborers to the introduction of piece-work, and payment in kind, I can hardly say that either change of system was fully proved, as the people did not give us a chance; they left the works in large numbers directly the change was attempted, and in some cases even before that, and I believe that even had the original rates of piece wages been adhered to a very large number would have left as soon as the rains began to fall; as it was it will be observed by reference to statement I. that we had only time to distribute about 80 maunds of rice when the whole of the laborers decamped.

Rates of wages.—I have already reported the entire stoppage of payment in pice and the introduction of grain payments; the only persons to whom wages in money is now being paid (exclusive of those working on irrigation works), are masons constructing bridges and culverts.

Irrigation works in Government farms.—I have not yet reported in any of my narratives on the progress made in carrying out the irrigation works in Government khas mehals. These works have been shewn in the narratives as relief work No. 9. The works have consisted of repaving existing embankments, and the construction of a few minor new works.

The total amount estimated for irrigation works in 35 khalsa villages was for large new works Rs. 9,445; petty new works Rs. 4,701, and for repairs Rs. 8,645, total Rs. 22,791; and the amount sanctioned was in 27 villages for large works (subject to report by English officer) Rs. 10,225; for petty new works, Rs. 2,251, and for repairs Rs. 6,595, total Rs. 19,071. The sanction to the expenditure on large new works was subject to a report by an English officer. The item Rs. 10,225 included, first, a large work in village Dhawadih, estimated cost Rs. 3,035. This work being situated in a part of the sub-district where there was very little distress, I did not consider it expedient to undertake. It would undoubtedly be of immense advantage to the village, but its construction I thought should be deferred till some more convenient season, especially as a sum of Rs. 530 had been sanctioned for the repairs of the existing embankments of the village.

2nd.—Two large works in village Pokraha to cost Rs. 6,410. The sites of these were inspected by Mr. J. B. Stoney, the Executive Engineer of Dehri, who took levels and prepared an estimate which, I believe, have been forwarded to Government. Though I was empowered to commence these works as relief works should I find any necessity for so doing, I did not do so, but the existing embankments were repaired, Rs. 580 having been sanctioned for the purpose.

I would also report, that I availed myself of the opportunity of Mr. Stoney's visit, by taking him to inspect the site of an irrigation scheme mentioned by me in a former letter, which I proposed to construct near Turhassi. The scheme included a weir across a small stream called the Nadowia, running into the Amanut river near the Government village of Jurhassi, with small irrigation canals to branch into a group of some twenty-six Government villages, and also to irrigate some private estates. Mr. Stoney expressed himself delighted with the site chosen; I was lucky enough to find a natural stone weir running all but a few feet right across the stream, and Mr. Stoney at a rough guess estimated the total cost of the weir at about Rs. 1,000. He has, I believe, drawn his plans and submitted an estimate of the cost. From a private letter received from him, he says he has planned some 20 miles of canals, the whole scheme to cost about Rs. 25,000. There can be no doubt that if sanctioned the scheme will prove most remunerative; for not only will the whole of the area be brought under irrigation, but the cultivated area will be very nearly doubled. The work done has consisted of petty new works in four villages, and repairs to existing embankments in twenty-four villages. The work has been executed by two of the canoongoes and their establishments, under the immediate supervision of the sub-deputy Collector. The accompanying statements will show the progress made up to the close of the fortnight. Some of the repairs have been completed and the remainder are still in progress; I have visited several of them myself, and have found the work good and cheap; in almost every instance the earth-work, which has been done on the contract system, has been below the estimated cost of Rs. 2 per 1,000 cubic feet. Fifty-one embankments have been put in a state of repair, and four petty new works are in course of construction. The total amount of earth-work thrown up is 29,47,000 cubic feet at a cost of Rs. 4,519-14. I propose to continue these works till completed, and I trust to be able to show next year by the improved state of these villages, the advantages of spending a little capital on them.

Arrangement for tools.—No remarks necessary.

C.—TRANSPORT OF FOOD.

Approximate amount of private food supplies.—Nothing to add to what I stated previously under this head.

Sufficiency or otherwise of means of transport.—No difficulty under this head.

D.—STORAGE OF GRAIN AT RELIEF WORKS.

The accompanying statement No. 1 exhibits all necessary information under this head. My great anxiety now is to get rid of my rice as fast as possible and to the greatest advantage; we are not likely to require much for payment to relief laborers, at the very outside I should say not more than 100 maunds, and the remainder will have to be loaned to zemindars and ryots requiring assistance in kind, or sold to mahajuns. I am assured that there will be no difficulty in getting rid of the whole, but I am not myself very confident. The loans being given without interest, it will of course be of the greatest advantage to the people to take rice from us; but the grain dealers (both zemindars and mahajuns) who have stored largely for the purpose of giving such advances on profitable terms to themselves, will, I have no doubt, exert great pressure in keeping back the ryots from applying to us. I do not anticipate much difficulty in getting rid of Chota Nagpore rice but I have fears for the Dehri rice, and I,

certainly would prefer, if possible, not having the other 10,000 maunds of Dehri rice in my hands.

| | Mds. | S. | C. |
|---|-------|----|----|
| The following exhibits the disposal of rice during the fortnight :— | | | |
| (1) Grain disposed of up to date of last report .. | 16 | 8 | 0 |
| (2) Grain disposed of during the fortnight :— | | | |
| (a) by payment to laborers .. | 80 | 38 | 1½ |
| (b) by sale to the public .. | 40 | 32 | 0 |
| (c) in charitable relief or in any other way .. | | | |
| Total .. | 121 | 30 | 1½ |

Condition of storage houses.—These are all in good condition except that at Morbey, where it is reported white-ants are causing some destruction; orders have been issued to the golah-keeper.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

The results of advances to native gentlemen for the purchase of rice on the part of Government, will be found embodied in statement I. Those who have not completed their purchases have been called upon to refund the money in their hands.

Advances to municipalities.—There are no municipalities.

Advances to private parties for land improvements.—Statement II exhibits all requisite information under this head. Baboo Gopal Chunder Mitter, with one canongoe, is now engaged in making enquiries as to the amount of work done, and he has written to me to say that some persons whom he has found to have not yet commenced work, he has directed to refund the amount of the advance. On the whole, I believe the people taking these advances have acted honestly up to their engagements. I shall be able to write more fully on this subject when I get the Baboo's final report.

F.—CHARITABLE RELIEF.

The following exhibits the amounts subscribed and realised during the fortnight :—

| | Subscribed. | | | | Realised. | | |
|------------------------------|-------------|----|----|---------------------------|-----------|----|----|
| | RS. | A. | P. | | RS. | A. | P. |
| Amount subscribed up to pre- | | | | Up to preceding fortnight | 5,705 | 12 | 0 |
| ceding fortnight ... | 7,303 | 12 | 0 | During the fortnight | 420 | 8 | 0 |
| During the fortnight ... | 220 | 8 | 0 | | | | |
| Total ... | 7,524 | 4 | 0 | Total ... | 6,126 | 4 | 0 |

From the above it will be seen that the wealthy of the sub-district have subscribed in the most liberal manner for the relief of the people; their subscriptions have in fact been far ahead of the actual requirements. The statement given below exhibits the total expenditure up to the end of May, to have been Rs. 1,224-4-5 only, and now the necessity for further relief has almost ceased, and I have asked permission to refund into the treasury the amount sent by the central committee. It was a mistake to have asked for this money at all, but the request was made at a time when we anticipated a far greater number of applicants for charitable relief. The people have, however, shown a great reluctance to accept of charity in any shape; I mean the higher classes. I know of several families who would gladly have taken a tucceavee advance from Government, but they have shrunk from asking for charitable relief.

I am sorry to say that Lieutenant Grey, during a recent visit to Husainabad, found that the recipients of charitable relief had been guilty of dishonest practices, by delivering their bundles of spun-thread filled with stones and other substances, in order to increase the weight. Mr. Ryves is now in charge of this part of the circle, and has taken up his residence at Husainabad; he will doubtless prevent any repetition of such malpractices.

Memo.

The accounts of expenditure of relief committees from commencement up to 30th May 1874, were as under :—

| | RS. | A. | P. |
|---------------------------|-------|----|----|

STATEMENT I.

Statement showing the Storage and Consumption of Government Grain in the sub-division of Palamow for the Fortnight ending 13th June 1874.

| NAMES OF GOLAHs. | Date for which figures are given. | Total allotment of Government grain. | Total quantity of grain, exclusive of grain transferred to other districts. | TOTAL QUANTITY OF GOVERNMENT GRAIN CONSUMED UP TO DATE. | | | Estimated grain expenditure for ensuing fortnight. |
|--------------------|-----------------------------------|--|---|---|---------------------------------|-----------|--|
| | | | | By sales to the public or to laborers. | By payment in kind to laborers. | Total. | |
| | | Mds. | Ms. S. C. | Ms. S. C. | Ms. S. C. | Ms. S. C. | Mds. |
| 1. Daltongunge ... | 11th June 1874 | From Dehri 20,000 | 7,971 23 2 | 52 32 0 | 40 38 1½ | 93 30 1½ | |
| 2. Parasia ... | 28th May " | " Lohardugga 1,200 | 1,499 12 14 | | 40 0 0 | 40 0 0 | |
| 3. Pauki ... | 11th June " | Ra. 40,000 advanced to trust-worthy residents for purchase of rice for Government, representing about ... 10,000 | 1,573 0 0 | 4 8 0 | | | |
| 4. Nawa ... | 1st May 1874 | | 778 15 0 | | | | 2,000 |
| 5. Morbey ... | 31st May " | | 1,583 0 12 | | | | |
| 6. Surki ... | Ditto " | | 1,572 21 4 | | | | |
| 7. Nuggur ... | Ditto " | | 3,053 25 9 | | | | |
| 8. Manjhiawan ... | Ditto " | | 1,105 27 7 | | | | |
| 9. Hussenabad ... | Ditto " | | 919 24 6 | | | | |
| 10. Kote ... | 13th June " | | 723 3 4 | | | | |
| Total ... | | 31,200 | 20,782 33 10 | 57 0 0 | 80 38 1½ | 137 30 1½ | |

REMARKS.—Last fortnight I estimated the probable expenditure as 2,694 maunds. This was the quantity estimated as likely to be expended, supposing two-thirds of the laborers exhibited had remained. Rice is now being given as tuccavee to landlords, and a fair demand is springing up for it, at least for the Chota Nagpore rice. I am afraid there will be considerable difficulty in getting rid of the Dehri rice. The people here do not like it, and besides it is very dirty, and more than one-third consists of dhan.

L. R. FORBES,

Offg. Assistant Commissioner.

* Advanced Ra. 75.

ASSISTANT COMMISSIONER'S OFFICE ;

PALAMOW,

The 19th June 1874.

L. R. FORBES,

Offg. Assistant Commissioner.

No. 1372, dated Purulia, the 22nd June 1874.

From—COLONEL E. A. ROWLATT, Deputy Commissioner of Manbhoom.

To—COLONEL E. T. DALTON, C.S.I., Commissioner of Chota Nagpore.

IN reply to the 1st paragraph of your letter No. 1879 of the 18th instant, I have the honor to state that we have at present about 150 carts and sagors running backwards and forwards between this and Rughoonathpore, which are sufficient to convey the Government rice required at this place as fast as we can receive it. A few thousand maunds only remain to be conveyed up to Rughoonathpore; the transport has hitherto been managed from Barrakur, but to-day I have heard from Captain Samuells that he will now arrange for the transport of what has been stored at Hijli, Captain Grant having closed his contract.

2. As yet we have been able to arrange for the despatch of rice from this place to the minor golahs and relief works, and the difficulties of procuring sufficient carriage at Rughoonathpore and Govindpore for the transport of rice into the interior, have also been got over, by employing carts, sagors, pack-bullocks and porters. I believe the removal of the rice from Govindpore, Rughoonathpore, and Purulia will be effected somehow or other, but there will be some delay in getting the full quantities stored at all the different places it is required at.

3. For the Manbazar circle the difficulties are much greater, as it is 30 miles from Rughoonathpore to Manbazar across a very rough, jungly country, with no roads, and very indifferent tracks, besides which, four large, and numerous small streams have to be crossed which are unfavorable in rainy weather. I am sure, however, that the relief officer of that circle will do his utmost to overcome all these difficulties, and at your suggestion, I will direct him to hire any zemindari elephants which may be procurable, of which, however, I know of only four serviceable ones in his circle.

4. I will address Capt. Samuells regarding his proposition of advancing money to those who are willing to serve in the transport of rice into the interior of his circle, for the purchase of bullocks, and direct him to carry out his proposal which I will extend to other circles if the scheme seems likely to succeed.

Dated Purulia, the July, 1874.

From—COLONEL E. A. ROWLATT, Deputy Commissioner of Manbhoom,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

WITH reference to paragraph 3 of Government Circular No. 154—S.R., dated the 16th January last, I have the honor to submit my fortnightly narrative up to the 27th ultimo.

A.—STATE OF THE COUNTRY.

Now the rains have fairly set in, and the people are busily employed in ploughing and sowing their lands. All appearance of distress, which sat so heavily on the country during the months of April, May, and part of June, has, I rejoice to say, nearly, if not quite, disappeared. All who are not engaged in the cultivation of the land are being provided with work on the roads and village tanks, whilst those who are unable to work are being fed by the Relief Committees and Group Officers, who have been spread all over the district where distress has prevailed. The organization for providing relief is both ample and complete, and nothing now remains to be done but to keep it in its present efficient state until the early crops are harvested in August and September, when, if all goes well, the crisis through which this district has passed will happily have terminated; and the people, who have been saved from a dire calamity, will then be able to depend on themselves alone. Up to the present time nothing could be more promising than the state of the crops. The gora paddy, gundlee, kodo, marua, Indian-corn, and pulses, are all doing remarkably well, and the seed-paddy, which has been sown for transplanting, will soon be ready for being set out in the fields. The fall of rain has been ample though not heavy; the showers have alternated with sunshine, which has produced good growing weather, so that the crops are altogether rather forward for the time of the year, and promise to yield an ample harvest.

The rainfall during the fortnight has amounted to 2.14 inches.

The reports from the different parts of the district regarding the proceedings of the mahajuns are very conflicting; in some places they are said to be advancing paddy freely to the cultivators, whilst from others it is stated that they are still holding back. The fact is, very many of them have very little to dispose of, and all of them agree that they were totally unable to have carried the people through the last three or four months, and that if the loaning out of the Government rice was to cease, they could not even now provide the people with food until the early crops come in. Far from considering themselves injured by the measures taken by the Government, they, one and all, declare that the Government have saved them as well as the people; for that had not the Government aided the people, large numbers of their debtors must have died, and that being mahajuns, but unable to assist the people themselves, they would have been plundered and robbed by the famishing crowds of what little they did possess; and some of them have lost their lives also. The only part of the district where any land is likely to be left uncultivated is situated in the Manbazar Circle, which, from the want of roads, and the distance it lies from the railway at Barrakur, and Rughoonathpore from whence the supply of Government rice is to be drawn, could not be supplied with grain

for loaning it out to the cultivators as soon or as fully as in the Govindpore, Rogoonathpore, and Purulia Circles, which are nearer the rail, and with which the communications by road are good. The quantity of land left uncultivated there is, however, not likely to be large, and will be more than made up by an extra breadth of land being brought under crop elsewhere this year than usual. The quantity of Indian-corn put down is unusually large, and could not be looking better; and as this is one of the first crops to ripen, it is most fortunate that it promises to give a full return rather earlier than usual.

Cholera and small-pox, I regret to say, have not yet disappeared, but on the contrary, in some villages which had hitherto escaped, these diseases have carried off a large number of persons. Those villages which have resisted the introduction of vaccination have of course suffered the most from small-pox, which will, I hope, be a lesson to them, and induce them to receive vaccination in future. The vaccinators are all at work, and will now continue their operations throughout the remainder of the year.

The persons who are the worst off just now are the purely laboring classes, who have no lands. In ordinary times at this season of the year, these persons get full employment from the landholders, but this year complain that their services are not asked for as usual. The fact is, the cultivators themselves have become so much impoverished, that they have not the means this year of employing laborers to anything like the same extent as formerly, and are, therefore, doing a great deal of their own work themselves. This will account for the very large numbers that are flocking to the roads and minor relief works, without which these classes would be reduced to great extremities. It cannot be that the relief works are attracting laborers who otherwise would be earning a livelihood by working in the fields, for the wages paid by the agriculturists are higher than what the Government are giving; and by an order lately received from the Commissioner, the rate of wages paid to the laborers on relief works has been reduced, so that with their wages converted into grain at 12 seers per rupee, they can now only earn just sufficient to keep body and soul together; and some who have large families of small children hardly that, and for them there is at present no work to be got elsewhere. As soon, however, as the transplanting season arrives, employment will be more abundant, and the condition of the laboring classes will, I hope, improve, as the cultivators cannot then do without largely availing themselves of their assistance. On this point Mr. More, the Relief Officer of the Purulia Circle, remarks that—"The laboring class is still largely dependent on our relief works for support. The comparative poverty of cultivators has forced them to do a great deal of work themselves this year, which is ordinarily performed by hired laborers regularly employed, while it is not till the commencement of the transplanting of the low land paddy that the laborers who live by odd jobs are able to get constant work in the fields." Mr. B. L. Gupta, the Relief Officer of the Roghoonathpore Eastern Circle, also states: "I apprehended at first that these relief works might keep away laborers from farm work, and thus tell against agricultural operations; but that impression has been removed from my mind since I visited nearly all these relief works;" and further on he says: "Most of the people employed are such as would have to be supported gratuitously by us, if they were not supplied with work; indeed, the number of people employed on these works has been considerably swelled by numbers turned out from the poor-houses, where cooked rice is gratuitously distributed." Had it not been for the relief afforded to this class by the works carried on by the Government, crime, I feel confident, would have greatly increased; whilst, as it is, the most pleasing feature to be remarked on is that offences against property have not risen at all above the average,—thus showing that the distress, which undoubtedly existed has been fully met, and large numbers preserved from the commission of crimes, which would have gone far to swell the numbers in our jails, or subjected others to the lash, who thus have been enabled to support themselves and families by honest labor.

The price of rice and pulses up to the 27th June, as reported by the police, with those of the previous fortnight, are given below:—

| NAME OF BAZAR. | COARSE RICE. | | FINE RICE. | | PULSES. | |
|-----------------------|--------------|-----------------|--------------|-----------------|--------------|-----------------|
| | Last report. | Present report. | Last report. | Present report. | Last report. | Present report. |
| Raipore | Srs. 17 | Srs. 16 | Srs. 16 | Srs. 15 | Srs. 13 | Srs. 12 |
| Manbazar | 14 | 13 | 11 | 12 | 12 | 12 |
| Burrabazar | 14 | 14 | 11 | 11 | 11 | 12 |
| Echagurh | 18 | 18 | 16 | 16 | 12 | 12 |
| Jhalda | 13 | 13 | 12 | 12 | 11 | 12 |
| Purulia | 14 | 14 | 12 | 12 | 12 | 12 |
| Govindpore | 12 | 12 | 11 | 11 | 10 | 11 |
| Roghoonathpore | 13 | 13 | 12 | 11 | 10 | 12 |
| Nirsha | 12½ | 12 | 12 | 11 | 11 | 11 |
| Gourandih | 12 | 12 | 11 | 11 | 10 | 11 |

It appears from the above that prices are pretty stationary, but that coarse rice has risen in Raipore, Manbazar, and at Nirsha. It is not expected that prices will rise any higher, but rather, on the contrary, that they will fall, in consequence of which some of the traders are

again exporting rice from this district to those where the prices are still higher than they are here.

B.—RELIEF WORKS.

The average number of persons employed on the 19 roads shown in the returns during the fortnight up to the 20th June amounted to 12,082, of which 2,725 were receiving daily wages, and 9,357 performing task-work. The numbers returned on the 6th instant amounted to 15,063, so that up to the 20th ultimo the numbers had fallen off by 2,981.

The number of village tanks taken up as Government minor relief works now amount to 62, and the number of persons employed on them, as by the returns made up to the 27th ultimo, to 3,992, as per margin.

| | Number of tanks. | Number of laborers. |
|------------------------------|------------------|---------------------|
| Govindpore Circle .. | 16 | 1,159 |
| Roghoonathpore, W. Circle .. | 7 | 280 |
| Ditto, E. Circle .. | 16 | 749 |
| Purulia Circle .. | 19 | 1,342 |
| Manbazar .. | 4 | 483 |
| Total .. | 62 | 3,992 |

The laborers at work on these tanks are persons who are unable to obtain employment elsewhere, and who, if they did not obtain work from the Government, would largely come on our hands as applicants

for gratuitous relief. The numbers have greatly increased during the fortnight under report, but will most likely decrease again considerably by the 5th of July, when a large number of hands are required in transplanting the principal crops of rice.

In accordance with the orders of Government, just received, the laborers on the tanks will in future be paid in grain only, instead of rice, for 6 days, and pice on the 7th. This will be very much disliked by the laborers, as they now will have no means of procuring salt, condiments, and oil, which the one day's payment in cash enabled them to procure, though even then in insufficient quantities; but the orders are peremptory, and must be obeyed.

The quantity of Government grain paid to laborers on the minor relief works during the fortnight amounted to 570 maunds 26 seers 7 chittacks.

C.—TRANSPORT OF GOVERNMENT GRAIN.

The transport of Government grain has proceeded during the fortnight as well as it could possibly be arranged in such rainy weather. Whilst in transit, the rice has been protected by tarpaulins, mats, and the empty bags sown together, so that not much loss has occurred from its getting wet. At Roghoonathpore all that arrives damp or wet is spread out in a shed and dried, and at Purulia a large, spacious bungalow has been hired in which to dry all that arrives at all wetted, by which means large quantities that would otherwise have heated and mildewed, have been preserved in a state fit for use.

The carriage along the Burrakur and Purulia road has been sufficient, but greater difficulties have been found in procuring the means of transporting the rice across country to the minor golahs, and those places where there are no roads. To carry the grain to the places where carts can no longer go pack-bullocks and porters, both men and women, are being employed; but this means of transport is expensive. All the circles have now received their full supply or nearly so at their head-quarters, except Manbazar, where the carts are reported to have been delayed in reaching, by the floods in the rivers. The delay, however, would not be of so much consequence, were it not that during all that time the grain is exposed more or less to getting wet, which cannot entirely be avoided, and in that circle I fear the loss of grain is likely to be greater than in any other.

D.—STORAGE OF GOVERNMENT GRAIN.

The whole of the allotment of Government grain for this district having been received at Burrakur, none is now in store at that place, and all that remained there at the end of the last fortnight and on the north bank of the Dumoodah River has been transferred to the south bank, and safely stored in a golah at Hijli. From this golah the grain is now being carted to Roghoonathpore, and there stored, or sent on to Purulia.

The total quantities received and stored in the several circles up to the 27th ultimo is as follow:—

| | Mds. | Srs. | Chs. |
|-----------------------------------|--------|------|------|
| Govindpore Circle .. | 68,182 | 5 | 0 |
| Roghoonathpore, Western Circle .. | 48,886 | 0 | 0 |
| Ditto, Eastern „ .. | 32,150 | 0 | 0 |
| Purulia .. | 26,541 | 0 | 0 |
| Manbazar .. | 4,000 | 0 | 0 |

The rest was in store in the Hijli golah.

To show what work has to be done at the main golahs connected with the drying and storing of Government grain, I quote from the narrative of Captain Samuells dated the 28th ultimo:

“The work of storing, drying, measuring, and carrying from one golah to another is done here almost entirely by the Bauree and Bagdee women of the place, and if treated with proper tact, a more willing and hardworking lot of people could not be found. Speak to them harshly, and they will strike work at once; but chaff them when they are working slack, or amuse them in some way or other, and they will soon make up for any time they have lost. If treated thus, they will and can work as hard as men; and though often kept at it hard, from early morning till after dark without being allowed to leave the work at any time

during the day, they are always ready for a laugh or a lark. The two-maund bags they convey from one place to another either on hand barrows, or on carts, to which latter they yoke themselves, and run them along with a load of 8 or 10 maunds, shouting and laughing all the way." For this work these women are paid nearly all in grain.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

Up to the 27th ultimo advances have been made to the following extent :—

| | Rs. | A. | P. |
|---|--------|----|----|
| 1st.—Advances to zemindars and others for the purchase of grain, without interest | 10,000 | 0 | 0 |
| 2nd.—To traders and others of a safe and respectable character, with interest | 11,567 | 0 | 0 |
| 3rd.—To zemindars and talookdars to assist their ryots | 9,950 | 0 | 0 |
| 4th.—To landholders for land improvements | 69,000 | 0 | 0 |
| 5th.—To the Purulia Municipality | 4,000 | 0 | 0 |

All the above advances were made previous to the last fortnight, but those made in the Gobindpore sub-division are not included in the above, as the returns that have been called for have not yet been received.

The loaning out of the Government grain to the cultivators and others on security, and to chowkedars and talidars, up to the 27th ultimo, is as follows:—

To cultivators—

| | Md. | S. | C. |
|---|----------|----|----|
| In the Govindpore Circle | 42,283 | 28 | 10 |
| „ Roghoonathpore, West Circle | 25,228 | 29 | 1 |
| „ Ditto East „ | 28,422 | 0 | 0 |
| „ Purulia Circle | 18,344 | 21 | 0 |
| „ Manbazar „ | 4,000 | 0 | 0 |
| To non-cultivators:— | | | |
| In the Govindpore Circle | 1,805 | 0 | 0 |
| „ Roghoonathpore, West Circle | 573 | 28 | 8 |
| „ Ditto, East „ | 316 | 0 | 0 |
| „ Purulia Circle | 76 | 0 | 0 |
| „ Manbazar „ | .. | .. | .. |
| To chowkidars:— | | | |
| In the Govindpore Circle | 222 | 0 | 0 |
| „ Roghoonathpur, West Circle, | 256 | 20 | 0 |
| „ Ditto. East „ | 284 | 0 | 0 |
| „ Purulia Circle | 171 | 24 | 0 |
| „ Manbazar „ | .. | .. | .. |
| To 24 talidars, at twoseers each, whilst employed in guarding Government grain in transi, &c. | 155 | 36 | 0 |
| Total | 1,22,141 | 27 | 3 |

A large number of cultivators who had taken small advances of grain in April and May, are now again coming forward for a second instalment, which is being given them. These advances will have to be continued during the whole of the transplanting time, to enable those cultivators to subsist themselves, and pay their laborers, who are unable to obtain advances from the mahajans.

F.—(a) CHARITABLE RELIEF BY GOVERNMENT.

The grouping out of the distressed pergunnahs, which had been completed in all the

Supur.
Ambikanagor.
Bagda.
Raipore.

other circles some time ago, has now also been finished in the Manbazar Circle, except in pergunnah Palma, which yet has to be sub-divided. The pergunnahs entered in the margin have now been divided into 50 groups, and officers

appointed. The total number of groups now amount to 214. Those in the Govindpore, the two Roghoonathpore, and the Purulia Circles, have been supplied with Government rice, but as yet distribution has only commenced in the Govindpore and Purulia Circles; in the other three circles relief in the shape of uncooked food is still being afforded by the sub-committees, but will soon cease, as the Group Officers in the Roghoonathpore and Manbazar Circles will soon now be in a position to take over this description of relief from them. The average numbers getting relief from the Group Officers is given below:

| | Men. | Women. | Children. |
|------------------------------------|-------|--------|-----------|
| In the Govindpore Circle | 262 | 850 | 504 |
| „ Purulia „ | 1,851 | | 1,289 |

It therefore appears that in these two circles alone uncooked rice is being given to no less than 4,756 persons, which is, I consider, a far larger number than it can possibly be necessary to relieve in this way. I have therefore addressed the officers concerned, pointing out the absolute necessity of reducing the numbers to the lowest possible extent, and

directed their attention to the orders of Government, which limit the relief by Group Officers to the preservation of life only, and nothing more can, I consider, be expected from the Government. It is, however, necessary to remark that in this district in particular there are a very large number of excessively poor people, who in all times of scarcity suffer extreme privation, and in many instances, I have no doubt, die from want of proper nourishment. They consist of the aged and infirm, the lame, blind, and diseased, all of whom are unable to work, and in ordinary times live on charity and what their relatives may choose to give them. On account of stores of Government grain having however now been placed in each group of villages, and the people having come to know that the Government have benevolently determined that no deaths from famine shall take place that can be prevented, the relatives of these people and the more wealthy villagers now refuse to support them as heretofore, so that all those incapable of work are now thrown on the hands of the Relief Officers, who are regularly besieged by applicants for relief when visiting the groups, and find it very difficult indeed to discriminate between those who are really in want of assistance, and those who might manage to support themselves.

The quantity of Government grain expended in the sub-circle during the fortnight amounts to

F.—(b) CHARITABLE RELIEF BY RELIEF COMMITTEES.

The Relief Committees having been relieved of the charge of distributing uncooked food in the Purulia and Govindpore Circles, the expenses incurred by these committees have been somewhat reduced, but still continue high.

Classified as directed in the notification of the Central Committee dated the 4th March last, the sums expended during the last fortnight according to the returns received up to the 27th ultimo are as follows:—

| | | | Rs. | A. | P. | Rs. | A. | P. |
|-----------------------------|-----|-----|------------|----|----|-------|----|----|
| In the Govindpore Circle | ... | ... | 604 | 2 | 11 | 0 | 0 | 0 |
| „ Roghoonathpore, W. Circle | ... | ... | 1,388 | 7 | 9 | 521 | 8 | 9 |
| „ Ditto, E. „ | ... | ... | 1,139 | 12 | 3 | 95 | 2 | 6 |
| „ Purulia Circle | ... | ... | 421 | 4 | 3 | 439 | 8 | 3 |
| „ Manbazar „ | ... | ... | Not given. | | | | | |
| Total | ... | ... | 3,553 | 11 | 2 | 1,056 | 3 | 6 |

The numbers receiving relief in the above forms during the fortnight under report amounted to—

| | | | B. | C. | D. * |
|-----------------------------|----|----|-------|-------|------|
| In the Govindpore, Circle | .. | .. | 731 | 0 | 0 |
| „ Roghoonathpore, W. Circle | .. | .. | 313 | 77 | 0 |
| „ Ditto, E. „ | .. | .. | 292 | 24 | 0 |
| „ Purulia Circle | .. | .. | 1,983 | 1,179 | 0 |
| „ Manbazar „ | .. | .. | 1,841 | 0 | 0 |
| Total | .. | .. | 5,190 | 1,280 | 0 |

The grand total of persons relieved by the several Relief Committees in the fortnight ending the 13th ultimo was 10,496, against 6,470 in the fortnight ending the 27th ultimo; so that there has been a reduction in the numbers relieved by the Relief Committees, amounting to 4,026; but as 4,756 have received uncooked food from the Group Officers, there has really been an increase in the total numbers relieved of 730 persons.

Large numbers of women of respectable families are still applying for cotton being served out to them to spin into thread, and large numbers are being relieved in this manner in the Roghoonathpore and Purulia Circles; the thread is then given over to persons of the weaver caste, Tantis and Jolhas, and when made, the cloths are served out to those frequenting the poor-houses, who are destitute of clothing; three sets of people are therefore relieved in this manner with very little extra cost to the committees than the value of the cloth.

G.—FINANCIAL RESULTS.

Total expenditure from the district and sub-divisional treasuries as shown in the last narrative, Rs. 1,85,224-11-10.

Expenditure during the last fortnight up to the 27th June, 1874—

NOTE.—This statement shows the number of laborers employed on the last day of the fortnight ending the 20th June, whilst in the body of the report under heading "Relief Works" the average number employed during the fortnight was given; hence the difference.

PURULIA,
The 1st July, 1874.

E. A. ROWLATT, Colonel,
Deputy Commissioner.

No. 37M.A., dated Calcutta, the 30th June 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

In continuation of my No. 31M.A., dated 18th June 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending 15th June 1874, I have now the honor to submit the Collector's report* for the fortnight ending 29th June 1874.

* No. 756—S.R., dated 29th June 1874.

2. The large area sown with aus rice has drawn away, for the first weeding, more able-bodied laborers from relief works than I had expected, but nevertheless distress is on the increase among the aged and helpless.

3. I am in demi-official communication with Government on the subject mentioned in the latter part of the Collector's paragraph 8.

No. 756—S.R., dated Kishnaghur, the 29th June 1874.

From—C. O. STEVENS, Esq., Collector of Nuddea,
To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of distress for the fortnight ending this day.

STATE OF THE COUNTRY.

1. The bazars in different parts of the district still continue to receive supplies from dealers and importers. With the exception of the thanas of Kaligunge and Nakasipara in the Sudder sub-division, portions of thanas Karimpur and Tehatta in Meherpur, thana Jaguli, and part of thana Ranaghat, in sub-division Ranaghat, the supply in the local markets, generally speaking, is adequate to meet local wants. It is reported, however (probably correctly), that the stocks in the hands of the mahajuns have fallen very low; private trade seems scarcely sufficient to provide food, if such provision be needed for a long time. Stores of grain in the hands of the well-to-do people have been nearly exhausted. Some of the mahajuns, I regret to say, are taking advantage of the high price of grain to sell out of the district, instead of looking after their *Khataks*.

The joli dhan crop is now being cut, and bhura and cheena will be fit for harvesting by the first week of July. These, however, are but small crops. It is the general opinion that the reaping of the present aous crop in certain portions of the district will commence within three weeks, and that the bulk of the new crop will have been reaped within two months from this date.

2. The following are the rates of common rice which have prevailed in the several markets:—

| | | | | Rs. | A. |
|-------------|-----|-----|-----|-----|--------------|
| Kishnaghur | ... | ... | ... | 3 | 6 per maund. |
| Santipore | ... | ... | ... | 3 | 8 |
| Ranaghat | ... | ... | ... | 3 | 2 |
| Chagda | ... | ... | ... | 3 | 2 |
| Bongong | ... | ... | ... | 3 | 0 |
| Kooshteah | ... | ... | ... | 3 | 8 |
| Chooadanga | ... | ... | ... | 3 | 4 |
| Alamdanga | ... | ... | ... | 3 | 2 |
| Dampurhuda | ... | ... | ... | 3 | 4 |
| Dowlatgunge | ... | ... | ... | 3 | 4 |
| Debagram | ... | ... | ... | 3 | 14—4 Rs. |

A slight rise in the rice is generally observable. It is the highest at Debagram, and lowest in Bongong. This general rise in the price of rice was to be expected, and will probably continue in most places till the present aous crop is reaped. I hear, however, that at Kooshteah prices are falling a little.

3. There is no information which can be relied on as to the quantity of grain in stock, but from the reports received from the sub-divisional officers, it is indicated that in most parts of the district stocks are sufficient to carry the people through till the present aous crop is harvested. In Nakasipara, Kaligunge, Karunpur, Tehatta, and Jaguli thanas, the stocks are very low.

4. *State of the crops.*—Joli dhan has nearly been harvested. Bhura and cheena are still on the fields, but they have reached maturity. The aous crop is doing very well. Opportune falls of rain have greatly benefited the crop. The young plants look very healthy, and if the weather continue to be propitious, we have every reason to hope for a splendid harvest. In consequence of the very early sowings, and of the favorable weather, some of the aous dhan is already in the ear, and it is not unlikely that by the end of July this portion of the crop will be harvested. The quantity of land under aous cultivation this year is said to be considerably larger than usual, probably about one-fourth more. Amun sowings have been going on for some time with much success. The sugarcane, arhar, and indigo, are all promising.

5. There has been sufficient rain in all parts of the district. The prospects of the next season are very cheering.

6. Distress has however decidedly increased, but no case of actual starvation or of extreme misery for want of food has yet been reported. I may mention that on the 29th May last, I received a petition from Debagram bearing some 1,500 signatures, to the effect that all the agriculturists there were "selling off their marketable possessions;" that able-bodied laborers with average families had been "reduced to skeletons" for want of food; that a large number of people were subsisting on food of a "revolting nature;" that a great many of the ryots were selling off their live stock, and that three persons had been reported by eye-witnesses to have died for want of food. I immediately made enquiries from both officials and non-officials, though some of the statements (*eg.*, that regarding the laborers), were known to have little or no foundation. I am glad to say that the reports I have obtained entirely corroborated the information which I had before in my possession. Investigation showed that there was no ground whatever for the statement that three persons had died from starvation. Unfortunately the stir and agitation caused by the very ill-judged, though no doubt benevolently intended steps of the petitioners, did much harm. I had intended about the time to visit the locality, but I happened to hear that the petitioners had prepared the people to come to me in crowds. I therefore very reluctantly resolved to abandon my intention for the present, as I thought I

should do more harm than good. The agitation, I believe, has now subsided. The number of grain-thefts reported by the police during the fortnight was eight. They occurred in the following sub-divisions: Sudder 1, Kooshtea 1, Chooadanga 3, Bongong 1, and Ranaghat 2.

7. There has been a visible decrease in Abkaree revenue in sub-divisions Ranaghat and Kooshtea. The sub-divisional officers attribute this decrease to the increase in the price of food-grain. In all other sub-divisions the excise revenue may be said to have remained stationary, but I ought to mention that the distressed part of the district never brings in much.

8. *Condition of any special tract.*—Distress has overtaken the northern portion of thana Karimpore in Meherpore. The sub-divisional officer has been to the spot to enquire into the extent of distress there, and to ascertain the best mode of relief which may be given to the people. The population of this part of the thana amounts to 25,000 individuals. It is reported that the stock there is very low, and if grain be not imported severe distress may soon be felt. I have heard that Baboo Nafar Chundra Pal Chowdhuri is importing grain there. The crops will soon be ripe in Karimpore, and if there be no inundation the distress will here be of very short duration. The sub-divisional officer of Bongong reports that he has obtained intelligence of distress in certain tracts of thana Mohespore. He has promised to inspect that tract, and after enquiry to submit a report. I do not, however, expect that there is anything very wrong there. The Deputy Collector of Ranaghat reports: "there is some fear of distress in the eastern part of the thana Rangahat," i.e., in the villages about Asmali, among the non-agricultural classes. Enquiries are being made to ascertain the extent of distress in that part; here again I do not anticipate anything very serious. In the more seriously distressed parts, the cultivators and persons of the middle classes are feeling the pressure greatly. I was about to give loans in money to some of the zemindars for these persons, but a telegram received yesterday from Government has forbidden me to advance anything but grain, and I have no Government grain to advance. I have, however, written demi-officially on the subject, and I hope that supplies may soon come. The general health of the district is good.

9. The construction and repair of roads are generally going on as usual. The construction of kutchra roads in the Sudder has now been resumed. Most of the tuccavee tanks have been finished, or the work, except dressing and turfing, has been stopped by the rain. It seems probable that we shall not now have to execute all the works which I had projected. Paddy-husking, and jute and cotton-spinning, are going on, but it seems difficult to get enough of the raw materials. The number of sufferers unfit to work has increased of late, and the Debagram and Mooragatcha sub-committees have been authorised to open gratuitous relief operations, spending up to the limit of 100 maunds and 40 maunds, respectively, per diem. The number of laborers employed on Government tanks and roads on the last Saturday was about 1,500, and the total number of men employed may roughly be estimated at 7,000.

10. *Transport of food.*—I have scarcely anything to add to this head in this report; export and import business seems to be carried on as usual. The approximate quantity of rice imported to sub-division Ranaghat during the fortnight is 2,100 maunds. The quantity exported from Bongong and Ranaghat may be estimated at 3,500 maunds, and 560 maunds respectively.

CHARITABLE RELIEF.

11. The distribution of charitable relief has been commenced, as above stated, by the Debagram and Mooragatcha sub-committees. My application for 5,000 maunds of Burmah rice has been sanctioned. This quantity of rice will be distributed for gratuitous relief in thanas Kaligunge and Nakasipara, where it is reported the stock of rice has fallen very low.

No. 1702—S.B., dated Berhampore, the 6th July 1874.

From—E. W. MOLONY, Esq., Commissioner of the Rajshahye Division,

To—The Off. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

IN forwarding the usual fortnightly rice statement for the period ending the 4th of July, I have the honor to state that I have very few remarks to make in addition to what has been reported in detail by the several district officers.

2. The position has not materially changed during the week that has elapsed. The future prospects continue excellent. The Rajshahye staff has been strengthened by the addition of a sub-divisional officer (Mr. Clay) transferred from Bogra, and a sub-deputy Collector, Baboo Okhoy Coomar

Bose from Maldah, and by the appointment of two group superintendents to the North Burhind sub-division. The Magistrate has decided to introduce that system for the parts immediately adjoining Dinagepore, owing to the circle officers reporting that he had ascertained personally that the condition of the people there was such as to require closer watching and inspection. Two other superintendents will be selected as soon as the Magistrate can find fit men. Those already sent are head-constables.

3. The importations spoken of in my last narrative, with the improving prospects, have had a sensible effect in bringing down prices at all places accessible by the large rivers. This should tide over much of the interval of time that has to elapse before the aous crop begins to have an effect.

4. In connection with that subject I have to report with reference to the remarks contained in the 2nd paragraph of my narrative of the 7th of June, that on enquiry I find that all officers are of opinion that the effect of the aous crop on the market will be felt more decidedly and earlier than usual this year. The crop is earlier and much more extensive and promising than in 1866. There will be need of realising cash on the part of the cultivators, and whether the rice is brought to the market or not, the markets will be relieved of the demands of the great mass of the cultivators. I therefore anticipate that the effect of the aous crop will be very sensibly felt in the latter half of September, and that the effect it produces will last almost, if not quite up to the period of the winter crop being harvested, provided only that the prospects of the winter crop continue good to the end of September.

5. The other heads of the report, as I have stated above, do not seem this fortnight to call for any remarks from me.

LIBERALITY OF THE MAHARAJAH OF BETTIAH.

No. B.B. dated Durbhunga, the 2nd July 1874.

From—C. BERNARD, Esq., Officiating Secretary to the Government of Bengal,

To—The Commissioner of Patna.

THE Lieutenant-Governor has had an opportunity of seeing Mr. Howe's report, No. 245, dated 28rd June, to the effect that Mr. T. Gibbon had, in behalf of the Bettiah Raj, agreed to take over and be responsible for almost all the advances made from the Government treasury or Government golabs to ryots on the Bettiah estate.

2. I am directed to request that you will convey to the Maharajah of Bettiah, and also to Mr. T. Gibbon, an expression of the Lieutenant-Governor's entire satisfaction with the liberality towards their ryots and the loyalty towards the Government which they have displayed in this matter.

R. KNIGHT,
 Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 11th July 1874.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|---------------------------|-----------------------------------|---------------------------------------|---|
| BENGAL. | | | |
| <i>Western Districts.</i> | | | |
| BURDWAN DIVISION. | 1 Burdwan, 13th* July 1874 | 1.34 | A little rain fell in the interior of the district. More rain wanted for transplanting the late rice and for the early rice crop. Fever as before; few cases of cholera in the Sudder and sub-divisions. |
| | 2 Bankoora, 11th " " | 1.75 | Generally showery, but in a partial sort of way. Rain is required in the greater part of the district to allow of transplantation being carried on, but no actual damage has yet been caused. Sugarcane and indigo have, however, benefited by the sunshine. Cholera and small-pox still reported. |
| | 3 Beerbhoom, 11th " " | 2.87 | Showery and uncertain. Prospects continue excellent. Export for week ending 4th July, 1,499 maunda, chiefly to Bhagulpore Division. Prices almost stationary. |
| | 4 Midnapore, 11th " " | 0.17 | A break has occurred in the rainy weather, which threatens to entail much damage. More rain urgently wanted, especially in the east and south-east. Canal irrigation is being much sought for. It is only on lands artificially irrigated that transplantation can take place. Rain is now much needed everywhere, but especially at Tumlook. |
| | 5 Hooghly, 11th " " | 1.03 | Cloudy and clear alternately; heavy rain has fallen some short distance from the head-quarters, but in the station little over an inch. In Serampore the rainfall has been .18 only. In many parts of the district the crops are suffering, in other parts they are doing well, but rain is wanted everywhere. |
| PRESIDENCY DIVISION. | Howrah, 11th " " | .36 | There was no rain in the district during the week, except a shower on Friday. Weather sultry and wind from south. The seedlings of the aman or late rice are growing. Aous or early rice and jute have been sown. More rain is wanted. The lands are being ploughed for transplanting late rice seedlings, for which rain is wanted. Sugarcane plants, good. |
| | <i>Central Districts.</i> | | |
| | 6 24-Pergunnahs, 13th† July 1874. | 1.10 | Very sultry, with few showers of rain. The prospects of the early rice crop continue favorable, but more rain is much wanted everywhere. The transplantation of the late rice has only been commenced to an inconsiderable extent on the low lands of Diamond Harbour, Bussacerhat, and Barrackpore sub-divisions. Public health generally good, but a few cases of fever reported at Bussacerhat; malarious fever abating at Bhangore. Two fatal cases of cholera reported in thana Bhangore in the Sudder Sub-division. |
| RAJSHAHIE DIVISION. | 7 Nuddea, 11th July 1874 | 0.46 | Occasional showers, but no heavy rain. More rain is required for transplanting the aman or late rice crop. The prospects of the aous or early rice crop are everywhere favorable. The harvest will probably be an early one. There is a marked decline of prices in most parts of the district. |
| | 8 Jessore, 11th " " | .73 | Cloudy days and clear nights and little rain. The prospects of the indigo and early rice are very luxuriant. The latter is beginning to come into the markets and prices have been falling in consequence. In the south of the Magoorah and the north and east of Nurraill sub-divisions, the sudden rise of the rivers, which are unusually high for the time of the year, has done a little damage to both paddy and indigo, but not much. More rain is generally wished for. |
| | 9 Moorshedabad, 11th " " | 2.74 | General and tolerably abundant rain during the week. Cloudy and close. Prospects of crops continue excellent. Nothing further to report since last week. The recent fall in prices has been maintained. Cholera and small-pox have almost disappeared. |
| | 10 Dinagepore, 10th " " | 8.86 | Rain more or less heavy throughout the district. Prospects of the coming crops most excellent. The earliest bhadoi or early rice is being cut in a few places. Everywhere a good yield is expected. Sugarcane and jute both doing well. |
| RAJSHAHIE DIVISION. | 11 Maldah, 11th " " | 4.92 | Very rainy and cloudy. During the week under review the state and prospects of the bhadoi or early crops continue to be favorable, and unless injured and destroyed by inundation, there is every prospect of a good return from it. A greater part of the hymuntee or late rice has been sown. In thana Gorgorilea, the early sown bhadoi and jali rice is being reaped with a good return. |

* Telegram of the 13th July, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 13th July, received on the same day, shows rainfall during the seven days immediately preceding.

BENGAL.—(Cont)

*Central Districts
(Contd.)*

| | | | | |
|-----------------|---------------------------|---------------------------|-------|---|
| RAJSHAHY DIV. | 12 | Rajshahye, 11th July 1874 | 2.15 | There has been almost daily rain throughout the district during the week. The next aus or early rice crop is reported to be in a most flourishing condition. The sowing of rupa paddy has been commenced; it is not yet transplanted. The aman or late rice crop looks well. Sugarcane and mulberry are thriving. Prices same as reported last week. Public health generally good; reports of cholera and small-pox are being rare. |
| | 13 | Rungpore, 10 | 1.9 | Rain has fallen copiously almost every night. On the 9th more than 5 inches rain fell during the 24 hours. Crop prospects are as favorable as could be wished. Early rice is being harvested. Late rice is being transplanted. Sea good. |
| | 14 | Bogra, 11 | 7.8 | Seasonable. Everything continues satisfactory. The rain falls seasonably. An aus or early rice crop of unprecedented excellence is certain. The planting of the late rice is progressing favorably. Jute very good. If the prospects of the season continue as they are now, the harvest of the great crop will be abundant. The year prosperous, and the condition of the country and people all that could be wished for. |
| | 15 | Pubna, 11th | 0.4 | Weather dry and hot, with slight rainfall on the 8th instant. The harvesting of the aus or early rice and of kawni and bhura (millets) has commenced, and the greater portion of the jute rice is cut. The outturn of all these crops is as good as was expected. Aman or late paddy, sugarcane, and arhur (pulse), promise well. Public health good. |
| | 6 | Darjeeling, 10th " | 3.4 | Incessant rain almost every day, but not heavy. All the crops in both the hills and plains are progressing very favorably. |
| DARJEELING DIV. | 7 | Jalpigoree, 10th | 8.5 | The steady rain has been most favorable, and prospects of coming crops could not be better. Jancera paddy is being cut, and is a full crop; there is, however, but little of it in the district. In some 20 days more bhadoi or early crops should be cut, the late rain having done much to bring it to maturity. |
| | 16 | Cooch Behar, 9th " | 17.84 | Very wet. Highest flood known for many years in town of Cooch Behar. The early rice will be damaged by the flood in some places. Prospects of the late rice are good at present. |
| | <i>Eastern Districts.</i> | | | |
| | 18 | Dacca, 13th* July 1874 | 0.63 | Showers continue. State of crops good. But a subsequent telegram from the Collector in camp reports great damage done to rice by sudden rise of the rivers. |
| | 19 | Fureedpore, 11th " | 2.3 | Only on the 5th and 7th instant there was a little rain, the rest of the week clear and sunny. The rivers have been rising very rapidly for some few days. The district officer has learnt that the water had made six inches during the night of the 10th, and that the aus or early rice has been injured in places subject to inundation. The District Superintendent is travelling in the south, and the effects of the sudden rise of the rivers on the late rice crops will be reported on his return. A good deal of the early rice will be cut in the next week or ten days and the crop not injured looks well. The height of the Ganges above zero is 20 feet 8 inches at Goulundo. The price of coarse rice has risen at Goulundo, but has fallen at Bhangah, Gopalgunge, and Mudaripore, and is stationary at Fureedpore. |
| DACC DIVISION. | 20 | Hackergunge, 9th " | 1.40 | Rainy and cool. Prospects of crops good. |
| | 21 | Mymensingh, 10th " | 3.24 | Cloudy, with heavy showers. An excellent aus or early rice crop. Transplanting of the later young rice progressing. The Brahmapootra and Jamuna unusually high, and some aus or early crop as well as jute destroyed. Reports also received of an inundation at Durgapore under the Garo Hills, but no details of damage. |
| | 22 | Sylhet, 7th " | 3.21 | The rain, though not abundant, has been most favorable for the crops. On the 5th and 6th instant it blew a gale. On the 8th it rained all day, and the barometer fell; the wind was from south and south-east. Everywhere the crops promise well. The aman or late rice crops have been much improved last week, owing to the rain and the rise of the rivers. The ryots in the neighbourhood of Laskarpore have begun to manure their lands, a thing never attempted before. The price of rice has fallen owing to the new rice coming in for sale. A slight shock of earthquake was felt at 1.6 P.M. of the 6th instant. |
| | 23 | Chittagong, 9th " | 1.94 | A fair amount of rain fell during the week; weather otherwise breezy and fine. From Cox's Bazar 1.53 inches only reported to 9th instant. Field work actively progressing. Nothing new since last report. |
| | 24 | Noakholly, 9th " | 3.05 | Occasional showers of rain during the week, and strong southerly wind. The aus or early rice is doing well. The aman or late rice is being sown. |
| CHITTAGONG DIV. | 25 | Tipperah, 10th " | 2.22 | Some heavy rain, with fine sunshine alternately. Prospects of all crops good. Prices of rice continue much the same. |

* Telegram of the 13th July, received on the same day, shows rainfall during the seven days immediately preceding.

| No. | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |

| BENGAL.—(Concl'd.) | | | |
| <i>Eastern Districts.—(Cont'd.)</i> | | | |
| CHITTAGONG DIV. | 26 Chittagong Hill Tracts, 7th July 1874. | 99 | Constant rain throughout the whole week, weather seasonable. The paddy and cotton plants are thriving very well, owing to the constant falls of rain. Indian-corn is brought in small quantities for sale in the local markets. The plough cultivators are still employed in sowing paddy, for transplantation. The prospects on the whole are good. |
| | Hill Tipperah, 8th July 1874. | 1.94 | More rain is wanted in the northern part of the district, both for the amun or early and for the amun or late rice. The weather has been all that could be desired; in the west and south and about head-quarters alternate rain and sunshine. Paddy is looking very well, transplanting is going on briskly. Everywhere reports are favorable. |
| BEHAR. | | | |
| PATNA DIVISION. | 27 Patna, 13th* July 1874 | 3.21 | Weather all that could be wished for; a little too much rain was falling, but the last three days of sunshine have done much good. The floods to the south are said not to have done much harm. Health of the district continues good. |
| | 28 Gya | 1.69 | Seasonable weather. Prospects of crops everything that could be desired. |
| | 29 Shahabad, 11th July 1874 | 2.65 | Constant showers; rain heavier in the north than the south of the district. Prospects of crops so far good, but dry weather and sun are required. Damage done by the floods reported last week, slight and partial, and confined to the crops under influences of the water rush. Murwa (millet) being transplanted. Nursery rice being generally sown in the Sasseeram sub-division. Sugarcane in good condition. Indigo promises to be an excellent crop. Health good; small-pox has disappeared, excepting a few cases here and there only. |
| | 30 Tirhoot, 11th and 12th July 1874. | 6.74 | Seetamurhee sub-division—4.71 inches of rain fell during the week; ryots are engaged in cultivating fields. Laborers well off. No disease among men or cattle; great decrease in relief works from people resorting to field labor. Transplanting going on rapidly, and prospects fair. Tajpore sub-division—7 inches of rain fell; no change in the prospects of crops; a few days' sunny weather is required for the low-lying makai or Indian-corn fields. No real harm done yet to crops, which promise well, except indigo. Mudhoobunnee sub-division—5.18 inches of rain fell during the week. Rice and bhadoi or early crops doing well, except in Motipur, where damaged by excessive rain. Transplanting of both crops is going on in every part of the sub-division. Murwa (millet) and makai (Indian-corn) have been more largely sown than last year. In Jhaphurpore double the area has been sown. Report from Hajepore not received. There is no material change in the prospects of the sudder sub-division, great damage will be done to the bhadoi or early crop if the rain continues any longer to fall every day as it has hitherto done. Durbhunga sub-division—11 inches of rain since 1st instant. Bagmuttee and Kumlah rivers overflowed their banks, submerging about 20 square miles of country lying between them north and east of Durbhunga town. Inundations customary, but earlier than usual. More rain will seriously damage crops. 12th instant promised fair weather, but wind was still east. If inundation do not subside within a week, submerged young paddy will probably perish. Damage to bhadoi or early crops insignificant as yet. |
| | 31 Sarun, 11th July 1874 | 8.47 | Raining throughout the week; heavy showers on the 4th, 5th, 7th, and 8th instant. Too much rain has fallen; weeding operations are being impeded and the young makai (Indian-corn) plant is in many places choked by weeds; with a break of a few days of dry sunny weather the crops now choked with weeds may yet recover, but with a very few more days of rainy weather (such as at present) a large proportion of the makai or the main bhadoi or early crop will be lost. Owing to a flood in the Gunduk, the tract lying to the north of the embankment, covering an area of about thirty square miles, has been inundated and the bhadoi crops have been extensively destroyed. At Seepahen factory the water was flowing into the beating vats and the Mohai had to be stopped. Manufacture of indigo has commenced in some factories. Prices have fallen considerably owing to importations, and partly perhaps to the effect of the large advances of Government grain. |
| | 32 Chumnarun, 10th and 12th July 1874. | 5.02 | Very rainy weather. Very heavy rain reported from Ramnuggur. The rivers have risen and flooded a large tract to the north of Soogowli, destroying indigo and maize crops. The rice crop is uninjured. In the rest of the district prospects continue good, but fair weather is required for the maize and kodo crops which will be injured should the incessant rain continue. Bettiah sub-division—Rainfall from 5th to 11th instant 8.87 inches. |

* Telegram of the 18th July, received on the same day, shows rainfall during the seven days immediately preceding.

| | District and date of return. | Rainfall at Sudder Station in inches. | Character of the weather, state and prospects of the crops, and state of health at date. |
|------------------|--|---------------------------------------|---|
| BEHAR.—(Contd.) | | | |
| BHAGULPORE DIVY. | 33 Monghyr, 11th July 1874 | 2.34 | Heavy and continuous rain up to Wednesday (8th) night. Thursday (9th), Friday (10th), and Saturday (11th) fine, but occasionally cloudy. People on the low lands were beginning to complain of too much rain for the early crops. These few fine days will remove all that. The young paddy crop very promising. |
| | 34 Bhagulpore, 13th* „ „ | 2.56 | Rain heavier in the north. Some few crops have been damaged by Koosee inundation; there is apparently every prospect now of a little sunny weather, for which there is a general outcry. Crops on the whole, however, are still promising. General health very good, but cholera has again broken out in Kutoorya, in Banka Sub-division. |
| | 35 Purneah, 11th „ „ | 6.37 | Heavy rain in the first part of the week, with thunder and lightning. Present prospects of fine weather, which is wanted. Crops to the west of the district injured by the floods of the Koosee. The rise is reported as high as in 1871; as the Ganges is falling it is hoped the water will soon subside. Arrareah and Kishengungo reports excellent, but fine weather is wanted both for weeding and transplanting. |
| | 36 Sonthal Pergunnahs, 11th July 1874. | 2.58 | Heavy rain followed by bright sunshine. The transplanting of paddy is briskly going on everywhere. Prospects of bhadoi or early crops promising everywhere. Janera (Indian-corn), goondli, and murwa (millets) are looking well. Public health generally good. |
| ORISSA. | | | |
| ORISSA DIVISION. | 37 Cuttack, 13th* July 1874 | 1.45 | Scanty rainfall in district; alternating sunshine and showers. Excellent weather for crops. Prices slightly falling. Public health good. |
| | 38 Pooree, 9th „ „ | .22 | There has been slight rain. The weather is hot and cloudy and more rain is expected. Sowing operations are going on rapidly, and the seedlings of previous sowings are growing well. More rain is wanted in Khoordah. Cotton has just begun to be gathered. Sugarcane plants are being earthed up. Prices are stationary. Export continues. Public health good. |
| | 39 Balasore, 10th „ „ | .23 | Sultry and hot. Very little rains have fallen in some places of the district. The young paddy plants are doing well, and have not suffered as yet from the want of sufficient rains. |
| CHOTA NAGPORE. | | | |
| | <i>South-West Frontier Agency.</i> | | |
| | 40 Hazareebagh, 10th July 1874. | 4.32 | Continuously heavy rain except on the 9th and 10th instant. The maize requires some fine weather. It is reported sickly and drenched in parts. The goondli and murwa (millets) are as good as possible. Small-pox in the district and a few cases in Hazareebagh. General health good. |
| | 41 Lohardugga, 11th July 1874. | 1.47 | Very little rain for this time of year, but the weather has been very favorable for the crops. All the reports from Chota Nagpore Proper continue to the effect that the prospects are at present very good, the crops are thriving splendidly. The Palanow sub-divisional report shows a rainfall of 6.75 inches during the week, and states that no harm has yet come to the bhadoi or early crops, but if this rain continues much longer the crops must suffer. A week of fine weather is urgently required to give the young plants strength. The prospects of the rice harvest are excellent. General health good; small-pox diminishing. |
| | 42 Singbhoom, 10th July 1874. | 1.01 | Hot and dry. The rain promised in the beginning of the week still holding off. Reports beginning to come in, that more rain is required. The high land crops though nothing could be better than their present appearance, will suffer if the rains hold off much longer. Public health good, and condition of the people satisfactory. |
| | 43 Manbhoom, 11th July 1874. | 0.50 | Partial and slight showers only. The want of rain is beginning to be severely felt, and more rain is anxiously looked for; in the northern part of the district where there had been too much rain, the dry weather has been beneficial, but in the rest of the district it has been injurious to the prospects of the crops. Transplanting is at a standstill, and the crops on the high lands are beginning to wither for want of moisture in the ground. |

* Telegrams of the 13th July, received on the same day, show rainfall during the seven days immediately preceding.

Published for general information.

CALCUTTA, STATISTICAL DEPT.,
The 14th July 1874.

L. C. ABBOTT,
Offg. Under-Secy. to the Govt. of Bengal.
